PART I.

Government of India Notifications, Appointments, Promotions, &c.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Calcutta, the 27th March, 1896.

No. 664.—Under the provisions of section 9 of the Statute 24 and 25 Victoria, Cap. 67, the Governor General in Council is pleased to direct that His Excellency's Council shall assemble at Simla in the jurisdiction of the Lieutenant-Governor of the Punjab.

ESTABLISHMENTS.

The 28th March, 1896.

No. 253.—Major J. Shakespear, D.S.O., Leinster Regiment, Superintendent, South Lushai Hills, is appointed to be an Assistant Commissioner of the 1st grade in Assam.

Simla, the 2nd April, 1896.

No. 263.—The Home Department Notification No. 515, dated the 20th August 1895, replacing the services of Colonel T. W. Hogg, a Deputy Commissioner in the Central Provinces, at the disposal of the Military Department, is hereby cancelled.

J. P. HEWETT,
Secretary to the Government of India.

GOVERNMENT OF MADRAS.

NOTIFICATION.

JUDICIAL DEPARTMENT.

The 12th March, 1896.

No. 132.—In exercise of the power conferred by section 5 of the Scheduled Districts Act, 1874, and with the previous sanction of the Governor General in Council, the Governor of Fort St. George in Council is pleased to extend the Madras Act, III of 1895 (an Act to repeal Madras Regulation VI of 1831 and for other purposes) to all the scheduled districts in the Gódávari district with the exception of the Dutsarti and Guditeru muttahs.

By order,
J. F. PRICE,
Chief Secretary to the Government of Madras.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Simla, the 2nd April, 1896.

No. 544-*G.*—*Erratum.*—In the notification of the Government of India in the Foreign Department, No. 1296-G., dated the 10th July, 1895, *for* "Mr. J. S. Edward" *read* "Mr. J. R. Edwards."

No. 546-*G.*—With the sanction of Her Majesty's Government, the Governor-General in Council is pleased to recognise the appointment of Mr. Richard Focke as Consul for Peru at Rangoon.

No. 549-*G.*—The Governor-General in Council is pleased to recognise the appointment of Monsieur F. Masotti, Belgian Consul at Bombay, as Acting Consul-General for Belgium at Bombay, during the absence of Monsieur Leon Dossogne, Consul-General.

No. 552-*G.*—The under-mentioned officer is granted leave to proceed out of India, on private affairs, under the leave rules for the Staff Corps; the specified period to count from the date of being struck off duty:

Lieutenant S. Clay, Indian Staff Corps, Wing Officer and officiating Adjutant, Mewar Bhil Corps, for one year. Pension service—6th year, commenced on the 3rd May, 1895.

No. 555-*G.*—Lieutenant F. G. Beville, Indian Staff Corps, Political Assistant of the 3rd (officiating 2nd) Class, is posted as Political Agent at Maskat, with effect from the date of assuming charge.

No. 556-*G.*—Captain A. F. DeLæssoe, C.M.G., C.I.E., Political Agent of the 3rd Class, is posted on return from furlough, as Political Agent in Bhopawar, with effect from the date of assuming charge.

No. 1125-*I.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), the Governor-General in Council is pleased to appoint Pandit Suraj Narain, Assistant Cantonment Magistrate, Secunderabad, to be a Magistrate of the 1st Class as described in the Code of Criminal Procedure, 1882, within the limits of the Hyderabad Residency Bazars.

No. 1127-*I.*—In exercise of the powers conferred by section 13 of the Births, Deaths and Marriages Registration Act, VI of 1886, the Governor-General in Council is pleased to appoint the Reverend Fawcett Shaw, a Minister of the Methodist Episcopal Church, to be a Registrar of Births and Deaths for the territories of Mysore, including the Civil and Military Station of Bangalore, in respect of the classes of persons indicated in section II, sub-section (I), clause (*b*) of the said Act, whom he baptises or whose funeral ceremonies he performs.

No. 1129-*I.*—Whereas the Governor-General in Council has full jurisdiction within the lands which are, or may hereafter be, occupied by the Ankleshwar-Pardi section of the Rajpipla State Railway (including the land occupied as stations and for out-buildings and other purposes connected with the railway), and which lie within the Rajpipla State;

In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct that the following addition shall be made to the notification of the Government of India in the Foreign Department, No. 1328-I., dated the 23rd March, 1891, namely:

In the schedule, *before* the entries relating to the Rajputana-Malwa Railway, the following entries shall be inserted:

Ankleshwar-Pardi section of the Rajpipla State Railway.	Rajpipla.	...	The Government of Bombay.

H. S. BARNES,

Offg. Secretary to the Government of India.

MILITARY DEPARTMENT.

Simla, the 3rd April, 1896.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 30th March, 1896, and is hereby promulgated for general information:

ACT No. XIII OF 1896.

An Act to amend the Code of Criminal Procedure, 1882.

WHEREAS it is expedient to amend the Code of Criminal Procedure, 1882; It is hereby enacted as follows: 1882.

Amendment of section 269, Act X, 1882.

1. (*1*) In the first sentence of section 269 of the said Code, after the word "may," where it first occurs, the words "with the previous sanction of the Governor General in Council," and after the word "may," where it next occurs, the words "with the like sanction," shall respectively be inserted.

(*2*) After the first sentence of the same section the following shall be inserted, namely:

"The Local Government, by like order, may also declare that, in the case of any district in which the trial of any offence is to be by jury, the trial of such offence shall, if the Judge, on application made to him or of his own motion, so directs, be by jurors summoned from a special jury list, and may revoke or alter such order."

Amendment of section 276, Act X, 1882.

2. In section 276 of the said Code, before the word "*thirdly*" the word "and" shall be repealed, and to the same section the following shall be added, namely:

"and

fourthly, in any district for which the Local Government has declared that the trial of certain offences may be by special jury, the jurors shall, in any case in which the Judge so directs, be chosen from the special jury list prescribed in section 325A."

Amendment of section 307, Act X, 1882.

3. (*1*) In section 307 of the said Code, for the words "so completely that he considers it" the words "and is clearly of opinion that it is" shall be substituted.

(*2*) In the same section, for the words "but it may" the words "and subject thereto it shall, after considering the entire evidence and after giving due weight to the opinions of the Sessions Judge and the jury," shall be substituted.

Amendment of section 319, Act X, 1882.

4. To section 319 of the said Code the following words shall be added, namely:

"or, if the Local Government, on consideration of local circumstances, has fixed any smaller area in this behalf, within the area so fixed."

Addition of new section after section 325, Act X, 1882.

5. After section 325 of the said Code the following section shall be added, namely:

Preparation of list of special jurors.

"325A. In the case of any district for which the Local Government has declared that the trial of certain offences shall, if the Judge so direct, be by special jury, the Sessions Judge and the Collector of such district or other officer as aforesaid shall prepare, in addition to the revised list hereinbefore prescribed, a special list containing the names of such jurors as are borne on the revised list and are, in the opinion of such Sessions Judge and Collector or other officer as aforesaid, by reason of their possessing superior

qualifications in respect of property, character or education, fit persons to serve as special jurors: Provided always that the inclusion of the name of any person in such special list shall not involve the removal of his name from the revised list nor relieve him of his liability to serve as an ordinary juror in cases not tried by special jury."

Amendment of section 326, Act X, 1882.

6. In section 326 of the said Code, after the words "the said revised list" the words "or the said special list" shall be inserted, and the words "on the revised list" shall be omitted.

Addition of new section after section 330, Act X, 1882.

7. After section 330 of the said Code the following section shall be added, namely:

Court may relieve special jurors from liability to serve again as jurors for twelve months.

"330A. The Court of Session may, if it shall think fit, at the conclusion of any trial by special jury direct that the jurors who have served on such jury shall not be summoned to serve again as jurors for a period of twelve months."

S. HARVEY JAMES,

Secretary to the Government of India.

SUPPLEMENT TO

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a. m. on Saturday, March 21st, 1896.

As was the case last week, pressure has been very unsteady during the week under review, but the weather thereby has been very little affected and has been generally fine or only slightly showery over by far the greater part of the country. On the first day of the week, pressure was high all over North-Western and Central India, but a brisk fall was in progress over Baluchistan. This was succeeded by a slight depression which appeared over the Indus Valley on the 16th, and subsequently passed across Rajputana and the Southern Punjab and disappeared among the North-Western Himalayas. It occasioned unsettled weather over Baluchistan, Kashmir, and the Punjab, and heavish snow was received at Minimarg. By the morning of the 19th the depression had disappeared, and readings decreased fairly steadily from a high pressure area in the west of the Punjab to a low pressure area over Bengal. Northerly (north-westerly—north-easterly) winds prevailed over a large part of the country, but southerly winds were experienced at the head of the Bay, and easterly winds in Assam and North Bengal. These conditions lasted until the close of the week, and during their continuance showers occurred over parts of North-Eastern India. The mean temperature of India gradually rose during the week, and was highest and about 2° above the normal at its close.

Daily Summary.—*Sunday, March 15th.*—Pressure had increased briskly at a few central stations, and decreased briskly in Baluchistan, but elsewhere the changes were small. Readings were high over North-Western India, relatively low over North-Eastern India, and lowest over the Deccan, while a depression was apparently advancing through Baluchistan. The winds were generally

from north-west and west down the Gangetic plain, north-easterly over the Central Provinces, and from irregular cyclonic directions over the Peninsula. The mean temperature was in slight to large excess over the Peninsula and over Assam and Burma, and generally in defect elsewhere. The deficiency was large over Eastern Rajputana and the west of the North-Western Provinces. Showers were reported from parts of Lower Bengal, of Assam, and of the east of the Central Provinces.

Monday, March 16th.—The barometer had fallen briskly to rapidly over North-Western India, and risen slightly to rapidly over North-Eastern India. A shallow depression had appeared over the Indus Valley, while readings were highest over the Assam Valley. The winds were feebly cyclonic over North-Western India, and were very variable elsewhere. The mean temperature was excessive over the Peninsula, and in defect over Northern and Central India. The area of greatest abnormal deficiency had been transferred eastward, and was shown over the region represented by the stations of Nowgong, Saugor, and Sutna. A few light showers were reported from parts of North-Eastern India and of the Peninsula.

Tuesday, March 17th.—The barometer had fallen briskly over the Southern Punjab and Eastern Rajputana, but had generally changed slightly elsewhere. The depression from the Indus Valley had reached the Southern Punjab. Except over North-Western India, pressure was exceedingly uniform. The winds were feebly cyclonic in the north-west, and very variable elsewhere. The mean temperature was in excess of the normal over North-Western India and over the Carnatic, but was in defect in other parts of India. The greatest deficiency was over the lower Gangetic plain; the greatest excess over the south of the Punjab. Showers were reported from Kashmir, Baluchistan, and a few places in the east of the Peninsula.

Wednesday, March 18th.—Pressure had decreased slowly over the Gangetic plain, and generally increased elsewhere. The rise was greatest over the west of the Punjab. A broad band of relatively low pressure stretched across Northern India, and within this band were three small depressions. The winds were extremely variable. The mean temperature was below the normal average over North Bengal, and on part of the West Coast, but was excessive generally. Snow was reported from Kashmir, and dust or thunder storms had given scattered showers to different parts of the country.

Thursday, March 19th.—Pressure had fallen briskly over Bengal, and slightly over the Peninsula, while it had continued to increase over North-Western India. Readings were highest over the west of the Punjab, and lowest over Bengal, and, owing to the changes described above, the pressure difference had increased. The winds were generally northerly over North-Western India and down the West Coast, westerly down the Gangetic plain, south-westerly in Lower Bengal, and easterly in North Bengal. The force was fresh at some of the Bay stations. Snow had again fallen in Kashmir, light rain over the North-Western Himalayas, and a few scattered showers in other parts of the country.

Friday, March 20th.—Pressure had given way everywhere, the change having been brisk to rapid over the greater part of the country. The general distribution of pressure had not changed much, but the pressure difference between the Punjab and Bengal had become less. The wind directions had not altered much. The mean temperature was excessive over nearly the whole country—most so over West Bengal and the east of the Central and North-Western Provinces. Snow continued to be reported from Kashmir, and showers of rain from parts of North-Western and of North-Eastern India. In Assam the amounts were considerable.

Saturday, March 21st.—Pressure was giving way over Baluchistan and the Indus Valley, but in nearly all other places a recovery had commenced. The low pressure area over Bengal had largely filled up, and pressure was again very uniform over a large part of the country. A southerly wind had appeared over Baluchistan, but in other places there was not much change. The mean temperature was low over Assam and Upper Burma, but was generally excessive in other places—most so over the Central Provinces. Snow continued to fall at

the highest hill stations, while a few local showers of rain were received on the plains.

Temperature.—On the first two days of the week a large area of low temperature overlay the central and northern parts of India. On the 17th this area began to move eastward, and a well marked high temperature area appeared in the north-west. This high temperature area gradually extended, and on the 20th and 21st practically covered the whole country.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	March 1896.							Mean Variation of week.
	15th	16th	17th	18th	19th	20th	21st	
	o	o	o	o	o	o	o	o
Burma	+1·2	−0·2	+1·0	+0·4	+0·1	+0·1	+0·6	+0·5
Bengal and Assam	−0·3	−1·9	−1·3	−0·1	+2·1	+2·9	+2·6	+0·6
North-Western Provinces and Oudh	−4·1	−3·3	−2·3	+2·2	+3·9	+3·4	+1·6	+0·2
Punjab	−3·1	−1·0	+3·3	+2·2	+1·4	+1·9	+1·5	+0·9
Bombay	−0·4	−0·7	−0·7	−1·0	−0·4	+0·8	+1·7	−0·1
Central Provinces and Berar	−1·1	−4·1	−0·2	+1·3	+2·1	+2·4	+3·8	+0·6
Central India and Gujarat	−4·4	−3·9	−1·1	+0·8	+3·5	+3·6	+2·9	+0·2
Sind and Rajputana	−4·8	−2·4	+1·9	+3·8	+4·1	+1·9	+1·6	+0·9
Madras	+3·0	+3·3	+2·3	+1·3	+0·6	+1·9	+1·6	+2·0
Mean for whole of India	−1·6	−1·6	+0·3	+1·2	+1·9	+2·1	+2·0	+0·6

On the 15th and 16th, when as stated above a large low temperature area overlay Northern and Central India, the mean temperature of the whole country was 1·6° below the normal. On the 17th a slight excess was shown, and temperature gradually increased up to the close of the week. The provincial variations showed that the mean temperature of the week was excessive in Madras, and about normal in all the remaining provinces.

The highest maximum reported on each day was as follows:

March 15th	103·7°	at	Akola and Cuddapah.
" 16th	105·2°	"	Cuddapah.
" 17th	102·7°	"	Bellary.
" 18th	102·2°	"	" and Cuddapah.
" 19th	102·2°	"	Bellary.
" 20th	103·8°	"	Kurnool.
" 21st	106·9°	"	Chanda.

Rainfall.—The rainfall of the week under review has been more extensive than that of the two preceding weeks, but the amount received, except in the case of Assam and of the Baluchistan hills has been exceedingly small. Rain was received on each day of the week. On the 15th and 16th the showers were mainly received over North-Eastern India and the east of the Peninsula, on the 17th the precipitation occurred over the north-west hills and the east of the Peninsula, on the 18th there were scattered showers in different parts of the country, and on the 19th, 20th, and 21st there was heavy snow in Kashmir and scattered showers in various parts of India. The concluding table gives the rainfall data. Rain fell in no less than twenty-seven of the rainfall divisions, but in eighteen of these divisions the average actual rainfall per division was less than 0·10 inch. This leaves nine divisions in which the fall was effective. These nine divisions were—East Bengal, the three Assam divisions, Orissa, the Central Punjab, Madras (South-Central), the Baluchistan hills, and the East Coast (North). In all the remaining divisions the rainfall of the week was either actually or practically *nil*. The

second column of the table shows the rainfall ordinarily expected during the week under review, and the third column shows the difference between the actual and normal rainfall. These columns exhibit a very general deficiency of rain. Only in the case of Assam (Surma), of Sind, of Baluchistan, and of the East Coast (North) has there been any excess, though, except in the case of a few of the divisions in North-Eastern and North-Western India, the amount of the deficiency has been very small.

The three concluding columns of the table show the condition of the rainfall of the three weeks March 1st to 21st. Except in Assam, the Punjab, Baluchistan, Lower and South-West Bengal and the Ganjam Coast, the rainfall of the period has been very light, and in no case, except Baluchistan, has the normal been exceeded.

The following are the principal totals recorded during the week March 15th to 21st: Karimgunj (Sylhet) 2·97 inches, Silchar 4·18 inches, Cherrapunji 2·73 inches, Golaghat (Sibsagar) 1·44 inches, False Point (Cuttack) 1·07 inches, Ootacamund 1·28 inches, Russellkonda (Ganjam) 2·62 inches, Chandavarum (Vizagapatam) 3·29 inches, Alamur (Godavery) 1·50 inches, Palamanar (North Arcot) 1·25 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *26th March 1896.*

F. G. SLY,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 28th, 1896.

At the end of last week a depression was approaching the north-west frontier, and at the beginning of the week under review this depression entered North-Western India, and at 8 A.M. on the 22nd apparently overlay Rajputana and the Southern Punjab. It was a feeble disturbance, but gave disturbed showery weather to North-Western India—both hills and plains. By the 23rd the feeble depression had disappeared, but the accompanying improvement in the weather was very slight, and showers continued to be received at many stations in the north-west. On Tuesday, the 24th, the distribution of pressure assumed a form which with slight modifications lasted until the close of the week. During this period readings were highest in the north-west and relatively high over Burma with an intervening region of low pressure. Within this region of low pressure an area of considerable depression was developed over North Bihar, and this locality remained steadily the seat of the lowest pressure till the end of the period. On the last two days of the week, further feebly unsettled weather appeared over North-Western India, and light showers were again received over Baluchistan, Kashmir, the North-Western Himalayas, and the Northern Punjab. The temperature conditions have agreed fairly closely with the rainfall conditions. At first the mean temperature was everywhere excessive, but with the occurrence of rain over the Punjab the mean temperature fell over North-Western India, and on Wednesday, the 25th, the mean of the whole country was below the normal. Subsequently as the influence of the showers disappeared the temperature rose, and on Saturday, the 28th, the mean was again excessive almost everywhere.

Daily Summary.—*Sunday, March 22nd.*—Pressure had increased in all parts of the country, except Eastern Rajputana, where a slight depression existed. Pressure was somewhat higher over Tenasserim, and somewhat lower over Bihar and over Eastern Rajputana than elsewhere, but in general readings were very uniform. The wind was between south-west and south-east over North-Eastern India, and very variable in other parts of the country. Calms were reported at several central stations, while, on the contrary, the force of the wind was strong at some of the hill stations, and fresh at the head of the Bay. The mean temperature was excessive almost everywhere, especially so over the central parts of the country.

Monday, March 23rd.—The depression noticed over Eastern Rajputana on the 22nd had disappeared, and pressure had continued to increase—most so over North-Western India. Pressure was high over North-Western India, and relatively high over Assam and Burma, while it was low over Bengal, the North-Western Provinces, and the east of the Peninsula. The pressure differences were, however, small. The winds were northerly in the north-west, between south-westerly and south-easterly in the north-east, and variable in other places. The force was fresh at some western stations and around the head of the Bay. Temperature had fallen fast over North-Western India and

in Madras, and in both these localities the mean was below the normal, but elsewhere the temperature has been generally steady, and the mean was still excessive. Moderate rain had been received over the North-Western Himalayas and the Punjab plains.

Tuesday, March 24th.—Pressure had decreased slightly over North-Eastern India, and increased elsewhere—most so over the central parts of India and of the Peninsula. The general distribution of pressure was little changed, and readings were still above the normal average everywhere. With the exception of a north-westerly wind over part of North-Western India, the wind directions were very irregular. The low temperature area over North-Western India had increased in extent and intensity, and a slight low temperature area had appeared over Madras. Elsewhere the mean temperature remained excessive—more especially so over West Bengal. Showers were reported from various places in North-Western, North-Eastern and Central India.

Wednesday, March 25th.—The barometer was now falling almost everywhere—most so along the foot of the hills and over Northern Bombay. Readings were high over North-Western India, relatively high over Tenasserim and the Bay, and low over North Bengal. Northerly winds prevailed over North-Western India, westerly winds down the Gangetic plain, and southerly winds at the head of the Bay, while over the Peninsula the directions remained variable. The mean temperature was generally lower than usual over North-Western India and over the Carnatic, and generally higher than usual in other parts of the country, but the general distribution with regard to the average was irregular. Showers of rain had been received at a few places in North-Western and North-Eastern India, and also at Colombo and Nagpur.

Thursday, March 26th.—Pressure had risen briskly over Burma and Assam, and over part of the West Coast, while it had changed slightly elsewhere. Readings remained high over Tenasserim and over the west of the Punjab, low over Bihar, and very uniform elsewhere. The winds were practically unchanged. The mean temperature was in slight to moderate defect over the north of the Punjab, over part of the Gangetic plain, and over Madras, and was in slight to moderate excess elsewhere. A few scattered rain showers were reported.

Friday, March 27th.—Pressure had generally changed slightly and irregularly, and the general distribution and conditions of pressure were practically unaltered. The northerly winds over North-Western India had largely disappeared, and easterly winds had appeared over North Bengal, but there was no other change. The mean temperature was excessive, except in the north of the Punjab and on the coasts of the Peninsula. Light showers had been received over Baluchistan and the North-Western Himalayas.

Saturday, March 28th.—Pressure had decreased everywhere—briskly over a large part of the country. Readings were very uniform generally, though still relatively low over Bihar and the North Gangetic plain. Easterly winds continued to prevail over North Bengal, and south-westerly winds in Lower Bengal, but elsewhere the directions were very variable. The general temperature distribution was the same as on the preceding day. There was large excess over Rajputana. Light showers had again fallen over Baluchistan, the Punjab hills, and the Northern Punjab.

Temperature.—The mean temperature has been generally excessive throughout the week. The showers, however, which occurred over the Punjab, etc., on the 22nd brought about a fall of temperature over North-Western India, and on the 23rd an area of relatively low temperature was shown over the Punjab and the western desert. This area extended and intensified during the 24th and 25th, and on the latter date covered the whole of North-Western and Central India. On the 26th it commenced to recede again, and by the close of the week had almost disappeared. Over Madras also a low temperature area appeared on the 22nd. It was very small at this time, but gradually grew, and on Tuesday, Wednesday, and Thursday covered the greater part of the Presidency.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day:

Province.	March 1896.							Mean variation of week.
	22nd	23rd	24th	25th	26th	27th	28th	
	°	°	°	°	°	°	°	°
Burma	+1·8	+2·6	+2·5	+3·0	+2·4	+2·1	+2·6	+2·4
Bengal and Assam	+3·7	+4·2	+4·3	+0·9	+2·1	+2·5	+3·0	+3·1
North-Western Provinces and Oudh	+2·7	+5·4	+1·6	—1·2	—1·0	+1·7	+2·4	+1·7
Punjab	+3·5	—5·0	—3·0	—2·7	—0·4	+0·1	+1·7	—0·8
Bombay	+2·2	+2·1	+1·8	+1·3	+1·2	+1·1	+2·3	+1·7
Central Provinces and Berar	+4·4	+7·0	+4·2	+0·1	+1·8	+3·4	+3·7	+3·5
Central India and Gujarat	+3·1	+4·1	—2·4	—1·1	—0·3	+1·5	+3·1	+1·1
Sind and Rajputana	+5·1	+2·3	—2·0	—2·2	+0·8	+2·5	+3·8	+1·5
Madras	+1·0	—0·2	—0·2	+0·2	—0·6	+0·3	—1·0	—0·1
Mean for whole of India	+3·1	+2·5	+0·8	—0·2	+0·7	+1·7	+2·4	+1·6

The mean temperature of the whole country, relatively to the normal, decreased from the 22nd to the 25th, and then increased again up to the close of the week. The mean temperature for the week was about normal in Madras and the Punjab, but was in slight to considerable excess in the other provinces.

The following were the maximum temperatures throughout India reported on each day:

March 22nd	107·9°	at Chanda.
" 23rd	106·2°	" Akola and Cuddapah.
" 24th	106·9°	" Chanda.
" 25th	107·0°	" Yamethin.
" 26th	106·0°	" "
" 27th	106·9°	" Chanda.
" 28th	107·9°	" "

Rainfall.—The rainfall of the week has been almost altogether confined to the north-western and north-eastern districts of India. In the former division the rainfall resulted directly or indirectly from the atmospheric disturbance which followed the advance into North-Western India of small barometric depressions, while the rainfall of the latter division was mainly attributable to thunderstorms which accompanied the setting in of strong southerly winds at the head

of the Bay, while Assam, North Bengal, &c., were occupied by a more or less steady easterly current. In addition to the above, the central parts of the country were in the middle of the week visited by duststorms which gave very slight showers to a few stations. The concluding table shows the rainfall data. The first column shows that rain was received in twenty-three of the rainfall divisions, but of these twenty-three only thirteen received effective rain, that is a fall for the week equalling or exceeding one-tenth of an inch. These thirteen divisions were—the three Assam divisions, the Bengal hills, Orissa, the North-Western Provinces hills, the central, submontane, hills, northern and western divisions of the Punjab, the Baluchistan hills, and the west of Rajputana. In all other parts of India, the rainfall of the week was either practically or actually *nil*. The heaviest average rainfall was 1·82 inches in Assam (Surma), followed by 0·77 inch in Baluchistan, by 0·67 inch in the Northern Punjab, and by 0·59 inch in the Brahmaputra division of Assam. The second column of the table shows the average normal rainfall for the week, and the third column gives the difference between the actual and normal average fall. In the case of the central, submontane, northern and western districts of the Punjab, of Sind, and of Baluchistan, there has been a slight to moderate excess of rain, but in all other divisions there has been a deficiency which in the case of parts of Bengal and of Assam has been considerable.

The three concluding columns of the table show the state of the seasonal rainfall. During the four weeks ending on the 28th of March, there has been little or no rain over Burma, and the greater part of Bengal, of the Gangetic plain, of the Central Provinces, and of the Peninsula, while the concluding column of the table shows that in all parts of the Indian region, except the Western Punjab, Sind, Baluchistan, and Western Rajputana, the rainfall of the four weeks has been in considerable to large defect of the normal. In Gujarat, however, no rain has been received, and none is anticipated.

The following are the principal totals recorded during the week under review: Karimgunj (Sylhet) 3·82 inches, Sibsagar 2·32 inches, Abbottabad 1·78 inches, Jhang 1·15 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

Simla, 2nd April 1896.

DENZIL IBBETSON,

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 28th March.*—No rain, except scattered showers in parts of Vizagapatam and one station in Ganjam and at Cochin. The standing crops are generally fair. The harvest continues with moderate yield. Pasture is generally scarce, but fodder is available. Cattle are in good condition. Prices are generally stationary, but are slightly dearer in parts of the Deccan and Southern districts.

Bombay.—*For week ending 1st April.*—Slight rain in parts of Karachi, Upper Sind frontier, Belgaum and Dharwar. The standing crops have been damaged by hail in parts of Shikarpur and the Upper Sind frontier; otherwise the crops are good. Extracting of opium juice continues in parts of Baroda territory. Cotton-picking continues in parts of Gujarat, Kathiawar, and Dharwar, and harvesting of the late crops is in progress generally in fourteen districts. Preparations for next season are progressing in eleven districts. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of Shikarpur and Broach. Prices are normal, except in parts of Shikarpur and Sholapur.

Bengal.—*For week ending 30th March.*—There was practically no rain during the week. Rain is generally much wanted both for the crops in the ground and for the ploughing of lands in North Bengal and Bihar. The sowing of early paddy has begun in Bihar, some millets are also being sown. The harvesting of the spring crops is nearly completed. The collection of opium is over, and weighments have begun. Want of drinking water is reported from parts of Burdwan, Midnapore, the 24-Parganas, Khulna, Pabna and Dacca. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 25th March.*—The weather is seasonable. Harvesting operations are approaching completion in several districts; in a few places threshing and winnowing have begun. The extra crops are being irrigated where practicable. Prospects are unchanged. Opium collections are in progress, and the yield is generally fair. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 21st March, were—Banda 33,726, Hamirpur 28,392, Allahabad 802, Jhansi 10,186, Jalaun 17,054, Garhwal 343, Hardoi 124—total 90,627; of these 16,292 were dependants gratuitously relieved on the works; 1,552 persons also received gratuitous relief under other provisions of the Famine Code. In Sitapur and Hardoi test works have been closed, they will be opened in Pilibhit on 25th March. Supplies are sufficient, but fodder is becoming scarce in places. Prices, though ruling high, are falling.

For week ending 1st April.—The weather continues seasonable. Harvesting operations have been completed in several districts, and are approaching completion in others. Threshing and winnowing are in progress. Cane and extra

crops are being sown and irrigated where practicable. The crops in Dudhi, South Mirzapur, are said to have failed, the outturn not being equal to the seed sown. Prospects are unchanged. The numbers employed on relief works and in receipt of gratuitous relief on the 28th March were:—Banda 47,867, Hamirpur 31,559, Jhansi 22,040, Jalaun 27,162, Allahabad 1,157, Pilibhit 1,263, Ghamal 1,184—total 1,32,232; of this number 20,648 dependants were gratuitously relieved on the works; 2,841 persons also received gratuitous relief under other provisions of the Famine Code. Supplies are ample, but fodder is becoming scarce in places, and the want of water is felt in Banda and Hamirpur. Prices continue to fall.

Punjab.—*For week ending 1st April.*—Rain has fallen in all districts, except Hissar and Karnal. The harvesting of certain spring crops has commenced. Ploughings for and sowings of the extra spring crops and of sugar-cane, cotton, and other autumn crops are in progress. More rain is wanted in Shahpur. The condition and prospects of the standing crops are generally reported to be average on irrigated lands and poor on unirrigated lands. The stock of food-grains is said to be insufficient in Sialkot, Rawalpindi, Gujranwala and parts of Shahpur. Hail fell in parts of Dera Ismail Khan, but no damage has been done to the crops. Cattle are still in poor condition in Hissar and Shahpur, and they are dying for want of fodder in parts of Karnal, Lahore and Gujranwala; elsewhere they are in good condition. Fodder is scarce in all districts, except Jullundur and Sialkot. The stock of fodder is said to be insufficient in some districts. Prices are normal in Ferozepore and Dera Ismail Khan, but are high elsewhere.

Central Provinces.—*For week ending 1st April.*—The weather is hot and occasionally cloudy in parts. Threshing of the winter crops is in progress. The land is being prepared for the monsoon sowings in Nimar, Wardha and Sambalpur. Fodder and water are getting scarce in Wardha and Seoni.

Burma.—*For week ending 28th March.*—In Lower Burma the dry-weather paddy is being reaped in Tavoy. In Upper Burma cultivation of dry-weather paddy is completed in some places, and is progressing in others. Ploughing for the early wet-weather paddy continues in Kyaukse. The standing crops of dry-weather paddy are in good condition, and the island crops are promising, particularly in Minbu. The price of paddy has risen considerably in Rangoon, Prome and Bassein, and slightly in Henzada and Magwe, but has fallen slightly in Bhamo; elsewhere prices are stationary.

Assam.—*For week ending 31st March.*—The weather is dry. Sowing of early rice is progressing. The condition of cattle is fair. Fodder and water are insufficient in places.

Mysore and Coorg.—*For week ending 1st April.*—MYSORE: No rain. The crops and prospects are good. Prices have slightly risen in all districts, except Bangalore and Kolar.

COORG.—No standing crops. Want of fodder and water for cattle is felt in some parts. Prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 1st April.*—BERAR: The weather is warm and clear. No rain has fallen during the week. Breaking up of land for the next autumn crops continues. Fodder and water are generally scanty. Prices are fluctuating in Wun, but are steady elsewhere.

HYDERABAD.—No rain during the week. Harvesting of the spring crops continues. The crops on irrigated areas are being harvested in the central division, and they are in fairly good condition in the eastern division, but are drying up in the Gurmatkal and Korangal taluks in the southern division. Fodder is getting scarce. The water-supply also is running short. Prices are normal.

Central India.—*For week ending 1st April.*—Slight rain fell in one tehsil of Gwalior during the week. Agricultural operations are in progress throughout Central India. The probable outturn will be below average in three Agencies owing to the damage caused to the crops from want of rain, but will be fairly good in others. Cattle are in good condition, except in parts of Bhopal and Gwalior. Pasturage is good and sufficient in all Agencies. Prices are above normal in Baghelkhand, Malwa, Goona, and in five districts of Gwalior; elsewhere prices are normal. The opium crop is in fairly good condition in Gwalior, Bhopal and Malwa. The numbers employed on relief works in the Bundelkhand and Goona Agencies were 3,212 and 747 respectively.

Rajputana.—*For week ending 1st April.*—Agricultural operations are generally satisfactory, except in Merwara and Jaisalmere, where the crops and prospects are poor. The unirrigated crops are suffering in Ajmere-Merwara, and the crops have been damaged in Dholpore for want of rain, which is generally needed. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk, Jaisalmere, and parts of Meywar; fodder is failing in Dholpore and Bhurtpore, but is sufficient elsewhere. Prices are rising in four States, fluctuating in three others, and falling in one, but are steady elsewhere. In Marwar 4,310 persons are on relief works, and 168 on gratuitous relief, in Shahpura 200 on relief works, in Merwara 2,112 on relief works, in Bikanir 1,614 on relief works, and 341 on gratuitous relief, in Jaisalmere 365 on relief works, and 37 on gratuitous relief.

Kashmir.—*For week ending 31st March.*—KASHMIR VALLEY: Rain has fallen. Water is ample for irrigation. Prices continue normal.

JAMMU PROVINCE.—*For week ending 25th March.*—Good rain. The harvest is fair. Fodder is scanty.

For week ending 1st April.—Report not received.

Nepal.—*For week ending 28th March.*—The weather is warm, dry and windy. Sowing of rice and maize is delayed for want of rain. The prospects of the wheat crop are poor.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

D

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 23RD MARCH 1895, AND FROM 1ST JANUARY TO 21ST MARCH 1896.

N.B.—As regards the figures in column *Total Earnings from 1st January 1896*, audited figures have been used as far as possible.

No. 989 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 22 of 1889.—The Honourable Erastus Wiman of New York, United States of America, for improvements relating to the pulverization or reduction of mineral or other substances and to apparatus therefor. (From 1st April 1896 to 31st March 1897.)

No. 121 of 1889.—La Société des générateurs à vaporisation instantanée (Système Serpollet), a company incorporated according to the laws of Paris, France, for improvements in apparatus for generating steam. (From 6th June 1896 to 5th June 1897.)

No. 218 of 1889.—Carl Olof Lundholm, chemist, of Stevenston, in the county of Ayr, Scotland, for improvements in the manufacture of dynamite. (From 11th April 1896 to 10th April 1897.)

No. 314 of 1889.—Hugo Wollheim, chemist, of London, for a new re-agent for disinfecting, preservative or remedial purposes. (From 27th March 1896 to 26th March 1897.)

No. 136 of 1891.—William Charles Boyce, of Calcutta, Indian State Railways, Revenue service, for a transit indicator. (From 5th May 1897 to 4th May 1898.)

No. 275 of 1891.—Isaac Shone and Edwin Ault, civil and mining engineers, both of Great George Street Chambers, Parliament Square, London, for improvements in and connected with the ventilation of drains and sewers. (From 5th May 1896 to 4th May 1897.)

No. 49 of 1892.—Joseph Lindsay and Robert Lindsay, engineers, of 4, Somerville Place, Dundee, in the county of Forfar, North Britain, for improvements in yarn beams for looms. (From 31st March 1896 to 30th March 1897.)

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 A.M. to 4 P.M.

Applications for the registration of Trade Marks as "Designs" under Part II of the "Inventions and Designs Act (V of 1888)" are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act, and, therefore, are not capable of such registration.

The fees payable under the Inventions and Designs Act, V of 1888, are now collected in cash. Cheques do not constitute payment in cash until they have been actually cashed, and applicants must submit to the risk of delay being incurred in cashing them.

Copies of the weekly Notifications of applications and specifications filed in the office of the Secretary under the Inventions and Designs Act, 1888, are now on sale to the public at one anna a copy.

Copies of the quarterly lists of applications and specifications filed in the office of the Secretary under the Inventions and Designs Act, 1888, are now on sale to the public at 8 annas a copy.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

The 23rd March, 1896.

No. 6.—Mr. W. Beechey, Executive Engineer, 3rd grade, temporary rank, is granted, under Article 371 of the Civil Service Regulations, furlough for twelve months, with effect from 15th April, 1896, or such subsequent date as he may be permitted to avail himself of it.

G. BOUGHEY, *Colonel*,

Manager, N. W. Railway.

TREASURE TROVE.

NOTICE.

It is hereby notified, under section 5 of Act VI of 1878, that on 31st December, 1895, the undermentioned copper idols and a copper tiruvasi, weighing 348½ seers in all, and estimated to be worth R120, were found buried in Paimash No. 2691 of Kamal village, Mayavaram Taluk, which was measured as Sengamottu Mattu manthai (cattle stand), but which is now measured in Survey No. 722, as thrashing floor and path :—

Description.	Weight in seers.	Value. R	a.	p.
1. Perumal (god), small	37¼	12	0	0
2. Goddess do.	11	5	0	0
3. Do. do.	8¾	4	0	0
4. Perumal (god) large	140½	48	0	0
5. Goddess, do.	69½	24	0	0
6. Do. do.	67¼	23	0	0
7. Tiruvasi	14	4	0	0
TOTAL	348½	120	0	0

All persons claiming the said treasure, or part thereof, are hereby required to appear personally, or by Agent, before the Collector of Tanjore, at his Office, on the 11th September, 1896, in view to the matter being enquired into and determined according to law.

G. STOKES,

Collector.

TANJORE COLLECTOR'S OFFICE,
Camp Shiyali, 17th March, 1896.

NOTICE.

It is hereby notified, under section V of the Indian Treasure Trove Act (VI of 1878), that on the 19th day of October, 1895, treasure, consisting of the undermentioned articles, valued at R277-8-0, was found hidden in the ruined

Perumal povil, in the village of Vinnamangolani, in the Vellore Taluq, North Arcot District :—

Description of property.	Value. R	a.	p.
A pumbaloga (5 metals) Anjaneyar idol, weighing 40½ seers . .	20	4	0
A Krishnaswami idol, weighing 28½ seers	14	4	0
A Pirumal idol, weighing 87 seers .	43	8	1
A Amman idol, weighing 100½ seers	50	4	0
A female image of Siva temple, weighing 108 seers	54	0	0
Ditto ditto, 102 seers	51	0	0
Subramaniaswami idol, weighing 61½ seers	30	12	0
Nafesar idol, weighing 27 seers .	13	8	0
	277	8	0

All persons claiming the said treasure, or any part thereof, are hereby required at Chittoor, to appear personally, or by agent, before the Collector of North Arcot, at his office, on the 15th day of August, 1896, in order to the matter being enquired into and determined in accordance with the provisions of the Act.

For *Collector*.

NORTH ARCOT COLLECTOR'S OFFICE.
Chittoor, 25th March, 1896.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.
½ „ R 9, „ R9-8.
¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৸৹
। আধ „ „ ৯৲ „ ৯৷৹
। শিকি „ „ ৪৷৹৲ „ . ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনাডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

SEA AND FOREIGN MAILS.

Mails for	Date of closing at Calcutta	Route by which despatched.
	1896	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., Natal, and Cape Colony, and in general all countries served through the United Kingdom.	8th April	Per P. & O. Str from Bombay.
Straits Settlements, China, and Japan.	11th ,,	*Viâ* Tuticorin and Colombo.
*Australasian Colonies . .	11th ,,	Ditto.*
Ditto ditto . .	4th ,,	Ditto.*
Madras and Colombo . .	13th ,,	Per P. & O. Str. *Bengal.*
Straits Settlements, China, and Japan.	9th ,,	Per Steamer *Lightning.*
Rangoon and Moulmein . .	10th ,,	Per Steamer *Purnea.*
Rangoon, Moulmein, Penang, and Singapore.	7th ,,	Per Steamer *Ethiopia.*
Akyab, Kyaukpyu, Sandoway and Rangoon	8th ,,	Per Steamer *Kistna.*
Port Blair	7th ,,	*Viâ* Rangoon.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.L.,*

Principal, Thomason College.

THE YEARLY EXAMINATION OF CANDIDATES FOR 4TH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for 4th grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd June, 1896, at 10-30 A.M.:—

SUBJECTS.

	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity) . .	100	50
Dictation (spelling, punctuation, etc.) . . .	100	50
Arithmetic (the whole) .	240	100
Mensuration (*a*) the whole .	60	30
Book-keeping, (*b*) mercantile	100	50
TOTAL .	600	400

Mimimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Ball and Hamilton.
"Book-keeping" by double and single entry by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the ***place*** and ***hour*** of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it ; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decided whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal, together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish f esh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no application received direct.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR ;

The 31st March, 1896.

N.B.—All Cheques, Money Orders, etc. must be made payable to the "Treasurer, Asiatic Society," only.

Catalogue of Books printed at Thomason College Press and procurable from Thomason College Book Depot.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depôt, at R64 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

* The other Fasciculi of these works are out of stock, and complete copies cannot be supplied.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

First two Volumes are published in separate Sections, as below, but can be bound up in Volumes if required :—

VOLUME I.*

Section I.	Building Materials	(1895),	R2-8
" II.	Masonry	(1891),	R1-8
" III.	Carpentry	(1889),	R1-8
" IV.	Earthwork	(1892),	R1-8
" V.	Tools and Plant (never published).		

VOLUME II.*

Section VI.	Buildings	(1891),	R1-8
" VII.	Bridges	(in the Press), say	
" VIII.	Roads	(1888),	R2-0
" IX.	Railways	(1891),	R1-8
" X.	Irrigation Works	(1873),	R2-0

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R5.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).

" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition), with Curve Table. R3-8

XIII **Drawing** (by Lieut. R. Pulford, R.E.†) R6.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.

XIV. **Simple Applied Mechanics** (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition) (5th edition in Press).

XVI. **Earthwork Estimating,** with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 8a.

XVII. **Specimens of Printing** used in the College. Drawing Course and Entrance Examinations. 8a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve (in the Press.)

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.

Scantlings of Timber for Beams. 8a.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

GEORGE WATT,
Reporter on Econom. Products to the Govt. of India.
CALCUTTA,
The 28th November, 1894.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R32-8

	Without postage. R a. p.	With postage. R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

Cattle Disease in India. Manual of the more deadly forms of. Hindi version, Royal 8vo., stiff boards. 6a.

Ditto. Urdu version, Royal 8vo., stiff boards. 6a.

A Dictionary of the Economic Products of India.

BY DR GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III, & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L; and Volume V contains the latter half of L to end of O; Vol. VI (which consists of four parts), Part I, contains **letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the** vernacular and European names of the plants, animals, and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

- 1886-87, 6 Plates with Text. R1-8 a set (4a.)
- 1888-89, 18 Plates with Text. R4-8 a set (8a.)
- 1890, 12 Plates with Text. R3 a set (6a.)
- 1891, 18 Plates with Text. R4-8 a set (8a.)
- 1892, 13 Plates with Text. R3-4 a set (6a.)

PART VI.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 26th March, 1896.

PRESENT:

His Excellency the Viceroy and Governor General of India, P.C., G.M.S.I., G.M.I.E., LL.D., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K C.S.I.
The Hon'ble Sir A. E. Miller, KT., C.S.I., Q.C.
The Hon'ble Lieutenant-General Sir H. Brackenbury, K.C.B., K.C.S.I., R.A.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble J. Woodburn, C.S.I.
The Hon'ble Alan Cadell, C.S.I.
The Hon'ble M. R. Ry. P. Ananda Charlu, Rai Bahádur.
The Hon'ble J. D. Rees, C.I.E.
The Hon'ble G. P. Glendinning.
The Hon'ble Nawab Amir-ud-Din Ahmad Khan, C.I.E., Bahádur, Fakharuddoulah, Chief of Loharu.
The Hon'ble Rao Sahib Balwant Rao Bhuskute.
The Hon'ble P. Playfair, C.I.E.

QUESTIONS AND ANSWERS.

The Hon'ble NAWAB AMIR-UD-DIN AHMAD KHAN, BAHÁDUR, in the absence of the Hon'ble PRINCE SIR JAHAN KADR MEERZA MUHAMMAD WAHID ALI BAHÁDUR, asked:—" With reference to Sir Charles Pritchard's replies to my questions (1), (3), (4) and (5) on the 7th February, 1895,

regarding conveniences for railway passengers, will the Government please state the result of its enquiries and consideration?"

The Hon'ble MR. CADELL replied:—"The attention of Local Governments and Administrations was drawn, in July, 1895, to the importance of the subject, and the various railway administrations were invited to co-operate in the removal of all reasonable causes of complaint. Amongst others, particular attention was invited to the following points:—

(1) the reduction during the hot weather of the number of passengers carried in each compartment or carriage;

(2) the removal of delays and difficulties in obtaining third class tickets by the opening of ticket offices for a more prolonged period before the arrival of trains, or, where necessary, for the whole day; the establishment, where the demands of traffic call for it, of agencies for the issue of tickets in the bazars or other convenient places; and the provision at large booking centres of additional ticket-issuing windows, and of additional staff for the issue, checking and collection of tickets, and the employment of female ticket collectors, when possible, for dealing with female passengers;

(3) the improvement, where necessary, of existing latrines by the addition of screens or other means of securing privacy;

(4) the distribution of pure drinking water, especially in the hot weather and during fairs or other large gatherings, with proper precautions to protect it from pollution.

"Having regard to the extreme importance of the matter, no less from the standpoint of the Government and of the railway administrations than from that of the great mass of the travelling public, the Governor General in Council desired that the authorities of the several railways should give their constant attention to the subject by enforcing the rigid observance of the rules already in force and by the introduction from time to time of such further reforms as experience may show to be necessary or desirable.

"Government Inspectors for Railways have also been instructed that in the course of all periodical and other inspections made by them attention should be paid to any improved arrangements that have been found possible for the comfort and convenience of passengers, and that these arrangements, or the necessity for improved arrangements, should be made the subject of report."

The Hon'ble NAWAB AMIR-UD-DIN AHMAD KHAN, BAHÁDUR, in the absence of the Hon'ble PRINCE SIR JAHAN KADR MEERZA MUHAMMAD WAHID ALI BAHÁDUR, asked:—"Will the Government please state whether any, and if so what, communication has been received from the Secretary of State as to the result of the Opium Commission?"

The Hon'ble SIR JAMES WESTLAND replied:—"The Government of India communicated its views to Her Majesty's Secretary of State in a despatch dated the 19th October, 1895, to which the Secretary of State replied on December 12th. Both despatches were published in full in the Official-Papers Supplement to the Gazette of India of the 18th January last, and are available also in pamphlet form."

FINANCIAL STATEMENT.

The Hon'ble SIR JAMES WESTLAND, in moving that the Financial Statement be taken into consideration, said:—"There are one or two subjects which are of some public interest and which were not referred to in that statement, but in regard to which I should like to take the opportunity of giving some explanation now. The first question to which I wish to allude is the reference which we made in the course of the past year to Commercial and Banking Institutions on the subject of the investment of the currency reserve. The proposal that we laid before them was that, whereas the currency reserve is now invested to the extent of eight crores, we should take legal powers to

invest it up to the limit of ten crores. We furnished these bodies with statistics relating to the circulation, and we asked them their opinion as to the measure, and whether, in their opinion, it in any way diminished or endangered the perfect convertibility of the currency note. We have received answers from all the Chambers of Commerce and Presidency Banks, and I may say that there is not one of these bodies which calls in question the proposal to make this investment on the ground that it diminishes the security for the convertibility of the currency note. I may mention that since these papers were circulated to the Banks and to the Chambers of Commerce we have received even additional evidence of the security with which the proposed transactions can be carried out. It will perhaps be remembered that we drew up two statements shewing the variation in the circulation. One of these statements was a statement, month by month, for some time past, of what we call the gross circulation of the currency notes. The other was a statement of what we call the net circulation. The difference between the gross and the net circulations in this case is that the gross circulation includes the currency notes which lie in our Reserve Treasury and also the currency notes held by the Presidency Banks. These notes are certain to come to us for encashment sooner or later; we do not regard them as a permanent part of the currency circulation, and we ought not to regard them as such in discussing any question of the currency reserve. The net circulation is the balance which remains in the hands of the public generally.

"Now, since these papers were sent out this gross circulation has very much diminished. It stood, if I remember rightly, at about 31½ crores when we sent out the statistics, but now the gross circulation has been reduced to something like 25 crores. That is to say, the demand for money which springs up every cold weather, and which sprang up this cold weather also, has so greatly reduced the amount held in the balance of the Reserve Treasury and in the Presidency Banks, that they have brought forward their notes for encashment, and by that means have reduced very largely—by something like 20 per cent.—what I have been defining as the gross circulation. But notwithstanding this great change in the gross circulation, the net circulation, that is to say, the amount of notes which remains in the hands of the public, and which can be depended upon to a large extent to remain in the hands of the public, has increased by a small amount. When we consulted these bodies whom I have named, we based our proposals entirely upon the statistics of the net circulation, and rightly so, so far as I can see. The evidence that this circumstance has given to us—the circumstance, namely, of the great diminution of the gross circulation, entirely unaccompanied by any diminution in the net circulation—adds considerable strength to the argument that we can increase our currency investment from eight to ten crores without the slightest danger to the convertibility of the note.

"The only objection that has been raised to the proposal which we made was that we might to some extent endanger our currency policy, that is to say, our rupee currency policy, by throwing on the market two crores of rupees. These two crores of rupees would hardly be thrown upon the market in the sense of being suddenly put upon the market, but ultimately and after a long series of intermediate transactions the circulation of rupees in the country would be two crores more than it would otherwise be. Now, this is obviously a theoretical objection, and it is based upon theoretical grounds. I am not prepared to discuss these theoretical grounds now, because it is very difficult indeed to say how far the total amount of the rupee currency in circulation affects the exchange value of the rupee, and I do not wish to discuss a difficult and dangerous question of that kind. But I am a little doubtful whether in discussing the question of the investment of the currency reserve we are at liberty to look at outside considerations of that kind. Of this I am confident that we are not entitled to use the currency reserve for any purpose of producing a certain effect upon the exchange value of the rupee. No person would for a moment allow that if we did that we would be acting within our duty. It is for the same reason arguable that when a measure affecting the currency reserve is proposed, from the point of view of the currency-reserve pure and simple, we ought not perhaps to allow

ourselves to be influenced by the possible effect which a measure desirable from a currency-reserve point of view, may have upon the exchange value of the rupee. However, these are all questions which will no doubt be argued out before the measure which we propose takes any actual form. What I wish to state at present for the information of the Council is what the Government intend to do with regard to the proposal generally. In the first place, we shall publish in the Government Gazette for general information the opinions that we have received upon the subject. We shall also communicate them to the Secretary of State for his information, with a view to any suggestions or orders that he may desire to give. If he sanctions our proposals, it is possible that we may bring forward a legislative measure for carrying them out, but that will not be done until next cold weather; that is to say, that we shall not make any proposals of this kind during the session at Simla, where we do not receive the assistance of our commercial colleagues.

"The other matter to which I desire to make reference was a communication made to me by merchants at Rangoon during my visit to that place. It is a matter which I considered partly at that time and afterwards in Calcutta. The merchants of Rangoon had two requests to make—first, that the Secretary of State might draw his Council Bills upon Rangoon as well as upon Calcutta and Bombay. This is a question which has been before the Government at various times during the past few years, but the Government has never seen its way to allow any drawings of Council Bills on Rangoon. There is more than one reason for this. The drafts of the Secretary of State come at present, for example, to about sixty lakhs a month. If we were to allow the Secretary of State to draw upon Rangoon, it is obvious that we ought to be prepared at any moment to pay sixty lakhs at Rangoon. It is easy for us, at centres like Bombay and Calcutta, to provide ourselves with as large an amount of money as may at any time be necessary to meet the Council Bills of the Secretary of State; but, if we were obliged to provide money for that purpose at Rangoon also, it would make far too serious an inroad upon our cash balances, and we would be able only with great difficulty, and not even so at some times of the year, to provide the necessary funds to meet such Council Bills as might be drawn on Rangoon. I may also point out that the Exchange Banks, through whom most of these Council Bills are passed, are exactly in the same position and circumstances as ourselves. It does not pay them to keep money lying at Rangoon waiting the demands of the merchants. They prefer financing Rangoon entirely from Calcutta. Even if we were to allow Council Bills to be drawn upon Rangoon, the chances are that the Banks through whom they almost entirely pass would prefer drawing upon Calcutta and holding their funds there; because in that case the same amount of reserve held in their hands would be available both for the demands made upon them at Calcutta and those made at Rangoon. We have an exact example of this in the Secretary of State's drawings at Madras. The Secretary of State may draw on Madras—and he does so to a small extent—but as a matter of fact the commerce of Madras is financed almost entirely through Calcutta and Bombay. The Banks prefer having their money at these big centres, and sending it thence, from time to time, to where it is actually wanted. I do not think, therefore, in the first place that it would be possible, or desirable, that the Secretary of State should draw upon Rangoon, nor, should he determine to draw upon Rangoon, that much advantage would be taken of the permission by the Exchange Banks.

"The other matter which was brought forward by the same merchants at Rangoon was their demand that the large sums of money, which through currency and commercial operations become available in our hands at Rangoon at the beginning of every cold weather, should be made available for the rice trade at Burma, not only, as at present through the Bank of Bengal, but to the merchants directly. Our present practice is to make an arrangement with the Bank of Bengal that we should hold this money at their disposal and make it available to them at a premium of four annas per cent. The Exchange Banks, I believe, pay another anna per cent. to the Bank of Bengal, and by this means and by any necessary cash remittances made by the Bank of Bengal the whole of the Burma rice trade is financed. The desire of the merchants was that, instead of making this money available through the Bank of Bengal only, we should throw

it open to tender in the same way as the Secretary of State throws open his Council Bills to tender; and the merchants think that by this means they will get rid of part of the present banking charges which they consider fall very heavily upon them. Now it may be impertinent in me to pretend to know more about the business of the merchants of Rangoon than they do themselves, but I confess I have some doubts that when bills are made available in this way the merchants will be able in any way either to reduce their banking and remitting charges or to compete with the Banks for these remittances. However, I perfectly admit that my opinion on this subject is not sufficient to warrant me in withholding from them the permission they ask for to tender for the Bills in competition with the Bank of Bengal.

"I have therefore made an arrangement, and I have communicated it to the Rangoon merchants, that next season we shall advertise at the proper time the amount of funds that we have available at Rangoon, and we shall call for tenders for the available amount of money. These tenders can be made either by the Bank of Bengal or by the Exchange Banks or by the merchants direct. That is what the merchants have asked for, and it remains to be seen whether the plan will suit the circumstances of the trade. I myself feel a little doubtful as to whether the merchants will in the end find it profitable to take all these banking transactions upon their own shoulders, but that is a matter for them to consider for themselves. At present even Exchange Banks are unwilling to take upon themselves this burden of keeping money lying idle at Rangoon. They prefer to keep the money here till it is actually wanted at Rangoon, and when it is wanted they can depend upon its being made available through the present system. That is in my opinion the cheapest and most practical system; but, as I have said, I have not the slightest objection to allowing the merchants of Rangoon to attempt the system of direct tender if they find that it suits them better.

"I thought it desirable to give a public explanation on these two matters because they are matters in which the commercial public have generally some interest. I did not think it worth while to enter upon these subjects in the Financial Statement, and therefore I have taken this opportunity of making the explanations which I have to give the public on the matter."

The Hon'ble MR. PLAYFAIR said:—"My Lord, the Financial Statement before your Excellency's Council again testifies to the buoyancy and elasticity of the Indian revenue, and it does more, for it manifests in a most satisfactory manner the result of the perseverance in economy which has distinguished your Excellency's administration.

"My Lord, I have little to add to my congratulations to the Hon'ble Member for Finance, that under his guidance the country has emerged from the transition period he was forced to proclaim two years ago and that he is able to state in paragraph 10 of the Financial Statement that he has paid for the Chitral Expedition, restored the Famine Insurance Grant, recouped the contributions levied in 1894-95 from the Provincial Governments, and has a surplus over and above, approximating to a crore of rupees. Unless the value of the rupee again and suddenly alters for the worse and the country is called upon to meet some unforeseen calamity, it is apparent that the surplus of the current year should be considerably larger than the estimate of Rx. 463,000 taken in the Budget. I therefore look forward with most concern to 'l'embarrass des richesses' as likely to invite demands upon the Member for Finance from many directions as the year advances and as the surplus accumulates. I have lately expressed the hope in this Council and elsewhere that the Government of India will take into earnest consideration those commercial wants of the Empire to attend fully to which it has not had either leisure or opportunity during the recent periods of war and poverty. I would specially refer to the competition from other countries with which the produce and trade of India is now beset, and to the effect which existing inland transport charges, and especially railway rates, tend to restrict traffic. I hope that these important questions will not be forgotten when Government comes to deal with the surplus balances of the year. I do not propose to enlarge upon this question on the present occasion. I hope it may be presented by the commercial community more

fully for the deliberate consideration of your Excellency's Government than time at present would permit. In this connection it is encouraging to learn that the Budget contains provision for a more extensive railway programme than India has known for many years. And, while I heartily congratulate the Government on this advance, I would express the hope that more liberal encouragement may attract the private resources of the country and of investors in Europe to the development of the system of communication by the construction of feeder railways and tramways throughout the country.

" Another most satisfactory feature in this Budget is the savings that have been effected under the ordinary army expenditure, amounting to Rx. 462,000. Two years ago the Council listened with keen interest to a carefully prepared and business-like explanation given by the Hon'ble and gallant Military Member of Council with regard to the army expenditure. I may venture to assure the Hon'ble Member that any additional information he can give the public, especially as to whether the Chitral outpost may create a demand for special defence works, will be received with lively interest. Such an explanation, made on the eve of his retirement,—an event which is regarded with general regret,—would be at this juncture of very great importance.

" Turning to the question of income, it is a matter of anxiety, which I am glad to find the Government of India share with the public, that the opium crop continues to yield very much below the quantity gathered during previous years. The total income from this source has fallen from Rx. 8,451,185 in 1880-81 to Rx. 4,979,800 in 1894-95. The decline has been attributed to unfavourable seasons, but it has not been shown that the same influence has affected other crops in like manner. I would invite the Member for Finance to say whether experience satisfies him that the rise in price paid to the cultivators he announced a year ago has been sufficient to secure the more general cultivation of the crop, and whether it would not be advisable to offer a still further advance to the cultivator to ensure a supply to replenish stocks and bring them up to the requirements of the demand. I would also like to enquire whether the attention of the Government of India has been directed to the remarks appearing in the reports of the British Consuls in China upon the increased adulteration by the Chinese of Indian opium with Tientsin cake, Sesamum seed cake, and other compounds, to the prejudice of the reputation of the Indian drug, before it reaches the consumer, and whether the Government will endeavour to induce the officials in China to protect the Indian trade against this pernicious practice.

" It would also be of interest should the Minister for Finance find himself able to state at what rate of interest he intends raising the new rupee loan of Rx. 4,000,000, contemplated in paragraph 178 of the statement. With regard to the remark that the minimum cash balance required by the Government of India over all the Treasuries in India is between 8 and 9 crores, I desire to enquire whether in view of the increased balances of the Savings Banks—estimated in the Budget of 1896-97 to amount to Rx. 11,862,618—it is not necessary, in the opinion of the Government of India, to retain rather a higher balance in cash than formerly.

" A reply to this question, in view of the remarks that have fallen from the Hon'ble Member in connection with the proposed increase of the Paper Currency Reserve would, I think, be of interest to many. Without entering upon the question raised by the Hon'ble Member, I would desire to say that the mercantile community have every appreciation for the seven lakhs saving in interest that his scheme is designed to afford. When the reserve was raised in 1889-90 from 6 to 8 crores of Government paper, the Savings Bank balances were, if my memory serves me right, about 7 crores. These balances will stand according to the estimate in the Budget of 1896-97 at something like Rs. 11½ crores, and, as I have remarked, it will be of interest if the Hon'ble Member is able to give a reply to the question I have put."

The Hon'ble RAO SAHIB BALWANT RAO BHUSKUTE said :—" My Lord, the Financial Statement is certainly an unmixed gratification for which we were

not altogether unprepared. Yet our anticipations were mere conjectures. They have been agreeably realised and the Government of India must be warmly congratulated on the prosperity budget which the Hon'ble Sir James Westland has been able to place before the Council for their consideration. Two years ago, when our troubles seemed to be at the worst, nobody could have ventured to hope that the Government of India would have been able to tide over their difficulties so successfully as they have done, and your Excellency's Government will receive the congratulations of the country on this happy result. Both the actuals of 1894 and the revised estimates of 1895 have turned out better than were anticipated, and we can now count upon a surplus in the past year's accounts as also in those of the opening year with great confidence. The public will now have their anxieties allayed. A surplus means an implied pledge that public burdens will at least not be augmented if not lightened.

"It is in this connection that the Hon'ble Member for Finance deserves especial felicitations. He took office under the most unfavourable circumstances. An evil star seemed to haunt him. Some nine years ago, when he was in temporary charge of the Finance Department, he was forced to have recourse to the extreme necessities of taxation. It was necessitated by the annexation of Northern Burma, the increase of the army expenditure the military expenditure on the North-Western frontier, and by the rapid fall of exchange. Some three years ago, when the portfolio of finance was made over to him, the circumstances were equally unfavourable. Talents, which could pre-eminently have relieved the public at large of onerous duties by an inborn mastery over financial problems, were thus employed in struggling with a crisis threatening bankruptcy. Better days appear to smile on him and on your Excellency's Government.

"But to what are we to attribute the present occasion for rejoicing? When this question comes to our mind we find ourselves again left to mere chance and frailty. The opium revenue and the rise in exchange underlie this prosperous outlook.

"The great Roman jurist Paulus had laid down that 'money circulates with a power which it derives not from its substance but from the quantity.' This view has not been contradicted to the present day. This is the principle of the Barbour scheme and it has admirably succeeded. Other circumstances too contributed to its success. Chitral has probably caused a large amount of money to be directed towards itself. Payments on account of railways under construction must have likewise caused a great absorption. The closing of the mints successfully operated on raising the market value of the rupee. Thus a rise in the exchange is due to exceptional circumstances.

"The Chitral expedition is probably, at least we all pray, the last of the projects of our Supreme Government for pushing their conquests in the North-West. Further circulation of money is therefore retarded. Crops in the North-Western Provinces and in some parts of the Central Provinces are fearfully bad. There will be less advances made than in the preceding year. Doubtless the whole basis of the Budget is the state of exchange. The Finance Member is aware of the difficulties and hence the caution which characterises his Budget (paragraph 31 at Part I of the Statement).

"The vagaries of exchange are almost certain in future. The present triumph is by no means final. To prevent importations of silver a further augmentation of the duty will be necessary. During the last week the exchange was as low as 14½*d*. And even while the Hon'ble Member was speaking a further fall had taken place.

"The exchange, therefore, my Lord, is not an unfailing indication of the improvement of our financial situation. Our surplus or deficit or equilibrium is solely guided by it. Suppose the rupee had fallen to 13*d*., what would our position have been? With public works stopped and progress starved it would have been a paramount necessity to find out some means of escape. Whatever it be there are chances enough that exchange may rise, and we all wish it would.

"The other main advantage accruing to the Government during the past year and contributing enormously to the present situation comes from opium,

During the past ten years, as I shall show later on, the opium revenue has gone far lower than what it was during the ten years immediately preceding. This item of revenue, though conspicuous some particular year, is as frail as the exchange. A due allowance has even in this case been made for this unstable nature of the revenue. Here we find another proof of the cautiousness of the Finance Minister.

"There are, however, reasons to hope for a time when budgets can be taken for a true forecast of the year. The financial administration will be free from that anxiety which has harassed it during the last decade of years, if an effective control were exercised on it. Without it we cannot be said to have made any progress.

"In adverting to the means of control, I wish to make it clear that I am duly aware of the heavy work of this day. I shall therefore abridge my remarks as much as possible. A non-official Native member is said to be waiting for this one day in a year to expend his ire. This is a gross injustice to him. Ire he has none, and if he has it he has other times and places to expend it. This is in my opinion a sacred place where we are bound in duty to place before your Excellency such arguments as may conduce to the best interests of the millions whose destinies your Excellency has been called upon to rule. Making light therefore of the insinuations of others, I hasten to offer my remarks. But before proceeding to my task I must state I am no expert in statistics, and the figures I shall quote are taken from an authority at least satisfactory to me.

"The Budget is very reticent with regard to the means of economy either actual or prospective. The Government has during these twelve years endeavoured to meet its extra demands with peculiar indifference to expenditure and revenue. Among the financial expedients resorted to by Government the principal ones are—the frequent curtailment or even suspensions of the Famine Insurance Fund; absorption of the provincial resources and balances; suspensions of useful administrative reforms and expenditure; and taxation. I shall speak of each of these and say how the Budget deals with it.

"(1) *The Famine Insurance Fund, otherwise called the Famine Insurance Grant.*—During the past twelve years the grant appears to have been five times suspended and twice curtailed. The Government could not have done a better thing than taking advantage of the present prosperity to reconstitute the Famine Grant on its own basis. That grant was a sacred trust which ought never to have been diverted to other purposes. It is no use complaining of the past, and in view of the uncertain character of the present season, after the long spent impunity we have enjoyed, the country will breathe more freely when it learns authoritatively that your Excellency's Government is prepared to accept the pledges so solemnly given when the fund was first constituted. The Hon'ble Sir James Westland gives reasons to justify the resolutions of the Government of India to reduce this provision for famine from a crore and a half rupees to one crore. The propriety of the policy which is now announced of reducing this grant by one-third of the amount fixed by Sir John Strachey and Lord Lytton may be questioned, considering that during the last fifteen years the total sums spent on various accounts under this head represent an average expenditure representing one crore and sixteen lakhs. Even if the reasons assigned by Sir James Westland be as cogent as they are represented to be, the further question arises whether this reduction of the grant does not require the Government of India that they should remit those special taxes which were imposed for this special purpose when famine insurance was accepted as a State obligation by the Government of India. Sir James Westland's remarks throw no light on this head, although it is a matter on which the provinces affected by this special taxation will naturally claim immediate consideration at the hands of the Government of India.

"(2) *The provincial resources and balances.*—Besides reconstituting the Famine Insurance Fund on partial footing the Government of India has been able, chiefly by reason of rise in exchange, out of its realised surplus of nearly three and a half crores in the revised estimates of the present year, to pay off the whole of the Chitral expenditure of nearly two crores and to return back to the Provincial Government forty lakhs of the balances withdrawn from them two years ago. This latter feature will not fail to inspire greater confidence in the binding force of the Provincial contracts—an arrangement entered into from

time to time by the Government of India with the various Local Governments. The appropriation of these balances, during the term of the contracts, has always a very prejudicial effect, and as it now turns out there was no necessity for such interference with existing arrangements. It is to be hoped that, when the next five years' contracts are entered into, guarantees may be given that recourse will not be had to such interference. It necessarily tends to unsettle Provincial arrangements.

"Towards the conclusion of the first part of his statement, the Hon'ble Finance Minister, with his usual ability and clearness, discusses the question how far Provincial revenues are appropriated to Provincial purposes and how far they are diverted to supplement Imperial revenues appropriated mainly to Imperial charges. His position is that, taking the distributable and non-distributable items of revenue and expenditure, the claims of the Provincial administration are not unduly sacrificed to subserve Imperial purposes. He estimates that the non-distributable items of revenue, including Opium, Salt, Customs, Post, Telegraph, Mint, Miscellanous and Railways, come to about 28 crores, and the contributions by the provinces from their net receipts come to about 21 crores, making about 50 crores, which represent the non-provincial items of expenditure on the Central Administration, the Army interest and Famine Insurance charges spent in India, making a total of 22 crores, and the English charges, Army interest, Superannuation allowances and other items, which with exchange come to about 2c crores. In other words, the Imperial charges are about 50 crores and the receipts about 28 crores. The deficit is made up by 22 crores contributed out of their surplus revenues by the provinces. While the Imperial revenues are thus short of Imperial charges by 22 crores, the Provincial revenues under distributive heads are 48 crores and the Provincial charges are 26. The representation is perfectly correct as far as it goes, though it does not cover the whole field of Indian finances. It moreover fails to take account of the main grounds on which the complaint made by the provinces really rests.

"This complaint is not, as the Hon'ble Member puts it, that each province thinks the richer provinces have a surplus which they are made to disgorge for the poorer provinces, but that under the present arrangements the poorer provinces are made to contribute more than their proper shares in order that the richer provinces might not be taxed their full share of the Imperial contribution. On the basis of the figures furnished in the Financial Statement I have tried to prepare statements which bring out this fact more clearly than what I could actually describe:—

PREPARED FROM THE FINANCE REVENUE ACCOUNT, PAGE 24, AND FROM THE FINANCIAL STATEMENT.

Table showing the incidence of taxation per head in the different provinces.

Provinces.	Total.	Land.	Salt.	Excise.	Customs.	Other heads.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Central Provinces	1 5 4	0 9 9	0 2 6	0 4 1½	...	0 5 9
Burma . .	6 0 4	3 3 9	0 3 6	0 7 10	0 10 9	0 15 7
Assam .	2 2 3	1 1 9	0 2 4	0 7 10	...	0 4 1
Bengal . .	1 5 5	0 8 9	0 3 9	0 2 9	0 0 6	0 3 6
North-Western Provinces and Oudh.	2 0 7	1 3 6	0 2 4	3 1 11	...	0 4 5
Punjab . .	2 3 3	1 2 3	0 3 0	0 1 7	...	0 5 4

Irrigation	1·75	Buildings	·5
Military Department	·8		
TOTAL	48·15		48·5

"It appears from these statements that while in the rich Gangetic province of Bengal the land-revenue charged is only eight annas per head, it is as high as Rs. 2-6 in Bombay and even in my poor province the charge is nearly ten annas per head. Under Excise the same story is repeated. The total charged per head of distributive revenue in Bengal is Rs. 1-5-5, the same as in Central Provinces, while in Bombay it is as high as Rs. 4-3-5. It is this unequal distribution of burden involved in the present arrangement which is really the subject of complaint. The poorer provinces are taxed more than their capacities, while the richer provinces pay less than their shares. The charge of net revenue contributions made to the Imperial Government per head of population is ten annas in Bengal, while it is Re. 1-6 in Bombay and Madras, Re. 1-3 annas in North-Western Provinces and Oudh, and 14 annas in the Punjab.

"If the calculations partially made by the Hon'ble Sir James Westland in his statement be extended on the same principles so as to cover all the expenditure and receipt, it would be found that roughly speaking out of 96 crores of rupees raised as revenue in India the purely Imperial receipts (Opium, Salt, Customs, Tribute, Interest, Post, Telegraph, Mint, Irrigation and Railway Works, Miscellaneous) represent a total nearly of 48 crores, which is realised for the Imperial Government through the Local Governments or directly through its own agencies, while Lands, Stamps, Excise, Rates and Taxes, Forest, Registration, Civil and Miscellaneous Receipts, which may be regarded more or less Provincial, amount to another 48 crores. Out of these 48 crores the Local Governments are permitted to spend about 24 crores on their own responsibility under the system of Provincial contracts, and the remaining 24 crores are paid over to the Imperial Government which spends 33 crores in England, 37 crores in India, making in all nearly 70 crores. The remaining 26 crores are all that are really spent on Provincial purposes. If, instead of Imperial Government assigning at its own sweet will what it thinks a fair share in Provincial charges, the Local Governments were required to pay their fixed proportion on the principle of population or income, to supplement the Imperial receipts, a more healthy state of things would spring up than the present centralising arrangement permits and all cause for local complaints will be removed.

"My Lord, I have only ventured to press these points upon the attention of the Council. The expected fall in exchange and the rise in the rupee price will I am sure establish better relations between income and expenditure and enable your Excellency's Government to remit the heavy additional taxation which has been imposed during the past few years to meet the crisis. When this time arises your Excellency's Government will no doubt weigh the claims of the people of India for relief, though these claims cannot for obvious reasons be pressed with the same urgency as those of the manufacturers of Lancashire in whose interests the Council has already gone so far as circumstances require. Properly speaking, when the finances permitted reduction in taxation, the poor

population of India should have been the first to feel the benefit of the remission. I hope when the next opportunity arises your Excellency's Government will redeem its word by granting this promised relief.

" *Administrative reforms and useful expenditure.*—These have been neglected. The department of police, for instance, demands a thorough revision. Time is come for making educational and departmental tests the essential qualifications for higher appointments in the police. There has been a universal cry for the separation of the judicial from the executive. The expenditure on public education is exceedingly meagre and has not kept pace with diffusion of education and rising taste for learning. The pay is inadequate and promotion bad. A general discontent among the schoolmasters is the natural consequence. Men of sound learning and impressive character shrink from the service. Minds entrusted to the care of this body of men are sure to imbibe at a very seasonable period some tincture of their teachers' spirit. Useful public works have been likewise stopped.

" So long as our expenditure abroad is thus increasing there can be no hope of having these requirements satisfied. A proper re-adjustment of revenue expenditure and utmost economy have been axiously called for from every quarter.

" Last year the Hon'ble Finance Member showed a decrease of taxation 4·5 millions. No doubt the receipts under taxation in 1883 were 33·678 millions sterling. Those in 1894-95 were 29·528. But he omitted the income of the country. Were it likewise reduced to a sterling basis it too would have shown a corresponding decrease. During the twelve years from 1883 to 1894 taxation has increased 35 per cent., whereas it has increased in the United Kingdom in the same space by only 14 per cent.

" The subject of agriculture may justly be called the burning question of the day. It now demands the immediate attention of those whom it has pleased God to place over us. Further postponement of this matter would amount to the neglect of a solemn trust. The population of India may fairly be estimated at 30 crores. Of this a little above 80 per cent. live on agriculture, and nearly 10 per cent. live or trade on the produce. We admit we have unprecedented blessings of peace and safety. We must acknowledge the rectitude of purpose of our rulers. Our only complaint is that a proper investigation has not been made of the real state of things. The breaking of the ice is only difficult. The rest is smooth enough. None but your Excellency's Government can do this. On account of the security of person and property, on account of peace and tranquility conferred upon us, the Indian races breed rapidly. The increase of mouths has necessarily to be fed. The area of cultivation has not kept pace with the increased needs of an over-increased and ever-increasing population. No agricultural improvements have been introduced. Rude system of agriculture, unmanured cropping, continuous cultivation have all as it were conspired to contribute to the fast proceeding exhaustion of the soil. Crops have begun as a matter of natural consequence to yield diminishing returns. The proverbial indebtedness of the agricultural classes has however kept its just measure and time with the other difficulties. If the Government be the sole proprietor of the soil, as such, and also as a State, it doubly becomes the bounden duty of the Government to put it right.

" The salt duties were enhanced in 1888. In 1886-87, 3,37,35,054 Indian maunds of salt were consumed, whereas in 1894 the consumption was 3,41,50,507 maunds, or only 4,15,453 maunds more than in 1886. The population must have increased by about 23 millions. The normal rate of consumption of salt per head of population is 10 lbs. The consumption per eight heads of population is therefore one maund per annum. The increase of consumption proportioned to population ought to have been nearly 33 lakhs of maunds; but the increase is only 4 lakhs of maunds and a little more. The consumption has thus, it is plain enough, fallen by 25 lakhs of maunds. Such is then the poverty of the masses that a slight increase in duty has caused a diminution in the consumption of an indispensable necessary of life such as salt.

"*Numerous other proofs may be given of the strains on the poor.* It would be impossible to produce all. I have tried to avoid as far as possible arguments requiring a deal of reasoning. For instance, there is a general rise in prices, but wages have remained stationary. The acknowledged principle of taxation is that it should not affect the national industries. There is again nothing to rely on should these happy peaceful times threaten war. In times of peace we should prepare for war. We deprecate such an event, but we must have a large surplus in the shape of preparation.

"This increase of taxation has features which cannot be made light of. There is every certainty that your Excellency's Government will soon take such measures as may tend to lighten taxation and relieve the anxieties of our men. The position which Lord George Hamilton holds is briefly one of financial equilibrium—a test considered to be an acknowledged proof of its soundness. But there lies underneath a grave and serious peril to which we ought to be no longer blind.

"It is no use discussing where the money thus raised was spent. It is far from my mind to throw any unjust and undeserved odium on this or that administration or on this or that individual administrator. It is the entire system which has given birth to these difficulties. So long as this whole system has not been altered no part of the evil will be uprooted.

"My Lord, I have briefly tried to bring out the nature of our present financial position. I have also tried to show that though we are all very jubilant to-day there is no knowing how exchange may rise or fall. I have also shown the justness on the steps taken in partially restoring the Famine Insurance Fund and in re-imbursing the Provincial treasuries with the balances taken from them. It only remains for me to add a few more things connected with expenditure on which the Financial Statement is notably silent, though it has made some trifling savings by way of economy in different administrations.

"The exchange and opium had a continual fall since 1883. The former entailed a loss of 9¾ crores exclusive of additional payment to European soldiers. The aggregate excess loss in consequence of exchange from 1884 to the present date amounts to nearly 60 crores. The increase in Home charges has since been about 2 millions sterling, due mainly to military expenditure and increase of loss on railway accounts.

"Opium receipts also showed a continual deficiency compared to those of previous ten years to an aggregate of nearly 6 crores of rupees. Both these losses were beyond the control of Governments.

"Towards the close of 1885 followed a tremendous extension of the frontier forward policy, special defence work, fortunately not given a prominent figure in this year's budget, and the recruiting of the armies.

"The frontier policy necessitated an aggregate expenditure of nearly 68 crores and added six to the permanent annual charge. The real cause of the financial difficulties is not the exchange, but it is this expenditure. Railway extensions have been carried on with little regard for costs. It is not necessary to think of the exchange compensation grant. The total expenditure has risen to 85½ crores, making a permanent addition of 9 crores. Placing the military expenditure of 1887 and 1893 side by side with each other, the latter has risen to nearly 2¾ crores. Of this net increase in the charges both effective and non-effective is one crore and eighty-three lakhs, while the increase due to exchange is only 96 lakhs.

"Such is the increase in a department whose charges are already tremendously heavy.

"Though people have an incomplete knowledge of statistical study and though they cannot account for the premises of their reasonings, this is the inference they have drawn. It is difficult for a non-official member to presume to lay his fingers on established institutions. It was my duty, my Lord, to lay before your Excellency the causes of this embarrassment.

"Your Excellency's Government can best remedy the shortcomings adverted to. As regards the provinces which I have the honour to represent I must state the Finance Minister has been rightly informed as regards the

crops there. I am glad the Hon'ble Member for Finance proposes restoring the contribution taken from that administration. I am aware, though the cultivators are warned that the remission granted owing to failure of crops would be claimed in the year following, they are never exacted with much rigidity. There has been a continued failure in some parts and an entire remission is therefore very imperative. Some lenient rules ought to be framed for recovering arrears allowed to accumulate. If Government were to realise their arrears in one or at the most two years, the cultivator has no option other than that of borrowing. A complete remission in hard cases and a partial one in others would be desirable. The arrears in the latter cases were better collected in four or five annual instalments. In cases like this the Famine Insurance Fund may be partially utilized. If it be taken out of the pockets of the people in times of plenty to meet famine contingencies, it may be spent to meet their wants in times of scarcity. I am sure such steps will be taken both by the Local and the Central Governments.

"In this year's budget protective railways constitute the most important head of expenditure. Most of them are constructed for protecting the North-Western Frontier. The vigorous prosecution of railway construction has already largely added to the net loss to the State during previous years. Several of the new lines are strategic.

"There appears to have been much unnecessary outcry against the special grant for mobilisation purposes. Unless another war were in contemplation this item would necessarily pass into the surplus very likely to be attained over and above the margin presented in the Budget.

"There is now no use raking up an old question decided once for all. Legislation deemed it necessary to forego an income of about half a crore imposing a burden of about 8 lakhs on this country. But it could not be helped. Clouds are gathering on the horizon and there are indications enough of a gathering tempest. We have every assurance in that case that the Indian Government will assert its own.

"On the whole we cannot but admire the cautious spirit which reigns throughout the budget. Even supposing the exchange to fall, and even supposing the opium revenue to fall as it threatens to, it will be found at the end of the year that there is no shortcoming."

The Hon'ble NAWAB AMIR-UD-DIN AHMAD KHAN, BAHADUR, said:—"My Lord, I am very glad to be able to say that I do not feel myself called upon to take up much of the time of Your Lordship's Council to-day, or to enter into any detailed criticism of the Financial Statement now under discussion. Feeling sure, as I am, of the desire of your Excellency's Government to do what is right, and in the best interests of the people of this country, having due regard to the duty that is laid upon it by the control that is exercised by the authorities to which it is responsible, and knowing, as is well known, that the financial interests of the Empire are at present committed to one who is eminently fitted to deal with and control them, I confidently anticipated that the Budget for the ensuing year would call for no unfavourable comment except, perhaps, from those who consider it a privilege or duty to attack everything that the Government may do, and my expectations have been fully realized.

"The Financial Statement for the year 1896-97, which was presented by the Hon'ble the Finance Minister at last Thursday's Meeting of Council, is one which I think the Government of India have good reason to be satisfied with. A surplus of nearly one crore of rupees is shown in the revised figures for the year now drawing to a close although a very large expenditure, which was not provided for in the budget estimate, had to be incurred. This in itself is matter for congratulation, but when it is remembered that this great expenditure includes amounts which denote first, the large sums debited on account of the Chitral Expedition, second, the redemption of the pledges of the Government in respect of insurance against famine, and, third, the repayment of the contributions levied from the several Provinces, the result shows that the Government has maintained its reputation for an earnest desire to do what is right, and the best that circumstances will admit of.

"The budget estimate for 1896-97 may on the whole, I think, be regarded as illustrating the prosperous condition of the country and the soundness of its financial position, and the forecast of the year, as far as it is practicable to make one, may safely be accepted.

"A budget estimate is necessarily liable to be affected by causes beyond human control, a fact which the Hon'ble Finance Minister is not slow to admit; nevertheless I for one cannot but express my appreciation of the prudence that has led to the cautious estimates of revenue which have been framed by the Hon'ble the Finance Minister in order as far as possible to be prepared for any unforeseen causes, which may operate to affect the estimates unfavourably. This is especially shown in the very moderate estimate of the gain in revenue due to the rise in exchange, for, although the present state of the silver market might justly warrant calculations at a higher rate than has been adopted, that rate will most probably prevent dislocation of the estimate and any difficulty that might be caused by an unexpected reverse. Another feature in the Financial Statement which has struck me as indicative of a wise policy on the part of the Government is the determination to improve the resources of the country by the extension of irrigation works and the constructions of railways, and additions to lines already opened out. This is in my opinion a step in the right direction which would no doubt have been taken years ago but for the state of the finances of the country which has for sometime past caused uneasiness.

"My Lord, as I indicated at the beginning of my remarks, there must and will be critics who will endeavour to pick holes, but on the present occasion they must endure the disappointment they will have to suffer in that they cannot find even a decent pretext for raising their voice against the annual Financial Statement which is now under consideration and which will, I have no hesitation in saying, call forth general approbation and tend to free the public mind from undue anxiety as to the intentions of the Government or the prospects of the future."

The Hon'ble MR. REES said:—"The hon'ble gentleman who opened the debate with all the authority which attaches to the representative of the Chamber of Commerce has already dwelt upon the most salient feature of this statement, and few, if any, who have the interests of India at heart can doubt that in the discriminate multiplication of railways lies the greatest good of the greatest number of its inhabitants. And my hon'ble friend Mr. Ananda Charlu who will speak next, clothed in a still more comprehensively representative character, will no doubt discover other merits in a Budget, the criticism of which is likely to eventuate in a chorus of congratulation. I would only beg for your Excellency's indulgence for a very few minutes to briefly refer to two or three provisions which cannot but increase in a conspicuous measure the material prosperity of Southern India in localities with which I have an intimate acquaintance.

"The first of these is the allotment of six lakhs for the water-supply of Bangalore. For many years successive Residents in Mysore, two of them distinguished officers of the Corps of Royal Engineers, and successive Governors of Madras have had this problem before them, and have sought to devise a scheme for its solution; but either because none was suitable, or because it was doubtful which was most suitable, or because funds were not forthcoming, little has been effected till this present time. With an admirable climate, and with all the advantages and amenities of one of the most favoured localities in the country, the water there has not been the best thing, but the worst, and there has been so little of it as to give rise to annual apprehension. In future upwards of 180,000 souls in city and cantonment, and the whole population of surrounding British and Mysore districts, which use Bangalore as a health resort, will directly or indirectly benefit by the blessings of an improved water-supply. Had the late Maharaja of Mysore, who provided a supply for the city, been spared, none would have rejoiced more than that admirable Prince to witness the grant of this boon to the inhabitants of the small tract of Mysore which is under British administration.

"The six lakhs of rupees required in the coming year for the improvement of the Coum River are provided by the Provincial Government, but by sanctioning this allotment and by passing the large estimates prepared, the Government of India has co-operated with that of Madras in the greatest effort yet made to heal a running sore which has baffled successive Administrations probably ever since the British flag has flown at Fort St. George and has contributed in no small degree to raise Madras, as judged by its death-rate, to a bad eminence among the insanitary cities of the world. Nothing so much as the improvement of the Coum will conduce to removing it from that index.

"The Hon'ble Finance Member in his speech last Thursday referred to a new and interesting feature of the present Budget, the statement showing the financial relations between the Central and the several Local Governments and the use which is made of provincial contributions, and he trusted that the figures given would show that there was no foundation for the theory that provincial surpluses are absorbed by the Imperial Government for expenditure on objects foreign to the provinces in which they arise.

"But however interesting and useful these figures are to dissipate a belief which I venture to think is not wholly peculiar to 'non-official circles,' the present Budget affords a most convincing refutation of any such theory in the liberal grants made for railways not only in adjacent, but in remote provinces, which exceed, I believe, those of any previous year.

"The matters to which I have referred, though of supreme local importance, are altogether insignificant beside the grant of Rx. 137,800 for the completion of the East Coast Railway between Bezwada and Cuttack, and of Rx. 800,000 for the Madras-Bezwada line, probably the largest sum which can consistently with efficiency and economy be spent in a single year.

"If to these amounts be added the advance of Rx. 750,000 to the Bengal-Nagpore Railway, of which perhaps Rx. 500,000 will be devoted to the East Coast connection, little less than Rx. 1½ millions is provided for the completion of railway communication between Calcutta and Madras, which it is believed in no long time will be reduced to a matter of 44 hours. Quite lately such a prospect would have been regarded as an optimistic dream.

"There would be no justification for occupying the time of your Excellency's Council in demonstrating the acknowledged fact that the speedy construction of this line will result in unnumbered advantages to several contiguous and populous districts, at present so little in touch one with another that in 1889 Ganjam suffered from famine while its neighbours enjoyed normal prosperity.

"But it is difficult for one who upwards of twenty years ago knew the Northern Circars at all times cut off by land and not infrequently when cyclones raged in the Bay cut off by sea from all communication with the rest of the Indian world, to pass by these liberal grants without endeavouring, however inadequately, to express on behalf of nearly nine millions of inhabitants of upwards of 31,000 square miles of Madras territory a satisfaction keenly felt by the industrious and estimable Telegu people, which is not articulate in proportion to its worth.

"If I have not referred to the restoration of the Famine Insurance Grant it is because a Railway Budget is in the best and widest sense of the word an insurance against famine as well as an advance all along the line.

"There is an Arab proverb current in India, 'Better an hour of justice, than seventy years of prayer.' So little do I think that the Hon'ble Member for the Central Provinces is right in holding that the construction of railways has pressed heavily on the Indian peasantry, that I believe, if rural India could be polled, it would answer in a paraphrase of this proverb and would say, 'Better a line of railway than all the other services of civilisation.'"

The Hon'ble ANANDA CHARLU, RAI BAHADUR, said:—"May it please your Lordship, I cordially congratulate the Hon'ble Finance Minister on his very able Financial Statement, subject to some few exceptions; and as to these exceptions I cordially sympathise with him in his personal inability

to get rid of them. With all these latter, it is hardly possible to deal at present; but some of them I cannot but discuss at some length, for which I beg to apologise.

"It is highly gratifying to note that the question of questions of vital interest to the people of India, that of the Famine Insurance Fund, is again taken in hand and a provision has been made towards it on the credit side. It is deservedly given the first and foremost place. I do not see, however, why it is called a *self-imposed* obligation. It is, I believe, an obligation, compulsorily thrust on the Government by the necessities and conditions inseparable from the administration of a country subject to repeated recurrences of famine almost as a matter of course. If so, it is like all other obligations which are forced upon the Government by causes extraneous to its mere will and pleasure. If this has been specialised as self-imposed in order to facilitate its suspension in the future, as has too often been done in the past, I must strongly object to it as the introduction of the thin end of the wedge to initiate an unsympathetic and radical change of policy. Again, I first thought that it was nothing more than an accident that the well-known name—the Famine Insurance Fund—was discarded in favour of the new designation, the Famine Insurance Grant. To my mind and to the general public the former conveyed and conveys the idea of a trust already created and already existent, while the latter denotes a mere creature of option—not importing any sense of obligation. But this seemingly slight change of nomenclature appears to have a history behind it, and it has been followed by the systematic use of such expressions as 'famine insurance policy,' 'obligation of famine insurance,' and so forth, to the studious exclusion of the word "Fund"; and it is too much to be feared that power is meant to be taken or retained henceforward to grant the provision, to withhold it, or to withdraw it, or as it suits the exigencies of each year. To this substantial change of front I must indeed object. I fear there is, beneath the surface of an acknowledgment of the obligation, a distinct undercurrent, undermining the policy originally inaugurated and the pledges given when the Famine Insurance Fund was brought into being, under a deep and harrowing sense of responsibility for human lives, by Lord Lytton, a horrified eye-witness of the palpable havocs of famine—chiefly in the Madras Presidency. There are, in the Financial Statement before us, other indications accentuating this fear. This fund —I prefer continuing to call it by the name with which it was first christened—this Fund as set forth in the Financial Statement under debate is to be devoted (1) to actual relief of famine when it occurred, (2) to measures calculated to prevent the recurrence of famine, and (3) to facilitate measures of relief on its occurrence. Let us see how the purposes of that Fund were described at its creation.

"Now, looking back upon the history of this Fund, from the records available to me, it appears that the question of organising some system in the direction of preparing against famine was first taken up by Lord Northbrook.

"Sir John Strachey, speaking in connection with his Financial Statement for 1877-78 on the 27th December, 1877, said:—

'He (Lord Northbrook) determined that to enable the State to meet the serious obligation of preventing and relieving famine, it was necessary to secure in prosperous times a substantial surplus of revenue over expenditure in addition to that necessary margin which a prudent administration demands for the ordinary requirements of the State. Due provision would thus be made for meeting occasional expenditure upon famine. He urged that if this surplus were devoted to the reduction of debt or to preventing the increase of debt for the construction of reproductive public works in years of ordinary prosperity, there would be no objection to the public expenditure exceeding the public revenue in occasional years of adversity, so that we might then without objection meet the charges on account of famine from borrowed funds, to the full extent to which our surplus had permitted the discharge of debt or prevented its increase.'

"The policy herein indicated may be put thus:—

1. Secure a substantial surplus in prosperous times.
2. Make out of it due provision to give actual famine relief.
3. Devote the rest of it to (1) reduction of debt, (2) to prevent increase of debt, and (3) to the construction of *reproductive* public works.

4. Thus enable Government at any given time to borrow funds to meet the charges on account of famine, when they actually come on.

" That embryonic policy had to be essentially modified, proclaimed and strengthened with clear pledges, when Lord *Lytton* came face to face with the ravages of the dread spectre! In his minute, in his speeches from his place in the Council, and in his replies to public bodies, he made his meaning abundantly clear that *every year* an allotment of *a crore and half of rupees* should be *religiously* set apart, and that, among other things, the sums, so to be set apart, should be *actually* and *loyally* invested in a particular class of public works which he indicated pretty intelligibly, irrespective of other works, generically similar perhaps, but admittedly different in character.

" Here are his chief utterances on the subject :—

' Well, then, I think I am entitled to point out to the Council that we are not now fairly open to this customary criticism. We do not speak without having acted; and we promised nothing which we have not, after long and anxious consideration, provided ourselves with the means of performing. I must have very imperfectly explained myself thus far, if I have failed to make it clearly understood that I am not now speaking of what we ought to do or would do, to insure this country against the worst effects of future famine, had we only the means of doing it; but of what we can do, and will do with the means already provided for in the measures now before the Council. I do not mean to say that the construction of such an extensive system of local railroads and irrigation works as we propose to undertake, will not be the gradual task of many years. But I *do* mean to say that in the manner and on the principle already explained we are now providing for the prompt commencement and uninterrupted continuation of this great and necessary task.

' As the representative of the Sovereign of India, I regret that such language should have been held to me by you.......The sole purpose of the additional taxation, you complain of, was the preservation of the lives of the people of India from the effects of famine...... Whatever may be the faults or shortcomings of this Government, its action in the matter to which your address makes reference was dictated by the sincerest and most anxious desire to give the people of India the greatest protection which could practically be provided for them against the calamities of future famine. To insinuate the contrary is to insinuate a calumny.'

" The passage below sets forth the engagements of the Government in Lord Lytton's own words :—

' *1st.*—To apply funds from the surplus revenues at the rate of 1½ millions sterling per annum in such a manner as to create what shall be, in fact, an Insurance Fund, from which future expenditure for famine relief can be provided for without adding to the permanent burdens on the revenues.

" *2nd.*—To bring about this result, either by the direct discharge of debt in times of prosperity or by investments of surplus revenue in productive public works under conditions that shall ensure their being really remunerative, and that they shall at the same time supply to the country the best material protection against famine.

" *3rd.*—To comply with this condition carrying out in all the provinces of India as speedily as our financial position and other economical considerations will admit all approved extensions of irrigation, and a complete system of cheap railroads, primarily and specially adapted to a slow goods traffic.

" *4th.*—To secure to the utmost the finance basis of this undertaking by assigning to, and concentrating upon, the Local Governments the financial responsibility and administrative powers necessary for the designing, commencement, completion and maintenance, within their respective provinces, of such a system of works as shall fulfil the requirements of the case for each of them.

" *5th.*—To arrive at this result by giving to these Local Governments the maximum of pecuniary interest and profit in the cheap construction and successful management of all provincial public works by reducing to a minimum interference on the part of the Government of India in the administration of such works, and by not permitting such interference to extend beyond what is necessary to ensure regularity and harmony of action or protection to the general financial interests of the State.'

" Placed side by side, there is a very striking, and I shall add a very startling, divergence between the two. One cannot help reading between the lines and noting with profound sorrow an ill-concealed disposition to starve this Fund in order to meet the cost of measures which are more or less dictated by the

general obligation the Government is under to meet commercial or strategic needs, and to develop the resources of the country and which it is bound to undertake for their own sakes and quite apart from any relation to famines. These, for purposes of distinction and easy reference, I shall call non-famine public works, including both large irrigation measures and railway constructions. The phrase 'measures calculated to prevent the recurrence of famine and the phrase 'to facilitate measures of relief on its occurrence,' which are used by the Hon'ble Finance Minister, are far too elastic and far too vague. Given a certain amount of skill and ingenuity, I do not know what measures could not be easily lugged into these categories, irrespective of all specifications in the past. Every railway construction by affording easy transit for food-grains, and every work of irrigation by serving the same purpose and rendering the further service of watering more extended areas of cultivated land, must to some extent help to check famine and might any day be declared to come under the latter of these words. What is the permanent differentia? Is it to be the will and pleasure of the holders of the portfolio for the time being? I do wish that the Hon'ble Finance Minister had more unequivocally enunciated his restricted meaning and shewn the amount of famine public works already accomplished and yet remaining to be accomplished out of them by means of a map or sketch indicating the former and the latter in different colours. In paragraph 4 of the Financial Statement it is stated that a total sum of Rx. 1,815,724 has been spent upon the construction of irrigation works out of the Famine Insurance Grant within these fifteen years. The first thing that strikes one is to ask why is there no table or explanation as to how this Fund had been dealt with from the date of its creation, namely, from 1878 down to 1881-82?.

The Hon'ble SIR JAMES WESTLAND: "Government publishes this every year. The whole thing is available to the public whenever they like to ask for it."

The Hon'ble ANANDA CHARLU, RAI BAHADUR, said he was not aware of the existence of any such return or explanation.

THE HON'BLE SIR JAMES WESTLAND: "I think, before that accusation against the Government passes, I should like to hand the Hon'ble Member a copy of the return in question."

The Hon'ble ANANDA CHARLU, RAI BAHADUR: "I only want the assurance. That is sufficient. Is it that, during that interval, the entire Fund was devoted to famine relief and famine works? Or is it that its very existence was all these years ignored? I crave a solution of these doubts. The next thing that occurs to me is to ask for information whether the sum named represents the cost of the *entire* irrigation work constructed during that period or of a *portion only*, *i.e.*, the portion debitable against the Famine Insurance Fund? A misgiving is created by the fact that whereas, as regards the railway construction, a distinction in this respect is shewn in the table, no such thing is done as regards the irrigation works. If only a portion, I shall feel thankful if information is afforded as to the location and the cost of the rest. A natural misgiving arises from the very phraseology employed by the Hon'ble Finance Minister. In describing the source out of which the amount of their cost was taken he does not content himself with saying that they came 'out of the Famine Insurance.' But he hastens to add, '*i.e.*, out of our revenue.' Are these identical expressions? Or is it an attempt to be true to the ear but not to the hope?

"Next as to what is said on the railway construction. I have to ask about this also, for information as to the period prior to 1881-82, such as I have desired as regards irrigation works. A further point requires clearing up, namely, a specification of the railway construction already completed, as distinguished from those which yet remain to be taken up, and why so. It would have been a considerable help if it had occurred to the Hon'ble Finance Minister to indicate this also, in a map or sketch as an annexure to the Finan-

cial Statement. Such maps or sketches would also be valuable as guides in respect of future operations in the direction of safeguarding famines, and ensuring unintermittent attention to famine public works. Now it is quite possible to seize and carry away, year after year, by the right (*i.e.*, the wrong) hand and for non-famine public works what are annually doled out to famine public works by the left hand.

"If the humane policy, which dictated a yearly allotment of a crore and a half and a utilisation of it in famine public works, has been religiously given effect to all these years, we should have to-day famine irrigation work and famine railway construction worth at least a sum of seven crores of rupees over and above what now exists. In the interests of the eighty per cent. of the people, *i.e.*, in the interests of the entire body of agriculturist population in the country, I am bound to say that these seven crores and odd should be put back into the coffers, reserved for actual famine relief and for the completion of the famine public works, as absolutely needful for supplying them with the necessaries of life, if the word *restoration*, which is so freely and so frequently diffuse throughout the Budget, is to receive its full meaning. The so-called restoration of famine insurance in the present Budget is to me, therefore, not a matter of such jubilation as it evidently has been to others whose eyes do not fall on the toiling millions of the country and who, somewhat like the barber in a Tamil story, have in their carpet-bags a small ingot of gold and will hence say that, in this land, there is none so poor as not to possess a nugget of that precious metal. I shall be deeply grateful if I am at least told whether the Fund is to be ever recouped, according to this measure of justice, if not in the immediate present. I shall also receive with an equal gratitude a further assurance as to whether the policy, now meant to be recognised and carried out, is the policy as laid down by Lord Lytton's Government, and whether annual contributions would be, hereafter at least, loyally made, to make amends for the past neglect of years; for it is surely no satisfaction to be referred, year after year, to works such as are mentioned in paragraph 4 of the Financial Statement.

"I am indeed perfectly certain that whether the Famine Insurance Fund existed or not the Government would laudably rise to the exigencies of famines whenever and on whatever scale they might occur, and that it would generously and humanely grapple with them at all cost. But that is a species of obligation quite distinct from the inviolable obligation to put back the consecrated money where it was or where it should have been, or shew it in the form of famine public works already completed and in a working order. The very fact that, side by side with the general obligation to fight famines, a special reserve under the name of Famine Insurance *Fund* was set on foot shows that contributions to it were meant to be regularly made and uninterruptedly utilised for the intended purpose, without division and without being subject to the liability to lapse, at the end of each year, into the common exchequer. It must have been so set apart, as is easy to realise, for the very reason that, when famines do come, the Government may not have to strain its giant strength and put forth its uttermost efforts to cope with them, as it had to do, to its bitter experience, during the famine of 1876 and 1877, chiefly in the Presidency of Madras; for, with all that the Government could do on that occasion, the public and the British generosity had to be appealed to, with all the weight and prestige of no less than the Duke of Buckingham, the then Governor of Madras. Notwithstanding all this stupendous effort, no less than six millions died by the famine of those years. It was wisely assumed that such unstinted and princely bounty, on the part of the British public in particular, could not always be counted upon and therefore a ***reserve of a crore and half of rupees under the name of Famine Insurance Fund*** was brought into being, in the first instance, to be augmented by a crore and a half of rupees every succeeding year, but to remain untouched except for giving ***actual*** relief in times of famine and except for carrying out famine public works, ***i.e.***, that particular class of works which would directly contribute to ward off occurences of great scarcity. A new and special tax—the license-tax—was imposed for the very purpose of making up and enlarging that Fund. The proceeds of that tax ought to have been, as was pledged religiously, placed to the credit of the Famine Insurance Fund, and when the income-tax has replaced that tax an equal amount out of the collections under the

new impost should have been put into the coffers of that Fund. 'Revive the Famine Insurance Fund or remit the taxation initiated for the purpose' demanded the Hon'ble Mr. Playfair last year. *My demand this year is somewhat different, namely, do not remit the taxation initiated for that purpose, but restore the Famine Insurance Fund loyally to what it should and would have been if it had not been meddled with.*

"It may be said, and it has been said, that miles of famine railroads have been constructed and numerous works of famine irrigation have been completed. Quite true. But it is beside the question. It would indeed be an answer to a charge of absolute non-performance. But how is it an argument why the rest of the promise has remained unredeemed by action? If it be said that there is very little yet left to be done in this direction, then the burden of the tax on the poorer classes must *pro tanto* go. Let the taxable minimum of the income-tax be proportionately raised or let reduction of salt-tax follow, or let a stop be put to the process of squeezing his paltry remnant from the raiyat by so-called re-surveys and re-settlements, the object of which has, till now, been enhancement and nothing but enhancement—such as the Presidency of Madras is, with one voice, lamenting and crying against. This and the like of this are perhaps the basis for the Hon'ble Finance Minister's complacent remarks in paragraph 65: 'Our prospects are now very much more hopeful. Our revenues are advancing.'

"I cannot pass away from this subject without reminding ourselves of certain very appropriate words of Lord Lytton. Here they are:—

'The current claims upon the activities and resources on the Government of India are so numerous, so pressing, so important, official forces and imperial funds so necessarily limited, that when once the daily, hourly strain of a great famine has been removed from a wearied administration and impoverished treasury, its fearful warnings are soon forgotten; its disquieting ghosts are quickly exorcised by the conventional declaration of some unexceptionable principle, its bitter memories decently interred beneath the dull *hic jacet* of a blue-book, and there, for all practical purposes, is an end of the matter.'

"I next proceed to the pronouncement in regard to Chitral. The Honb'le Finance Minister has very properly said that the Financial Statement is not the place in which to defend the policy relating to Chitral. I say, with greater propriety of language, that it is not of any avail (and therefore not fitting) that it should be discussed in this Council. But one single remark has, however, to be made in this connection, namely, that, owing to the accident of a recent change of Ministry in Great Britain, five untoward results to India have ensued, namely, (1) the disappearance of a *good slice* of her previous income, (2) the permanent addition to her already over-burdened expenditure by reason of retaining Chitral, (3) the postponement of a performance of a long-standing and deliberate promise to relieve her suffering poor by a reduction of the salt-tax, (4) by a fresh burden in the shape of taxation on the coarser goods which alone are available to the poor in the land, and (5) a burden of 15 lakhs a year in the shape of interest on the loan of four crores that has been announced to be in immediate contemplation. This is matter, perhaps, for serious reflection on the part of those who still cling to the fond belief that Indian affairs are outside the sphere of the party politics of Great Britain and Ireland.

"I proceed and I note that the entire income derived from the whole of the irrigation works and railway construction is coolly put down as available for the general purposes of the Imperial administration. This seems to militate against what was laid down by Lord Lytton in respect of the profits of true famine public works. Let me repeat his words in this context:—

'To arrive at this result by giving to these Local Governments the maximum of pecuniary interest and profit in the cheap construction and successful management of all Provincial public works by reducing to a minimum interference on the part of the Government of India in the administration of such works, and by not permitting such interference to extend beyond what is necessary to ensure regularity and harmony to action of protection to the general financial interests of the State.'

"I pass on to exchange and opium. I heartily congratulate the Hon'ble Finance Minister on the cautious data on which he has based the Budget so

far as the exchange and the opium revenue are concerned, and on the hopeful prospect of further betterment which he asks us to cherish regarding these shifting causes of Indian misfortune. Having regard to that prospect, and believing with others that the rate of exchange might not fall below *14d.*, I should receive with gratitude—not only I myself but the entire country would so receive—an assurance from the Government that, so soon as the exchange or opium rendered it possible, the reduction of the salt-tax and the raising of the taxable minimum of the income-tax would engage its very first attention.

"As regards the attitude of the Central with the Provincial Governments, it is a welcome news that repayments will be made to them of the contributions taken from them in 1894-95. But I must enter a solemn protest against the most extraordinary theory of the mutual relations between the Central and the Provincial Governments, developed and dwelt upon in paragraphs 61 to 64 of the Financial Statement.

"It is, to my mind, subversive of all accepted notions of fairness and propriety. It reduces the Governors of Provinces into gardeners for a far-off absentee landlord and the tillers of soil into his serfs. Just as a gardener cannot touch or call one bunch in the vineyard as his own, so the Governors are to be merely guards and sentinels to watch and see that no one takes any part of the outturn. Just as the serf cannot, *as of right*, look to any good coming to him from the crop which he exerts himself to raise, the people themselves cannot, *as of right*, expect that the share of the fruits of their labour, which they hand over to their Governors, might in the first instance be applied towards their well-being. This is as cruel as it is amazing and unfair. It is difficult to say which to admire—the temerity or the heartlessness of the pronouncement. Every body has been saying to himself that, at the approaching revision of the Provincial Contracts, there ought to be an insistance upon a larger retention by the Provincial Administrations of the revenues they raise. The further idea has also been fondly cherished that, on that coming occasion, Provincial Administrations should ask to be permitted to keep to themselves such sums as they may have by economy saved and allowed to accumulate for large and costly works of provincial utility, in the way of reliefs to municipalities and district boards where the revenues of these latter are not equal to them. It is indeed an irony of fate that, amid all this hope, the bolt should have fallen blasting all that hope. I sincerely wish that this theory—perilous to the welfare of the provinces and perilous to the responsibility and motives to economy on the part of the Provincial Governors as well—will not pass beyond the stage of mere enunciation.

"This Budget is indeed an admirable feat. I can only describe it as an inverted cone, with its apex in the shifting sands of exchange, with all the weight of this year's Indian prosperity mainly poised on that apex. That unstable foundation might any day discover sudden signs of giving way; and to prop up our inverted cone we might have to seize upon every thing ready to hand, even to the extent of further straitening the poor man's food and clothing and his small savings. It behoves us, therefore, to see how to rehabilitate our revenue and to place it on a sound, firm and solid basis. There is but one alternative, and it is but to have the word 'retrenchment' largely writ and put in practice measures tending towards it. A mere cheese-paring policy will never do. The insatiate and never-ceasing demands of our forward policy must be attacked and overcome. Our ever-growing home charges must be considerably beaten down.

"If these are impracticable, then the sole remedy is for Great Britain to come out with a substantial contribution to alleviate India's burden. The colossal and costly schemes of the forward policy are mainly to maintain the British prestige—say what others may to the contrary—and this measure of bare justice is rightly due from the dominant and flourishing to the subject and prostrate country. Without these righteous achievements, to endeavour to promote the happiness or contentment of the people and, in a true sense, to make the two ends meet is—to use a homely simile—to work at the pump and leave the leak open.

"Within these ten years this forward policy has cost us—apart from the wars themselves—an aggregate sum of nearly *seventy crores* and has added to

our permanent expenditure no less a sum than *six crores per annum*; and as for the home charges they have amounted up to over twenty-five crores of rupees. It is to meet drains such as these that the poor man's food and salt are reduced to famine rations, and the hand of the tax-gatherer is laid even on his coarse and scanty raiment.

"This has been said, and said times out of number. The non-officials have said it, and they have been laughed at for their pains. But two predecessors of the Finance Minister of to-day have also said it, with a full knowledge of the arcana of the Indian finance. They have, with the trammels of office, thrown away the dead weight of reticence which sat heavily on their conscience while they held the official portfolio. They have discharged their conscience by boldly denouncing these as the true enemies of India. They, too, have been relegated to the limbo of disdain and scorn. This is the most unspeakable of India's misfortunes."

The Hon'ble MR. CADELL said:—"My Lord, no department is more interested in the success of the Hon'ble Member's financial administration than that which I have the honour to represent, and no one can congratulate him more heartily than I do on the financial prosperity which his skilful administration has been instrumental in establishing, and which among other advantages which it has brought to the country has rendered possible increased effort with respect to public works.

"Notwithstanding what has just been said by the Hon'ble Mr. Ananda Charlu, I think that I am justified in making the statement that so much has been done in former years to secure and improve cultivation in different parts of India, by extensive irrigation works, that there is now comparatively little left to be done on a large scale in that direction, and at all events the irrigation works in hand or sanctioned do not require for their completion an expenditure greatly exceeding 4 crores of rupees to be spread over a number of years.

"The Hon'ble Mr. Ananda Charlu may be surprised to hear that the demand for strictly protective works is a very small one, and does not exceed 4 to 5 lakhs annually for the help of India. A further sum of 10 or 12 lakhs may be necessary for Burma, but as most of the works required there are likely to be remunerative they would not come under the head of 'Protective.'

"In this way financial interest with respect to public works is largely concentrated upon the operations of our railway engineers, whose possible requirements are practically unlimited, and whose immediate requirements have in the Budget under discussion been very liberally provided for. Even the figures given at page 14 of the Financial Statement show very substantial and increasing provision for the wants of the country with respect to railways, and the figures there given by no means represent the whole of the expenditure on railway extension in India, which is due either directly or indirectly to the action of Government, for, as is noticed in the Statement, there are large items of expenditure which do not pass through the Government accounts, and our expectation is that, while in the year which is just closing a sum of 6¼ crores of rupees will have been usefully spent on railways, in the year which is about to begin, no less a sum than 13¼ crores will be so spent, and it is hoped that the Hon'ble Member's provision for the further development of the railway communications of India will be on a not greatly restricted scale in future years.

"But perhaps it will be well that I should leave financial details alone, and that I should restrict myself to the results which this Department has recently achieved or hopes to achieve, and for this purpose a convenient period to consider will be that of your Excellency's administration. When the first complete financial year of that administration began, there were 18,503 finished miles of railway in India; in 1894-95 360 miles were added, and it is hoped that in the year which is about to close 1,009 miles more will now have been completed, and, if it be possible to carry out the programme which has been drawn up, there will have been added, during the period of your Excellency's administration, no less than 4,400 miles of railway, which would constitute an addition of 24 per cent. to the mileage of 1893-94.

'But even the completion of this programme in whatever direction it may be finally altered will leave much work already considered and approved untouched. Important main lines, links which are most desirable if not absolutely necessary, and numerous minor lines, must be omitted, and there will remain very ample room for the expansion of railways in all directions, more especially in such countries as Assam and Burma.

"The most noteworthy events in the history of the Public Works Department during the year which is drawing to a close have been the opening of the Periyar Irrigation work, the brilliant conception and the practical working out of which we owe to Colonel Pennycuick, and the completion of the Mushkaf-Bolan Railway, a work presenting many difficulties which have been overcome by the skill and perseverance of Messrs. Ramsay and Hodson and their staff.

"It is, however, in the addition to our railway undertakings that the year 1895-96 has been most conspicuous. First of all in magnitude and in importance to Calcutta and Madras are the connections now arranged for at a cost of 7½ crores of rupees for linking Calcutta with Cuttack and Madras with Bezvada, which will complete the direct line of railway communication between the two Presidency-towns, and will be most beneficial to the trade of both.

"Another important line between Rohri and Kotri to the east of the Indus is approaching completion, and the projected line of the Southern Punjab Railway from Bhatinda to near Bhawalpur will form an important complement to it, when the bridge over the Indus is finished. The Saugor-Katni Railway forms another desirable link which will render the coal-fields of the Central Provinces accessible to the railway system and Rajputana, and is being arranged for by the Indian Midland Railway.

"In the North-Western Provinces as in certain other parts of India the extension of the railway system of the country has been accelerated by the prevailing scarcity, which rendered the commencement of work desirable, on the extension from Rai Bareli to Benares and on the Bengal and North-Western system.

"In Burma work on the Mu Valley Railway has been progressing steadily an extension has been sanctioned from Mogaung to the river at Myitkina, and the construction of an important line from Mandalay to the Salween river at a cost of 225 lakhs has been authorized and has been begun.

"In all directions there has been marked progress and the foundation has been laid of still more important progress in the near future, and I think it may be said that the Public Works Department of the Government of India, until recently presided over by Sir Charles Pritchard, is taking full advantage of the opportunities which have been afforded by the great improvement in the financial condition of the country which has taken place.

"The Hon'ble Mr. Playfair expressed the hope that more liberal encouragement might in future be given to the construction of feeder railways. I do not think that one who is only temporarily connected with the Government should be its exponent on questions of permanent policy, but in case your Excellency does not discuss this question, I may say that new rules on the subject are under consideration, and will shortly be issued with the effect, I trust, of encouraging private enterprise in this very useful direction.

"The Hon'ble Rao Sahib Balwant Rao Bhuskute has made a statement to the effect that 'protective railways constitute the most important head of expenditure. Most of them are constructed for protecting the North-Western frontier.' As a matter of fact, the only two railways which bear this character are the Mushkaf-Bolan and the Mari-Attock Railways, for the Kotri-Rohri chord line lies to the east of the Indus, and although it will no doubt be used for military purposes when required, it was principally demanded by the commercial community of Karachi in the interests of that port. So far from most of the railways being on the North-West frontier, most of them, it so happens, are on the Eastern side of India.

"The Hon'ble Mr. Rees has borne testimony to the great advantage to the country which is likely to follow the construction of a continuous line of railway from Madras to Calcutta, and there is little doubt that it will serve

the interests of Calcutta and Madras, as much as it will tend to the advantage of the districts traversed and the convenience of the people.

"The chief assailant of the administration of the Government in past times and in the budget arrangements of the present period has been the Hon'ble Member on my right, Mr. Ananda Charlu, who seems to think that protective works have been systematically neglected, and that the administration of the country has been careless of the interests of the people. The Hon'ble Member in charge of the Finance Department will no doubt reply to the Hon'ble Member on the whole question, but I think it may be of use if I describe what within my personal observation has been done to protect the only province, as far as I know in the territories under immediate administration of your Excellency's Government, in which upon any extensive scale relief operations have at the present time been found to be necessary. I happened to be in charge of one of the Bundelkhand districts when famine last threatened in 1877. At that time there was no railway in the province, and if the supply of food had proved insufficient to meet the wants not only of the population of our districts, but of adjoining Native States, there might have been serious difficulty in pouring supplies into a country provided with few metalled roads, and with unmetalled roads peculiarly liable to be rendered impassable if rain had fallen at a time which was too late for the purposes of agriculture. Now the Province is traversed to the west by the main line of the Indian Midland Railway, while to the east a long and wholly unremunerative broad gauge branch passes through three out of the four districts and brings every village in within 50 miles or less of the railway. Both these branches of the Indian Midland Railway have been constructed from the Famine Grant, from which also the annual loss is met. But this is not all that has been done to safeguard the people of Bundelkhand from the worst terrors of drought, for although there was great difference of opinion as to whether it was desirable to construct a canal in a country in which black soils predominate on the level plain, Government decided that the experiment should be tried, and undertook the construction of the Betwa Canal at the cost of some 40 lakhs of rupees. This work has never paid, and has not so far been so beneficial to the country as to justify the construction of the other Bundelkhand Canal which was at one time contemplated. The benefit to the country of the Betwa Canal during a period of scarcity is now being tested. I am certainly not one of those to use words used by the Hon'ble Member 'whose eyes do not fall upon the toiling millions of the country'. I have year after year spent many months each season in contact with the agricultural community, in their villages and fields, and I can certainly say that I have never noticed more especially in the districts which I have mentioned, the harsh and unsympathetic attitude of which the Hon'ble Member complains. Enhancements of land-revenue are only looked for where the circumstances of the country fully justify them, and I am sure that the Hon'ble Member on my left (Mr. Woodburn) will bear me out in saying there is no pressure on the part of Government in that direction. I can for my own part assert that when in one of these very Bundelkhand districts to which I have referred large and important reductions in assessment were held to be necessary, they were granted with the fullest and readiest approval of every authority to which they were submitted. The Hon'ble Member's charges are general, and a mere general assertion to the contrary would have been of little use. I have traversed them by stating what has been done in a single tract of country selected for the sole reason that it is happily the only portion of British territory with which I am acquainted in which during the current year relief operations on a considerable scale have been found to be necessary."

The Hon'ble MR. WOODBURN said :—"I had no intention of intervening in this debate, but as I have been appealed to by my hon'ble friend Mr. Cadell, I may at once confirm what he has said as to the attitude of the Government of India and the Local Governments in the matter of the assessment of land-revenue. I listened with some surprise to the remarks made by the Hon'ble Mr. Bhuskute on the condition of the soil, and of the people who live on

it. In the part of the country with which he is most familiar I have never heard or seen any evidence of any sensible depreciation of the soil within recent times; nor have I heard that crops have as a natural consequence begun to yield diminishing returns. But what I have heard and seen is a great enhancement within the last quarter of a century of the rents which are received by the landlords. No one would be more ready than my hon'ble friend in calmer moments to admit that in that great increase of the landlord's receipts, the State, which supplies protection and the assistance of many services, is entitled to have a place.

"There is one matter in which Mr. Cadell has taken from my lips the only other remark which has been suggested to me by the course of this discussion. I was surprised to hear my hon'ble friend Rai Ananda Charlu speak with such disapproval of the expenditure from the Famine Fund and, indeed, from the general revenues. No one who has seen the influence of railways in tracts where the harvests are short can doubt that almost every railway is in fact a famine protection railway. In Saugor, where two years ago there was sharp scarcity, the railway brought such supplies of food and grain that prices never rose to what used to be known as famine prices. Similarly, in the North-West Provinces in the present year the Lieutenant-Governor has just presented to your Excellency a statement in regard to the scarcity there which is illustrated by those maps that Rai Ananda Charlu would like to see presented to this Council. Each one of these districts is traversed by a railway, and the consequence is that, though there may be much suffering and poverty, the prices will never be abnormal, and it ought to be possible that there shall be no death from starvation."

The Hon'ble LIEUTENANT-GENERAL SIR HENRY BRACKENBURY said:—
"My Lord, I am grateful to my hon'ble colleagues in charge of the Public Works and Home Departments for having intervened between the speech of the Hon'ble Mr. Ananda Charlu and myself, for I feel that it is always a somewhat ungrateful task to bring a debate down from those high, if somewhat misty and vague, regions of Oriental metaphor to which this debate was raised by the Hon'ble Member, to those earthly, but I trust solid and substantial, regions of fact in which I shall have to ask the Council to follow me for I fear some considerable length of time. My hon'ble friend Mr. Playfair, with his usual courtesy, gave me notice of his intention to invite me to explain to this Council some matters connected with military expenditure, and especially the point in connection with the Chitral outposts. I have now to thank him also for his most kindly mention of myself, and for his statement that my efforts in former years to explain in this Council in as clear a manner as possible the facts in regard to our military expenditure in India have given satisfaction to the commercial classes in India; and I trust that in the statement I shall now make I shall be able satisfactorily to account to him and to this Council for much upon which it is impossible for them, without such statements being made in Council by the Member in charge of the Military Department, to have any real knowledge.

"To the best of my recollection I have never heard the Royal Indian Marine mentioned in this Council, but I am responsible to your Excellency for the estimates of that Service, and I should like to say a few words about them. The Royal Indian Marine is a very important service. It contains more than fifty vessels of various kinds. Of these, two armour-plated turret vessels, two gun-boats, and seven first class torpedo boats, constituting Her Majesty's ships and vessels for the naval defence of India, are in charge of the Royal Navy, and are partly officered by officers of the Royal Indian Marine; four are troopships, which carry out the whole of the Indian Trooping Service between India and Burma, and between the various ports on our coasts, occasionally proceeding to England or elsewhere out of Indian waters; one is used as a despatch vessel in the Persian Gulf, while the remainder are employed in various services, including the Marine Survey and the conveyance of troops by river in Burma and elsewhere.

"This service provides the Port Officers for all the chief ports in India, and the officers for Marine Transport Service and for the Marine Survey. It

possesses dockyards at Bombay, Kidderpore and elsewhere, where repairs are carried on for the Royal Navy and for its own ships, where vessels of small size are built, and where services of construction and repair are carried out for Local Governments at actual cost price. Its net budget estimate for the year now closing was 16½ lakhs. The actual expenditure has been about 14 lakhs, showing a saving of 2½ lakhs. The net estimates for the coming year are Rs. 1,36,000 below the estimates for 1895-96.

"I will now proceed to deal with military expenditure, and in speaking on this subject, I shall always deal with net figures. I have great satisfaction in bringing to notice that the net expenditure in the Indian estimates for 1894-95, the accounts of which year are now completed, was 6½ lakhs below the budget estimates for that year, although there was an expenditure of 6¾ lakhs on account of the Chitral Expedition in that year for which no provision had been made in the estimates. This is, I believe, the first time for many years that the military expenditure has been within the Indian budget estimates. The Military Works expenditure, the Special Defence expenditure, and the Home expenditure for 1894-95 were all also well within the estimates.

"I now pass to the current year. There are four separate items to be considered :—

1.—The Home Military Budget Estimates.

2.—The Indian Military Budget Estimates.

3.—The Military Works Estimates (India and Home taken together).

4.—Special Defence Estimates (India and Home taken together).

"In the Home estimates there has been a saving of 25 lakhs in expenditure as compared with the estimates. In India there has been an excess over estimates of 108½ lakhs. In the Military Works estimates the expenditure just comes up to the estimates; and in Special Defence estimates there has been a saving of 4 lakhs. Taking the whole of these several estimates together the net excess of expenditure over estimates has been 79½ lakhs.

"There has been expenditure on account of the Chitral Expedition in the Home estimates to the extent of 3 lakhs, in the Indian estimates of 165 lakhs, and in the Military Works estimates of 5½ lakhs, so that the total expenditure upon the Chitral Relief Expedition during the year has been 173½ lakhs. A sum of 15 lakhs only was provided in the estimates; as stated in the Financial Statement of last year, not for an expedition, but for preliminary preparations in case an expedition should become necessary. We have thus an expenditure of 158½ lakhs over what was provided in estimates for preparations for the Chitral Expedition, while the actual expenditure over estimates has been only 79½ lakhs. Thus, but for the Chitral Expedition, the whole of the military expenditure during the current year would have been 79 lakhs below the estimates for the current year.

"The savings in the Home estimates are largely due to causes over which the Government of India has no control. But in those portions of the Home estimates over which the Government of India has control, that is to say, the supply of stores from England, the expenditure has been kept well within the estimates.

"The savings in the Indian budget estimates which have reduced the net excess from 165 lakhs due to the Chitral Expedition to 108½ lakhs are due to various causes. Seventeen lakhs of these savings are due to fall in food prices below the estimated rate; 5½ lakhs are due to diminution in exchange compensation allowance owing to improvement in exchange; 7 lakhs are due to savings on account of conveyance of troops and stores; 5½ lakhs to savings in Commissariat establishments and miscellaneous Commissariat expenditure; 1¾ lakhs to savings in hot weather establishments and barrack supplies; ¾ lakh to saving in sea transport charges; 7¼ lakhs to saving in Ordnance establishments and expenditure; ¾ lakh to savings in Remount Depôt charges. All these savings show careful and economical management by heads of departments, upon whom the Government of India pressed the necessity for watching and keeping down expenditure, and to whom, in my opinion, great thanks are due for their efforts to assist the Government and tax-payers in this direction.

"The first great event of the year from the military point of view has been the introduction on the 1st April of the new scheme under which the Presidential Army system was abolished, the control of the armies of Madras and Bombay, hitherto vested in the Governments of those presidencies, was transferred to the Government of India, and their supreme command from the Commanders-in-Chief in those presidencies to the Commander-in-Chief in India. During the current financial year there has been but one army in India, under the Commander-in-Chief in India, and under the Government of India. The system has worked, I believe I may say, without a hitch of any importance, a result which I believe to be due in the first place to the determination of all concerned, including the Lieutenant-Generals Commanding in Madras and Bombay, to make the new system work smoothly; and in the second place to the deliberation with which every detail consequent upon the change was considered previous to the change being introduced. The Military Secretariats of the Governments of Madras and Bombay were abolished from the 1st April, and a considerable saving ensued to the civil estimates. The Military Department of the Government of India made no addition to its higher staff in consequence of the increase of work, and only a small addition to its clerical establishment. Large reductions have been effected in the staff at the head-quarters of the commands in Madras and Bombay, some reductions have been made in the head-quarters staff of the Commander-in-Chief in India, and further reductions are about to be made on the 1st of April next. But it must be remembered in considering the reductions that can be made at army head-quarters that, although the Commander-in-Chief has got rid of the direct command of the armies of the Punjab and Bengal, he has had thrown upon himself and his staff the supreme command of the armies in Madras and Bombay. The establishments of the two new commands created in the Punjab and Bengal have been kept within most economical limits. Further experience is necessary before the establishments of the four commands and of army head-quarters can be distinctly and finally fixed. But I believe they will be kept, taken as a whole, within the amount sanctioned by the Secretary of State when the scheme was originally introduced; and I can say with confidence that no further increase on account of this change will be required in the office establishment of the Military Department of the Government of India.

"The second great event of the year from the military point of view has been the Chitral Expedition. On the morning of the 7th of March last year, news reached your Excellency's Government leading it to believe that it might be absolutely necessary to send an expedition by way of Swat and Bajaur to relieve the beleaguered garrison of Chitral. The Commander-in-Chief was absent in Assam. That afternoon I held an interview with the representative of the Quartermaster-General's Department present in Calcutta, and the Commissary General-in-Chief. The latest report of the Intelligence Department upon the steps to be taken for such an expedition was laid before me, and the Commissary General-in-Chief stated his views. It was clear that owing to our mobilisation arrangements the troops necessary could be assembled on the frontier in a very short time, and that whatever delay might occur in the despatch of the expedition across the frontier would be due to the time required for collecting transport. I laid certain proposals for the collection of transport before your Excellency, and you assembled a Council the same evening which decided that these preparations should be proceeded with. At midnight on the 7th I personally gave the orders to the Commissary-General-in-Chief, and they were telegraphed off the same night, the Commander-in-Chief being informed. The Commander-in-Chief returned to Calcutta on the 11th, and at the Council held on the 14th March it was decided, on His Excellency's recommendation, to issue instructions for the mobilisation of the First Division of the field army, with certain modifications due to the special nature of the country between our frontier and Chitral. It was then still hoped that an expedition might be avoided, but before the end of March that hope was dead; and on the 1st of April, the day named in your Excellency's ultimatum to Umra Khan, within eighteen days from the order for mobilisation, a force of upwards of 15,000 men advanced across the frontier. The despatch of that force under the command of Sir Robert Low, its complete success in the storming of that most difficult

position, the Malakand Pass, and its rapid advance into Dir, enabled Colonel Kelly with a small force of Pioneers, Kashmir Imperial Service Troops and native levies, to effect the relief of the garrison of Chitral at a time when they were closely pressed by the enemy, and when their provisions would shortly have been exhausted.

"Your Excellency's Government in a General Order has expressed its sense of the services of Sir Robert Low and Colonel Kelly and the troops under their command, and Her Majesty's Government has endorsed those expressions. But there are some points in connection with that expedition to which I now wish to draw attention. But for the delay which occurred in the hire and purchase of transport at the outset, the expedition might have started sooner. This delay was in no way due to any neglect on the part of the Government or the military authorities. For a considerable time past the whole of the arrangements for the purchase of transport in the event of war had been matured. Civil officers of districts had taken steps to ascertain where and how the transport animals could best be procured, purchasing officers had been told off and placed in communication with the civil authorities. The delay was due in part to the time actually necessary for collecting the animals, in part to hesitation of owners to hire or sell them. Once it had started, the expedition was, I may safely assert, an unqualified success. Owing to the good medical arrangements the health of the troops was on the whole excellent. Fearing that owing to the necessity for rapidity of movement the troops might be obliged to put up with short rations for some time, permission to give compensation to the men in such cases was granted by Government; but such were the commissariat arrangements that in no single case were we called upon to grant that compensation. As soon as the first rush was over, and the line of communications was thoroughly established under the able direction of General Stedman, the staging system of transport was introduced throughout with the most admirable results. The condition of the Government transport at the end of the campaign was excellent. I believe it may safely be said that in no campaign ever yet conducted on the Indian frontier has there been so little loss in mule transport, or have the animals been in such good condition at the close of the campaign. As regards camels, the same can only to a certain extent be said. We were dependent entirely upon hired camels or upon camels purchased expressly for the campaign. The Government has no establishment of camels in peace, and has therefore no means of training officers and men to the care and supervision of those most delicate animals. The result is that the management and working of camels is not understood as it should be by our Transport Department. The hired camels did better in the campaign than the camels which we had purchased, the reason being that where camels were hired they were accompanied by the trained camel drivers of their owners, who looked after them in their masters' interests. But the number which could be hired was extremely small, and at the very outset the Government was obliged to have recourse to purchase. Having no trained establishment of drivers of its own it had to engage as transport drivers any men who were willing to take such service, and they were nearly all utterly inexperienced in the work. The result has been that while comparatively few camels actually died on the campaign, the camels purchased by Government have for the most part so broken down in health that it has been found impracticable to retain any but a very small number of them for future use. I shall state presently how the Government of India propose to remedy this great defect in our preparation for war in the future.

"The expedition has been invaluable to us as a test of the mobilisation arrangements for a whole division of the field army. It would be too much to say that those arrangements were found perfect. No army in the world, so far as I know, and I have been a great student of these matters, has ever found its mobilisation arrangements perfect, though all the skill and experience of its ablest experts has been brought to bear upon them. But with a few exceptions the mobilisation arrangements were found thoroughly sound, practical and easy to work. The campaign has also taught a great lesson to our military authorities in the working of the lines of communication of an army. And I feel confident that, in any future campaign, that experience will bear

most valuable fruit, both in the form of comfort and saving of suffering to the troops engaged, and in the form of reducing waste of transport. The campaign has also been of great value in testing the Imperial Service Troops. The Kashmir Imperial Service Troops showed very fine qualities, and the greatest advantage was derived from the admirably organised transport corps of the Maharajas of Gwalior and Jeypore, who placed those corps at our disposal. And I would take this opportunity of expressing my hope that further efforts may be made by the Native Rulers of India to organise such transport corps, which cannot fail to be of the greatest service in any considerable campaign. I wish to bring prominently to notice the fact that the charges for this campaign include the whole cost of an excellent metalled road from Hoti Mardan to the Swat River, of the bridging of that river and the Panjkora, and of the pack road which has been constructed from the Swat River to Chitral, as well as the construction of forts and barracks for the troops at the Malakand, at Chakdara and in Chitral. There, I may say in answer to the Hon'ble Mr. Playfair, will be no charge on account of these barracks and defences in the Special Defence estimates; and a small addition to the Military Works estimates of the coming year, which I shall presently mention, completes the provision for them.

"I now turn to the estimates for 1896-97. Here again I have to deal with the four estimates:—

1.—Home Budget Estimates.
2.—Indian Budget Estimates.
3.—Military Works Estimates.
4.—Special Defence Estimates.

"The Home budget estimates, as compared with the estimates of 1895-96, show a decrease of rather more than 5 lakhs of rupees. These estimates are so complicated by causes over which the Government of India has no control, such as payments to the War Office for services, and payments for stores, rising or falling according as the payments are made in one year or another, that I can say nothing about them, except this one simple fact that that portion of them over which the Government of India has control, namely, its demands for stores, shows a saving of 14 lakhs in the estimates of 1896-97 as compared with the similar demands for 1895-96. This is largely due to manufacture in this country having replaced manufacture at home. The Indian budget estimates for 1896-97 (I am dealing with net figures) show an increase of 39 lakhs over the budget estimates for 1895-96. The Military Works estimates show an increase of 6 lakhs over the estimates for 1895-96, and the Special Defence estimates show a decrease of 10 lakhs. So that the whole of the Military estimates for which the Government of India is responsible, taken together, show a net increase over those of the current year of only 21 lakhs of rupees.

"This Council is aware that a Royal Commission is now sitting in England to discuss the apportionment of Home charges between the mother country and India. We have sent home officers specially versed in this question, including Sir Edwin Collen and Captain Hext, to give evidence before that Commission, and we hope that its report may be in favour of giving some relief to India in the matter of the Home charges.

"The Indian budget estimates for 1896-97 include three great items of expenditure which have not appeared in former budget estimates. The first of these is an addition of 11 lakhs to the pay for the Native army. The estimates of the current year only include the extra pay given to the sepoy from 1st July last for eight months of the year; in next year's estimates twelve months have to be provided for, causing this increase of 11 lakhs. There is an item of 49½ lakhs for preparations for mobilisation, concerning which I shall speak presently; and the cost of the occupation of Chitral and the line of communications to it, and of the relief of troops which has to be carried out during the current year, adds 23 lakhs to the estimates. These three items amount to 83½ lakhs as against 39 lakhs of excess over last year's estimates, and the difference of 44½ lakhs may be roughly accounted for in the following way: Thirteen lakhs is on account of the Chitral Expedition, 15 lakhs having been provided in the current year's estimates, and only 2 lakhs being required for

arrear charges in the estimates for 1896-97. The adoption of a more favourable rate of exchange causes a saving of 13 lakhs in exchange compensation, and 5 lakhs on account of the pay of the British soldier. There is a saving of 6 lakhs on account of lower estimate for food prices for men and animals, and the remaining 7½ lakhs of savings is spread over a great number of items which it is not necessary for me to enter upon.

"Economies are constantly being introduced on the recommendation of the Commander-in-Chief, or Heads of Departments, or the Controllers. On the other hand, new demands are constantly being made upon us for additional expenditure on account of necessary services, and in the interests of improvement and progress. It would be useless for me to weary the Council with a long list of the economies effected on the one side, and the additional expenditure sanctioned on the other side. It is sufficient to point out that apart from the great items which I have already mentioned, the net result of this is a saving of between 7 and 8 lakhs in the coming year.

"As regards the three great items of addition to the estimates which I have named, that on account of pay for the Native soldier explains itself. The pay of the dismounted branches of the army was raised by Rs. 2 a month from the 1st of July last, with, I think I may say, the unanimous approval of this Council.

"The expenditure due to the occupation of Chitral has been kept as low as possible. That expenditure is due to the deliberately adopted policy of the Government of India, endorsed and approved by Her Majesty's Government. It is not for me to defend that policy, heartily as I approve it. All that I need say is that up to the present date it has been attended with complete success from every point of view. The troops in Chitral and at the Malakand are on a war footing. They are ready to take the field at a moment's notice. They are healthy; their transport is in excellent condition, and though the service may be somewhat irksome, especially for the troops in Chitral, they receive the prescribed pecuniary and other concessions which render them contented. The inhabitants of Swat, Dir and Chitral find their advantage in the markets created by the presence of our troops; and in the coming year it is believed that the greatest portion of the supplies required will be obtained by local purchase. Trade between these countries and India has very largely increased. It is intended to reduce the garrison of the Malakand by one regiment of infantry during this year; and I look forward with confidence to further reductions becoming possible within a short period of time. Against the expenditure under the head of 'Occupation of Chitral' has to be set the saving due to the withdrawal of the regiment of Native Infantry from Gilgit, which was made possible by the occupation of Chitral, and proposal for further reductions in the cost of the Gilgit Agency are under consideration.

"As regards the large sum of 49½ lakhs included in the estimates for the preparations for mobilisation, I will, with the permission of the Council, explain to what this is due. Preparation for mobilisation is comparatively a new branch of the science of war. It is an outgrowth of modern times. When once one army had prepared itself in every detail to pass with great rapidity from a peace footing to a war footing, it became necessary for other armies to follow in the same direction. The field army of India consists of a certain number of divisions, each including a Cavalry Brigade, and of an additional force of cavalry and of reserve artillery. The arrangements for the mobilisation of this army, which is quite apart from the garrisons which will have to be maintained in India in case of the field army marching to the frontier, have been worked out in every detail upon paper. But the equipment, stores and mules required for mobilisation have only been provided as yet for a part of that army, and until they have been provided for the whole of it, our field army cannot be considered ready for war. Great delay would occur in procuring from England the stores and equipment which must be obtained thence, and in the manufacturing in this country of such stores as could not be obtained ready in the local markets. And it would be practically impossible to purchase at short notice in this country the mules that would be required. Were circumstances to compel us to mobilise our field army,

it is the opinion of your Excellency's Government that the attitude of the frontier tribes would largely depend upon our ability to advance rapidly and in perfect order; while, in the event of our having to meet a strong enemy, there would be great risk in pushing forward only a portion of our army, when weeks and even months might pass before the remainder could be in a position to support it.

" These grave considerations have not been absent from the minds of the Government of India, but in recent years financial considerations have prevented our making the preparations which we considered necessary. The time has now come when we consider that these preparations should no longer be delayed, and we have therefore, with the full approval of the Secretary of State, made the necessary provision in the estimates of the coming financial year for obtaining such equipment and stores as could not be at once obtained locally at the time of mobilisation, and for such number of the mules required as we believe can be purchased within twelve months at ordinary rates in the local market.

" If our field army were to be mobilised, in order to bring the reserve cavalry, the reserve artillery and the line of communication troops up to war strength, nearly 1,000 artillery horses would be required, and to obtain these we should have to take them from the batteries remaining with the garrisons in India, which would thus be so depleted as to be scarcely fit for fighting purposes. To bring these batteries up to war strength we should have to purchase in Australia, for this country does not provide horses fit for artillery, and a long time would elapse before the horses, which would arrive raw, unbroken and unacclimatised, could be fit for service. More than four years ago we brought this to the notice of the Secretary of State, and we obtained his permission to provide a reserve of 1,000 horses whenever our funds would admit of it. Up to the present time we have been unable to make this provision. But with the approval of the Secretary of State it has now been made in the estimates for the coming year.

" Experience has shown us that the greatest delay in the starting of every expedition is caused by the time that is required to obtain camels for transport purposes. This was specially marked in the case of the despatch of the Chitral Relief Force. A week had passed from the date of our orders before any camels had been obtained in the districts. It was found impossible to hire in sufficient numbers, and resort had to be made to purchase, with the results which I have already described in speaking of that expedition. Time is necessarily involved in the despatch of purchasing officers to the districts in which camels are to be procured, in sending orders to the district civil officers, in the issue of instructions by them for the collection of transport and in the collection of that transport. Valuable time which might be utilised in the formation of advanced depôts is thus lost. Year by year the number of camels that can be procured for transport purposes in India is diminishing, as railways take the place of camel transport, and our difficulties on this score are increasing. The troops can always be moved in far less time than it takes to collect the stores and supplies in the advanced depôts, and we consider it of great importance to minimise this delay as far as possible. We have, therefore, with the Secretary of State's approval, made provision in the estimates of the coming year for the purchase of sufficient camels to complete an establishment of 3,250, which we propose to maintain in future, so that they will be immediately available, and can be utilised for the formation of advanced depôts, even before formal orders for mobilisation issue. We look to another immense advantage from the purchase of these camels. By thus maintaining an establishment of camel transport, the Government will be able to educate both officers and attendants in the care and management of camels, and will have a considerable nucleus of trained camel attendants who will be able to superintend those large numbers of hired and purchased camels—no less than 40,000 transport animals were employed with the Chitral Relief Force—which it is always necessary to obtain in case of an expedition. We believe that this will bring great advantages to us in any future campaign.

" The provision which we have made in the estimates provides under the head 'Rations for men' for all home supplies required for the field army; local supplies could not wisely be laid in, having regard to the stocks* already main-

tained, which are as much as can be turned over. Under the head 'Rations for animals' provision has been made for the purchase of fodder for the concentration period, for the fodder to accompany corps, for the marching stages and for one-fourth of the reserve. The remainder of the fodder could not wisely be laid in for the same reason as in the case of rations for men, but provision has been made for the provision of the fodder presses and engines required for pressing this amount on the occasion arising.

"Under the head 'Clothing' a full reserve of articles required has been provided for troops and followers, with certain deliberately considered exceptions.

"Under 'Transport Animals' provision has been made for the purchase of 1,750 mules and 3,250 camels; bullocks, it is believed, could be purchased when required. Employment for the mules and the camels can be found during peace, and there will be a saving on account of hire of transport in consequence. Bullocks on the other hand could not be economically employed during peace time. Provision has been made for the camel gear, transport carts, transport gear, water gear, regimental equipments, ambulance equipments, artificers' tools, stationery, forms, office furniture, miscellaneous equipment and packing materials to enable our field army to take the field without delay.

"Under 'Ordnance' provision has been made for all the stores required from home, and for local expenditure in providing the tents, harness, saddlery, Ordnance stores for medical and veterinary hospitals, entrenching tools, ammunition boxes and general stores for ammunition columns and field parks. In the Medical Department the medical and surgical stores, Commissariat stores, equipment and furniture required to complete the equipment of the field hospitals of the whole field army have been provided for. In the Veterinary Department the whole of the veterinary equipment and medicines, instruments and other supplies required will be purchased. Eight hundred and fifty artillery horses will be purchased in the coming cold season, and the shippers have already received notice that this number will be required; we already possess a reserve of about 150 horses. One thousand seven hundred and fifty mules and 3,250 camels with their gear will be provided. The establishments for the care of the horses, mules and camels are provided for in the estimates.

"It is evident that the maintenance of these additional animals involves a recurring charge in the estimates annually, and there will be a certain small annual charge for deterioration of stores and for compressing forage. For the year 1896-97 this recurring charge is estimated at a little under 6 lakhs; so that of the 49½ lakhs 43½ lakhs are an initial charge, which will drop out of the estimates in future years. But, on the other hand, it is estimated that in future years the recurring charge, which for the present year will be only 6 lakhs, will rise in round numbers to 13 lakhs. This initial charge of 43½ lakhs, and this annual recurring charge of 13 lakhs, do not, in my opinion, provide all that is required. The number of mules should, I consider, be increased in future years by about 2,700, and the number of camels be raised from 3,250 to 6,500. This would involve an additional initial expenditure of about 7 lakhs, and an additional annual expenditure of between 10 and 12 lakhs. These initial and annual charges are the price which India must pay for having its army ready for war. I believe that there is no greater extravagance than to maintain a large army and to keep that army unready for war. There is, it seems to me, but one excuse for military expenditure, that when the army on whose account this expenditure has been incurred is called upon to take the field, it shall be ready to do so promptly and in perfect order. I believe that when these preparations have been fully completed, the army of India will be in every detail as ready to take the field and as able to give a good account of its enemies as any army in the world.

"The increase of 6 lakhs in the Military Works estimates for this year is due to the provision of 4 lakhs for a cantonment in the Tochi Valley and 2 lakhs for works connected with the occupation of Chitral.

"Special Defence estimates for the coming year are 5¾ lakhs as against 15¼ lakhs in the current year and 22 lakhs in the year 1894-95. In the budget

estimate for the current year sufficient provision was made for nearly carrying to completion the whole programme of Special Defences, with the exception only of those items which the Government of India have decided should be abandoned or indefinitely postponed. But it was found impossible to spend the whole of the money during the year, and about 4 lakhs have lasped from one cause or another. The budget provision for 1896-97 is chiefly for carrying out works provided for but not executed in 1895-96. Two new items only have been brought forward, namely, an extension of the sea-wall at Middle Ground Battery, Bombay, which is necessary for the security of the work, and a new main magazine at Bombay. The provision made in 1896-97 should suffice to carry the Special Defence programme to completion, so far as it is considered desirable to carry out the original programme, and these Special Defence estimates should in future years disappear.

"My Lord, this is the last time that I shall speak or sit in this Council, and I will ask its indulgence while I mention briefly a few of the chief reforms which have been carried out, during the past five years, in the Departments of which I have been in charge.

"In the Royal Indian Marine, under the direction of that able officer, Captain Hext, while the tone and spirit of the service have greatly improved, there is not one test by which you can measure the work done which will not show that economy has been effected. Whether you take the cost per mile run of the ships, the cost per head of men conveyed by them, or the cost per ton of the vessels maintained, the charge is less than it was five years ago.

"Turning to the reforms in the Military Department, these have all had one of two objects, either the effecting of economy, or the making the army of India a more perfect instrument for war. First amongst these in time and date, and second to none in importance, is the reorganisation of the Intelligence Department at Army head-quarters. Upon the information of the Intelligence Department depends and must depend in all armies the original direction and impetus given to the army at the commencement of a campaign. And it is a well-known military axiom that, if the original impetus given is in the right direction and with sufficient force, half the campaign is already won. The Intelligence Department was insufficiently officered, and was stinted in funds. It was entirely reorganised and granted sufficient money to enable it to carry on its work, and was placed in charge of that most able officer, Colonel Elles, under whom and his successor it has become, I believe, as good as any Intelligence Department can be. The Chitral Relief Expedition was carried out, with scarcely any alteration, on the lines indicated in the Intelligence Department memorandum which I have already spoken of as having been placed in my hands on the 7th of March of last year.

"The next great reform has been in our mobilisation system. Five years ago this was only in embryo, and none of the present details had been worked out. A little less than five years ago the Mobilisation Committee, of which Lord Roberts was President, met at Simla, and the lines upon which mobilisation was to proceed were definitely decided. It was felt that a large committee was not the right machinery for carrying out a system full of extraordinarily complicated details, and a section was created in the Quartermaster-General's Department under the charge of that most valuable officer, Captain Kemball, for the purpose of working out all the details and keeping them constantly up to date. The troops to form the several brigades and divisions of the field army have been told off. Those of the first divisions have been supplied with their regimental equipment for war; transport, equipment and stores for the mobilisation of the first two divisions have been collected at the strategic points laid down. Field Service Manuals containing instructions for all arms and departments in case of mobilisation have been printed. The corps composing the field army are kept warned; the Staff and Army Departments are told off; railway time tables for the movement of the whole field army and its stores for long distances have been prepared in concert with the railway authorities. By the end of March, 1897, thanks to the provision made in the estimates for the coming year, the entire equipment and stores required for the whole field army will be in readiness.

"Our establishment of transport, which is our greatest difficulty in India, was increased by 2,000 mules in 1891, and will be again increased as I have already explained in the coming year, and at the end of the year we should, as I have said, be in possession of a nucleus of camel transport.

"Of the abolition of the Presidential Army System, and of the substitution for it of a single army of India, I have already spoken. This great reform had been so long delayed, though so constantly urged by successive Indian Governments, that it still seems to me almost difficult to believe that this dream has been so quietly and completely realised.

"The Coast Defences at Karachi, Bombay, Calcutta, Madras and Rangoon have been brought to completion, and the defence vessels of the Royal Indian Marine have been placed under the control of the Admiral Commanding the East India Squadron, by whom they will be utilised in case of war with a maritime Power.

"The defences of the North-West Frontier, including the lines of Quetta and the great bridge heads on the Indus at Sukkur and at Attock, have been completed. A series of forts has been completed at Rawal Pindi, forming a strong entrenched position. These forts required a long time for construction, and the Government of India thought it well that they should be made. But it has been decided to postpone the construction of the intermediate batteries, as these could comparatively rapidly be made, and in view of the great progress of modern military science it is thought that the armament should not yet be procured.

"Great progress has also been made in the armament of the troops. The Horse and Field Artillery have been armed with 12-pounder breach-loading guns, and every encouragement is given to them in the way of grants of ammunition and prizes to make the most by good shooting of that weapon. The British Infantry has been armed with the Lee-Metford magazine rifle, a most satisfactory arm. The only complaint made in regard to this weapon has been that the small-bore bullet has not, at short ranges, sufficient stopping power. Experiments have been conducted with a view to remedying this defect, and there is every reason to believe that a complete remedy has been found in a modification of the bullet. The Native Infantry and Cavalry have been armed with Martini-Henry rifles and carbines in place of Sniders, while the Sniders returned by the Native Infantry have, after conversion into smooth-bores, been handed over to the armed police. The shooting of both the British and Native Infantry is eminently satisfactory. Large grants of free ammunition are made for practice, and the troops are allowed to purchase, within certain limits, additional ammunition at considerably reduced prices.

"Great progress has been made in the manufacturing departments, and India is now turning out all her own small-arm ammunition, is making her own cartridge metal, gun fittings for the latest types of guns, powder, accoutrements, harness and saddlery to keep pace with the extended needs of the army in India; while under the able direction of Captain Mahon, and of General Walker, the Director-General of Ordnance, the manufacture of steel and steel projectiles has been successfully introduced at Cossipore.

"As examples of the economy of substituting Indian manufactures for articles from home, I may mention that the English price of Martini-Henry rifle cartridges is Rs. 71 per 1,000, and we manufacture them in India for Rs. 49 per 1,000. The English price of Lee-Metford cordite cartridges is Rs. 108 per 1,000; we manufacture them in India for Rs. 83 per 1,000. Twelve-pounder shrapnel shells cost in England Rs. 837 per 100; we manufacture them for Rs. 710. In every proposal for new manufacture in this country the Ordnance Department has been required to show that the local manufacture will be economical; and the result of our advance in this direction has been that every material increase in the Ordnance Indian budget estimate has been counterbalanced by a larger reduction in the Home estimates. The official Financial Review shows that in 1894-95 a saving of close upon 20 lakhs was effected during that year in the Bengal ordnance factories by local manufacture having taken the place of importation of stores.

"A Proof Department has been established at Balasore for the practical test of projectiles, fuzes, etc., made in India, before they are passed into the service.

"We have not as yet attempted the manufacture of cordite in India. For some time there was a doubt as to its suitability for standing the heat of India, as it failed in some cases to fulfil the War Office standard heat test. But its ballistic properties, even when it failed to fulfil this test, were unimpaired, and the War Office have recently acknowledged that the test, not the cordite, was in fault. The test has been reduced, the cordite thoroughly meets the requirements of the new test, and all anxiety has been removed. It causes rather excessive wear of the Lee-Metford rifle barrels. I have no doubt that means will be found of removing this drawback; and it is probable that in a rifle of larger calibre this wear would not take place, but pending certainty on this point cordite is not being introduced for the Native army. We are still experimenting to obtain a thoroughly satisfactory rolled cartridge case for the Henry-Martini rifle, as this will cost very much less than the solid-drawn cartridge case in use with the Lee-Metford. I have no hesitation in saying that we are on the point of success. There would undoubtedly be difficulties attending the manufacture of cordite in this country; and we do not propose to attempt it, unless there is reason to suppose we cannot obtain our full requirements at a reasonable rate from England. There would be no danger in depending upon England for it, as we should always keep a four-years' supply in this country.

"The greatly increased duties of the Ordnance Department have been hitherto carried out without increase to its staff. But it is under-officered, and, as this is not true economy, provision has been made in the estimates of the coming year for an increase of five officers to the department.

"The Commissariat Department has shown itself effective and successful in the many expeditions and campaigns that have taken place in the last five years, campaigns for the most part conducted in wild countries where it is most difficult to obtain supplies; and searching inquiries have convinced me that in time of peace its administration is as economical as can reasonably be expected.

"Lieutenants-General Commanding have since the 1st of April last been invested with the control over the Commissariat Department within their respective Commands, and are responsible for its maintenance in an efficient condition, as well as for strict economy in its administration. The Commissaries-General have been placed on their departmental staff; and Commissariat officers have been made staff officers of the Generals or other officers commanding districts or stations.

"The principle that as far as possible supplies and services should be arranged for by contract rather than by departmental agency has been carefully observed, and in the Bombay Command especially very considerable savings have been effected by introducing important changes in this direction.

"In all cases where Indian manufactures can be obtained as good in quality as imported articles, and no dearer in price, they have been substituted for imported articles. The gain in 1891-92 resulting from the use of stores manufactured in India in substitution for stores formerly imported through Secretary of State was Rs. 5,37,000, and in 1894-95 Rs. 16,50,000.

"The bread supply of the troops has received careful attention. An officer of the Commissariat was deputed to inspect mills and private bakeries in England in 1892, and consequent on his report schools of instruction have been established for the training of European departmental subordinates in bread-making, instructors having been obtained from Home. A native bakery class was established at Rawal Pindi, and a second class is about to be held in the coming year. With a view to checking the spread of enteric fever, dairy farms have been established at several stations throughout India and Burma. Officers have been trained in meat inspection since 1893. The entire supply of tinned meat is now obtained direct from the British Colonies, the supplies so obtained being better and cheaper than the American meats previously obtained from England.

"The spread of cultivation having made it almost impossible to obtain grass through the agency of grass-cutters from waste land, a system of grass cultivation was inaugurated in 1887. During the past five years these operations have been extended very considerably, and have been very successful financially and otherwise. Grass farms and rukhs are now existing practically to the full extent necessary in the Bengal and Punjab Commands, and Government have recently sanctioned the extension of the system to the Bombay Command. In the Bengal and Punjab Commands in 1894-95, the Financial Review shows that these grass operations resulted in a saving of Rs. 2,74,000, besides which there were further indirect savings by the reduction of claims from Silladar Cavalry corps for compensation for dearness of forage.

"It has been satisfactorily proved that the Commissariat rates for supplies are well within market rates, and that the compensation for dearness of food and forage given to troops corresponds fairly accurately with the fluctuation in those rates. The Department suffered great loss this year in the removal of its able chief, General Badcock. But in his new position as Quartermaster-General his valuable advice will still be available to the Government.

"In the Clothing Department every effort has been made to substitute clothing materials of *boná fide* Indian manufacture for imported articles, in order to encourage local industries, and in view to economy. The gain to the State by this procedure was in 1891-92 Rs. 1,68,000, and in 1894-95 Rs. 3,33,000. As a specimen of the success attending these efforts I may mention that the white drill for the summer clothing of British troops which costs about 3½*d.* a yard manufactured in India was reported upon by the Store Department of the India Office to be superior to the material costing about 4½*d.* a yard previously supplied from England, or to any material which could be manufactured in England at the price.

"The whole of the boots for the British troops serving in India are now made by Messrs. Cooper, Allen & Co. of Cawnpore. They are cheaper and at least as good as the boots previously supplied from England

"Helmets, formerly obtained from Home and costing up to 1892 Rs. 3-14, are now made in India for Rs. 2-12. Many internal improvements have been introduced in the Clothing Department.

"In the Military Works Department great progress has been made in the direction of sanitation. Pure water-supply has been laid down at a large number of the military stations in India, including Secunderabad, Delhi, Agra, Lucknow, Allahabad, Dum-Dum, Rawal Pindi, Murree and Quetta; and each year the number of such stations is being added to. Provision has been made in the estimates of the coming year for the water-supply of the Civil and Military Station of Bangalore, to which my hon'ble friend Mr. Rees has alluded; not for the whole cost of that scheme, but for as much as it is believed can be usefully expended upon it during the financial year. Improved systems of conservancy have been introduced, and we are now experimenting at several stations with different kinds of incinerators, by which method of disposal of the solid products of sewage it is to be hoped that the health of our troops may be greatly improved.

"In one most important matter, the horsing of the Cavalry and Artillery, considerable advance has been made. For horses for our Artillery and for the greater part of the British Cavalry we are dependent upon Australia, and it became necessary to raise the prices which had hitherto been given, as the supply was falling off in consequence of the diminished value of the rupee. The price now given is £45 sterling, with which the shippers are thoroughly content, and I believe that I may confidently say that nowhere in the world are any cavalry and artillery so well horsed as ours are in India. Three regiments of British Cavalry are now mounted on country-breds by which a considerable saving is effected. But at present the local markets do not supply horses fit for this purpose in sufficient numbers to mount more than three British regiments.

"It is impossible to buy country-bred horses of an age fit for issue as remounts. Young horses, if left with the zamindars who have bred them, are worked too young, and are not sufficiently well fed or allowed sufficient freedom

in that early stage of a horse's life when his growth depends upon good feeding and freedom. Consequently, the Government has established rearing depôts at Ahmednagar, Hapur and Kurnal. It buys, every year, some hundreds of young stock at eighteen months of age and over, and rears them in the very best conditions under its own care, issuing them when fit as remounts. The age of issue of remounts to British Cavalry and Artillery has been raised from four years to five years. Although this involves an additional initial expenditure in the cost of the horse when issued, there is no doubt that horses which are not worked till five years old will last longer and stand the strain of heavy weights better than horses which are worked at an earlier age. The Government horse depôts have been strictly limited to their functions of rearing, breaking and acclimatising horses. The old stud system, abolished several years ago, but which had begun again to crop up, was absolutely abolished and forbidden four years ago. There is now no competition whatever between the Government and the private breeders in the matter of breeding horses. The Government of India is indebted to Colonel Deane, Director of Army Remounts, for his loyal co-operation in its orders in this respect, and for his excellent management of the remount depôts.

"A great improvement in horse-breeding in India has taken place. There is a distinct improvement in the quality of the horses at the fairs upon which the Silladar Cavalry are dependent for their remounts. The present Inspector-General of the Civil Veterinary Department, Veterinary-Colonel Queripel, is an enthusiast on the subject of horse-breeding, and I have little doubt that it will improve greatly in his hands. He has induced several of the Native States to take the question up.

"Mule-breeding too has made considerable progress. We have imported first class donkey stallions from Europe and elsewhere, and for the past three years we have been able to obtain the whole of our requirements in mules, both for transport and for ordnance purposes, within the limits of India.

"As regards the personnel of the army, the British soldier is well paid. He receives the equivalent of his sterling pay at the current official rate of exchange; and, as his expenditure is all in India, he has benefited by the fall in the sterling value of the rupee. He is well fed, well housed and well clothed, and a new clothing scheme is on the point of being introduced, which, while it results in economy to the State, will also save the pocket of the soldier, and will ensure his always being clothed in a dress suitable to the climate, the cloth clothing worn in England being, with the exception of certain regiments, abolished for India.

"As regards the Native army, the opinion of the Military authorities has long been that class regiments are better fitted for war than regiments composed of several classes. And in this direction progress has been made. Sixteen mixed battalions of Hindustani regiments have been reconstituted into class regiments of Brahmins, Rajputs, Jats and Muhammadans. And in Madras seven battalions of infantry have been reconstituted by transforming battalions of Military police, composed of Gurkhas, Sikhs, Punjabis and other hardy and valiant races into local battalions for service in Burma. In Bombay a class company system has been introduced, and two regiments have been converted into local corps, for service in Baluchistan, composed of warlike tribes of Northern India. It is believed that the class company system will result in our obtaining recruits of a better stamp than those obtainable under the old system in which men of all classes were indiscriminately mixed together.

"An improved system of recruiting has been introduced, under which officers specially selected are told off for the recruiting of certain classes of soldiers in the Punjab, in Bengal and in Bombay. This system cannot yet be introduced into Madras, for the authorities there have not as yet sufficient information as to the classes suitable for recruitment in that Command; but the existing system of recruiting there has been improved, and certain unwarlike races will no longer be recruited.

"The increase of pay of Rs. 2 granted to the dismounted branches of the Native army in the current year is already having its effect in an improvement in the class of men who join the army. And I may mention that the deficiency

in the strength of the army as compared with sanctioned establishments was a thousand less on the first of this month than on the first of March last year. There is little doubt that as the increased advantages given to the soldier become more widely known their effect will become more marked.

"One great step is being taken towards the comfort of the Native soldier. The old system under which he built his own lines, receiving a hutting and repair allowance from the Government, is being gradually replaced by a system under which good lines of an improved pattern are being built for him by the Government, and maintained at the expense of Government. The estimates for the current year and coming year each contain a grant sufficient to build from three to four new sets of lines, and at the end of a few years all the Native Infantry should be decently and comfortably housed.

"An Act was passed in this Legislative Council in 1894 revising and amending the Indian Articles of War, and they are now thoroughly adapted to the disciplinary requirements of the Native army.

"As regards the numbers of the army, there has been practically no addition to the army during the past five years, and the occupation of all the new territory which has come under our control, whether on the frontiers of Burma, or on the North-West Frontier of India, has been provided for by the redistribution of the troops.

"But the Reserves of the Native army which stood on the 1st of April 1891 at a strength of 7,093 now stand at a strength of 15,567. These are all thoroughly trained soldiers within good fighting limits of age. They are called up annually and trained at the centres of the regiments to which they belong, and they will be a most substantial and valuable addition to our army in case of its having to take the field.

"Finally, there are the Imperial Service Troops, which have to a great extent taken the place of the large inferior and undisciplined armies formerly kept up by the Native States in India. They have made great progress under the Inspector-General, Colonel Melliss, during the past five years. By the latest report in the hands of Government these troops numbered 7,970 cavalry, 289 artillery, 303 Sappers and Miners, 9,015 infantry, 497 camel corps and 942 transport corps, a total of 18,710, with 1,400 transport ponies and 600 carts. The troops are trained under the supervision of British officers, they have recently been armed with Martini-Henry rifles, and many of them have now reached a stage of efficiency which, in the opinion of the Commander-in-Chief, would render them valuable auxiliaries to our army in the field. To the services of the Kashmir Imperial Service Troops and of the Transport Corps of Jeypore and Gwalior in the Chitral Relief Expedition I have already alluded.

"On the European side, the volunteers, who in April 1891 numbered less than 20,000 efficients and less than 23,000 enrolled, now number nearly 24,000 efficients and nearly 30,000 enrolled. Additional concessions have been given to them in the way of grants for camps-of-exercise and field days, relieving the pockets of the officers of expense, and for construction of armouries, head-quarters buildings, etc. By the Act passed a fortnight ago the Governor General in Council has obtained power to call out the volunteers for actual military service in case of emergency, and to provide them with pay, supplies and transport, and to give pensions and gratuities to them and their families in case of wounds or death.

"These, my Lord, are some of the great improvements which have been made in the army in the past five years. When my predecessor in office, the late General Sir George Chesney, left India, he left behind him an important and long minute on the Indian Army and Military Administration, in which he recommended certain improvements and reforms. Some few of these have been deliberately considered and rejected, but the rest, with one exception, have been either entirely carried out, or are in actual progress. That one exception is an increase to the number of British officers with the Native army.

"Were it necessary now for me to write for my successor such a minute, I should confine my expression of the wants of the army of India to three

points—more transport, more officers and more garrison artillery. I hope that that transport may be provided in the next year or two. Our forts and batteries are undermanned, but it has not been in our power to provide the money for an increase to the garrison artillery establishments.

"The greatest want, in my opinion, and, I know, in the opinion of the Commander-in-Chief, is an increase to the number of British officers. We have endeavoured to meet this by establishing a reserve of officers, but the attempt has been a failure. Civilians in the service of the State would be far too heavily occupied with their own duties for us to be able to count upon their service with the army in case of war, and the number of British civilians in India not in the service of the State is so small, and they are all such busy men, that it is little wonder that we have had but few applications to join the reserve of officers. Yet, upon the outbreak of war, we ought to increase the number of European officers with every unit of the Native army, and we should require some hundreds of officers for transport duties, and for various staff appointments in the field. Where to lay hands upon these officers is a problem that has not yet been solved. Should the finances of India improve, I earnestly hope that this question will not be lost sight of.

"In addition to the reforms which I have above enumerated, there is one which is unknown outside the walls of the Military and Finance Departments and the India Office in London, and that is the internal reform of our military financial system. The system which I found in existence was one that did not give sufficient control even in times when money was plentiful, and was utterly unsuited for times of difficulty. The Military Member of Council and Finance Department did not have that control over military expenditure which they should have had. For that system one has been substituted, under which not one rupee of additional expenditure can be sanctioned by any one but the Military Member of Council himself, under which no expenditure not provided for in the estimates is sanctioned during any current year, unless it is of absolute and urgent necessity, and no fresh expenditure is added to future estimates until after the Military and Financial Members have personally agreed upon the amount available for military expenditure within which the estimates must be kept. I take this opportunity of expressing my sense of deep personal indebtedness to Colonel Miley, the Military Accountant-General, for his untiring efforts to assist me in carrying out these reforms, and in effecting true economy. I would like to give this Council one specimen of the Accountant-General's work, which will, I think, convey confidence to the minds of this Council and of the public ; especially to those who remember the failure to forecast the expenditure in the Afghan war. Within about five weeks from the starting of the Chitral Relief Force, the Accountant-General sent to the Finance Department his approximate estimate of the cost of the expedition. It was a full estimate, in which an allowance had been made for contingencies under each separate head. The actual expenditure has been 19 per cent. below the Accountant-General's estimate. I can assure this Council that the most rigid economy is now practised in all matters of military expenditure, that no effort is spared by the Military Department, by the Commander-in-Chief and the heads of departments to effect reductions of expenditure wherever they can be effected without detriment to the efficiency of the army, and that, except for military expeditions which cannot be provided for in the estimates, such things as supplementary estimates have altogether ceased.

"I am to be suceeded in charge of the Military Department by an officer, Sir Edwin Collen, who has for the past five years been working with me heart and soul in these reforms, whose ability is well known, and whose efforts in favour of economy have not been exceeded by those of any officer in the service of the Government. I would ask this Council to trust him.

"The past five years have been years of great difficulty for the Military Department. There have been a great number of frontier expeditions, which have upset our budgets, and have been unwillingly concurred in by the Commander-in-Chief and myself. There has been, owing to the fall in exchange, a financial pressure such as had been hitherto unknown.

"In face of these facts I trust, my Lord, that the list of improvements and reforms which have been effected in our army and our military administration will not be considered by this Council an unsatisfactory record of progress.

"The army in India is in my opinion none too large for the work it may be called upon at any time to perform, and I trust that this Council will never lend a willing ear to those who advocate reduction of military expenditure other than that recommended by your Excellency's Government. For I say deliberately and advisedly, after the closest and most minute study of every detail of that expenditure, that such reduction could only result in that worst and most wicked of all waste, the maintenance of an army which would be either insufficient in strength, or unfit and unready for war."

His Honour THE LIEUTENANT-GOVERNOR said:—"I should like to say a few words on the subject of Provincial Finance and paragraphs 60-64 of the Hon'ble Member's statement. I hardly think it possible that at the present day Local Governments can have any such misapprehension of their true relation to the Supreme Government as the Hon'ble Member describes. Personally I have always refused to admit that there can be any separation of interests between the Government of India and the Local Administrations. The latter are as much interested in the expenditure directly controlled by the Imperial Government as the Imperial Government itself. But the principle applies in the other direction also. The Imperial Government is, or ought to be, as much interested in the matters left to the Provincial Governments as any or all of those Governments. Now I have received myself as a provincial administrator, as a general rule, the most generous treatment and support from the Government of India during the past ten years. Our relations have ordinarily been of the most amicable kind. But nevertheless it has at times appeared to me that the Supreme Government did not always realise that it has as great a responsibility for local administration as the Local Government itself. I have seen or seemed to see a tendency on the part of that Government to wash its hands of this responsibility, especially as regards finance. I thought I saw this when as Chief Commissioner of Burma I protested vigorously against the mulct of 18 lakhs taken from that province in 1894-95, and which I am glad to see now given back. I know that my hon'ble friend will repudiate the idea, but I have, I believe, none the less seen it elsewhere also in operation, conscious or unconscious. I refer to it, however, now not by way of complaint about the past, but in order to enter a caveat in view of the revision of the provincial contracts to which the Hon'ble Member alludes in his paragraph 60. I trust that he will enter upon this revision in full consciousness of the fact that the Imperial Government is as much interested in the development and improvement of provincial administration as the Provincial Governments themselves, and that any check inflicted on them is a check to the whole imperial machine. I must say I deprecate the way in which these quinquennial revisions have too frequently been carried out. The provincial sheep is summarily thrown on its back, close clipped and shorn of its wool and turned out to shiver till its fleece grows again.

"The normal history of a Provincial contract is this—two years of screwing and saving and postponement of works; two years of resumed energy on a normal scale, and one year of dissipation of balances in the fear that if not spent they will be annexed by the Supreme Government, directly or indirectly, at the time of revision. Now, all this is wrong, not to say demoralising. I say that the Supreme Government ought not to sheer too closely each quinquennium. It is as much interested in the continuity of work as the Local Governments: and ought to endeavour to secure this and avoid extreme bouleversements of the Provincial finances. In the first two Provincial contracts India left Bengal not only its accumulated balance, bur part of its normal and recurring surplus. In the last three contracts it has taken the whole normal surplus, leaving Bengal to create a new surplus, and make what it could out of the progressive growth of its revenues. This necessarily inflicts on the province at least two years of leanness at the outset of each quinquennium. It would be an immense gain to local administration if the Government of India could see its way to renewing the contracts

with as little change as practicable on each occasion It is only in this way that the element of fiscal certainty, which was put forward in 1870 as one of the main objects of decentralisation, can be secured. Hitherto we have had but little of certainty. Not only have the terms of the contract been repeatedly changed, but 3 out of 5 have been practically set aside. I do not grumble at this. I would willingly surrender every available rupee if Imperial necessities required it. We are, as I said at starting, all one Government. I merely desire to suggest that this unity should be recognised throughout all the financial arrangements, and as little disturbance as possible be introduced on each occasion of quinquennial revision."

The Hon'ble SIR JAMES WESTLAND said:—"During the past week I have been making an attempt, by studying the public newspapers, to discover on what particular lines my Financial Statement was likely to be attacked. I failed somewhat in that effort, because I have found that the proposals of the Government as made in the Statement have been generally accepted. There was one newspaper, I admit, that I looked to with some fear and trembling—it is a weekly newspaper published in Calcutta, a newspaper that never has a good word to say for the Government or any of its doings, and I was afraid that this newspaper would have some words of commendation for the Financial Statement—a commendation which would damn it in its author's eyes. But fortunately I found that this newspaper did not approve of the Statement. It did not give any particular reasons, but it did not approve of it, and it went on to accuse me of something like the fraud, of which the Hon'ble Rai Ananda Charlu has been accusing me, namely, that of diverting the Famine Insurance Grant, or the Famine Insurance Fund, as he insists upon calling it, to purposes for which it was never intended. I have also been accused of fraudulently making up the accounts by a gentleman on the Bombay side who is under the delusion that he knows something about Indian finance and has been making occasional attempts to induce the public to share in his hallucination. He stated that it was no wonder that I should bring forward the accounts of 1894-95 as showing how accurately we had forecasted them in the revised estimates presented last March, because we had already obviously taken the revised estimate as our basis and falsified the accounts so as to make them work up to the estimate. He was able to show this by comparing the Statement of Accounts we published with the estimates with one that we published in one of our Gazettes in February. Now, it requires only an elementary acquaintance with our accounts to know that when we first make them up we gather the land-revenue and the interest each under a single head, because it is a single class of receipt or of charge; but that afterwards, when making up our final accounts, we divide these preliminary figures between two different heads, namely, the land-revenue ordinary, and the land-revenue due to Irrigation, and in the case of interest, part of the interest we pay is transferred to the charge of the Irrigation and the Railway Accounts. All this was perfectly plain on the face of the Account presented for certain comparative purposes in the Gazette in February; but by suppressing the differences in the names we gave to the heads, this critic of mine on the Bombay side professed to show that we produce different figures under the same designation. Of course they were different figures, because they refer entirely to different things. If he had carried the comparison into detail, he would have found that the figures he produced in one statement exactly corresponded with the figures I had produced in another. I only notice these matters because they have been given currency to by one of the leading newspapers of Bombay. I think it necessary, as I shall have to answer other charges of fraudulent concoction of accounts, to state that these accounts are made under safeguards which render it perfectly impossible, even if the Government of India desired to produce fraudulent accounts, for it to do so. I am accustomed to be hauled over the coals for doing dishonest actions; but political criticism in this country is young, and it has not emerged from that primitive stage in which it consists of accusing your adversary, with or without evidence, of dishonest actions. But what did touch me in the criticism presented in Bombay was that we were not only supposed to be rogues in making up our accounts, but also declared to be such fools as to provide the public in our own Gazette with the means of convicting us.

"The Hon'ble Mr. Bhuskute has prepared a long discussion, and I think on the whole a very useful one for the purposes of the Government of India upon many questions raised in the Budget. I call it a very useful discussion, because I think it is very desirable, and that it is a very valuable assistance to us to get a calm statement of the manner in which our accounts and financial transactions present themselves to a non-official gentleman who has at heart the interests of the province to which he belongs.

"The Hon'ble Mr. Bhuskute was good enough to give me a copy of his statement last night, and in the course of this morning I have been able to examine his statements and some figures on which he has founded them. Now, Sir, of course an Hon'ble Member who gives me a statement of this kind places himself, I know, at a very great disadvantage. He gives me a very great dialectic advantage over him; he knows that the last word will come to me, and that I may make use of his statement without the possibility of his making any answer to my criticisms. I desire to avoid as far as possible using any language which can be interpreted as in any way disparaging the Hon'ble Mr. Bhuskute's criticisms, because, as I say, I do admit it is very useful for us to know what view is taken of many of these matters by an independent gentleman in his position. But I am bound at the same time to point out that many of the statements and figures presented are very far from correct. I know that in these matters I am at a very great advantage. He is dealing with figures new to him—figures which in their very mass are very difficult to follow, and I am dealing with matters with which I have been familiar during the whole of my life. For one of the statements the Hon'ble Mr. Bhuskute drew up he was good enough to come to me for information. I gave him that information at once, but in regard to the other matters I regret that he did not ask me for further information, because I could have saved him a very great deal of criticism which I think somewhat unfounded.

"Now the Hon'ble Mr. Bhuskute addresses himself first of all to the Famine Insurance Grant, and what he has said has been repeated with additions by the Hon'ble Rai Ananda Charlu. I think it will be better for me to notice first the points which the Hon'ble Mr. Bhuskute has taken up, and afterwards to take up those to which the Hon'ble Rai Ananda Charlu drew attention.

"The Hon'ble Mr. Bhuskute objects to the reduction of the amount of the Famine Insurance Fund on the ground that we spent during the last fifteen years an average representing one crore and sixteen lakhs. I cannot admit this to be true. I am quite sure that, if any person having an income (say) of five lakhs of rupees chose to invest of that income two lakhs in railway shares and two lakhs in Government securities, it would not be said that he spent his whole income. That is exactly what we have been doing with our Famine Insurance Grant. We have not spent the 116 lakhs; the greater part of that has been invested in railways and in Government securities. It is obvious, therefore, that the fact that we have laid out 116 lakhs in these investments is no argument to show that it is for the future necessary for protection against famine to maintain the grant at its original figure—1½ millions.

"Then he calls upon us to remit the special taxes imposed at the time when this Insurance Fund was instituted. And he says that the provinces interested in this special taxation will naturally claim immediate consideration of the subject from us. In the first place, I have to point out that the taxes imposed for the institution of the Famine Insurance policy did not exceed one crore of rupees, and that therefore no question of their remission at present arises. I will make a quotation on this point from one of Sir John Strachey's Financial Statements (1880-81), in which he says—

'As I have already explained, that taxation amounted originally to Rx. 1,345,000. It has now been reduced to Rx. 1,000,000.'

"So that the amount of taxation which was called the famine taxation and was instituted at the time when the Famine Insurance Grant was instituted does not exceed the amount set aside now as famine insurance. Moreover, I rather think that the Hon'ble Member is not aware to what a small extent his own province is interested in this famine taxation. The details of it are before

me; they were given in the Financial Statement of 1879-80. They consisted for the most part of the license-tax amendment, ordinarily called the income-tax, and of the Bengal public works cess. Then there were small amounts of local taxation, of which the additional cess in the Central Provinces comes only to 1½ lakhs of rupees. It would appear, therefore, that the Hon'ble Member's province is very little interested in the question of the abolition of the taxation which was instituted at the time of the Famine Insurance Grant, and I am quite sure from what the Hon'ble Member says in his speech of the smallness of the contribution which Bengal makes compared with other provinces that he would not argue in favour of the remission of that part of the taxation which is represented by the public works cess of Bengal.

"I wish to point out with reference to this point that Sir John Strachey, when he instituted this Famine Grant, distinctly declared that any intermission of it did not involve in the smallest degree the question of the remission of the particular taxation levied at the time of the grant And it is very obvious that that cannot be the case. Our last tax in point of date was the imposition of the customs-duties. We levied the customs-duties because the value of the rupee had fallen from 14 or 14½ to 13 pence. If there was any force in the argument of the Hon'ble Member, it is obvious that our first endeavour when the rupee rises ought to be to abolish these customs-duties and not touch any part of the rest of the taxation of the Empire. Now I do not think there is any person who would urge that as the first tax to be got rid of.

"There are a great number of taxes for the prior remission of which claims may be made—one from the Hon'ble Rai Ananda Charlu for example, that a portion of the income-tax should go. We have a claim from the Hon'ble Rai Ananda Charlu, and also I think from the Hon'ble Mr. Bhuskute, that the salt-tax should go. It is obvious that these claims are founded upon a theory quite different from that which would attach to each tax a particular ear-mark and declare that when the increase of expenditure, with reference to which that special taxation had been levied, ceased, it should become the duty of Government to abolish the particular tax levied for it. Sir John Strachey was very clear on that point, and I shall read a short extract from his Financial Statement, the same statement as that from which I quoted before, of 1878-79, in which he says—

'I need hardly say, after what has been said on former occasions, that the Government can entertain no idea of giving these taxes up and of sacrificing a million a year of revenue.'

"I would wish to point out to the Hon'ble Rai Ananda Charlu that this statement was made at a time when Sir John Strachey was suspending the Famine Grant, and that even at that time he declared that he would not propose to remit the taxation which was levied with reference to the constitution of the Famine Insurance Grant."

The Hon'ble RAI ANANDA CHARLU BAHÁDUR: "Kindly give me the year."

The Hon'ble SIR JAMES WESTLAND: "It is paragraph 54 of the Financial Statement of 1880-81. Sir John Strachey goes on to say—

'Even if those taxes were as bad as some think them, a time like the present, when we have to meet the heavy obligations entailed by a serious war, would not be opportune for abandoning them; still less could such a course be approved by those who believed, with me, that these taxes are far less objectionable than others that could be named, and that when the time comes for remitting taxes, it is not with these that we ought to begin.'

"When a tax is imposed, whether it is imposed at a time when it is necessary to make a special provision for famine, or whether it is imposed at a time when the conquest of a new province has necessitated the increase of our army expenditure, or whether it is imposed, as it was two years ago, at a time when great difficulties in exchange had increased the burden of our expenditure, that tax becomes part of the regular fiscal system of

the Empire. When we come to questions of remission of taxation, which I hope is not very far distant—although I do not like to prophesy until I am sure—we must take up the remission of taxation as a thing which is quite independent of the particular expenditure for which the tax has been levied. We must choose for remission those taxes which are found to be most burdensome and whose remission will bring the greatest relief to the Empire.

" My statement of the financial relations between Provincial Governments and the Imperial Government has been criticised in more than one direction. I am afraid that the Hon'ble Mr. Bhuskute is one of those against whose views it was my object to remonstrate, one of those, namely, who think that the Local Governments and the local objects have necessarily a first claim upon the revenues and that the Imperial Government is something which lies entirely outside. In fact, the Hon'ble Mr. Charlu went further than that and protested against our imagining that the Local Governments were only the agents of an absentee landlord and were merely collecting taxes for some other Government. I am glad for one thing that His Honour the Lieutenant-Governor has very promptly repudiated these claims, and I am sure that every Local Government will admit, as he has admitted, that it is both legally and constitutionally the agent of the Government of India for carrying on the administration of its province, and that it cannot declare to us that its business is to keep its own revenue in its own hands and refuse to be responsible to the Government of India for the revenues it collects. In talking of it as an agent it is to be understood that I am not denying it a large amount of discretion. In fact, the whole system is founded on the theory that it is still an independent Government and has all the functions of a Government, but that we must control the action of the Local Governments in their financial proceedings on the theory that the whole financial system of India is one, and that we cannot break up the system into financially separate provinces and make these provinces independent contributories to a central account. This is one of the proposals which the Hon'ble Mr. Bhuskute makes in his statement. In connection with it he says :—

'This complaint is not, as the Hon'ble Member puts it, that each province thinks the richer provinces have a surplus which they are made to disgorge for the poorer provinces, but that under the present arrangements the poorer provinces are made to contribute more than their proper shares in order that the richer provinces might not be taxed their full share of the Imperial contribution.'

" And here, my Lord, I think that the Hon'ble Member's statements are not borne out by the figures which I set forth in my Financial Statement, from which it will be seen that, as a matter of fact, the richer provinces do contribute a very much larger share than the poorer provinces. I would ask attention to paragraph 63 of the Financial Statement in which I showed the figures of the contributions made to the central account by the various Governments. Now, I take the Central Provinces: those provinces have a population of ten millions and contribute Rx. 451,000. Bengal has a population of seven times as much, but contributes ten times as much. Madras has a population of three and a half times as much, but contributes ten times as much. Bombay has a population of not quite twice the amount of the Central Provinces, but its contribution is about six times the amount that the Central Provinces contribute. I think there is no better proof than that afforded by those statements that the present provincial system is not liable to the charge, that the poorer provinces are taxed beyond their power, and that the largest provinces get off with too small a contribution.

" And with reference to the proposal that it might be possible to alter the system of assignment altogether, which has been made by the Hon'ble Mr. Bhuskute, and partly also by His Honour the Lieutenant-Governor, I can only say that the question has been considered over and over again and that there are immense difficulties in the way. You cannot deal with India as a homogeneous country. Various provinces are in various stages of advancement. Bombay and Bengal, which have been a long time under the control of the British Government, are advanced provinces to an extent to which such recent occupation as the Central Provinces can lay no claim. They are better fitted out with roads and communications; their whole administrative

system is more complete; the population is for the most part a more dense one; and their industrial development is also very much greater. You cannot deal on the same footing with such provinces as Bombay and the Central Provinces, which, although neighbours of each other, are yet in such entirely different stages of development. Now, if we were to attempt to make a theoretical distribution of liability according to the Hon'ble Mr. Bhuskute's plan so that the same tax per head should be levied towards Imperial purposes from the various provinces, we would be met at the outset by this impossibility—we would be assuming an equality between provinces which does not exist. It is perhaps a fault, but it is an inevitable fault of the provincial system, that we must take the actual state of each province as a starting point, and the result of the provincial system, as at present applied, is that taking that starting pcint each Local Government can practically keep in its demands upon the general account its relative position with reference to all other provinces. We cannot, for example, reduce the assignment made to Bombay because we find that in some respects its expenditure is greater than that of Bengal and might theoretically be reduced to the same standard. It is not practicable to impose upon any province an obligation to reduce its expenditure to the standard of another province. Suppose, for example, that dealing with questions by the head of population, we were to tell Bombay that we must reduce its assignment by half a crore. What would that mean to Bombay? It would only mean that it would not have the means of carrying on its existing system of administration; perhaps it would have to discharge some hundreds of its officers. We would certainly dislocate by this means its whole administration. We must, therefore, as I say, deal with each province, in the consideration of the requirements of its administrative expenditure, almost as a separate unit, and in these matters at least take each province as we find it. I quite agree with the theory of His Honour the Lieutenant-Governor that the Government of India has a very direct interest in provincial expenditure and should not wash its hands of responsibility for it. I think the Government of India gave a very satisfactory proof of their acceptance of that theory in returning into the hands of the Provincial Administrations the balances which it was obliged to take from them when it had to impose upon them a share of the retrenchment which had to be effected two years ago.

"I have taken a note also of the Hon'ble Mr. Bhuskute's remarks in which he called upon us for reduction of taxation, but unfortunately they are mixed up with calls for increase of expenditure. These are two things which it is very obvious will not go together. You cannot reduce taxation and at the same time urge, as Mr. Bhuskute does, that 'the department of Police should undergo a thorough revision,' that 'there is an universal cry for the separation of the Judicial and Executive functions, and for larger grants for higher education' on the ground that the taste for learning has increased and the amounts at present allowed are inadequate. I freely admit that it is highly desirable that we should increase expenditure in some directions, but it must be continually borne in mind that if we increase the expenditure we can only do so by increasing taxation. It is no use to call upon us to diminish this tax and that tax, if at the same time you call for increased expenditure. At the same time I would call attention to one of the theories of the Hon'ble Rai Ananda Charlu with reference to provincial and local arrangements. He protests against our entering upon a new settlement of our contracts with the Provincial Governments with the idea that we are going to make money out of the operation. He points out with perfect truth that the local funds, which, I admit, are in Madras developed to a much larger extent than in any other part of India, are demanding larger assignments of funds from the Provincial Government, that the Provincial Government requires for this and other purposes larger funds; and he argues that therefore we are called upon to increase the provincial assignment that all this may be undertaken. But then the question is where is the money to come from? He protests against our sending Settlement-officers over the land because it means enhancement of land-revenue; and he wants the salt-tax reduced. You cannot be increasing your provincial assignments and increasing provincial and local expenditure unless you are prepared to pay for it by paying increased taxes.

"He has called upon us also to restore the Famine Fund, and declares that

it is useless for us to talk of restoring the Famine Fund, because in order to do that we must repay to it the seven crores of rupees by which the forward totals fall short of 1½ crores a year. I have to ask again where these seven crores are to come from? I would ask, for example, what would be thought if I were to give notice now, that, as the Hon'ble Rai Ananda Charlu has pointed out this obligation on the part of Government, at the next sitting of Council I would introduce a Bill by which the income-tax for the present year would be quintupled, because it would require fully that amount of taxation to restore these seven crores of rupees which he represents to belong to the Famine Fund? Government does not possess money other than what it derives from taxation. It is no use saying that we must get this money and that money if at the same time it is known that it cannot be got except by taxation. The Famine Fund had occasionally to be suspended because the Government did not possess the money to keep it at a crore and a half; and it deliberately chose to suspend the grant rather than impose a new burden upon the people. If the Hon'ble Rai Ananda Charlu's advice had been taken then it would have been necessary, in order to keep up the Famine Grant up to the mark, to impose some new tax upon the people; it is quite obvious that in no other way could Government have observed the obligation which he insists upon to keep up the Famine Fund to a standard of one and a half crores. But, as regards this assumed standard, I shall read a paragraph from Sir John Strachey's statement dated the 27th December, 1877, which shews that it was never his intention to permanently fix it at one and a half crores, and that he knew perfectly well that the question would arise whether it should be maintained at that figure or should be reduced :—

* * * * * * *

'Making all allowances for these considerations, I cannot now venture to estimate the yearly average cost of famines in loss of revenue and actual expenditure at less than £1,500,000. This amount has necessarily been arrived at in a somewhat arbitrary manner, and it will be seen to correspond approximately with the sum that would be requisite to distribute the charges of the last five years over a period of ten years. It will remain for the Government in the future to reconsider, from time to time, the practical result of the assumption which we are now constrained to make on what are necessarily imperfect grounds, and to take all requisite steps in the way of correcting any error into which farther experience may indicate that we have fallen, either in the one direction or the other.'

* * * * * *

"I cannot imagine a more distinct statement made by the founder of the Fund shewing that it was not to be fixed at one and a half crores and that the amount was to be reconsidered from time to time. We have done so, and the Government has come to the conclusion on the facts set forth in the Financial Statement that, for the present at least, we meet all necessary obligation by keeping it at a million. So far as the power to reduce the amount is concerned, the Government is at perfect liberty to reduce it to a million or any other sum which the experience of the past may teach to be expedient. The original sum was fixed as the amount which the then Government calculated to be sufficient and expedient, and in the same way the present or any future Government can consider the question upon the same basis and find it sufficient and expedient to fix it at a crore. I am rather sorry to see that an Hon'ble Member of this Council should charge the Government with something like a breach of faith or dishonesty in its reducing the amount to a million, and should declare that he expects further dishonesty to take place because we have been using the term 'grant' instead of the term 'fund' which he prefers to use. As to this point perhaps I may also quote from the same speech of Sir John Strachey. It is to these speeches, delivered at the time of the institution of the Famine Fund or Famine Grant that we must appeal to discover the meaning of the Famine Insurance system and to see from the expressions in them what the intentions were that the founders wished to be carried out :—

* * * * * *

'So far, however, as we can now speak for the future, the Government of India intends to keep this million and a half as an insurance against famine alone. In saying

this I should explain that we do not contemplate the constitution of any separate statutory fund, as such a course would be attended with many useless and inconvenient complications, without giving any real security. Unless, then, it should be proved hereafter by experience that the annual appropriation of a smaller sum from our revenues will give to the country the protection which it requires, we consider that the estimates of every year ought to make provision for religiously applying the sum I have mentioned to this sole purpose, and I hope that no desire to carry out any administrative improvement, however urgent, or any fiscal reform, however wise, will tempt the Government to neglect this sacred trust.'

"One of the inconvenient complications which Sir John Strachey foresaw and deprecated was that we would from time to time have to temporarily increase the taxation purely for maintaining the Fund at a certain amount, and we might have now to introduce a Bill to levy seven crores of rupees of new taxes from the people in order to restore this seven crores which the Hon'ble Member claims for his Famine Fund.

"The Hon'ble Member does not at all say what we are to do with these seven crores. I suppose they are to be put into some hiding place. He seems to have overlooked the fact that there is nobody but ourselves to whom the restoration could be made; it is the Government treasury alone to whom the restoration could be made.

"There is one thing also with reference to which I desire to express my regret. The Hon'ble Member who represents Madras has used the word 'protest' half a dozen times, and it is my duty on the part of Government also to make a protest. My protest is this, that when an Hon'ble Member desires to make a statement on a subject in which he accuses the Government of dishonesty, which the Hon'ble Member has done, he ought to be very careful in ascertaining the facts. I do not think that my hon'ble friend Rai Ananda Charlu has done so before bringing this accusation against us. If I followed his statement rightly—and Hon'ble Members here have had the same opportunity as I have had of following his speech—he has accused us of suppressing the Famine Fund, and he has accused us of using this Fund for the purposes of ordinary irrigation, ordinary railway-construction and other things. He has also accused us of concealing these facts. At the last meeting of the Council I stated that if any Hon'ble Member desired to have information on any points which were not fully enough explained in the Financial Statement, I would be very pleased if he gave me notice of what he wanted in order that I might possibly give him all the information he pleased. The Hon'ble Rai Ananda Charlu has not asked for a single piece of information, and yet he now says that the Government has acted dishonestly in respect of these moneys and we are withholding the facts and the accounts of the expenditure. There is not a single point in all the information which he says we are withholding because we dare not publish it, in which the fullest details are not set forth in our annual accounts for the benefit of every one who desires information; and they are set out not only for the year concerned but for all previous years. The Government accounts are available for any Hon'ble Member (in fact, for any member of the public,) who wishes to see them, and any one with the slightest knowledge of how the work of Government is done ought to know that the Government publishes these accounts. I have great pleasure in passing down a copy of the accounts of 1894-95 to the Hon'ble Rai Ananda Charlu, if he wants to satisfy himself that the Government of India has published the full information he desires.

"I am afraid I am a little discursive in the order in which I take up the different subjects. It is rather difficult for me to take up my subjects in a regular and definite order, because I have been busy the whole day in taking notes of the various statements which have been made by the speakers, and I am obliged to bring matters forward in the order in which I have taken notes.

"I am led back now to the salt-duties, which have been criticised and represented to us as a heavy burden upon the people. If it is a burden at all, it is a burden which not a soul in the country feels, and this is good evidence that it is a burden which can be very easily borne. Of course I quite agree in thinking that it is desirable that these duties should be reduced if possible, and possibly some day the question may arise. But there is one thing I will impress

upon Hon'ble Members who think that the Government imposed a heavy burden by the increase of the salt-duties, which took place about ten years ago, and that is, that instead of affecting the salt-trade by making the price of salt higher, during the last ten years the price of salt has been very much lower than it was ever before in this country.

"I have here statistics which go back to the year 1861 and there is hardly a single province except Burma in which the figures do not show that salt at the present day sells at a cheaper price than it ever did before. The truth is that the improvement of communication in the country and the gradual extension of railways has cheapened salt so much that notwithstanding the taxation imposed upon it its price has not been added to. The consequence therefore is that the burden upon the people in respect of the salt, instead of increasing, continues to diminish and has been continually diminishing.

"As regards the burden of land-revenue the Hon'ble Rai Ananda Charlu has expressed his horror at seeing the Settlement-officer let loose in every province raising the land-revenue. I will read a paragraph from a despatch which was recently sent by the Secretary of State which will show that the land revenue has also been a gradually diminishing burden upon the people. This paragraph runs as follows—

* * * * * *

'8. We shall first set forth, as briefly as the facts permit, the successive steps by which the Government share of the assets of land has been reduced.

'It was laid down in Regulations IX and X of 1812, following the precedent of the Permanent Settlement, that a net income of 10 per cent. on the Government demand should be reserved to the proprietors. This fixed the State's share of the assets at 91 per cent. Regulation VII of 1822 raised their income to 20 per cent., and reduced the share of the State to 83 per cent. of the assets. The assessment was to be based upon an enquiry into the productive capacity of each field or plot of land; and the Resolution which accompanied the Regulation substituted for the two or three years term of settlement that had till then been customary, a term of ten to twelve years, and thus introduced the first long-term settlements. The detailed enquiry thus prescribed was found to be impracticable, and Regulation IX of 1833 was based upon a minute by Lord William Bentinck, dated 26th September, 1832, in which he proposed that the demand should be fixed upon a general consideration of the circumstances of each village or estate, and that the term should be extended to fifteen or twenty years. At the same time, he limited the Government share of the assets to 70 to 75 per cent. All the early settlements of the North-Western Provinces were made under this Regulation, and for the most part for a term of thirty years. In 1844 Mr. Thomason, Lieutentant-Governor of the North-Western Provinces, reduced the share of the net assets to be taken as revenue to two-thirds, or 67 per cent. In 1855 the demand was still further reduced by the Saharanpur Instructions, Rule XXXVI of which limited it to 50 per cent. of what were described as "the *real* average assets," and this proportion has ever since formed the basis of assessment in Northern India; though, as we shall presently show, still further reduction has been authorised in certain cases.'

"I wish in addition to this to point out to my hon'ble friend a purely arithmetical calculation which will show how much of the increase of the productiveness of the land has fallen to the share of the proprietors and how very small the increase to Government has been. We will assume that the land-revenue at present is something like 25 crores. The purpose for which I am making use of this figure is one in regard to which we need not be particular. I will assume that fifty years ago the land-revenue assessed upon the same territory was 15 crores and that we have during this time increased our assessment of land-revenue from 15 crores to 25 crores. Let us see what this enhancement really means to the people of the country. We fixed it at 15 crores at a time when Government got 75 per cent of the assets and the people got 25 per cent. The people's share of the assets, fifty years ago, was therefore five crores. Now, when we get 25 crores we get 50 per cent., and the consequence is that the share of the people is equal to our own and is equal to 25 crores. So that the Government share of the produce of the land has increased from 15 crores to 25 crores, but the share of the people has increased from 5 crores to 25 crores. This will show that the enhancement of the land-revenue has been brought about without adding to the burden of the people, and that the amount left in the people's pockets after each settlement is greater than at each previous

settlement. This is what our Settlement-officers have done; they universally find that in claiming for Government its proper share of the enhancement of the produce of the land, they leave a continually increasing share in the pockets of the people.

"Another matter which was referred to in the Hon'ble Mr. Bhuskute's address was his declaration that the vigorous prosecution of railways has caused us heavy loss, and in the same way the Hon'ble Rai Ananda Charlu says that we are imposing a new and unnecessary burden, because we are raising four crores of rupees during the current year for the construction of railways. I can only say that the vigorous prosecution of railways during the last ten years has not caused loss of revenue. Our railways have produced more than the interest on the loans raised for the purpose of construction, and as regards these four crores of rupees that we are to raise this year, every single railway project has been separately investigated and the greater part of them will produce a great deal more than the amount we will have to pay as interest on the loan. At the present moment the whole of our loss on railway transactions is about two crores of rupees, that is to say, we have constructed and we are running 19,000 or 20,000 miles of railway, part of them constructed on military grounds and without reference to commercial returns; part of them constructed for protective purposes—protection against famine; and most of them constructed for commercial purposes. Taking the whole of them, the charge to Government is only two crores of rupees. I would ask simply as a question of policy whether the possession of these 20,000 miles of railway is not worth to the people of India two crores of rupees. There is not a soul in the room who would not admit that India would be better for these railways even if the people had to pay ten crores a year instead of two.

"With reference to these two crores of rupees I have also to state that the loss which we have to bear mostly arises upon railways constructed on the guaranteed system. The loss a few years ago was only 70 lakhs of rupees. It has since mounted to two crores mainly because we have to bear a heavy loss of exchange upon the sterling debt connected with the older railways. But it is obvious that this heavy loss has nothing to do with the present construction of railways. We would have to bear this loss even if we were not constructing any railways during the last ten or twenty years. The later construction and expansion of railways has therefore been on the whole a financial gain.

"Before I close I want to refer to another statement which is made in the Hon'ble Mr. Bhuskute's address and which refers to the military expenditure. We have been liberally accused on all sides of having indulged in heavy military expenditure, and putting the figures of 1887 and 1893 side by side it is stated that the latter has risen by 2¾ crores of rupees; and the statement is made that the only portion of the increase due to exchange is 95 lakhs. The Hon'ble Mr. Bhuskute is erring in good company, for the *Economist* made the same blunder in a criticism it published about July last. The Hon'ble Mr. Bhuskute when he talks of these charges means that the figures which are entered in the exchange column account for only 96 lakhs of increase; but he forgets, what has often been pointed out, that there are a number of charges which enter into our Indian column of expenditure which are very much affected indeed by exchange. One of them, for example, is the obligation to pay the British soldier at a sterling rate. The consequence is that as the rate of exchange falls we have to pay him more rupees. I have made an actual calculation of the difference which arose between 1887 and 1893 on this account and also on account of exchange compensation allowance which, whether the Hon'ble Member is in favour of it or not, he must admit arises purely from the fall in rate of exchange. From these figures I take it that from 55 to 60 lakhs are the amount of the increase which is made in the British soldier's pay and 26 lakhs were the amount which we had to pay for exchange compensation in the year 1893. These two amounts taken together make up 81 to 86 lakhs of rupees, and these 86 lakhs do not represent increased military expenditure, as the Hon'ble Member and the *Economist* put it, but arise from the fall in exchange.

"There is one thing with reference to this subject which I wish to mention. It seems to me that I have been unnecessarily modest in not claiming for

myself the whole of the credit for the improvement that has occurred in the financial state of affairs. I thought I was bound to be honest and state that the increase of some Rx. 1,400,000 was due to exchange. For many years past the Government of India has been declaring that the difficulty they were in had been almost entirely due to the imposition upon it of the burdens arising from the loss in exchange, and that statement has been continually denied by our critics, and we have been continually told that our difficulties arose from our own extravagance and that it was not any loss in exchange which produced this result. Well, the people who make that statement against us are bound, if they are consistent with themselves, to admit that the improvement in the present state of finances is due to our own good management, and that it is nonsense on our part to allege that the improvement is due to the rise in the value of the rupee. If they were right, and we were wrong, in estimating the gravity of the effect of the falling rupee, they are bound now to give to us, and not to the rising rupee, the credit of the recovery that has taken place.

"The Hon'ble Mr. Bhuskute, in the twelfth page of the statement which he has made, compares the duty and consumption of salt in 1886-87 with that in 1894, and deduces a conclusion as to the poverty of the people. I know where he has got these figures, but there is one important thing he omitted to observe. The consumption of salt in any given twelve months from various circumstances is always altering. The Hon'ble Mr. Bhuskute has taken as his first year one in which it was abnormally large, and for his second year one in which it was abnormally small. If he had only taken as his figures for 1886-87 those which are the average for that year and the year before it and the year after it, and for the second year also not the figures of that year but the figure which is the average of that year and the year before it and the year after it, the result is that the consumption of salt for the first period on which the Hon'ble Member makes his stand is 32·8 millions of maunds and for the second 34·4, and the Hon'ble Mr. Bhuskute's conclusion as to 'the poverty of the masses' becomes reversed.

"In connection with the taxation of salt, which is said to be an extreme burden upon the masses, I wish to make one remark. One can hardly understand the people of India being an over-taxed people, as they are often represented to be by Native political associations, if they do not in some way or another feel the burden of the tax. But the truth is that there is not one man in a hundred who is in the least degree aware that he contributes a single pice to the system under which he obtains security for his property and person to which his forefathers of three generations ago were utter strangers, and is assured of the possession of legal rights which are superior to those enjoyed by many nations of the West. I can only oppose to this imaginary, poor, over-taxed raiyat the fact, which is perfectly notorious and which every one can verify for himself, that there is not a single country in the civilized world where the amount of taxation is so small as it is in India.

"And here I want to add one remark with reference to the military expenditure which is attacked by the Hon'ble Mr. Bhuskute and a great many other people as a tremendously heavy one. I can quite understand the ordinary cultivator, whose knowledge of history never goes beyond his own life and whose experience is limited by the boundaries of his own village, thinking that the state of peace, prosperity, tranquillity and comfort which he enjoys is the natural condition of India. But for educated gentlemen like our political critics to know nothing of the history of their own country astonishes me. They have only to look back one hundred years to see that those fields which now smile with yellow harvest and which the husbandman can till every year with the absolute assurance that in time he will reap his harvest were year by year liable to be devastated by warfare or by the rivalries of contending chiefs whose armies plundered the country. The districts from which the Hon'ble Mr. Bhuskute comes were the highway between Northern India and the Dekkhan. They were the districts through which the armies of the Mogul poured from Northern India to the Dekkhan for conquest and for plunder. The whole country within the last hundred years resounded to the tramp of armies and was filled with robbery and rapine, and that is a state of things which would return to India if the British army were withdrawn. The one security that India has for the

continual preservation of that state of peace and tranquillity is that there is one Paramount authority that possesses sufficient power to suppress all disorderly elements. It is at the back of our civil administration, which would not be effective unless it could carry out its duties in peace and quietness. The cost of the army, to which 250 millions of people are indebted for the peace and tranquillity which they enjoy, comes to something a little more than half a rupee per head of the people protected. The Hon'ble Sir Henry Brackenbury has made a very full statement to-day which is a complete answer to those who think that the interests of economy are not fully studied in its administration. There is no army so effective anywhere as the army of India; none in which the money spent is made to go so far in the direction of efficiency. I cannot understand how educated people who know the perpetual condition of warfare and insecurity in which people were in India before it was occupied by one over-mastering Power can make any objection to the military expenditure which is necessary for maintaining the security, peace and tranquillity, to which Mr. Bhuskute refers as one of the gifts of the British power.

"My Lord, I have left till the end a necessary duty—that of answering the questions which have been put to me by the Hon'ble Mr. Playfair. I shall answer them one by one. The first question that he asked was with reference to opium—whether I consider that the rise in the price which we offer for crude opium is sufficient. I think it is, and my reasons are that it has secured to us as much extension of cultivation as we wanted: that is, enough to enable us to recommence piling up a reserve. I regret that the crop has partially failed, and that the raiyats again will fail to benefit by the enhanced price to the extent that we and they hoped they would. What is wanted more than anything else is a favourable season; and, if we were to get a fairly favourable season, I am quite sure that the cultivator would get such encouragement that we would obtain, at the price we at present offer, all and more than all the cultivation we want.

"Another question was asked with regard to the interest which we propose to fix for the loan which we are about to issue. This is rather a difficult question to answer just now, for it is difficult for me to make a statement, without its being held to some extent to be binding. I must therefore begin by saying that any statement I make now will be understood as not in any way binding upon us when we come to make a settlement of the terms of the new loan. What they will really be depends solely upon the state of the market at the time. But, if I am allowed to make this complete reservation as to what we may do, I have no hesitation in saying that, unless circumstances change, my advice to the Government will be to issue a three per cent. loan and to add conditions guaranteeing it against a reduction of interest for a certain number of years, say, twenty years or something like that.

"I hope my hon'ble friend will be satisfied with that answer. It is impossible for me to give any answer which may be taken in any way as pledging the Government.

"In regard to the question of saving bank balances raised by the Hon'ble Member, the difficulty raised is one which is felt not only by the Government in this country but by the Government at home. The only security which we have in respect of our saving bank balances is that the amounts are all extremely small, so that it requires a very large combination of depositors to make a demand upon us which we would have the least difficulty in immediately meeting. They are, of course, secure of being all ultimately met, in any circumstances. We have, as the Hon'ble Member points out, about 10 crores on deposit payable upon call. But 10 crores is composed of a very large number of very minute items, and in practice we have as little danger to fear as any ordinary Bank, in respect of the calls of its depositors.

"Now, my Lord, before I close I have one word to say. It may be considered impertinence on the part of a junior Member of your Excellency's Council to say a word in acknowledgment of the services of a senior Member of this Council. But my relations with my hon'ble friend Sir Henry Brackenbury in the financial administration of his department have been such, that it is impossible for me to allow him to leave this Council without conveying to him, on the part

of the department over which I have the honour to preside, our acknowledgments for the grand work that he has done in bringing under complete financial control the whole of the expenditure of his department. I have had in my time of service in the Financial Department, now extending back over a quarter of a century, not a few contests with the Military Department. It is almost necessary that these should arise, because the Military Department is peculiarly the spending department of the Government and the Financial Department is very much interested in its financial control and in its financial arrangements. But there have been no difficulties of this kind during the time that I have had as my colleague the distinguished officer who sits on my left, and who is not only a distinguished soldier and military administrator, but is also a financier, and in that capacity has been able to give to me in my official duties most material assistance and helpful counsel."

His Excellency THE PRESIDENT said:—"I recognise with pleasure that no attack has been made on the policy of the Budget now under discussion, which calls for any general defence from me. It is not a sensational Budget; it is, as the Hon'ble Member has said, a modest Budget, as modest as himself, but I doubt if sensational Budgets are always the most satisfactory. It is generally agreed that, in the circumstances of the present time, the proper financial policy for India is one that is cautious, moderate and conservative, and that while the time may come, as the Hon'ble Member has hinted, for a comprehensive revision of the position, that time is not yet. What we have done in the Budget before us is to take advantage of the increase of the revenue which has exceeded the anticipations of last year, in two ways; in the first place, to retrace certain steps which we were very unwillingly obliged to take in laying under contribution for general purposes, grants which otherwise would have been devoted to special and useful purposes; and, in the second place, to the making good of special deficiencies. It is, in my opinion, most satisfactory that we have been again able to grant the large sum of a crore of rupees to the purpose of Famine Insurance—purposes as to which I cannot altogether accept the definition of the Hon'ble Mr. Ananda Charlu, which I venture to think is based on some misconception of the original proposals, of the nature of the transactions of the last fifteen years, and of the necessities of to-day. It is also most satisfactory that we have been able to restore to Provincial Governments the contributions from their balances which we had to demand in 1894. I have for myself always entirely sympathised with the disappointment which the Local Governments must feel, when they are suddenly called upon to relinquish funds on which they had calculated for works which they considered essential for the well-being of the people under their care.

"It is satisfactory also, for the reasons so well stated by the Hon'ble the Military Member, that we are at last able to complete those arrangements on which, it has been long recognised, in an emergency the safety of the Empire would depend. There is only one general remark which I would like to make with reference to these aspects of the Budget, and that is that it must not be supposed that we are going to deal equally generously with all demands of the kind. My hon'ble colleague, the ~~Financial~~ Member, will insist on as strict economy as the Hon'ble Mr. Ananda Charlu can desire.

"I am sure the Council will have heard with much interest the statement which has been made by the Hon'ble the Military Member; and not only have we listened to it with interest, but it will be exceedingly valuable to have on our proceedings a record of this kind. It is a record of a great work, not only the work during five years of an individual of distinguished ability, but the work of a great Department of State under the guidance of the Hon'ble Member. It is, I believe, a record of progress both in efficiency and in economy.

"We shall all miss the Hon'ble Member in our debates here, but we rejoice to know that the influence of his work will be felt in India for many years to come.

"There is another great Department, however, in which it is impossible for me not to take a personal interest, and to which I should like to refer. The

Hon'ble Mr. Playfair has spoken of the importance to India of its railways. He not unnaturally dwells specially on the question of rates. But I shall, with him, postpone the discussion of that delicate question. He has, however, spoken of the general railway policy of the Government with approval, and I should like to say a word or two about that.

"The development of the country by the construction of railways has for long been the recognised policy of the Government of India, and I need support it by no detailed argument. The fact is that it is the method by which we can materially improve the condition of the vast population dependent upon agriculture most surely and most steadily, and I am the last person to deny the contention of the Hon'ble Member from the Central Provinces that there is much in the condition of the agricultural population that calls for the careful attention of the Government. Even irrigation works, all important as they are in certain localities, can scarcely claim such far-reaching results as railways; at all events, unless irrigation and railway works proceed simultaneously.

"I need scarcely point out that the improvement in the condition of the people which I have claimed for railways has a special bearing on the discussion of to-day. I believe that, if the lines we have constructed for military purposes and protection against famine are kept separate, a very sufficient return is realised on the capital we have expended on railways. But, in truth, their value is far greater indirectly—from the growth and stability of the land-revenue on which Indian finance depends so much, and which in its turn depends largely on increased facilities of communication.

"But while there has never been much doubt about the policy, there has been considerable debate as to the best means of carrying it out. At first the construction of railways was generally entrusted to companies under some form of guarantee; then came a period when State agency alone was employed. Since 1880 the pendulum has swung now to one side, now to another: and the problem has been how best to utilise the resources of the State on the one hand, and the funds which private enterprise offers on the other.

"I think there has been some misconception of what the Government have been doing in the matter. I shall not repeat more than necessary what has been said by other Members, but I should like to say how it appears to me.

"As a preliminary, however, we must clearly understand what we mean by private enterprise as applied to railways. It is not the same, and probably it never can be wholly the same here, as it is in England. There it means that certain persons propose to construct a railway; they obtain surveys and estimates and prepare their Bill; they prove their surveys and estimates before a Select Committee, and pass their Bill, if they can. They raise their capital, buy the land, carry out their works; and, if they succeed in all this, they may make a profit. Throughout they look for nothing from the State. Parliament gives them certain rights, and imposes on them certain obligations, but only interferes with them financially by mulcting them in heavy Parliamentary expenses.

"We have nothing of all this in India, not even the last item. Private enterprise does not stand alone in this way. I do not propose at present to examine the causes of this; I merely ask you to note the fact that it is the State which makes the survey, which examines the estimates, which sanctions the project which provides the land, which perhaps builds the line, and, quite possibly, in certain circumstances, might even work it. In fact the assistance given to the Government in India by private enterprise, with scarcely an exception, takes one of two forms: (1) it raises the capital in the sense that it acts as intermediary between the Government and the individual investor; or (2) it undertakes the management of the line when opened. Of the second, I need not say more than this, that the policy of entrusting the working of railways to company management has, in several instances, proved very successful, and may be carried further with advantage, provided that the companies are such that we can be sure the management will be in the hands of capable and energetic men.

"As to the raising of capital, I need scarcely remind you that the determining cause is the nature of the security offered. In proportion to any doubt which the investor may entertain of the safety of his investment will he demand a larger interest on his loan. The Government of India could certainly borrow on its own account all the money required for its railways at the cheapest rate, if it consented to offer the security of the revenues of India. Of late years, as I have said, it has been thought wiser not to do this in all cases, and the assistance of private enterprise has therefore been sought. That was the origin of the Branch Lines Resolution of 1893, which offered, not the guarantee of the Government, but a security based on certain traffic arrangements. I believe that as all, or almost all, of the lines coming under this Resolution would have been lines which had been approved by the Government as likely to give a fair return, the terms of the Resolution did, as a matter of fact, afford ample security. But, unfortunately, the conditions were necessarily somewhat complicated, and it was impossible so to state them as to bring home to the average reader what his true position would be. The results, therefore, have been disappointing, and the Government have taken the whole matter into consideration. It has now been determined to issue a new Resolution for branch lines which will offer two alternatives—

(1) a fixed yearly minimum dividend with such share of the surplus net profits as may be agreed upon; or,

(2) a rebate arrangement on the lines of the present.

"The particular rate of interest will, of course, form part of the bargain, but the present intention is that the minimum dividend to be guaranteed under the first alternative should not exceed 3 per cent., and the rate of interest secured by rebates under the second alternative should be 3½ per cent.

"The effect will be shortly this—

"Under (1) the company will receive an absolute guarantee of interest at a rate not exceeding 3 per cent. and a higher return if the net earnings of the branch are sufficient to pay more than the guaranteed dividend; and, as an alternative, under (2) the company will receive a dividend of 3½ per cent., provided that the amount of the net earnings from local and interchanged traffic be sufficient, and a higher return if the net earnings of the branch from its own traffic be sufficient to pay a higher dividend.

"I do not wish to be misunderstood. We do not put forward this new Resolution because the small success of the former Resolution has hindered us in pushing forward the work of construction of railways. I do not believe that the amount of work we are now doing is at all realised, and I should like to give a few figures of mileage to show what it has been during the year now current.

"At the commencement of 1895-96, *i.e.*, on the 1st April, 1895, the total length of railways open for traffic was 18,863 miles, and the mileage under construction, or sanctioned for commencement on the same date, was 2,217 miles. During 1895-96, *i.e.*, from April 1st, 1895, to the present time, the commencement of 2,384 miles of new railway was authorised, and 1,009 miles were opened to traffic.

"Thus the total length of open line at the present moment is 19,873 miles, and the mileage now under construction, or sanctioned for commencement, is 3,564 miles.

"Adding together the amount of construction completed during the current year, and that in hand at the end of it, we have 4,573 miles, or an addition of one-fourth to the existing railways of India. This length of line exceeds the total length constructed in the United Kingdom in the last 20 years—or, to put it another way, is more than double the entire mileage of what is sometimes called the premier railway in England—the London and North-Western Railway Company—while there are only half a dozen Railway Companies in the United Kingdom whose mileage exceeds that which we opened as new lines in India in the single year 1895-96.

"I think that Hon'ble Members will be of opinion that this is a sufficiently extended programme. That part of it which still remains to be completed

represents an expenditure of something like 35 crores. The Financial Statement shows that we are preparing to undertake not much less than a third of it during the year 1896-97, including the amounts which are to be provided by companies, and do not pass through the Government accounts.

"It is also a comprehensive programme if you look at the character of the principal undertakings. In the west, in the Bombay Presidency, we have the Rohri-Kotri Chord, 200 miles, which not only practically doubles the main line to Karachi, but secures us against an interruption of the traffic by the irruption of the Indus.

"Passing northwards, we have in Upper India the new company, the Southern Punjab, with a mileage of 400 miles, shortening materially the distance from Delhi We have extensions of the Bengal and North-Western and Tirhoot State Railway system, 489 miles, which will provide on the north side of the Gogra a much improved communication between the districts where population is congested, and the districts in Eastern Bengal and Assam where labour is scarce, and on the south side of the Gogra a series of branches in the Eastern part of the North-West Provinces which is peculiarly liable to scarcity. We have also an important work, though the mileage is shorter, in the linking-up of the metre gauge systems of the north and west by a new connection between Cawnpore and the Gogra river, 80 miles.

"In Central India we have the Saugor-Katni Line, 118 miles, in connection with the Indian Midland system, which will not only secure districts which have suffered from scarcity more than any others since I came here, but will give a direct access for Umaria coal towards the west; and a similar advantage for east and west traffic has been secured by the construction of the Godhra-Rutlam and Bhopal-Ujjain Railways, a little further south.

"In the east there is the great scheme of the East Coast Railway, long contemplated, and now in a fair way to completion, of which it might be enough to say that Calcutta and Madras seem prepared to tear any one to pieces who denies their claim to the larger share in its benefits. At all events, this large work of which there is now under construction about 600 miles, while it completes the programme of the Famine Commission—a Commission which I may remark did long ago the work which, if I rightly understood the Hon'ble Mr. Ananda Charlu's observations, he asked should now be done—in the one district remaining, Orissa, and gives an independent access to Calcutta to the Bengal and Nagpur Railway, it will connect Madras with the Northern districts of that Presidency, and will bring to it cheaply and expeditiously the excellent coal of Singareni. I am obliged to the Hon'ble Mr. Rees for the warm way in which he has represented the views of Madras.

"In the north-east, by the doubling of a considerable portion of the Eastern Bengal Railway, we hope to provide facilities for the great jute trade in which this city is so largely interested, while it is not too much to say that the construction of the Assam-Bengal Railway, 600 miles, will open up an entire province, and have a lasting effect on another great interest, *i.e.*, trade in tea.

"In Burma we have in hand the completion of the Mu Valley line to Myitkina, which will give a thorough connection to Upper Burma over more than 700 miles of railway and by the Mandalay-Kunlon, 224 miles, the carrying forward of our railways to the Chinese border.

"In addition to all this and outside the mileage figures I have given, the Nizam's Government have several railway projects under consideration, and we are assured that a line in the Godavari Valley of some 400 miles in length will shortly be begun. The growing interest taken by Native States in railway construction is an encouraging symptom.

"I venture to say that in this programme—I do not profess to have described it exhaustively, but only to have touched on its more prominent features and the longer lines—we have endeavoured to provide for the more pressing needs in many directions in the varying conditions of this great Empire. I do not deny that there are many more to satisfy. I know that here in this city there are those who complain of our inaction. I can say for the

Government as well as for myself that we can never be indifferent to anything that would tend to the prosperity of this city and of its trade. No one who has seen the magnificent spectacle of the river crowded with shipping could fail to recognise how strong would be the arguments—sentimental as well as material—against anything that affected adversely interests so great. But, if I may say so in a whisper, we are doing something for Calcutta on the East Coast Railway—on the Eastern Bengal Railway—perhaps I might add in the opening up of Assam. I am not going to argue in detail the vexed question of the connection to the north. I am bound to say that I am not one of those who think two railways always better than one, or three railways better than two, and I am also bound to add that I cannot find evidence to prove that the existing facilities are insufficient for the existing traffic. On the other hand, I admit that there are districts from which new traffic might come to Calcutta, and I admit that, if and when existing facilities prove insufficient, it would be necessary to provide additional facilities. All I would urge is that in the case of new traffic we are bound to have as complete information as can be obtained, in the case of coal fields to be opened up we are bound to be satisfied as to the quality and quantity of the coal, and in the case of fresh facilities we must study the best way of giving them; and, much as I should like to see the coal traffic from Palamow or Jherria filling the docks of Kidderpore, all I can say now is that we are prosecuting our enquiries as to the mineral resources of the district between Calcutta and the North-West, but they are not complete.

"As to fresh facilities *primâ facie*, the first desideratum is to shorten the distance to be travelled. It will have been observed from a reply by the Secretary of State the other day to a question in Parliament that we have acknowledged that it falls to the East Indian Railway to construct what is undoubtedly the shortest line to the north, namely, the line known as the 'grand chord;' but we have coupled that acknowledgment with a very important stipulation. We are distinctly of opinion that full rights to running powers must be reserved for the administration working the Oudh and Rohilkhand Railway over any lines that may hereafter form part of a new through route between Mogal Sarai and Calcutta, and that stipulation will be found in the contract for the construction of the lines to Shergotty and Gaya now sanctioned. We recognise that it is imperative that the mercantile communities not only of Calcutta, but of Upper India, should be secured the full benefits that such a scheme, when carried out, would bring, and what I wish to make clear is that, if we have not been able to accept the case for the immediate construction of a second line between Calcutta and the North-West, we have at least taken care that no steps we are taking now shall be an obstacle to such a line, if it should be found desirable in the future.

"And, if any one has any hesitation about the efficiency of such a provision, I can give him an example. I was till the other day a Director of a Railway Company in Scotland that only by a right to running powers over a certain section of railway has access to an important city. It was essential to our rivals to shut us out if they could, and I will not deny that they did their best, but that they failed I think will be self evident when I mention that the line of which I speak formed the 'run in,' 'the finish,' of the great railway race to the North, of which the home papers were so full a few months ago. There will be no lack of competition if the rivals of the East Indian Railway have the same powers as the rivals of the Caledonian.

"I have shown that our programme is a full programme, and that it covers a great deal of ground. I wish now to impress upon you that all this lays upon the Government one duty above others for the present, *i.e.*, to resist temptation. It *is* very tempting to be asked to embark in large schemes or great works. But, if I am right in saying that the State is concerned in some way or other in every railway enterprise in India, it is undoubtedly incumbent on us not only to push forward railway construction at a favourable time such as this, but to do so at a rate that is not excessive, but can be steadily maintained: to be bold indeed but not to be rash.

With this object it is most desirable that the Government should themselves determine in the case of the larger schemes what new railways are required, and when they ought to be undertaken. It is only by so doing that a programme can be formed, can be adhered to, and can be carried out with regularity and efficiency. For the present it will be clear to every one that so far as large schemes are concerned our hands are full, and our ambitions must be humble.

"But there is another branch of railway construction which is at this moment even more important than the prosecution of large schemes, and that is the construction of those shorter lines which spread out from the great systems and, by gathering together the produce of the country, extend the beneficial influence of these systems over a far wider area. There is but one opinion of the necessity that exists for these lines in all directions, if we are to secure the development of the country of which I spoke at the beginning. I hope that, though our hands are full, it will still be possible to proceed with this work. It is a work which is specially suited for the employment of private enterprise, and I have told you the encouragement we are prepared to offer. It is a work which can also be profitably undertaken by the great main lines themselves, and we are anxious to see them engaged in it. It is a work of which the several items may seem unimportant, yet which is the most potent instrument we possess not only to consolidate and render profitable the great railway system of India, in which so much of its wealth is invested, but to make it an all-powerful agent in the promotion of the material and social advancement and political tranquillity of the people."

CRIMINAL PROCEDURE CODE, 1882, AMENDMENT BILL.

The Hon'ble SIR ALEXANDER MILLER moved that the Report of the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882, be taken into consideration. He said:—"This Bill has been so frequently before the Council, and the effects of the procedure discussed in the Select Committee were explained so fully last week when I presented the Report, that I do not propose to-day to recapitulate what must be fresh in the memory of Members of Council."

The Hon'ble MR. BHUSKUTE said:—"My Lord, the jury system has existed in India in the shape of a germ from time immemorial. Even the law, as it obtains here, recognizes it in the panchayat, arbitration, etc. Nay, the conclusiveness of its judgments has been generally accepted with satisfaction. I should have liked, my Lord, to dwell more on this point, had it not been for the heavy work of this day. I think the Bill as amended will please most of us, though there is some hesitation about section 307 of the original Act. But in my opinion the new wording inserted for the words 'so completely' does not make any new changes."

The Hon'ble NAWAB AMIR-UD-DIN AHMAD KHAN, BAHÁDUR, said:—"My Lord the Bill to amend the Criminal Procedure Code, popularly known as the Jury Bill, has evoked a good deal of hostile criticism, and has engaged the attention of all classes of the community since its introduction in Your Lordship's Council.

"It is therefore a cause of much satisfaction that the Select Committee, as the result of their deliberations, have modified the original Bill to such an extent as to render any further adverse criticism unnecessary and have presented the measure in a form in which it can meet with general approval. The elimination from the Bill, as introduced, of the provision in respect of special verdicts on specific issues of fact is the most noticeable feature of the Bill, as amended, and will be regarded as a very necessary modification, while the provision requiring High Courts to consider the entire evidence and to give due weight to the opinions of the Sessions Judge and jury in cases of reference when the Judge and jury differ in the matter of a verdict, and extending the period of

exemption from service to twelve months in the case of special jurors, will I have no doubt make the jury system more acceptable to the people generally. I am exceedingly glad to find that the measure as it stands deserves cordial support, and I desire to be permitted to avail myself of this opportunity of congratulating the Hon'ble the Law Member in having on the eve of his laying down his high office been enabled to allay the uneasiness to which the Bill as introduced gave rise."

The motion was put and agreed to.

The Hon'ble SIR ALEXANDER MILLER moved that the Bill, as amended, be passed.

The motion was put and agreed to.

UNITED KINGDOM PROBATES BILL.

The Hon'ble SIR ALEXANDER MILLER said:—"The next motion in my name is the one with reference to the Probates and Letters of Administration Bill. I introduced this under the impression that it was perfectly and obviously non-contentious, and when I received from the Hon'ble Mr. Playfair the letter from the Administrator General which I thought was merely intended as a hint to call my attention to certain observations on the Bill, which I thought and still think showed an entire misapprehension of its meaning, I did not then think myself called upon to do more than mention the fact to the Council. Since then I have received what might be called a Parliamentary Paper from the Administrator General, which shows that he is still under what, without disrespect to him, I might call the illusion that the Bill will be injurious to the interests of creditors in India; and under the circumstances I do not think it would be wise in me to press for the passing of the Bill without its being referred, in the ordinary way, for the opinions of the various High Courts; and therefore I do not propose to make the motion that stands in my name, but would move that the Bill be circulated for opinion to Local Governments and Administrations and to the High Court of Calcutta."

The motion was put and agreed to.

REFORMATORY SCHOOLS BILL.

The Hon'ble MR. WOODBURN moved for leave to introduce a Bill to amend the Law relating to Reformatory Schools, and to make further provision for dealing with youthful offenders. He said:—"This is a Bill to amend an Act passed by this Council in 1876. Since that period several minor defects have been brought to notice, and some suggestions have been made to the Government by a Conference held in 1892, and the opportunity has been taken to consider the procedure in force in certain British Colonies. The detailed results of this examination are not very numerous, nor are they very important, but most of them are very useful. At this hour of the afternoon I will not refer in detail to them, but I may mention as illustrating them the authority that is given to a Subordinate Magistrate, who is not himself empowered to send an offender to a Reformatory School, to submit to the District Magistrate cases in which he considers that such detention is the most appropriate punishment: another, which I myself regard with special interest, provides authority by which opportunity is given to a Magistrate to discharge with a mere admonition a youthful offender convicted of an offence."

The motion was put and agreed to.

The Hon'ble MR. WOODBURN introduced the Bill.

The Hon'ble MR. WOODBURN moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments may think fit.

The motion was put and agreed to.

GLANDERS AND FARCY ACT, 1879, AMENDMENT BILL.

The Hon'ble MR. WOODBURN also moved for leave to introduce a Bill to amend the Glanders and Farcy Act, 1879. He said:—" It has been represented to the Government of India that it is highly expedient and desirable that the Glanders and Farcy Act should be made applicable to the Presidencies of Madras and Bombay and the Province of Bengal, as well as other Provinces in which it is desirable, and the entire object of the Bill is to make that extension."

The motion was put and agreed to.

The Hon'ble MR. WOODBURN introduced the Bill.

The Hon'ble MR. WOODBURN moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments may think fit.

The motion was put and agreed to.

The Council adjourned *sine die*.

"Provided also that if a lunatic is an inhabitant of a Native State in the Central India Agency, the Magistrate may, with the consent of the Native State concerned, make him over to the care of such State."

H. S. BARNES,

Offg. Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

NOTIFICATIONS.

ACCOUNTS AND FINANCE.

PUBLIC DEBT.

No. 1401-A.

Simla, the 10th April, 1896.

The Governor General in Council is pleased to direct that the following amendments be made in the Rules laid down in the Notification in this Department, No. 6318-A., dated the 28th December 1894, regarding the registration of Government Promissory Notes in Book Debt Account:

(1) In paragraph 11 of the Notification, substitute the words "each non-transferable certificate issued under paragraph 10" for the words "each such certificate issued."

(2) In Rule 10 of the Rules on the form of Stock Certificate, substitute the words "each non-transferable certificate issued for transmission to the Bank of England" for the words "each such certificate issued."

2. The paragraph and the rule as now corrected will run as follows:

(1) *Paragraph 11.*—No enfacement or renewal fees will be levied in respect of the issue of Stock Certificates; but *each non-transferable certificate issued under paragraph 10* by the Bank of Bengal, Madras or Bombay will be chargeable at the rate of one rupee for every Rs. 5,000 or part of Rs. 5,000.

(2) *Rule 10.*—No enfacement or renewal fees charged for issue of Stock Certificates; but *each non-transferable certificate issued for transmission to the Bank of England* by the Bank of Bengal, Madras or Bombay to be charged at the rate of one rupee for every Rs. 5,000 or part of Rs. 5,000.

ACCOUNTS AND FINANCE.

PAPER CURRENCY.

No. 1636-A.

The 10th April, 1896.

The following papers relating to a proposal to take power from the Legislature to raise from eight to ten crores of rupees the limit up to which the paper currency reserve may be invested in Government securities are published for general information.

By order, &c.,

J. F. FINLAY,

Secretary to the Government of India.

No. 5318-A.

The 7th November 1895.

From—J. F. FINLAY, Esq., Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary, Chamber of Commerce, Calcutta. / Madras. / Bombay.

I am directed by His Excellency the Governor General in Council to request that the Chamber of Commerce will be good enough to favour the Government of India with an expression of their opinion upon a proposal to take power from the Legislature to raise the limit of the paper currency reserve, which is held in Government securities, from eight to ten crores of rupees.

2. The maximum limit of the invested reserve was raised on the last occasion in 1890 from six to eight crores by Act XV of 1890, and in accordance with the requirements of the Currency Act the increases to the investment from time to time were separately notified, the limit of the investment having been raised to seven crores by the Notification in this Department, No. 5900, dated 19th December 1890, and to eight crores by the Notification No. 4861, dated 3rd December 1891.

3. The considerations involved in the question of an increase in the currency investment were fully discussed in 1890, and the history of the subject was brought down to 1889 in my letter to the Chambers of Commerce, No. 6468, dated 23rd December 1889, a copy of which is enclosed. The following table gives the figures of the circulation of paper currency for all India from 1887-88:

[In lakhs of rupees.]

Month.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
April	14,02	16,54	15,83	17,42	25,71	23,96	24,22	30,64	30,76
May	13,90	17,03	15,77	17,65	26,18	25,28	24,99	31,13	30,17
June	14,08	17,69	16,24	17,94	26,81	26,77	26,49	31,40	30,86
July	15,48	18,06	16,50	19,18	27,04	28,46	27,05	31,20	32,43
August	15,66	17,69	16,15	20,50	26,93	29,06	28,30	31,57	31,54
September ...	16,78	16,94	16,14	22,97	26,24	28,97	28,98	31,23	*30,37* *
October	17,78	16,74	16,63	25,66	25,99	28,94	28,59	31,81	*29,98* *
November ...	18,61	15,50	16,67	26,54	25,88	28,83	29,62	32,36	*28,39* *
December ...	17,69	15,15	15,47	27,04	24,85	26,05	30,13	31,45	*27,82* *
January ...	17,08	15,28	16,29	27,66	22,62	26,61	30,52	29,50	*27,12* *
February ...	16,45	14,83	16,37	26,42	22,90	25,86	30,20	30,35	*25,99* *
March	16,42	15,74	15,77	25,69	24,08	26,40	30,41	30,70	...
Average ...	16,16	16,43	16,15	22,89	25,44	27,10	28,29	31,11	...
Maximum ...	18,61	18,06	16,67	27,66	27,04	29,06	30,52	32,36	...
Minimum ...	13,90	14,83	15,47	17,42	22,62	23,96	24,22	29,50	...

* Figures added in March 1896.

The above figures indicate that the total circulation of currency notes has steadily increased since the year 1887-88 and has now reached a figure about double that of the year 1889-90. But the Government of India are of opinion that these figures of total circulation show the increase as larger than can be considered to be the normal increase which may, with due regard to the caution desirable in the discussion of the question now under consideration, be counted on as certain to continue. In the first place, the Government balances during the past two years have been unusually high and a great portion of the excess balances, held in the Government Reserve Treasuries in currency notes, is included in the circulation. Secondly, the figures include the notes held by the Presidency Banks at their head offices, but the demands for encashment of notes so held are occasionally so large that a considerable portion of them cannot be treated as permanently in circulation.

4. On the grounds above explained, it is considered that for the present purpose it is desirable, in order to prevent all risk of overestimating the permanent circulation, to exclude the balances of currency notes in the head offices of the Presidency Banks and in the Reserve Treasuries from the total circulation. After such exclusion the figures for 1889-90 and subsequent years in the table in paragraph 3 will stand as follows:

[In lakhs of rupees.]

Month.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
April	13,20	13,71	17,28	18,72	20,84	18,64	21,81
May	13,39	13,96	17,41	19,47	19,99	19,00	21,34
June	13,40	13,66	17,90	19,97	19,49	19,09	20,83
July	13,44	13,73	17,37	20,59	19,19	19,10	21,49
August	12,95	14,48	17,61	20,49	18,96	19,49	21,58
September	13,20	15,13	17,69	21,66	19,09	19,55	22,37*
October	13,51	15,88	19,17	22,12	18,83	20,12	23,04*
November	13,31	15,67	19,01	22,30	18,84	20,65	22,84*
December	13,69	16,59	19,39	22,40	19,66	21,82	23,02*
January	13,62	16,92	18,21	21,75	19,19	22,15	22,52*
February	13,33	17,51	18,44	21,33	18,24	21,65	22,40*
March	13,50	17,62	18,45	21,68	18,49	21,31	...
Average ...	13,38	15,40	18,16	21,04	19,23	20,21	...
Maximum ...	13,69	17,62	19,39	22,40	20,84	22,15	...
Minimum ...	12,95	13,66	17,28	18,72	18,24	18,64	...

From this table it is observed that when the last increase to the investment was discussed towards the end of 1889, the circulation (excluding balances in the Reserve Treasuries and the head offices of the Presidency Banks) amounted to only about 13 to 13½ crores, while during the three years ending 1894-95 the minimum circulation has been well above 18 crores.

5. On a consideration of the figures given above, it appears to the Government of India that the circulation of currency notes has now attained a level about 50 per cent. higher than in the year 1889-90, and that it will be quite safe now to raise the limit of the investment to ten crores. The figures might indeed justify an even greater increase in the investment, but the Government of India do not desire to go to the full limit of safety. An investment of the reserve to the extent of ten crores would represent only about 50 per cent. of the average circulation as given in paragraph 4. The proposed increase would therefore appear to leave a fully sufficient margin to secure the immediate convertibility of the note even during a commercial crisis. As previously explained in paragraph 4 of my letter of 23rd December 1889,† over and above the reserve of coin and securities, the general credit of Government is pledged for the convertibility of the note under section 21 (1) of the Paper Currency Act.

† Copy enclosed.

* Figures added in March 1896.

6. The proposal which His Excellency the Governor General in Council is disposed to make now is to take power from the Legislature to increase the limit of the investment from eight to ten crores, and for the reasons above explained, he considers, subject to the opinions he may receive from the Presidency Banks and the Chambers of Commerce, that this power may be used with safety on some convenient occasion when it may be possible to carry out the operation without affecting the public market.

7. I am to say that His Excellency in Council will be glad to be favoured with the views of the Chamber as early as may be convenient.

No. 5319-A.

The 7th November 1895.

From—J. F. FINLAY, Esq., Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary, Bank of Bengal. / Madras / Bombay.

I am directed by His Excellency the Governor General in Council to request that the Directors of the Bank will be good enough to favour the Government of India with an expression of their opinion upon a proposal to take power from the Legislature to raise the limit of the paper currency reserve, which is held in Government securities, from eight to ten crores of rupees.

2. The maximum limit of the invested reserve was raised on the last occasion in 1890 from six to eight crores by Act XV of 1890, and in accordance with the requirements of the Currency Act the increases to the investment from time to time were separately notified, the limit of the investment having been raised to seven crores by the Notification in this Department, No. 5900, dated 19th December 1890, and to eight crores by the Notification No. 4861, dated 3rd December 1891.

3. The considerations involved in the question of an increase in the currency investment were fully discussed in 1890, and the history of the subject was brought down to 1889 in my letter to the Chambers of Commerce, No. 6468, dated 23rd December 1889, a copy of which is enclosed. The following table gives the figures of the circulation of paper currency for all India from 1887-88:

[In lakhs of rupees.]

Month.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.

The above figures indicate that the total circulation of currency notes has steadily increased since the year 1887-88 and has now reached a figure about double that of the year 1889-90. But the Government of India are of opinion that these figures of total circulation show the increase as larger than can be considered to be the normal increase which may, with due regard to the caution desirable in the discussion of the question now under consideration, be counted on as certain to continue. In the first place, the Government balances during the

* Figures added in March 1896.

past two years have been unusually high and a great portion of the excess balances, held in the Government Reserve Treasuries in currency notes, is included in the circulation. Secondly, the figures include the notes held by the Presidency Banks at their head offices, but the demands for encashment of notes so held are occasionally so large that a considerable portion of them cannot be treated as permanently in circulation.

4. On the grounds above explained, it is considered that for the present purpose it is desirable, in order to prevent all risk of overestimating the permanent circulation, to exclude the balances of currency notes in the head offices of the Presidency Banks and in the Reserve Treasuries from the total circulation. After such exclusion the figures for 1889-90 and subsequent years in the table in paragraph 3 will stand as follows:

[In lakhs of rupees.]

Month.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
April	13,20	13,71	17,28	18,72	20,84	18,64	21,81
May	13,39	13,96	17,41	19,47	19,99	19,00	21,34
June	13,40	13,66	17,90	19,97	19,49	19,09	20,83
July	13,44	13,73	17,37	20,59	19,19	19,10	21,49
August	12,95	14,48	17,61	20,49	18,96	19,49	21,58
September	13,20	15,13	17,69	21,66	19,09	19,55	22,37*
October	13,51	15,88	19,17	22,12	18,83	20,12	23,04*
November	13,31	15,67	19,01	22,30	18,84	20,65	22,84*
December	13,69	16,59	19,39	22,40	19,66	21,82	23,02*
January	13,62	16,92	18,21	21,76	19,19	22,15	22,52*
February	13,33	17,51	18,44	21,33	18,24	21,65	22,40*
March	13,50	17,62	18,45	21,68	18,49	21,31	...
Average ...	13,38	15,40	18,16	21,04	19,23	20,21	...
Maximum ...	13,69	17,62	19,39	22,40	20,84	22,15	...
Minimum ...	12,95	13,66	17,28	18,72	18,24	18,64	...

From this table it is observed that when the last increase to the investment was discussed towards the end of 1889, the circulation (excluding balances in the Reserve Treasuries and the head offices of the Presidency Banks) amounted to only about 13 to 13½ crores, while during the three years ending 1894-95 the minimum circulation has been well above 18 crores.

5. On a consideration of the figures given above, it appears to the Government of India that the circulation of currency notes has now attained a level about 50 per cent. higher than in the year 1889-90, and that it will be quite safe now to raise the limit of the investment to ten crores. The figures might indeed justify an even greater increase in the investment, but the Government of India do not desire to go to the full limit of safety. An investment of the reserve to the extent of ten crores would represent only about 50 per cent. of the average circulation as given in paragraph 4. The proposed increase would therefore appear to leave a fully sufficient margin to secure the immediate convertibility of the note even during a commercial crisis. As previously explained in paragraph 4 of my letter of 23rd December 1889,† over and above the reserve of coin and securities, the general credit of Government is pledged for the convertibility of the note under section 21 (1) of the Paper Currency Act.

† Copy enclosed.

6. The proposal which His Excellency the Governor General in Council is disposed to make now is to take power from the Legislature to increase the limit of the investment from eight to ten crores, and for the reasons above explained, he considers, subject to the opinions he may receive from the Presidency Banks and the Chambers of Commerce, that this power may be used with safety on some convenient occasion when it may be possible to carry out the operation without affecting the public market.

7. I am to say that His Excellency in Council will be glad to be favoured with the views of the Directors as early as may be convenient.

No. 6468, dated 23rd December 1889.

From—J. F. FINLAY, Esq., Officiating Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary to the Chamber of Commerce, Calcutta. / Madras. / Bombay.

I am directed by His Excellency the Governor General in Council to request that the Chamber of Commerce, Calcutta / Madras / Bombay, will be good enough to favour the Government of India with an expression of its opinion upon a proposal to increase the portion of the paper currency reserve which is invested in Government securities.

2. When the issue of a Government paper currency was first considered by the Government of India in 1860. it was proposed to fix the limit of the portion of the reserve which might be invested in Government securities at a fixed proportion—two-thirds—of the value of notes in circulation. But it was decided that the safer and sounder principle was to prescribe a fixed sum as the limit, that sum being somewhat less than the smallest aggregate amount of notes which experience had proved to be necessary for the monetary transactions of the country. It was considered that notes to this amount at least would always be outstanding, and that consequently it would not be necessary to keep coin in reserve for the purpose of cashing them. When this principle was adopted it was contemplated that it would be necessary to vary the limit in accordance with the circumstances of the times, and that the maximum sum that might be invested in Government securities would be fixed from time to time by legislation. In the Paper Currency Act of 1861, the sum to be so invested was fixed at four crores of rupees. In 1870, in view of the facts that the note circulation had increased considerably since that limit was fixed, and that the investment in Government securities bore a much smaller proportion to the total reserve than when the Act of 1861 was first brought into operation, the limit was raised to six crores. The minimum circulation of each year from 1862 to 1870 will be found in the statement appended. The maximum limit of investment in Government securities is still six crores of rupees.

3. Since 1870 the note circulation has greatly increased, as will be seen from the statement attached. In that year the minimum circulation was about eight and three-quarter crores of rupees, but since 1880-81 the minimum circulation has never fallen as low as 12 crores; for the last five years the minimum has exceeded 13 crores; and in the present year it approaches 16 crores. There is no reason to doubt that the minimum circulation in the future will continue to be at least 50 per cent. in excess of the minimum of 1870. With a minimum circulation in the present year of say 15¾ crores, the investment of the reserve remaining at six crores, the sum held in coin and bullion amounts to about nine and three-quarter crores.

4. The primary consideration in dealing with this question must be the necessity of securing the immediate convertibility of the note under all circumstances to which we can reasonably look forward. His Excellency in Council has no doubt that the reserve held in coin and bullion at the present time is more than sufficient to secure convertibility under all ordinary conditions, and the question to be decided is whether or not it is necessary to maintain the present high rate of reserve with a view to possible difficulties of the future which may never arise. In connection with this aspect of the case, I am to call the attention of the Chamber to section 21 (1) of the Paper Currency Act, 1882, under which the general credit of Government is pledged for the convertibility of the note. The currency reserve would, therefore, be supplied in case of need by the cash balance at the disposal of the Government of India, and the note would not cease to be convertible, even if the currency reserve was exhausted, so long as the Government of India could spare funds from the general cash balance at its disposal. The proposal which has been under the consideration of the Government of India is to take power from the Legislature to increase the amount of the invested reserve to eight crores of rupees, but it is not intended for the present to increase the investment by more than one crore, any further increase up to the limit of eight crores being made only if and when circumstances are favourable; and it is possible that even the increase of one crore might not be made for some time.

5. I am to say that His Excellency in Council will be glad to be favoured with the views of the Chamber as early as may be convenient.

Statement showing the minimum Currency Note circulation and the reserve in securities on bullion and coin since March 1862.

* From 1865 to February 1876.

. 3

Dated 15th November 1895.

From—JOHN MARSHALL, Esq., Secretary to the Chamber of Commerce, Bombay,
To—The Secretary to the Government of India, Finance and Commerce Department.

I am directed to acknowledge the receipt of your letter No. 5318-A. of the 7th instant, with accompaniment, and in reply to say that the subject-matter thereof having received the careful consideration of the Committee of the Bombay Chamber of Commerce, the proposal to take power from the Legislature to raise the limit of the paper currency reserve from eight to ten crores of rupees meets with their entire approval, and the Committee will be glad to learn that early legislative action has been taken to give it effect.

Dated 21st November 1895.

From—A. M. LINDSAY, Esq., Officiating Secretary and Treasurer, Bank of Bengal,
To—The Secretary to the Government of India, Finance and Commerce Department.

In compliance with the request made in your letter No. 5319-A. of 7th instant my Directors have considered the proposal to raise from eight to ten crores of rupees the limit fixed for investment in Government securities of the coin and bullion held as the paper currency reserve, and I have now to submit the views they have adopted.

It is understood that in determining the proportion of the reserve that may be invested in securities, the Government of India are guided to a great extent by the principle followed in the Bank of England Act of 1844, *viz.*, that the amount of notes issued on Government securities shall be maintained at a fixed sum well within the limit of the smallest amount which experience has proved to be necessary for the monetary transactions of the country, and that all additional notes issued shall be backed by an equivalent amount of coin or bullion. This principle is a safe guide in a country like England where a fairly accurate estimate can be formed of the lowest point to which the circulation is ever likely to fall; but in India, the general mass of the people have little confidence in paper money, and it is difficult to say where a run on the reserve might stop.

There is, therefore, under the present method of regulating the fiduciary issue, a possible danger that Government may at times be tempted for the sake of profit to invest in securities a larger proportion of the note reserve than is consistent with safety: but my Directors are pleased to observe that on this as on former occasions the Government of India, in estimating from past experience the smallest future issue, allow a wide margin for possible fluctuations. An investment of the reserve to the extent of ten crores would represent only about 54 per cent. of the minimum circulation of the last three official years excluding the balances of the Reserve Treasuries and the head offices of the Presidency Banks. The proposed increase of securities in the paper currency reserve should therefore leave a stock of coin and bullion sufficient to ensure convertibility of the notes under all circumstances for which it appears necessary to provide.

It is also satisfactory to note that, on this as on former occasions, it is the intention in increasing the securities in the reserve to select some convenient opportunity when it may be possible to carry out the operation without affecting the public market; and no doubts would have been entertained as to the prudence of the proposed measure, were it not that the substitution of securities for coin in the paper currency reserve may interfere with the policy adopted when the Indian Mints were closed to the free coinage of silver.

As to the merits of this policy my Directors express no opinion. They assume that it is the desire of Government to raise gradually, and eventually to fix within convenient limits, our sterling exchange; and I have to point out that, as Government securities are exported and imported, the lock up of two crores of securities in the currency reserve, in whatever form it be effected, must tend to lower or to curtail a rise in sterling exchange, because it will promote imports from, or curtail exports to London. The release of the coin will have a like effect on exchange; because much of the money will sooner or later enter the markets that rule the balance of foreign indebtedness. The arguments that support this view are intricate, but it may suffice to say that the sterling value of the rupee currency on its present footing is regulated, or rather determined,

much in the same way that the values of inconvertible paper currencies are settled: and it is generally admitted that it would be imprudent for any Government with an inconvertible paper currency of depreciated value to make additions to its circulation merely for the sake of realizing interest on these additions, especially if that Government had a heavy foreign debt bearing interest payable in gold. Apart from other considerations, the loss in exchange on remitting interest on the foreign debt might exceed the gain in interest from the addition to the money in circulation: and as the proposed substitution of securities for coin in the paper currency reserve is practically an addition to the monetary circulation made with the object of securing interest profit, it would appear to be contrary to what is generally accepted as sound policy.

While holding these opinions regarding the effect of the proposed measure on sterling exchange, my Directors can conceive of a position of affairs arising under present currency arrangements in which the proposed increase in the monetary circulation would not only be innocuous but desirable. When a currency is interchangeable with sterling money for foreign payment purposes at or about transit cost, as all currencies are where sterling exchange is fixed with convenient limits, the currency is self-regulating. Any deficiency makes it profitable for Banks to import money, and any excess leads to an export of money. But in India the currency has no self-adjusting power. It has no fixed specie export point, while its fixed specie import point (1*s*. 4*d*. plus transit charges) is far beyond the present range of exchange; and this want of elasticity might create a stringency at a time when the Reserve Treasury balances were low, which would best be met by an addition to the currency such as Government propose to make. The stringency might occur suddenly and require prompt relief, and, under these circumstances, I have to suggest, for the consideration of His Excellency the Governor General in Council, that the power contemplated should be obtained from the Legislature, but should be reserved either for use in an emergency such as above described or until the currency is made automatic.

Dated 23rd November 1895.

From—A. MURRAY, Esq., Officiating Secretary and Treasurer, Bank of Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge the receipt of your letter No. 5319-A. of the 7th instant, requesting the opinion of the Directors of this Bank upon a proposal to take powers from the Legislature to increase the portion of the paper currency reserve, which is invested in Government securities, from eight crores to ten crores of rupees.

In reply I am directed to say that the subject of your letter has had the careful consideration of my Directors, and that they desire to express their entire approval of the proposal submitted for their opinion. The tables of figures given in your letter, and specially those contained in paragraph 4, seem to my Directors to show that this proposed increase to the Government securities in the paper currency reserve may be adopted with safety, and is as fully warranted as any previous addition which has been made to this portion of the reserve.

No. 5597-A., dated 20th November 1895.

From—J. F. FINLAY, Esq., Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary, Chamber of Commerce, Rangoon. / Karachi.

I am directed to forward copy of a letter* No. 5318-A., dated the 7th November 1895, addressed to the Chambers of Commerce in the Presidency Towns regarding a proposal to take power from the Legislature to raise the limit of the paper currency reserve which is held in Government Securities from eight to ten crores of rupees.

* (With enclosures.)

2. I am to request that the Government of India may be favoured with the views of the Rangoon / Karachi Chamber on the subject.

Dated 11th December 1895.

From—J. MATHESON, Esq., Secretary and Treasurer, Bank of Madras,
To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour, by desire of my Directors, to acknowledge receipt of your letter No. 5319-A., dated 7th ultimo, and to say in reply that they are of opinion that the cash balance held in the Currency Department may be reduced by two crores with perfect safety.

I am to say further that my Directors are of opinion that the market would be less disturbed by the transaction if the amount, instead of being invested by purchase of interest bearing promissory notes of the Government of India in the open market, were transferred direct from the Currency to the Treasury Department, as a book debt, when next the Government have occasion to raise a loan for public works. It is presumed that the object of having a portion of the currency money invested in Government bonds is, that coin may be the more readily obtained by the sale of such bonds, which are already negotiable, rather than by the more formal procedure of the issue of a fresh loan.

My Directors are, however, of opinion that a sufficient amount of bonds for this purpose is already held, whereas if a portion were held as a book debt, the amount could at any time be retransferred from the Treasury to the Currency, and so avoid any sudden disturbance of the market by sale of bonds.

The interest bearing Promissory Notes of the Government of India afford no additional security to holders of Currency Notes which are on demand Promissory Notes, and are equally secured with the other notes by the credit of the Government of India.

Dated 10th December 1895.

From—The Secretary to the Chamber of Commerce, Rangoon,
To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge receipt of your letter No. 5597-A. of 29th ultimo, with enclosures, having reference to a proposal to raise the limit of paper currency reserve from eight to ten crores of rupees.

I am desired to say that the Committee approve of the proposal.

Dated 16th December 1895.

From—The HONOURABLE MR. G. L. CHAMBERS, Chairman, Chamber of Commerce, Madras,
To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge receipt of your letter No. 5318-A., dated the 7th November 1895, asking for an expression of opinion from this Chamber upon a proposal to take power from the Legislature to raise the limit of the paper currency reserve, which is held in Government Securities, from eight to ten crores of rupees.

In reply I have the honour to state that this Chamber sees no objection to the proposal in so far as it will affect the proportion of cash to be held in order to make good the issue of Currency Notes.

The view taken by the Chamber is that the Government, after mature consideration in consultation with the best authorities, can decide what proportion of cash should be held (whether one-half of the Notes in circulation, or any other ratio) in order to convince the public that on presentation of the Notes for payment there will be no danger of their not being paid, even in times of panic, and the Chamber is almost unanimous in thinking that there is no necessity to hold any other security as a guarantee for such payment. For instance, if the Note circulation be at present 20 crores, and if ten crores be held in cash, there is no danger whatever of any fear of non-payment arising in the minds of holders of Currency Notes—even in a commercial crisis, or a great war.

The Currency Note being payable on demand is not, in the opinion of this Chamber, rendered any more secure by Government holding as security for its prompt payment Government Securities which are not payable on demand, or even at any time, except at the option of Government. It seems almost unnecessary to add that if the public for any reason become imbued with the

feeling that Government is about to become unable to meet its engagements, and if in consequence of that feeling there is a rush to realise Currency Notes, then in that case Government Securities, which are unredeemable, will be unsaleable, and will therefore be useless as a reserve for securing the re-payment of the "on demand" liabilities of Government.

The Chamber considers, in fact, that the only security for the re-payment of the Note issue should be actual cash, and that the proper proportion of cash to liabilities can only be determined by experience, and the most important factor in the calculation will always be the state of the financial credit of the Government of India, and finally of the Government of Great Britain. As a matter of fact, Currency Notes are in India at present looked upon by all classes, with comparatively few exceptions, as actual money, and only the best informed people ever trouble themselves about the amount of cash held against them.

With regard to what should be done with the cash not required by the Currency Department, the Chamber is of opinion that it should be paid to the Government of India to enable it to avoid borrowing in future; whereby the general credit of that Government would be strengthened, and the pockets of the tax-payer saved.

The proposal to set free two crores of rupees is one to which objection has been taken in other quarters, on the ground that the Barbour Exchange Scheme would be affected thereby. Although it expresses no opinion upon the wisdom of that scheme, including the closing of the Mints, the Chamber considers that this step having been taken, and the success of the measure having been declared to be dependant upon the contraction of the currency, any fresh action is to be deprecated which would cause it to be said that the scheme had not had a fair trial. It appears to be established that such contraction has not yet taken place owing to the unexpected supply of hoarded rupees—and as this supply must have its limit, the flooding of the market by two crores would appear to be contrary to the recently declared policy of Government.

No. 15, dated 17th January 1896.

From—C. H. CHITHAM, Esq., Acting Secretary, Karachi Chamber of Commerce,

To The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge receipt of your letter of 29th November 1895, No. 5597-A., enclosing copy of a letter No. 5318-A., addressed to the Chambers of Commerce in the Presidency Towns, regarding a proposal to take power from the Legislature to raise the limit of the paper currency reserve, which is held in Government Securities, from eight to ten crores of rupees and calling for the views of this Chamber on the subject.

I am instructed by the Managing Committee to state that they see no objection to the increase of the reserve as contemplated, provided it is done gradually and at a favourable time.

No. 239-96, dated 31st January 1896.

From—S. E. J. CLARKE, Esq., Secretary, Bengal Chamber of Commerce,

To—The Secretary to the Government of India, Finance and Commerce Department.

The Committee of the Chamber of Commerce direct me to acknowledge receipt of your letter No. 5318-A., dated 7th November last, calling for an expression of opinion upon a proposal to take power from the Legislature to raise the limit of the paper currency reserve which is held in Government Securities, from eight to ten crores of rupees.

The Committee considered this proposal of sufficient importance to place before the members of the Chamber of Commerce, and to invite their individual opinions thereon. These replies have now been received, and shew that the opinion of members is divided as to the merits of the proposal as well as to the expediency of such a measure being undertaken by the Government of India.

I am to say further that those who are in favour of Government taking the power to increase the paper currency reserve from eight to ten crores of rupees, as suggested, think that such an operation, if attempted, would need to be carried out with very great caution, and only when a favourable opportunity occurred.

LEAVE AND APPOINTMENTS.

The 8th April, 1896.

ORGANISATION.

LOCAL CORPS.

No. 370.—With reference to paragraph 2 of G. G. O. No. 670 of 1895, the Governor-General in Council is pleased to announce that the Secretary of State for India has sanctioned, with effect from the 1st April 1896, the extension to the local corps under the Government of India named below of the increase of pay recently sanctioned for the native army:

Deoli Infantry.

Erinpura Infantry.

Bhopal Battalion.

Malwa Bhil Corps.

Meywar Bhil Corps.

Nepal Escort.

Merwara Battalion.

Hyderabad Contingent Infantry.

Hyderabad Contingent Artillery.

2. The concessions are—

(*a*) An increase of Rs. 2 per mensem to the pay of every non-commissioned officer and soldier in the corps above named; also to the native combatant driver establishment of the batteries of the Hyderabad Contingent Artillery. In the case of the drummers, fifers and buglers of the infantry regiments of the Hyderabad Contingent, the increase will be only twelve annas per mensem, as they already receive pay at the rate of Rs. 8-4 per mensem.

(*b*) The grant to recruits enlisted on or after the 1st April 1896 of the annual half-mounting allowance of Rs. 5 admissible under Article 323, Army Regulations, India, volume I, part II, from the date of enlistment, instead of from the date of completing eighteen months' service. This allowance will not be payable to recruits until the completion of the first year's service, when arrears due, together with the allowance for next quarter, will be drawn.

NATIVE ARMY.

No. 371.—It is notified that the designation of the various ranks in the Body Guard of His Excellency the Viceroy have been changed as follows:

Subadar to be Risaldar.

Jemadar to be Jemadar.

Havildar to be Dafadar.

General Rules for railways under construction.

Read—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act (IX) of 1890.

Government of India, Public Works Department, notification No. 267, dated the 11th June 1890, appointing the Director General of Railways as the officer who is to make General Rules, under section 47 of the Indian Railways Act, 1890, in the case of a railway administered by Government.

Government of India, Public Works Department, notification No. 480½, dated the 30th October 1890, publishing, in the *Gazette of India* of the 8th November 1890, the Government of India Resolution No. 736 R. T., dated the 17th October 1890, and the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods.

Letter from the Director General of Railways, No. 160 T., dated the 19th March 1896.

OBSERVATIONS.—The Director General of Railways has applied for leave to adopt, on the Najibabad-Kotdwara Branch of the Oudh and Rohilkhand railway, the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods, which rules were published in the *Gazette of India* of the 8th November 1890 under Public Works Department notification No. 480½, dated the 30th October 1890.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules, which are referred to in the foregoing observations, to the Najibabad-Kotdwara Branch of the Oudh and Rohilkhand railway, which has been sanctioned for construction.

ORDER.—Ordered, that the General Rules, which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the engineer in charge of the construction of the railway.

Ordered also, that this resolution be communicated to the Director General of Railways for information and guidance, and that it be published under a notification in Part I of the *Gazette of India.*

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURE.

ndia for the Week ending at 8 a.m. on day, April 4th, 1896.

Although pressure has been unsteady and has changed considerably from day to day, the general distribution and conditions of pressure have altered very slightly during the week. Throughout the whole period a large area of low and deficient pressure overlay West Bengal, Bihar, and the north of the Gangetic plain, while readings were high in Tenasserim and the west of the Punjab, and relatively high over the Indian Peninsula. Under these conditions of pressure, which were roughly more like the ordinary conditions of the end rather than of the beginning of April, the wind circulation was very steady. Strong southerly winds blew up the Bay into Bengal, hot westerly winds blew down the Gangetic plain into Bihar, and northerly and north-westerly winds prevailed over North-Western India, while on the coasts of the Peninsula variable or land and sea breezes were experienced. The rainfall of the week was very light, except over parts of Assam, where the usual spring thunderstorms gave fairly heavy rain. In consequence there was nothing to interfere with the steady increase of heat as the sun progressed northward, and the temperature returns of the week exhibit an actual increase of temperature, and also an increase relatively to the average.

Daily Summary.—*Sunday, March 29th.*—Pressure had fallen in most places, the decrease being rapid over North-Eastern India and the Gangetic plain. Readings were highest over the Western Punjab, relatively high over Tenasserim, lowest over Bihar and Bengal, and relatively low across the Central Provinces and the head of the Peninsula. Northerly winds prevailed over North-Western India, west-north-westerly winds down the Gangetic plain, southerly winds at the head of the Bay, and variable winds elsewhere. The mean temperature was in defect over the Punjab and Madras, and in excess elsewhere. Snow had fallen in Kashmir, and rain showers over part of Persia, of Baluchistan, of the North-Western Himalayas, and of the Northern Punjab, as well as at Colombo.

Monday, March 30th.—Pressure had been steady in the south, but had decreased elsewhere, the change having been brisk to rapid over a considerable part of the country. The barometer read below the normal average, except over the western desert. The greatest abnormal deficiency was over the north Gangetic plain. West-north-westerly winds prevailed down the Gangetic plain, and southerly winds at the head of the Bay, but elsewhere the directions were variable. The mean temperature was in excess, except over parts of Arakan and of Madras. Showers were reported from parts of the south of the Peninsula, of Ceylon, and of Assam.

Tuesday, March 31st.—Pressure had decreased briskly over part of North-Western India, and had increased briskly over Upper Burma, but elsewhere the changes were unimportant. Readings were lowest over the north Gangetic plain. The winds were practically unchanged. The mean temperature remained excessive, except in parts of Madras. Showers had been received over the north-west and north-east of India and the south of the Peninsula.

Wednesday, April 1st.—Pressure had decreased, except over the Indus Valley. Readings remained low over the Gangetic plain and high in Tenasserim and the west of the Punjab, and the winds were again practically unchanged. The mean temperature was low for the season over the extreme south of the Peninsula, and excessive elsewhere—more especially over the western desert. Showers had again been received in the extreme north-west and north-east and south.

Thursday, April 2nd.—The barometer had ceased to fall, and a very general recovery had set in. The general distribution was, however, unaltered. The

westerly current of air down the Gangetic plain was less marked than on the preceding days, but otherwise the winds were little changed. The mean temperature was relatively low over Assam and the south of the Peninsula, and excessive in all other places—most so over Eastern Rajputana. Rain had fallen in Assam and at Colombo.

Friday, April 3rd.—The barometer had continued to rise in most places, but the low pressure area over Bengal and the Gangetic plain and the high pressure area over Tenasserim were as marked as on previous days. The winds also showed no important alteration. Excessive temperatures continued to prevail, except in Assam and the Carnatic, but the hottest area was moving eastward, and was shown over the Central Provinces. Scattered showers had fallen at several stations, and rain had been general in Assam.

Saturday, April 4th.—The barometric rise had ceased, and a general slight to rapid fall had set in. Gradients had increased, and the low pressure area over the north Gangetic plain was more marked, but the relative positions of the areas of high and low pressure were unchanged. Northerly to westerly winds prevailed over the greater part of Northern India, and southerly winds at the head of the Bay. Excessive temperatures prevailed almost everywhere, the hottest area being Berar. Scattered showers of rain were again reported, of which the most important were 2·01 inches at Poona and 1·25 inches at Silchar.

Temperature.—The week has been one of generally excessive heat. Showers of rain occurred at different times during the week in North-Western, North-Eastern, and Southern India, and these showers had the effect of reducing temperature during their continuance, but directly they ceased excessive temperatures reappeared. Thus, on the 29th of March in the Punjab and Madras temperature was low, but on the 30th the depression of temperature had wholly disappeared from the Punjab. In parts of Madras, on the contrary, relatively low temperatures were recorded until the 2nd, when they also practically ceased. In Assam the heat was excessive until the 1st, when low temperatures appeared, and the depression of temperature continued until the close of the week. In all other parts of India the mean temperature was steadily, and in several places largely, in excess of the normal. The hottest areas were Rajputana, Central India, Berar, and the west of the Central Provinces on the one hand and Central Bengal on the other.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	March 1896.			April 1896.				Mean variation of week.
	29th	30th	31st	1st	2nd	3rd	4th	
	°	°	°	°	°	°	°	°
Burma	+2·2	+1·6	+2·2	+1·7	+2·1	+1·3	+1·8	+1·8
Bengal and Assam	+4·4	+4·4	+3·2	+4·1	+4·3	+3·7	+3·6	+4·0
North-Western Provinces and Oudh	+2·6	+1·8	+3·0	+5·2	+6·6	+6·8	+4·5	+4·4
Punjab	—3·4	+1·8	+4·2	+5·1	+4·6	+5·3	+3·9	+3·1
Bombay	+2·1	+2·6	+2·4	+2·8	+3·7	+3·3	+2·3	+2·7
Central Provinces and Berar	+4·9	+4·8	+3·9	+4·9	+7·7	+9·7	+5·3	+5·9
Central India and Gujarat	+5·1	+4·4	+4·8	+6·6	+8·4	+9·7	+6·0	+6·4
Sind and Rajputana	+4·0	+3·7	+5·0	+9·0	+8·8	+7·1	+5·8	+6·2
Madras	—1·0	+0·5	+0·2	+0·7	+1·9	+1·6	+2·1	+0·9
Mean for whole of India	+2·3	+2·8	+3·2	+4·5	+5·3	+5·4	+3·9	+3·9

The above shows that in all the provinces the mean temperature was excessive, and that for the whole country the temperature was abnormally high on all days. Between the 29th of March and the 3rd April the excess steadily increased, but on the last day of the week a sudden fall took place.

The following were the maximum temperatures throughout India reported on each day:

March	29th	108·4°	at	Deesa.
„	30th	108·9°	„	Chanda.
„	31st	109·9°	„	„
April	1st	111·0°	„	Deesa.
„	2nd	113·6°	„	„
„	3rd	112·0°	„	„
„	4th	110·5°	„	„

The above shows that the absolutely hottest area was Gujarat and the south of the Central Provinces.

Rainfall.—As has been the case for the past few weeks, the rainfall of India has been mainly confined to the north-west and north-east of India. A few showers have been received in the centre and south, but these have been scattered falls due to local thunderstorms, and almost the only rainfall of importance has been reported from the two regions mentioned above. In the case of North-Western India the rainfall was light, and apparently connected with slight local disturbances originating over Baluchistan and the North-Western Himalayas. Hence the fall was mainly confined to the hills and their immediate neighbourhood. In Kashmir snow fell on the higher hills. In Assam the rainfall took place under normal conditions of wind and pressure, *viz.*, during the prevalence of fresh to strong moist winds over the north of the Bay, while easterly and north-easterly winds were blowing down the Assam Valleys. The rainfall in Assam was much heavier than that at the opposite end of the Himalayan range, and over the hills between the Surma and the Brahmaputra rivers the fall was very heavy. In the extreme south of the Peninsula a fair number of light or moderate showers occurred during the middle of the week. The concluding table gives the rainfall data. From this it will be seen that rain fell during the week in twenty of the rainfall divisions. Of these twenty divisions nine had an average actual rainfall for the week of less than one-tenth of an inch, but in the remaining eleven divisions effective rainfall was received. These eleven divisions are—the three Assam divisions, North Bengal, the Bengal hills, the Punjab hills, North Punjab, Malabar, Baluchistan hills, the East Coast (South), and Madras (South), and the average actual rainfall ranged from 14·78 inches in the Assam hills to 0·13 inch in the East Coast (South). The second column of the table shows the anticipated rainfall for the week under review, and it will be noticed that, except in the case of Tenasserim, Assam, the Bengal hills, and Coorg, the anticipated rainfall is small and less than half an inch. The third column shows the difference between the average actual and average normal rainfall, and that, except in the case of Assam and of Madras (South), the actual rainfall has been practically everywhere in defect. In the case of Assam, on the contrary, all the divisions exhibit an excess. In the Surma division the excess is only trifling, but the Brahmaputra division has received more than twice, and the hills division more than five times the normal amount. In the case of Madras (South) also the normal amount was very largely exceeded.

The three concluding columns of the table exhibit the state of the seasonal rainfall. In Assam (Surma and Brahmaputra), the Western Punjab, Baluchistan, and Madras (South) the rainfall for the period March 1st to April 4th has been about normal, *i.e.*, has differed by less than 20 per cent. from the average, and in Assam (Hills) the rainfall has been excessive, but in all other places the rainfall has been deficient—more particularly so over the Gangetic plain and Burma.

The following are the principal totals recorded during the week under review:—Sylhet 3·45 inches, Silchar 4·55 inches, Cherrapunji 29·56 inches, Gauhati 8·12 inches, Sibsagar 3·72 inches, Alipore (Jalpaiguri) 1·36 inches, Panani (Malabar) 3·21 inches, Allepy (Travancore) 1·60 inches, Saltar (Tinnevelly) 4·67 inches, and Morekolam (Madura) 2·28 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *9th April 1896.*

DENZIL IBBETSON.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 4th April.*—The rainfall was fair in Madura, Tinnevelly, the Coast stations, Tanjore, and in Malabar; light showers fell in Trichinopoly, the Nilgiris, Salem, Coimbatore and Ganjam; no rain elsewhere. The standing crops are confined to small areas, and are generally fair, but paddy is withering in parts of North Arcot, Anantapur and Nellore. The harvest is going on with moderate yield. Pasture is generally scarce, but fodder is available. Cattle are in good condition. Prices are generally stationary, but are slightly dearer in parts of the Circars and southern districts.

Bombay.—*For week ending 8th April.*—Slight rain in parts of Sind, the Deccan and Karnatak. The standing crops are good. Cotton-picking continues in parts of Ahmedabad and Dharwar, and harvesting of the late crops in parts of thirteen districts. Preparations for next season are progressing in fourteen districts. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of Shikarpur and Broach. Prices are normal, except in parts of Sholapur.

Bengal.—*For week ending 6th April.*—With the exception of a light shower at Rangpur, there was no rain during the week, and consequently little change in the agricultural prospects of the province. Rain is generally wanted for the ploughing of lands and for the indigo and spring rice in the ground, and also for the planting of sugarcane. In some parts of North Bengal and Bihar early rice and millets are being sown. The collection of opium is over, and the harvesting of the spring crop is nearly finished. In Cuttack the harvesting of spring rice has begun. Scarcity of water continues to be reported from Burdwan, the 24-Perganas, Khulna, Pabna and Dacca. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 8th April.*—The heat is increasing, and rain is much needed in the hill districts to assist the germination of the autumn crop sowings. Harvesting operations have been completed in most districts. Threshing and winnowing are in active progress. The sowing and irrigation of the extra crops continue. The produce of *mahua* (*Bassia Latifolia*) has disappointed expectation. Owing to the prevalence of strong westerly winds the *mahua* crop has been a total failure in Banda and Fatehpur. Mangoes are reported as damaged in some districts. In Naini Tal much damage from jungle fires is reported. Opium collections are nearly finished, and the yield is generally fair. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 4th April, were—Banda 65,172, Hamirpur 40,132, Jhansi 27,724, Jalaun 29,990, Allahabad 1,369, Pilibhit 1,801, Garhwal 1,758—total 1,68,046; of this number 25,657 dependants were gratuitously relieved on the works; 3,081 persons also received gratuitous relief under other provisions of the Famine Code. Supplies are ample, but fodder is becoming scarce in places. The Government forests of Bundelkhand have been opened to

free grazing and the free extraction of edible jungle fruits. Scarcity of water is reported in Banda, Hamirpur and Lucknow. Prices are fairly stationary, but show a tendency to fall.

Punjab.—*For week ending 8th April.*—Rain has fallen in the Jullundur, Amritsar, Sialkot, Rawalpindi, Shahpur, Dera Ismail Khan and Gujranwala districts. The canal crops are being cut in Hissar. Reaping of the spring crops is in progress in Delhi and Gurgaon. Ploughing for cotton and sugarcane is in progress in Jullundur, Sialkot, Rohtak and Gujranwala. Sowings of the extra spring and autumn crops in Amritsar, of water-melon, tobacco, barley and cotton in Lahore, and of cotton in Rawalpindi, are in progress. Sugarcane and indigo sowings have been completed in Gurgaon. The condition of the spring crops is good in Mooltan. The crops dependent on rain have failed in Hissar. The prospects and condition of the spring crops are generally reported average on irrigated and below average on. unirrigated lands. The stock of food-grains is said to be insufficient in Sialkot, Rawalpindi, Gujranwala and in parts of Shahpur. Cattle are in poor condition in Hissar and Gurgaon, and they are dying for want of fodder in parts of Lahore and Gujranwala. Fodder is scarce in all districts, except Jullundur, Sialkot and Dera Ismail Khan. The stock of fodder is said to be insufficient in some districts. Prices are normal in Ferozepore and low in Delhi, but are high elsewhere.

Central Provinces.—*For week ending 8th April.*—The weather is very hot and occasionally cloudy. Threshing of the winter crops is approaching completion. The land is being prepared for the monsoon sowings. Want of fodder is felt in Seoni and in parts of Saugor. The water-supply is scanty in Seoni and in parts of Wardha. Prices are steady, and in most districts are fairly normal.

Burma.—*For week ending 4th April.*—In Lower Burma reaping of dry-weather paddy continues in Tavoy. Cultivation of paddy on hill clearings is in progress in Thaton. In Upper Burma reaping of dry-weather paddy has commenced in Mandalay and Sagaing. Cultivation of early wet-weather paddy continues in Kyaukse. The condition of the dry-weather paddy crop and of the crops on islands is generally good. The price of paddy has increased considerably in Myaungmya and Amherst, and slightly in Rangoon, Bassein and Thayetmyo, while it has decreased slightly in Prome; elsewhere prices are stationary.

Assam.—*For week ending 7th April.*—The weather is hot. Sowing of the early rice and pressing of sugarcane continue. The condition of cattle is good, except in Cachar. Scarcity of fodder and water is felt in places.

Mysore and Coorg.—*For week ending 8th April.*—MYSORE: No rain. The standing crops are withering for want of rain in Kolar and Chitaldroog. Paddy has been harvested in parts of Tumkur. Prices have risen in Kolar and Tumkur, but have fallen in Hassan, Kadur and Chitaldroog.

COORG.—There are no standing crops. Rain is much needed for the coffee blossom. Fodder and water for cattle are scarce in parts. Prices are normal.

Berar and Hyderabad.—*For week ending 8th April.*—BERAR: The weather is hot and cloudy with strong winds. Threshing of wheat is almost completed. The land is being prepared for the autumn sowings, Scarcity of fodder and water continues. Prices have risen in two districts and fallen in one, but are stationary elsewhere.

HYDERABAD.—No rain during the week. Harvesting of the spring crop is almost completed. The crops on irrigated areas are good. Fodder is getting scarce. The water-supply is decreasing. Prices are normal.

Central India.—*For week ending 8th April.*—Slight rain fell in the Gwalior and Malwa Agencies during the week. Agricultural operations have been completed in Baghelkand, but are in progress in all other Agencies. Owing to the damage done to the crops for want of rain, the probable outturn will be below the average in four Agencies. Cattle are in fairly good condition, except in parts of Bhopal and Gwalior. Pasturage is good and sufficient in all Agencies. Prices are above normal in Baghelkand, Malwa, Goona and in four districts of Gwalior, but are normal elsewhere. The opium crops in Gwalior, Bhopal and Malwa are in fairly good condition. The number of persons employed on relief works in Bundelkhand and Goona are 2,068 and 961 respectively.

Rajputana.—*For week ending 8th April.*—Rainfall slight in Dholepore and Bikanir. Agricultural operations are generally satisfactory, except in Marwar where prospects are poor. The unirrigated crops are suffering in Ajmere-Merwara, and the crops have been damaged in Dholepore for want of rain. Agricultural stock are generally in good condition, but are suffering in Ulwar for want of fodder. Pasturage and fodder are scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk and in parts of Meywar, and fodder is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in five States, and falling in two, but are steady elsewhere. In Marwar 3,918 persons are on relief works, and 251 on gratuitous relief, in Shahpura 400 are on relief works, in Merwara 2,341 are on relief works, in Bikanir 2,079 are on relief works, and 297 on gratuitous relief. The number for Jaisalmere has not been reported.

Kashmir.—*For week ending 7th April.*—KASHMIR VALLEY: Slight rain has fallen. Water is ample for irrigation. Prices continue normal.

JAMMU PROVINCE.—*For week ending 1st April.*—Rainfall slight. The spring crops are in fair condition. Fodder is scarce. Prices are stationary.

For week ending 8th April.—No rain. The crops are in fair condition. Fodder is scanty, and cattle are lean. Prices are stationary.

Nepal.—*For week ending 4th April.*—The weather is hot with strong westerly winds. The prospects of the spring harvest are very poor. Operations for the autumn crops are at a standstill for want of rain.

DENZIL IBBETSON,

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 8th April 1896.

NOTIFICATIONS.

No. 1000 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 4th April 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 120 of 1896.—Nundo Lall Haldar, sanitary inspector of the port of Calcutta, 25, Anund Khan's Lane, Baniatollah Street, Calcutta, for a sulphur incinerator or fumigator.

No. 121 of 1896.—Adolphe Zalkin Germains, of London, for improvements in globeless chimneys for oil and gas lamps.

No. 122 of 1896.—Carl Bergmann, engineer, of 55, Thalstrasse, Meisen on the Elbe, in the German Empire, for improvements in retting or steeping jute.

No. 1001 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying:—

No. 216 of 1895.—Eduard Penning Dupuis, of Halle a Saale, in the German Empire, for an apparatus for the automatic printing and delivery of cards or tickets with the time of issue printed thereon. (Filed 26th March 1896)

No. 232 of 1895.—Robert Rickie, of Messrs. Rickie & Co., Bangalore Iron Works, Bangalore city, for improvements in sugarcane crushing mills. (Filed 25th March 1896.)

No. 404 of 1895.—Eroom & Co., merchants, 168, Dharamtala Street, Calcutta, for an improved sola pith hat to be called the "musketeer range and shikar hat." (Filed 25th March 1896.)

No. 22 of 1896.—Eagle Pencil Company of the city, county and state of New York, United States of America, for improvements in pencils. (Filed 30th March 1896.)

No. 251 of 1895.—Charles Franklin Goddard, gentleman, of 1410, Marquette Building, Chicago, county of Cook, state of Illinois, United States of America, for threshing machines. (Filed 28th March 1896.)

No. 1002 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 256 of 1891.—William Robinson, electrical engineer, of Boston, in the county of Suffolk and state of Massachusetts, one of the United States of America, for an electric motor car. (From 31st March 1896 to 30th March 1897.)

No. 331 of 1891.—Philip Henry Holmes of Gardiner, county of Kennebec, state of Maine, one of the United States of America, mechanical engineer, for an improved electrical conductor. (From 21st January 1896 to 20th January 1897.)

No. 1003 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the Fourth Schedule to the Inventions and Designs Act (V of 1888) the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorizing others so to do has ceased:—

No. 86 of 1891.—Mr. C. Fairbairn's invention for improvements in apparatus for forging and finishing circular articles (Specification filed 31st December 1891.)

No. 102 of 1891.—The Giffard Gun and Ordnance Company's invention for improvements relating to guns or rifles and other apparatus operated by compressed or liquefied gases. (Specification filed 30th December 1891.)

No. 128 of 1891.—Mr. G. Tompkins' invention for improvements in foot rasps for horses. (Specification filed 29th December 1891.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

No 9 of 1890.—Mr. P Donaldson's invention for an improvement in the manufacture of oils, juices, etc, from seeds or nuts which can be applied to the native oil-mill or *ghání* or any oil-mill made on the same principle (Specification filed 31st December 1890.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of R50

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA"

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

RAILWAY DEPARTMENT—BENGAL.

NOTIFICATION.

Calcutta, the 1st April, 1896.

No. 38.—In accordance with section 42 of Act I of 1894, the following is published for information.

J. G. H. GLASS,
Secretary to the Government of Bengal.

MEMORANDUM OF AGREEMENT made and entered into this day of one thousand eight hundred and ninety-six *Between The Bengal District Road Tramways Company (Howrah Amta) Limited* a Joint Stock Company with limited liability duly incorporated under the Indian Companies' Act 1882 and having its registered office at 34 Jackson's Lane Calcutta (hereinafter called the Company) of the one part and *The Secretary of State for India in Council* (hereinafter called the Secretary of State) of the other part *Whereas* by order of the Government of Bengal acting in the premises for and on behalf of the Secretary of State published in the *Calcutta Gazette* of the twenty-seventh day of March one thousand eight hundred and ninety-five and being Notification No. 111 the Company have been empowered to make a tramway between the Town of Howrah and the Town of Amta within the District of Howrah *viâ* Jagatbulabpore upon the guage and in the manner described and in accordance with the provisions contained in the now reciting order and copies of the agreements entered into between the Promoters on behalf of the Company and the local authorities under the provisions of the Bengal Tramways Act 1883 are set out in Parts I and II of the Schedule annexed to the said order. *And whereas* the Company in pursuance of the provisions of clause 10 of the said order have applied to the Government of Bengal for the acquisition by the Government for the Company under the provisions of the Land Acquisition Act I of 1894 of such additional land over and above that which the local authorities have agreed to grant free to the Promoters in terms of the Agreements between them as is required by the Company for the purposes of the Tramway and may be sanctioned by the Government of Bengal as necessary for such purposes and the Government of Bengal in pursuance of section 41 of the said Act I of 1894 have accordingly called upon the Company to enter into such agreement with the Secretary of State as is hereinafter contained. Now these presents witness that it is hereby mutually covenanted and agreed between and by the said parties hereto for themselves their Successors and Assigns in manner following that is to say:—

1. The Company shall pay to the Government of Bengal before the land is transferred to the Company the costs of the said land and all proper costs of the acquisition proceedings including the costs of any references and Appeals to Courts and the charges for the necessary establishment (an estimate of the charges of such establishment which is only to be treated as an approximate estimate and not as limiting the powers of the Secretary of State his Successors or Assigns to employ a larger establishment if found necessary being hereto annexed by way of schedule and marked A) and the Company shall by way of securing such payment and immediately upon the amount being made known to them deposit with the Government of Bengal the amount that may be estimated by the Collector or Officer to be appointed under Act I of 1894 to make the acquisition as the cost of the land and the costs of the said proceedings and the Government of Bengal shall use and apply the moneys so deposited in paying and satisfying the same costs and the Company shall from time to time deposit such further sum as may be required by the Collector to bring the amount in deposit up to the estimated costs of the land and of the acquisition proceedings respectively.

2. On payment or satisfaction in full by application of the moneys deposited of the cost of such land and the proper costs of the acquisition proceedings and by payment of any balance remaining unsatisfied after such application the land shall at the cost of the Company be conveyed and transferred to the Company by the Secretary of State.

3. The land shall be held by the Company subject to all the terms and provisions set out in the above recited order and the time within which and the conditions referred to in section 41 of the said Act I of 1894 on which the work of constructing and making the said tramway are to be executed and maintained shall be the time and the conditions prescribed in the said order and the terms on which the public shall be entitled to use the said work shall be those set out in the said order the Company hereby agreeing with and to the Secretary of State that this agreement shall take effect in all respects as if the terms provisions and conditions referred to in this clause had been particularly set out at length in this agreement in relation to the said land in place of being incorporated herein by reference to the said order.

As witness the Seal of the Company and the hands of two of the Directors and the hand of the Secretary of State.

The Seal of the Company has been affixed by and in the presence of

NOTIFICATION.

Calcutta, the st April, 1896.

No. 17.—The twelve months' furlough granted to Mr. L. C. D. Bean, District Traffic Superintendent, in class II, grade 4, of the Superior Revenue Establishment of State Railways, in Manager, North Western Railway's Notification No. 9 of 15th May, 1895, has been commuted, by Her Majesty's Secretary of State for India, to sixteen months' leave on medical certificate.

T. GRACEY, *Colonel, R.E.*,
Director General.

NOTICE.

The post of Principal of the Bareilly College now vacant will be filled up on 1st July next. Applications are invited from gentlemen who have graduated and *taken honours* at a *European* University. Some knowledge of Urdu is necessary. Salary six hundred rising to seven hundred and fifty. Six months' probation. Applications with copies of testimonials (which will not be returned) should be addressed to the President, College Managing Committee, Bareilly, Rohilkhand.

E. ALEXANDER,
President.

BAREILLY;
The 24th March, 1896.

THOMASON COLLEGE, ROORKEE.

NOTIFICATION.

In para. 19 of the Circular, Engineer and Telegraph Classes, dated 1st January, 1896, it is stated that the Civil Engineering Course extends over two years. The Government having determined that this Course shall be extended to three years when the administrative arrangements for such extension are completed, notice is hereby given to intending Candidates that the Government retains discretion to extend the Course to three years without further notice.

J. CLIBBORN, *Lt.-Col., I.S.C.*,
Principal, Thomason College.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1895.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.*,
Principal, Thomason College.

SEA AND FOREIGN MAILS.

Mails for	Date of closing at Calcutta.	Route by which despatched.
	1896.	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., Natal, and Cape Colony, and in general all countries served through the United Kingdom.	15th April	Per P. & O. Str. from Bombay.
Straits Settlements, China, and Japan.	11th „	*Viâ* Tuticorin and Colombo.
*Australasian Colonies . .	11th „	Ditto.*
Ditto ditto . .	18th „	Ditto.
Madras, Pondichery, Ceylon, Singapore, China, and Japan.	18th „	Per French Str. *Eridan.*
Madras and Colombo . .	13th „	Per P. & O. Str. *Bengal.*
Straits Settlements, China, and Japan.	18th „	Per Steamer *Kutsang.*
Rangoon and Moulmein . .	17th „	Per Steamer *Pentakota.*
Rangoon, Moulmein, Penang, and Singapore.	14th „	Per Steamer *Karagola.*
Akyab, Kyaukpyu, Sandoway, and Rangoon	15th „	Per Steamer *Kasara.*
Port Blair	15th „	*Viâ* Madras.
Rangoon and Moulmein . .	11th „	Per Steamer *Purnea.*
Madras, Colombo, Straits Settlements, China, and Japan.	13th „	Per A. Lloyd's Str. *Daphne.*

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer,

full allowance being made for the Steamer being in advance of her published timing. Mails for the places mentioned in column 1 are despatched daily to Columbo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up o 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS.

Presidency Postmaster, Calcutta.

ALLAHABAD,
The 8th April, 1896.

THE YEARLY EXAMINATION OF CANDIDATES FOR 4TH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for 4th grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd June, 1890, at 10-30 A.M. :—

SUBJECTS.

	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity) . . .	100	50
Dictation (spelling, punctuation, etc.) . . .	100	50
Arithmetic (the whole) . .	240	100
Mensuration (*a*) the whole .	00	30
Book-keeping, (*b*) mercantile	100	50
TOTAL .	600	400

Mimimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Ball and Hamilton.
"Book-keeping" by double and single entry by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner. Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it ; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal, together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full

examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.
The Principal will attend to no application received direct.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR;
The 31st March, 1896.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8;* per eight-ounce tin, *R5;* per pound tin, *R10.* The general public can be supplied by the Superintendent, Botanic Garden, *for cash only,* at the undernoted rates: per four-ounce tin, *R3;* per eight-ounce tin, *R6;* per pound tin, *R12.* This medicine is also sold by the principal European and Native druggists in Calcutta. PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or, post free,	R18-12.
½	„	R 9,	„	R9-8.
¼	„	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	১৮৲	বা ডাকমাশুল বিনা	১৮৸৹
৷ আধ „ „	৯৲	„	৯৷৹
৷ সিকি „ „	৪৷৹৲	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Advertisement of Books and Publications which are less than two years old, for insertion weekly in Part II of the Gazette of India.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
" each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	a.	p.	R	a.	p.
For the Calcutta Series; per copy . .	0	8	9	0	10	3
" each of the Madras, Bombay, and Allahabad Series; per copy . . .	0	5	3	0	5	9
" the Calcutta Series. For the year .	7	2	6	8	6	3
" each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

SUPPLEMENT TO

The Gazette of India.

No. 16.} SIMLA, SATURDAY, APRIL 18, 1896.

OFFICIAL PAPERS.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 11th, 1896.

During the week under review conditions have been generally similar to those reported last week. Pressure has changed considerably from day to day, but throughout all the fluctuations of the barometer the general distribution of pressure has remained fairly constant, the charts having exhibited daily an area of relatively high pressure over Tenasserim, and a large area of low and deficient pressure over the north Gangetic Plain. The only important difference between the distributions of pressure in the present and the past weeks has been in North-Western India, where the barometer has been unsteady, and where a large shallow depression appeared on the 9th, and lasted until the close of the week. Hot and strong westerly winds have blown down the Gangetic Plain during the week, and strong southerly winds have been experienced at the head of the Bay. In other places the winds have been unsteady, and the directions variable, except in the north-west on the three last days of the week, when irregular cyclonic winds were shown there. Temperature has been steadily excessive over nearly the whole country during the week, the only important exception being the southern coast districts of Madras, where on most days there was some depression of temperature below the normal average. The rainfall has been very restricted, and confined almost wholly to Assam and some parts of Bengal and of Upper Burma.

Daily Summary.—*Sunday, April 5th.*—Pressure had decreased almost everywhere, and over the greater part of the country briskly. Readings were lowest in Bihar, highest in Tenasserim and Lower Burma, and relatively high over the west and south of the Peninsula. Pressure was everywhere below the normal average. Strong southerly and south-westerly winds prevailed at the head of the

Bay, and hot westerly winds down the Gangetic Plain. The mean temperature was excessive, except in Assam, Tenasserim, and a few places in the Peninsula, the abnormal excess being greatest in Bengal. Moderate rain had fallen over Assam and Sikhim, and a few light showers in other parts of the country.

Monday, April 6th.—Pressure had increased almost everywhere, and in most places briskly. Readings remained highest in Tenasserim and Lower Burma, and lowest in Bihar. The barometer still read below the normal average everywhere, especially so in the north-east. The winds were practically unchanged. The mean temperature was excessive, except on the South Madras coasts and in the Bombay Deccan. The excess was greatest over North and Central Bengal. Rain had again occurred over Assam and Sikhim, with a few local showers in other parts of the country.

Tuesday, April 7th.—Pressure had again increased in most places—more particularly in the north-east—so that, though readings remained lowest in Bihar and highest in Tenasserim, the pressure differences were smaller. The barometer read about normal over the greater part of the country. With the decrease in the steepness of the barometric gradient, the westerly winds had fallen off down the Gangetic Plain, but in other places the winds were little changed. The mean temperature remained excessive almost everywhere, the abnormal excess being again largest over Central Bengal. Moderate rain was again reported from Assam.

Wednesday, April 8th.—Pressure had changed slightly, and was still relatively uniform, though somewhat lower over Bihar and higher over Tenasserim than elsewhere. Fresh southerly winds continued to prevail over the head of the Bay, but elsewhere the directions were variable, and calms were common. The mean temperature was excessive, except over the Carnatic, the abnormal excess being greatest over Bengal. A few light showers of rain were reported from North-Eastern India.

Thursday, April 9th.—Pressure had decreased briskly over the Punjab and Upper Sind, and had again changed little elsewhere. A large shallow depression was shown over North-Western India, while there were relatively low readings over Bengal and Bihar. Pressure remained highest in Tenasserim. The wind remained southerly at the head of the Bay, and westerly winds were reported again down the Gangetic Plain, but elsewhere the directions were variable. The mean temperature remained excessive, except over the Madras coast districts and the Upper Assam Valley. The abnormal excess was about equally great over Eastern Rajputana and over Central Bengal. A few scattered thunder-showers were reported.

Friday, April 10th.—Pressure had decreased almost everywhere, but the changes were generally unimportant. The depression in the north-west had concentrated somewhat, and was shown in the neighbourhood of Lahore. Pressure was thus lowest over the Punjab, relatively low over Bengal, and high over North Bombay and over Tenasserim. The winds were irregular. A south-easterly gale was blowing at Murree. The mean temperature remained excessive, except in South Madras, and the only rainfall was a shower at Chaman.

Saturday, April 11th.—Pressure had increased over the Punjab and decreased elsewhere. The change was rapid over the North Gangetic Plain, and the low pressure area in that locality had again become strongly marked. Westerly winds prevailed down the Gangetic Plain, southerly winds at the head of the Bay, and variable winds in most other places. The distribution of the mean temperature relatively to the normal was unchanged. Duststorms had given showers to a few places in the north-west, and moderate rain had fallen in Assam.

Temperature.—The excessive heat which prevailed generally throughout India during last week was continued and indeed intensified during the week under review. Practically the only region where the mean temperature has ranged below the normal average during the present week has been the coast district of the Carnatic from Madras southward. At times in Assam a depression of temperature has taken place following on a shower of rain, but these have been only temporary changes from which the temperature has quickly recovered.

The principal abnormal excess of temperature has been shown over Central and North Bengal, but in parts of the Punjab and of Rajputana on some days the excess has been almost as great as in Bengal.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	April 1896.							Mean variation of week.
	5th	6th	7th	8th	9th	10th	11th	
	o	o	o	o	o	o	o	o
Burma	+1·9	+1·8	+2·1	+2·8	+2·2	+2·0	+2·0	+2·1
Bengal and Assam	+4·9	+4·2	+3·7	+3·9	+3·5	+3·6	+3·9	+4·0
North-Western Provinces and Oudh	+3·8	+1·5	+3·2	+2·4	+3·6	+5·2	+4·3	+3·4
Punjab	+2·8	+3·3	+4·0	+5·0	+6·2	+9·5	+6·3	+5·3
Bombay	+1·6	+0·7	+1·6	+2·9	+3·2	+2·6	+2·9	+2·2
Central Provinces and Berar	+3·0	+3·7	+3·7	+3·4	+3·6	+2·9	+2·1	+3·2
Central India and Gujarat	+3·4	+1·3	+2·9	+2·3	+4·6	+3·1	+3·1	+3·0
Sind and Rajputana	+3·0	+3·3	+3·8	+3·0	+4·4	+5·2	+6·2	+4·1
Madras	+1·6	+1·2	+0·5	+0·5	+1·4	+1·5	+2·2	+1·3
Mean for whole of India	+2·9	+2·3	+2·8	+2·9	+3·6	+4·0	+3·7	+3·2

The above shows that for the whole of India for each day of the week the mean temperature has been excessive, the excess ranging from 2·3° on the 6th to 4·0° on the 10th. The provincial variations exhibit the same results in every province in India, showing an excess both for the week as a whole and for every day of the week.

The following were the maximum temperatures throughout India reported on each day:

April 5th	109·0°	at	Chaibassa.
" 6th	110·0°	"	"
" 7th	108·5°	"	Sambalpur.
" 8th	109·0°	"	Chaibassa.
" 9th	109·0°	"	" and Sambalpur.
" 10th	110·4°	"	Chanda.
" 11th	110·9°	"	"

Rain.—The distribution of rain as regards the different provinces of India has been much the same during the week under review as during the past few weeks. Most of the rainfall has taken place over North-Eastern India, but scattered showers have occurred in different parts of the country. The amount of rain has, however, been generally smaller than was the case last week, and in the north-east much smaller. The rainfall over North-Eastern India occurred under the ordinary set of conditions. Strong damp southerly and south-westerly winds blew at the head of the Bay and carried much moisture into the interior. At the same time dry easterly winds prevailed over Assam, with the result that thunderstorms were of daily occurrence over and near the Assam Hills, and moderate rainfall was received. Over Burma the usual low pressure area of the hot weather was developed, and a well marked air current from the Bay blew up the valley of the Irrawaddy. This current on encountering the higher lands of Upper Burma was forced into ascent, and as a result gave a few light showers to several stations in the northern parts of Burma. The slight rainfall which is reported from other parts of the country fell during local dust and thunder storms, and, except over the Bombay Deccan, was generally insignificant in amount. The rainfall over North-Eastern India mainly occurred during the first four days of the week, the 9th, 10th and 11th having been generally fair, except

in the Assam Valley, where a moderate shower occurred on the 11th. In the Bombay Deccan scattered showers occurred throughout the week. The concluding table gives the rainfall data. From the first column it will be seen that rain of greater or less amount fell in eighteen of the rainfall divisions as compared with twenty in the preceding week. Of these eighteen divisions no less than twelve had an average actual rainfall for the week of less than one-tenth of an inch. Consequently it was only in six divisions, *viz.*, Assam (Surma, Hills, and Brahmaputra), Malabar Coast, the Bombay Deccan, and Madras (South), that effective rainfall was received, all the other divisions being actually or practically without rain. The heaviest actual average reported was 5·76 inches in the Surma division of Assam, followed by 2·59 inches in the hills of Assam, by 1·70 inches in the Brahmaputra Valley, and by 0·26 inch in the Bombay Deccan. The second column of the table giving the average normal rainfall of the week shows that the anticipated rainfall during the present week is comparatively small in all divisions, except in Assam and the Bengal hills. In the great majority of cases, however, this small amount has not been reached, and, except in the Assam divisions, in the Bombay Deccan, and in Khandesh, the actual rainfall has been less than the normal. In the case of the Deccan and of Khandesh the excess is only trifling, but in the case of Assam the excess varies between 0·3 inch and 1·2 inches.

The three concluding columns of the table exhibit the state of the seasonal rainfall. They show that for the period March 1st to April 11th there has been an excess of rain only in Western Rajputana. In Assam (Surma and Hill tracts and Brahmaputra), the Punjab (West), Sind, Baluchistan, and Madras (South) the rainfall of the period has been about normal, *i.e.*, has varied by less than 20 per cent. from the average, and that in all other divisions it has been deficient. Over a large part of the country it has been actually or practically *nil* for the whole period.

The following are the principal totals recorded during the week under review:—Nemotha (Cachar) 7·93 inches, Cherrapunji (Khasia Hills) 15·30 inches, Sibsagar 4·32 inches, Ponani (Malabar) 3·00 inches, Nargund (Dharwar) 1·35 inches, Hukeri (Belgaum) 2·10 inches, Hathkalangda (Kolhapur) 2·00 inches, Ramagiri (Ganjam) 1·18 inches.

Note.—The figures showing the seasonal, actual, and normal rainfall and difference for the Assam hills are not comparable with those given last week, as during the present week additional districts have been added.

PROVINCE.	DIVISION.	Rainfall data for week ending April 11th, 1896. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from March 1st to April 11th, 1896. Average actual rainfall of season to date.	Average normal rainfall, March 1st to April 11th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *16th April 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 11th April.*—No rain, except light showers in parts of Ganjam, the Nilgiris, and the Southern and West Coast districts. Preparations for next season have commenced. The standing crops are confined to small areas, and are generally fair. The harvest continues with moderate yield. Pasture is generally scarce, but fodder is available. Cattle are in good condition. Prices are practically stationary.

Bombay.—*For week ending 15th April.*—Rain fell in parts of the Deccan and Karnatak. The standing crops have been damaged by blight, insects or insufficient moisture in parts of Karachi, but are otherwise good. Cotton-picking continues in Gujarat, Kathiawar and Dharwar, and harvesting of the late crops in parts of ten districts. Preparations for next season are progressing in sixteen districts. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in Shikarpur and Broach. Prices are normal, except in parts of Sholapur.

Bengal.—*For week ending 13th April.*—Except for a shower at Dacca, there was no rain in the province during the week. The land everywhere is abnormally dry, and the crops on the ground are suffering, and the ploughing and early sowings are retarded. In some parts of North Bengal and in the low-lands of Bihar the sowing of early rice is going on. In Bihar millets are also being sown. There is scarcity of water in parts of Western and Central Bengal. Prices continue almost stationary, but in East Bengal and in Chota Nagpur and the adjacent districts they are higher than at the corresponding period of last year.

North-Western Provinces and Oudh.—*For week ending 15th April.*—The weather is seasonable, but want of rain is greatly felt in the hill districts, where the crops on unirrigated tracts are suffering from drought. Harvesting operations are practically completed, and threshing and winnowing are in active progress. The extra crops are flourishing, and irrigation is in progress where practicable. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 11th April, were—Banda 75,681, Hamirpur 39,009, Jhansi, excluding Garottia from which returns have not been received, 17,315, Jalaun 33,325, Allahabad 2,028, Pilibhit 2,257, Garhwal 1,809—total 1,71,424; of this number 26,924 dependants were gratuitously relieved on the works; 2,893 persons also received gratuitous relief under other provisions of the Famine Code. Supplies are ample. Fodder is scarce in places, and scarcity of water is also reported in Banda, Hamirpur and Lucknow. Prices are generally stationary, but have risen in a few districts.

Punjab.—*For week ending 15th April.*—Rain has fallen in the Rawalpindi, Shahpur, Gujranwala and Dera Ismail Khan districts. The canal crops are being reaped in Hissar. Spring reaping is in progress in Delhi, Umballa, Amritsar, Jullundur, Lahore, Mooltan, Shahpur and Gurgaon. The extra spring sowings have commenced in Jullundur and Amritsar. The autumn sowings are in progress in Amritsar, Sialkot and Mooltan; also sowings of cotton and other crops in Lahore, of sugarcane in Rohtak, of cane and cotton in Gujranwala. Harvesting of gram, barley and mustard is in progress in Dera Ismail Khan. The condition of the spring crop is good in Mooltan. The condition and prospects of the spring crop are generally reported average on irrigated and below average on unirrigated lands. The stock of grain is said to be insufficient in Ferozepore, Sialkot, Dera Ismail Khan, Gujranwala and in parts of Lahore and Shahpur. Cattle are in poor condition in Hissar and Gurgaon. Fodder is scarce in all districts, except Delhi, Jullundur and Rawalpindi. The stock of fodder is said to be insufficient in some districts. Prices are normal in Delhi and Ferozepore, and are falling in Gujranwala; elsewhere prices are high.

Central Provinces.—*For week ending 15th April.*—The weather is abnormally hot and occasionally close. In the north, the threshing of the winter crops is practically completed, and preparations for the autumn sowings have commenced in Chanda and Raipur. Fodder is becoming scarce in Saugor, Seoni, Sambalpur and parts of Raipur and Chanda. The water-supply is scanty in [illegible]

Burma.—*For week ending 11th April.*—In Lower Burma reaping of dry-weather paddy has been completed in Tavoy. In Upper Burma cultivation of early wet-weather paddy continues in Kyaukse. Reaping of dry-weather paddy has commenced in Sagaing, and of the island crops in Mandalay. The standing crops of dry-weather paddy, early wet-weather paddy and the crops on islands are generally promising. The price of paddy has risen considerably in Pegu, Myaungmya, Thayetmyo and Magwe, and slightly in Prome and Toungoo; elsewhere prices are stationary.

Assam.—*For week ending 14th April.*—The weather is seasonable. Some damage has been done to the standing crops by hailstorms in the Karimganj sub-division. Sowing of early rice continues. Pressing of sugarcane is nearly finished. The condition of cattle is fair. Fodder and water are insufficient in places.

Mysore and Coorg.—*For week ending 15th April.*—MYSORE: The standing crops are withering for want of rain in Kolar and Chitaldroog. Paddy has been harvested in Chitaldroog, and is being sown in parts of Tumkur. Prices have risen in Kadur, but have fallen in Tumkur, Mysore and Chitaldroog.

COORG.—Rainfall moderate. Rain is much needed for the coffee blossom. Ploughing of fields for *ragi* (*Eleusine coracana*) has commenced. Fodder for cattle is scarce. Prices are normal.

Berar and Hyderabad.—*For week ending 15th April.*—BERAR: No rain during the week. The weather is warm and occasionally cloudy. Threshing of wheat continues only in Ellichpur. Land is under preparation for the monsoon sowings. Scarcity of fodder and water prevails in all districts, except Basim. Prices are fluctuating in Akola and Wun, but are stationary elsewhere.

HYDERABAD.—No rain during the week. The spring crop has been harvested in many taluks. Fodder is getting scarce. The water-supply is decreasing. Prices are normal.

Central India.—*For week ending 15th April.*—No rain during the week. Agricultural operations have been completed in Baghelkhand and Malwa and in parts of Gwalior, and are nearly completed in Bundelkhand, but are in progress in all other Agencies. The probable outturn will be below average in three Agencies owing to want of rain, but fairly good in other Agencies. Cattle are in good condition, except in parts of Gwalior and Bhopal. Pasturage is good and sufficient in all Agencies, except in Gwalior. Prices are above normal in Baghelkhand, Malwa and Goona and in a few districts of Gwalior, but are normal elsewhere. Opium is in fairly good condition in Gwalior, Bhopal, Malwa, and the crop has been gathered in Bhopawar. The numbers employed on relief works in Bundelkhand and Goona are 5,730 and 956 respectively.

Rajputana.—*For week ending 15th April.*—Agricultural operations are generally satisfactory, except in Merwara and Jaisalmere where the crops and prospects are poor. The unirrigated crops are suffering in Ajmere-Merwara, and they have been damaged in Dholepore for want of rain. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk, Jaisalmere and in parts of Meywar, and fodder is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in four States, falling in two, and fluctuating in one; elsewhere prices are steady. In Marwar 4,519 persons are on relief works, and 192 on gratuitous relief, in Shahpura 450 are on relief works, in Merwara 2,561 are on relief works, in Bikanir 2,065 are on relief works, and 251 on gratuitous relief, in Jaisalmere 363 are on relief works, and 44 on gratuitous relief.

Kashmir.—*For week ending 14th April.*—KASHMIR VALLEY: Rain has fallen during the week. The prospects of the spring crops are excellent. Rice and maize are being sown. Prices continue normal.

JAMMU PROVINCE.—*For week ending 15th April.*—No rain. Reaping of the spring crops has commenced. Cultivation of cotton and sugarcane is in progress. Cattle are in good condition. Prices are high.

Nepal.—*For week ending 11th April.*—The weather is hot, dry and windy. Indian-corn and early rice cannot be sown for want of rain. Prices are rising.

DENZIL IBBETSON,

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 31ST MARCH 1895, AND FROM 1ST JANUARY TO 31ST MARCH 1896.

N.B.—As regards the figures in column *Total Earnings from 1st January 1896*, audited figures have been used as far as possible.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 16th April 1896.

NOTIFICATIONS.

No. 1062 P.—An application for an extension of the term of exclusive privilege in respect of the undermentioned invention has been filled under Section 15 of Act V of 1888 in the office of the Secretary appointed under the Inventions and Designs Act, 1888 :—

No. 73 of 1882.—Edward Lennon Cantwell, Civil Engineer, of No. 5, Old Post Office Street, Calcutta, for improvements in the construction of portable sugar-cane mills.

No. 1063 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 11th April 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 123 of 1896.—Gustaf Ferdinand Flodman, engineer, of 85 B, Folkkungagatan, Stockholm, Sweden, for improvements in diaphragm pumps driven by steam.

No. 124 of 1896.—Gerhard Ditmar, manufacturer, of 23, 25, 27, Erdbergstrasse, Vienna, in the empire of Austria, for an improved annular liquid combustible burner for incandescent light.

No. 125 of 1896.—Messrs. Shanks & Co. as assignees of John Shanks, of Tubal Works, Barrhead, in the county of Renfrew, North Britain, sanitary engineer, for improvements in water closets and urinals.

No. 126 of 1896.—Emil Claviez, general-director, of 1, David Street, Leipzig, in the German empire, for an improved process for the manufacture of yarn or thread from paper and apparatus therefor.

No. 1064 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 136 of 1895.—Ramsaran Das, son of Piarilal, cloth merchant, Chowrie Bazar, Delhi, for improvements in machines for extracting the juice of the sugarcane. (Filed 12th March 1896.)

No. 181 of 1895.—Ramsaran Das, son of Piarilal, cloth merchant of Chowrie Bazar, Delhi, for an improved machine for extracting the juice of the sugarcane. (Filed 12th March 1896.)

No. 214 of 1895.—The National Opalite Glazed Brick and Tile Syndicate, Limited, of 70—71, Bishopsgate Street, Within, London, for improved or improvements in connection with fancy or ornamental bricks, tiles, slabs, wallings, ceilings and the like. (Filed 26th March 1896.)

No. 219 of 1895.—Samuel Locke Johnston, of Boston, in the county of Suffolk and state of

Massachusetts, United States of America, for improvements in cotton gins and wool burrers. (Filed 2nd April 1896.)

No. 266 of 1895.—Alexander Gray, horse trainer, of Mount Street, Canterbury, in the colony of New South Wales, for an improved apparatus to be used for starting races. (Filed 2nd April 1896.)

No. 362 of 1895.—Lieutenant-Colonel Edward Brooke Anderson, commandant, 24th Regiment, Madras Infantry, stationed at Bangalore, for improvements in permanent and portable cooking ranges. (Filed 28th March 1896.)

No. 402 of 1895.—Peter Ross, conductor, sub-engineer, Public Works Department, Railway branch, and signal and interlocking inspector, North-Western Railway, Lahore, for a method of adjusting disc signal cranks worked with points on railways, to be called, "Disc signal adjustable crank." (Filed 9th March 1896.)

No. 405 of 1895.—Wilhelm Stern, merchant of Antwerp, kingdom of Belgium, 162, Rue de la Province Sud, for improvements in collapsible casks. (Filed 30th March 1896.)

No. 1065 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 13 of 1888.—William Lindsey Henderson, engineer of Khangaum, West Berar, and Frederick Walter Shallis, engineer, of 9, Marine Street, Bombay, for an improved beater cotton gin. (From 27th April 1896 to 26th April 1897.)

No. 155 of 1888.—Ludwig Mond, manufacturing chemist of Northwich in the county of Chester, and Dr. Carl Langer, Ph.D. of Hampstead, N. W., in the county of Middlesex, both in the kingdom of England, for improvements in gas batteries. (From 10th April 1896 to 9th April 1897.)

No. 1066 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the Fourth Schedule to the Inventions and Designs Act (V of 1888) the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (a) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 282 of 1890.—Mr. W. Lunsford's invention for improvements in cigarette machines. (Specification filed 7th January 1892.)

No. 115 of 1891.—Dr. H. C. Moir's invention for improvements in reversible seats. (Specification filed 8th January 1892.)

No. 244 of 1891.—Major B. A. N. Parrott's invention for an improved safety bolt. (Specification filed 9th January 1892.)

No. 319 of 1891.—Mr. E. Green's invention for improvements in and relating to billiard tables. (Specification filed 6th January 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

No. 298 of 1890.—Mr. E. C. Lea's invention for improvements in sewing machines. (Specification filed 9th January 1891.)

Fee in respect of the continuance of an exclusive privilege—

(b) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of R50.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

SEA AND FOREIGN MAILS.

Mails for	Date of closing at Calcutta 1896	Route by which despatched.
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Seychelles, Madagascar, etc., and in general all countries served through the United Kingdom.	22nd April	Per P. & O. Str from Bombay.
Straits Settlements, China, and Japan.	25th ,,	*Viâ* Tuticorin and Colombo.
*Australasian Colonies . .	18th ,,	Ditto.*
Ditto ditto . .	25th ,,	Ditto.
Madras, Pondichery, Ceylon, Singapore, China, and Japan.	18th ,,	Per French Str. *Eridan.*
Madras and Colombo . .	27th ,,	Per P. & O. Str. *Sumatra.*
Straits Settlements, China, and Japan.	20th ,,	Per Steamer *Kutsang.*
Rangoon and Moulmein . .	24th ,,	Per Steamer *Palamcotta.*
Rangoon, Moulmein, Penang, and Singapore	21st ,,	Per Steamer *M. Manatchy.*
Akyab, Kyaukpyu, Sandoway, and Rangoon	22nd ,,	Per Steamer *Katoria.*
Port Blair	21st ,,	*Viâ* Rangoon.
South African Ports . . .	22nd ,,	Per Steamer *Pongola.*
Mauritius, Réunion, Mayotte, Nossi Be, Delagoa Bay, Natal, and Cape Colony.	24th ,,	*Viâ* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS.

Presidency Postmaster, Calcutta.

THE YEARLY EXAMINATION OF CANDIDATES FOR 4TH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for 4th grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd June, 1896, at 10-30 A.M. :—

SUBJECTS.

Subjects	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity) . . .	100	50
Dictation (spelling, punctuation, etc.) . . .	100	50
Arithmetic (the whole) .	240	160
Mensuration (*a*) the whole .	60	30
Book-keeping, (*b*) mercantile	100	50
TOTAL .	600	400

Mimimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) " Book-keeping " by Ball and Hamilton.
" Book-keeping " by double and single entry by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it ; but if he is

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal, together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no application received direct.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR ;
The 31st March, 1896.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.			With postage.		
	R	*a.*	*p.*	*R*	*a.*	*p.*
For the Calcutta Series	10	0	0	12	8	0
„ each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series; per copy	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy	0 5 3	0 5 9
„ the Calcutta Series. For the year	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 20	R 14	R 9
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 45
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THOMASON COLLEGE, ROORKEE.

NOTIFICATION.

In para 19 of the Circular, Engineer and Telegraph Classes, dated 1st January, 1896, it is stated that the Civil Engineering Course extends over two years. The Government having determined that this Course shall be extended to three years when the administrative arrangements for such extension are completed, notice is hereby given to intending Candidates, that the Government retains discretion to extend the Course to three years without further notice.

J. CLIBBORN, *Lt.-Col., I.S.C.*,
Principal, Thomason College.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.*,
Principal, Thomason College.

Phelan, Executive Engineer, 1st Grade, Punjab, is appointed to officiate as a Superintending Engineer, with the temporary rank of Superintending Engineer, 3rd Class, with effect from the forenoon of the 14th April 1896, *vice* Colonel S. L. Jacob, R.E., on furlough, or until further orders.

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROPOSED AMENDMENT OF THE INDIAN CONTRACT ACT, 1892.

The following papers are published for general information:

No. 3/413-23, dated Simla, the 13th April, 1894.

From—C. J. LYALL, ESQ., C.S.I., C.I.E., Secretary to the Government of India, Home Department,

To—All Local Governments and Administrations, and Registrar, High Court, Calcutta.

I am directed to invite the attention of His Excellency the Governor in Council / His Honour the Lieutenant-Governor (and Chief Commissioner) / the Honourable the Chief Justice and Judges / your attention to the cases of *Kinu Ram Dass* v. *Mozaffer Hossain Shaha* and *Seth Chitor Mal* v. *Shib Lal*, which were decided by Full Benches of the High Courts at Calcutta and Allahabad and are reported in the Indian Law Reports, 14 Calcutta Series, p. 809, and 14 Allahabad Series, p. 273, respectively, where those Courts considered the nature and extent of the liens, sometimes described as salvage liens, which have been allowed in favour of persons expending money upon the property of others for the preservation of such property.

2. It will be observed that neither of the Full Benches in these cases was unanimous, Mitter and Norris, J.J., dissenting in the Calcutta case, and Mahmood, J., in the Allahabad one. Further, in a later Madras case, *Seshagiri* v. *Pichu*, reported in the Indian Law Reports, 11 Madras Series, p. 452, the Court (Kernan and Mutusami Ayyar, J.J.,) expressed their agreement with the opinion of the minority of the Calcutta Bench, whilst the view of the Bombay High Court, as expressed by Sargent, C. J., and Birdwood, J., in the case of *Achut Ram Chunder Pai* v. *Hari Kamti*, which was reported in the Indian Law Reports, 11 Bombay Series, p. 313, and is, so far as is known, the latest ruling of that Court on this subject, is also distinctly opposed to that adopted by the majority of the Calcutta Full Bench in their ruling which was delivered in the following year.

3. Having carefully considered these cases and the general principles involved, the Governor General in Council thinks it desirable to consider whether it would not be well to incorporate into Indian law, by express statutory enactment, some provisions on this subject, founded on the rule of equity adopted by the English and Irish Courts in the cases referred to by Mr. Justice Mitter in his judgment in the Calcutta case, which will enable persons making payments which have the effect of preserving property from alienation to acquire in certain circumstances a lien or charge on such property in respect of such payments.

4. There has already been some legislation in this direction in India. Thus a statutory lien was conferred as far back as 1819 (see Bengal Regulation VIII of 1819, section 13, clause *fourth*) in favour of an under-tenant advancing money to preserve a patni taluk from sale for arrears of the zamindar's rent. These provisions were applied to payments made by any one interested in an under-tenure to stay the sale of such tenure under the Landlord and Tenant Procedure Act, 1869 (Bengal Act VIII of 1869, s. 62); and now a similar lien of mortgage is given by section 171 of the Bengal Tenancy Act, 1885, to any person, who, having in a tenure or holding advertized for sale an interest which would be voidable upon the sale, pays the amount requisite to prevent the sale.

5. Like liens have also been conferred under the Bengal and Madras Revenue Laws on incumbrancers paying arrears of revenue due in respect of the mortgaged property (see Bengal Zamindari Revenue Sale Act XI of 1859,

section 9, and the Madras Revenue Recovery Act (Madras Act II of 1864), section 35), and under the Transfer of Property Act, 1882, section 72, clause (*b*), mortgagees in possession are entitled to spend such money as is necessary for the preservation of the mortgaged property from destruction, forfeiture or sale, and, in the absence of a contract to the contrary, to add such money to the principal money at the rate of interest payable on the principal, and, where no such rate is fixed, at the rate of 9 per cent. per annum.

6. It may also be noted that by section 69 of the Indian Contract Act (IX of 1872), and by some other enactments, *e. g.*, section 148 (3) of the Punjab Municipal Act (XX of 1891), a remedy has been given to persons making payments, under compulsion of law, on behalf of others. That remedy, however, is personal only, and it would seem desirable to extend it to a charge on the property preserved by means of such payments.

7. The Governor General in Council would be glad to be informed whether [after consulting the Hon'ble the Judges of the High Court / the learned Judges of the Chief Court,] the Governor in Council / the Lieutenant-Governor / the Lieutenant-Governor and Chief Commissioner / you / the Hon'ble Judges sees / see any objection to the enactment of some such provisions as are proposed in the enclosed draft.

8. I am to add, with reference to the communication from this Department No. 399/400, dated the 27th March 1885, that the High Court / Government of Bengal has also been consulted on this question. [To Bengal Government and High Court, Calcutta, only.]

Draft Provisions.

After section 69 of the Indian Contract Act, 1872, the following shall be inserted, namely:

69A. If any such payment as is mentioned in the last preceding section has the effect of preserving any property from alienation, the person making the payment shall be entitled to a charge upon the property so preserved for reimbursement of the sum so paid, with interest at such rate as the Court may direct.

Such charge shall have priority over all charges on, and rights in, such property which would have been defeated if such alienation had taken effect, and shall be subject to all such charges and rights as would have remained unaffected notwithstanding such alienation.

69B. When two or more persons are jointly interested in any property, and one of such persons makes any payment in respect thereof to which they are jointly and severally liable, or to which they ought by law or in equity to contribute either equally or in any definite proportions, the person making such payment shall be entitled to a charge upon the interest or respective interests of the other or others of them for reimbursement to him of the proportion or respective proportions of the sum so paid to the payment of which he or they respectively was or were so liable as aforesaid, together with interest thereon at such rate as the Court may direct.

69C. If any person, at the request of a person having an interest in any property, and in order to preserve such property from alienation, pays any charge or demand affecting such property which such last-mentioned person was bound by law to pay, the person making such payment shall be entitled to a charge on the property so preserved for reimbursement to him of the sum so paid, with interest thereon at such rate as the Court may direct. The person entitled to such charge shall have the same priority in respect thereof as between himself and the other persons interested in such property, as the person whose charge or demand was so paid as aforesaid was entitled to at the time of such payment.

No. 1876, Judicial, dated Ootacamund, the 2nd August, 1894.

From—The HONOURABLE J. F. PRICE, Chief Secretary to the Government of Fort St. George,

To—The Secretary to the Government of India, Home Department.

With reference to your letter, dated the 13th April, 1894, No. 3, Judicial—413, I am directed to furnish to you copies of the opinions recorded by the

Honourable the Judges of the High Court and the Advocate-General upon the proposal to incorporate into Indian law some provisions on the subject of salvage liens founded on the rule of equity adopted by the English and Irish Courts in the cases referred to by Mr. Justice Mitter *in re* Kinu Ram Dass *v.* Mozaffer Hossain Shaha. It will be seen that both the High Court and the Advocate-General are in favour of the proposed legislation, and His Excellency the Governor in Council sees no reason to dissent from their views.

Extract from the Proceedings of the Government of Madras, Judicial Department, No. 1875 (Judicial), dated 2nd August, 1894.

READ the following papers:

Dated Coonoor, the 4th June, 1894.

From—J. H. SPRING-BRANSON, Esq., Advocate-General, Madras,

To—The Chief Secretary to Government, Madras.

I have the honour to enclose my opinion upon the proposed additions to section 69 of the Indian Contract Act, 1872, as requested in G. O., dated the 8th May, 1894, No. 1106.

ENCLOSURE.

OPINION.

1. I am strongly in favour of the proposed statutory enactment whereby persons who make payments which have the effect of preserving property from alienation shall acquire in certain circumstances a lien or charge on such property in respect of such payments.

2. It is most desirable that the present conflict of opinions as to whether such a provision does, or does not, form part of the existing rules of equity should be put an end to; and that the proposed equity which is admittedly "attractive"—because it is reasonable and just—be incorporated into Indian law by express statutory enactment.

3. The proposed additions to section 69 of the Indian Contract Act, 1872, "give effect to a principle which prevents injustice in many cases, and in no conceivable case operates unjustly."*

* Per Mitter, J., *in Kinu Ram Das v. Mozaffer Hossain Shaha*, I.L.R., 14 Cal., at p. 815.

No. 1945, dated Madras, the 19th July, 1894.

From—H. W. FOSTER, Esq., Registrar of the High Court of Judicature, Appellate Side, Madras,

To—The Chief Secretary to Government, Madras.

With reference to G. O., dated 8th May last, No. 1106, Judicial, communicating, for the opinion of the High Court, a letter from the Government of India proposing certain additions to section 69 of the Indian Contract Act, 1872, I am directed to state that the Honourable the Chief Justice and Judges consider that the proposed provisions are equitable and their enactment desirable.

Order thereon by the Government of Madras.

The following letter will be despatched to the Government of India:

[Here enter No. 1876, dated 2nd August 1894.]

No. 5827, dated Bombay Castle, the 22nd August, 1894.

From—The HONOURABLE MR. W. LEE-WARNER, C.S.I., Secretary to Government of Bombay,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter No. $\frac{1 \text{ Judicial}}{414}$, dated the 13th of April last, forwarding the draft of certain sections which might be added to the Indian Contract Act, 1872, with a view to enable persons making payments which have the effect of preserving property from alienation to acquire in certain circumstances a lien or charge on such property in respect of such payments, and enquiring whether the Governor in Council, after consulting the Honourable the Judges of the High Court, sees any objection to the enactment of some such provisions as are proposed in the draft.

2. In reply, I am to forward herewith, for submission to the Government of India, copy of a letter from the Registrar of Her Majesty's High Court, Appellate Side, Bombay, No. 1658, dated the 2nd August, 1894, and its accompaniment, containing the opinion of the High Court on the draft, and to state that His Excellency the Governor in Council concurs with the Honourable the Judges and approves of the draft provision.

No. 1658, dated Bombay, the 2nd August, 1894.

From—R. D. SETHNA, Esq., Registrar, High Court, Appellate Side, Bombay,

To—The HONOURABLE MR. W. LEE-WARNER, C.S.I., Secretary to Government of Bombay, Judicial Department.

I am directed to acknowledge the receipt of your letter No. 3396, dated the 17th May last, forwarding copy of a letter from the Government of India, Home Department, Judicial, and of a draft Bill adding certain sections to the Indian Contract Act, 1872, to enable persons making payments which have the effect of preserving property from alienation, to acquire in certain circumstances a lien or charge on such property in respect of such payments, and requesting that Government may be favoured with the opinion of the Honourable the Chief Justice and Judges whether there is any objection to the enactment of some such provisions as are proposed in the draft Bill.

2. In reply, I am directed to forward copy of a minute on the draft Bill recorded by the Honourable Mr. Justice Jardine, and to say that the Honourable the Acting Chief Justice and the Honourable Mr. Justice Fulton concur in it.

Minute by the Honourable Mr. Justice Jardine on the draft Bill, adding certain sections to the Indian Contract Act, 1872.

I feel that my opinion on a matter which has divided learned Judges sitting in Full Bench is of no special value. But I think the proposed legislation is based on the same principle of equity as section 69 of the Indian Contract Act, and it appears to me to advance the remedy. The four High Courts having already dealt with the point, and diverse views having been expressed, it seems to me desirable that the Legislature should intervene and pronounce.

31st July, 1894. JOHN JARDINE.

Minute by the Honourable Mr. Justice Fulton.

I concur.

E. M. H. FULTON.

Minute by the Honourable the Acting Chief Justice.

I concur.

L. H. BAYLEY.

No. 3501 J., dated Calcutta, the 18th August, 1894.

From—H. J. S. COTTON, Esq., C.S.I., Chief Secretary to the Government of Bengal,

To—The Secretary to the Government of India, Home Department.

With reference to your letter No. 3 Judl./415, dated the 13th April, 1894, and its annexure, regarding the proposed amendment of the Indian Contract Act, IX of 1872, I am directed to submit, for the information of the Government of India, the accompanying copies of the replies* received from the officers who were consulted by this Government on the subject, and to say that the Lieutenant-Governor agrees with the opinions therein expressed, and approves of the enactment of some such provisions as are contained in the draft sections 69A to 69C, which it is proposed to insert in the Act.

*Letter No. 315, dated the 17th May, 1894, from W. H. Page, Esq., District Judge of Tirhut.
Letter No. 837, dated the 22nd May, 1894, from C. A. Wilkins, Esq., District Judge of the 24-Parganas.
Letter No. 303, dated the 29th May, 1884, from J. Tweedie, Esq., District Judge of Patna.
Letter No. 1323, dated the 30th May, 1894, from B. C. Seal, Esq., District Judge of Burdwan.
Letter No. 293, dated the 5th June, 1894, from T. T. Allen, Esq., Superintendent and Remembrancer of Legal Affairs.
Letter No. 1131J., dated the 14th June, 1894, from H. Luttman-Johnson, Esq., Commissioner of the Dacca Division.
Letter No. 723G., dated the 26th June, 1894, from A. W. Mackie, Esq., District Judge of Rangpur.

No. 315, dated Muzaffarpur, the 17th May, 1894.

From—W. H. PAGE, Esq., District Judge of Tirhut,

To—The Chief Secretary to the Government of Bengal.

I have the honour to acknowledge receipt of your No. 136J.D. of the 12th instant, on the subject of the proposed addition of certain sections to the Contract Act (IX of 1872).

2. I have carefully perused the judgments alluded to in the letter of the Home Secretary to the Government of India, and it is my opinion that whether the intention of the sections which it is proposed to add be to declare or to amend the existing law, the enactment of these sections is eminently desirable, and that principally for the first reason put forward by Mitter, J., in the Calcutta case (I. L. R., 14, Cal., 809), namely, that in the majority of cases a contrary view of the law would result in injustice; and mere personal decree against a defaulting co-sharer, in an estate, which is only saved from sale by a payment made by another co-sharer would be useless, and that no injustice is likely to be done to any party by the adoption of the principle laid down in Enayet Hossein *versus* Muddunmoonee Shahoon (14, B. L. R., 155).

No. 837, dated Alipore, the 22nd May, 1894.

From—C. A. WILKINS, Esq., District Judge, 24-Parganas,

To—The Chief Secretary to the Government of Bengal.

With reference to Mr. Under-Secretary Levinge's letter No. 132J.D. of the 12th instant, I have the honour to state, for the information of His Honour the Lieutenant-Governor, that I see no objection to the enactment of some such provisions as are proposed in the draft sections 69A to 69C, which it is proposed to insert in the Indian Contract Act, 1872.

These sections seem to me to embody the opinion of the majority of the High Court Judges in India who have dealt with the question of "salvage" charge.

No. 303, dated Bankipore, the 29th May, 1894.

From—J. TWEEDIE, Esq., District Judge of Patna,

To—The Under-Secretary to the Government of Bengal, Judicial Department.

I have the honour to acknowledge receipt of your letter No. 134 J. D., dated the 12th current, and to say that in my opinion the proposed amendment of the Contract Act is much required, and that the draft sections satisfactorily provide for the matters which they cover.

2. There is one analogous case which I think they do not cover, and which I think might well be provided for now. Such a case is now pending in my court. It is this—

3. A, a Muhammadan, dies, leaving three sons and three thousand rupees; also a debt of Rs. 1,000 due to Z. The sons take their shares, Rs. 1,000 each. It is at present law that Z may sue any son and take his Rs. 1,000 out of him only, leaving that son stripped entirely of all that he got from his father. It is doubtful whether that son can sue his brothers for contribution.

No. 1323, dated Burdwan, the 30th May, 1894.

From—B. C. SEAL, Esq., District Judge of Burdwan (on leave),

To—The Under-Secretary to the Government of Bengal, Judicial Department.

With reference to your No. 133 J. D. of the 12th instant, desiring an expression of opinion on the provisions proposed to be inserted after section 69 of the Indian Contract Act, 1872, I have the honour to state that the provisions are equitable, and they should be inserted as proposed.

No. 293, dated Calcutta, the 5th June, 1894.

From—T. T. ALLEN, Esq., Superintendent and Remembrancer of Legal Affairs,

To—The Chief Secretary to the Government of Bengal.

With reference to your No. 130 J. D. of the 12th ultimo, I have the honour to say that I see no reason to question the advantage of making the proposed additions after section 69 of the Contract Act.

No. 1131-J., dated Dacca, the 14th June, 1894.

From—H. LUTTMAN-JOHNSON, Esq., Commissioner of the Dacca Division,

To—The Chief Secretary to the Government of Bengal.

In reply to Under-Secretary Mr. Levinge's confidential letter No. 131 J. D., dated 12th May, 1894, asking my opinion in regard to certain additions which it is proposed to make to section 69 of the Contract Act, I have the honour to say that I agree with the views generally expressed by the Judges who tried the various cases referred to in the Government of India's letter No. 3 Judicial, dated 13th April, 1894, that persons who, by their payments, preserve any property from alienation, should have a lien on that property, and that as the common law of India gives them no such lien, it is necessary to give it them by statute.

2. I am inclined to think that the proposed additions to section 69 should be limited to the case of immoveable property.

3. In Eastern Bengal compulsory payments are very frequently made by persons interested in landed property to protect it from alienation by sale in the Civil and Revenue Courts, and I think the proposed additions to the Contract Act are in accordance with what the people of these parts consider to be justice.

4. I am inclined to think that a lien accruing in the manner described in these additions should be registered. Payments made to protect property from sale for arrears of land revenue might be registered as incumbrances under section 41, Act XI, 1859.

No. 723-G., dated Rangpur, the 26th June, 1894.

From—A. W. MACKIE, Esq., District Judge of Rangpur,

To—The Under-Secretary to the Government of Bengal, Judicial Department.

In reply to your No. 135 J. D., dated the 12th May, 1894, I have the honour to state that, after consulting some of the senior pleaders, I approve the proposed additions to section 69 of the Contract Act, which will enable persons making payments having the effect of preserving property from alienation to

acquire a lien on such property in respect of such payments. I may add that I do not share the fears of Mr. Justice Wilson as stated at page 832, volume XIV of the Calcutta Series of the Indian Law Reports. Any mortgagee will be entitled to make the payment necessary to save the property, and if he omits to do so, he has only himself to blame.

No. 597, dated Naini Tal, the 21st June, 1894.

From—The Secretary to Government, North-Western Provinces and Oudh,

To—The Secretary to the Government of India, Home Department.

With reference to your letter No. 2 Jud'l./416, dated 13th April, 1894, with which was forwarded for an expression of opinion a draft of certain sections proposed to be inserted after section 69 of the Indian Contract Act, I am directed to submit the opinions of the Hon'ble the Judges of the High Court of Allahabad.

2. The Hon'ble the Chief Justice, in his Minute, dated the 17th May, 1894, has gone very fully into the probable effects of the proposed addition to the statute law, and has shown that the draft sections as they stand are likely, if enacted, to cause a general insecurity of title, to facilitate the perpetration of frauds, to result in gross injustice in many cases to innocent investors of money, and to afford new opportunities for doubtful litigation to an over-litigious people. The Hon'ble Messrs. Justices Tyrrell and Knox are of the same opinion. The Hon'ble Mr. Justice Blair is also opposed to the draft provisions so far as they relate to moveable property; and though he accepts the principle as equitable as regards immoveable property, he states his inability to judge of the practicability of its application as it is at present expressed in the draft sections. The Hon'ble Mr. Justice Banerji, while approving of the principle of the proposed legislation, considers that it should be limited to immoveable property, and further that in any such legislation sufficient and effective safeguards should be provided against the perpetration of fraud and against any interference with the rights of persons who may acquire an interest in immoveable property over which, unknown to them, a statutory lien may have previously been created This in his opinion will necessitate the establishment of some system of registration of such liens. Regarding the proposed legislation mainly as an alleviative of the occasional consequences of the revenue sale laws, he considers that the charge created by the proposed law on an estate in land should be strictly limited to the particular interest of the defaulter himself in such estate, and that any such charge should not hold good against an auction-purchaser when the estate is sold for an arrear of land revenue.

3. The Lieutenant-Governor has given the subject careful consideration, and is constrained to agree with the opinion forcibly set forth in the Minute of the learned the Chief Justice that the proposed legislation is likely to increase fraud and to give rise to doubtful litigation. The chief point with which the executive Government is concerned is the bearing of the proposed legislation on the revenue sale law of the province, and the degree in which it is likely to diminish the security which that law at present gives the State for the full realisation of the land revenue demand. On this point the Lieutenant-Governor considers it imperative that no doubt should be cast on the present statutory power of the State to sell land free of all incumbrances and charges when an arrear of revenue is due upon it. The learned the Chief Justice shows that as the draft sections stand at present they afford opening for argument whether the liens proposed to be created would not survive after auction-sale of land for an arrear of revenue. The law should not leave any doubt on this point.

4. Assuming, however, that the Government of India, before the project of law reaches a final shape, will sufficiently remove all grounds for this apprehension, the Lieutenant-Governor has still grave doubts whether in the general interests of the community the proposed legislation is desirable. As the Chief Justice remarks, it is one thing to codify existing law when a legal principle, having been authoritatively accepted, has been illustrated and limited in its application by a body of decided cases; and it is another thing to introduce into the statute book a principle which has not been worked out in practice and which does not even

enjoy the repute of being settled law. The latter appears to be the position of the liens under reference which, as stated in your letter, are ordinarily described as salvage liens. The decisions cited in paragraphs 2 and 3 of your letter appear to support the view taken by the majority of Judges in the two Full Bench decisions of the Calcutta and Allahabad High Courts that the applicability of the maritime doctrine of salvage to property in land, or to goods and chattels, has now been authoritatively ruled by the highest English Courts for sound and sufficient reasons to have no place in the equity law of England.

5. The fact that the principle has been adopted in a very limited and tentative manner in local Indian enactments concerned with the special systems of land tenure existing in particular provinces is not, in the Lieutenant-Governor's opinion, a sufficient reason for incorporating it, discarded as it apparently is from the settled law of England, in a general and far-reaching form into the Imperial contract law of India. Even if the point at present in discussion were narrowed to the question whether it would be advisable to introduce into the Land Revenue Act of these provinces a provision somewhat similar to those found in the Bengal Sale Act of 1859 or the Madras Revenue Act of 1864, he would hesitate to decide in the affirmative without full enquiry as to how those provisions had worked in practice, and whether they made more for fraud and chicanery than for the protection of honest persons. And if he eventually came to the conclusion that amendment of the local revenue law in this point was desirable, and that protection might reasonably be given to other interests than those of a *bonâ fide* mortgagee, he would further have to consider whether the lambardár or other sharer in a pattidari mahal, who paid the revenue on the separated share of a defaulting pattidar, not in the capacity of a person interested in such share, but in his capacity of a person jointly responsible for the land revenue of the entire mahal, should be included or not in such protection. It is not clear at present, and it would probably not be made clear until considerable litigation had taken place, whether the proposed additions to the Contract Act, as worded in the draft appended to your letter, would create any lien in favour of the payer in such circumstances; yet in the particular form in which estates in land exist in this province the case above supposed would oftenest arise.

6. The question therefore of introducing the principle of salvage liens even into the local revenue law of this province would be one of great nicety and would require to be most carefully handled. How much more difficult it will be to place the principle in a clear and duly limited and properly safeguarded form in one of the general Indian codes, or to foresee the effects it may have as it is expounded by the Courts, the Lieutenant-Governor must leave to the Government of India to determine. To use the words of Mr. Justice Wilson in the Calcutta Full Bench case, he "cannot pretend to foresee what the consequences may be of broadly laying down such a doctrine," but he thinks there are ample reasons for not legislating in the manner proposed.

MINUTE.

1. I have carefully read the draft sections 69A, 69B, and 69C, which it is proposed to insert after section 69 of the Indian Contract Act, 1872.

2. It is not necessary for me now to consider whether, having regard to the judgments of Bowen, Fry and Cotton, L. L. J., in Falcke *versus* Scottish Imperial Insurance, L. R. 34 Ch. Div. 234, and to the case of Leslie *versus* French, L. R. 23 Ch. Div. 552, any such principle as that embodied in the proposed sections would be considered by high legal authority in England as a sound principle of equity to be applied to such transactions as it is proposed by the suggested sections to apply it. Nor is it necessary for me now to consider whether or not any such principle has by Statute Law in India or in England been applied to transactions similar to those to which the proposed sections will apply it.

Apart from such considerations I approve of the object of the proposed legislation if that object can be secured without causing a general insecurity of

title, without facilitating the perpetration of frauds, without resulting in gross injustice in many cases to innocent investors of money, and without affording new opportunities for doubtful litigation to an over-litigious people.

3. I propose to confine this Minute to an attempt to show by a few illustrations that it is necessary to consider very carefully what may be the results of bringing upon the Statute Book the proposed sections as they stand. I do not propose to express any extra-judicial opinion as to the conclusions which might be arrived at by a Court in any of the cases which I shall put by way of illustration. I shall with one exception take for the purposes of illustration cases to which Act No. XIX of 1873 and Act No. IV of 1882 or one of those Acts may apply.

Under section 166 of Act No. XIX of 1873 a mahal or a patti in the North-Western Provinces is liable to be sold by the Collector with the sanction of the Board of Revenue to satisfy any arrear of land revenue due in respect of the mahal or patti, and on such sale the purchaser obtains a clear title unaffected by any then existing mortgage of the mahal or patti or of any share in the mahal or patti. It is the whole mahal or the whole patti, and not the share of the defaulter in the mahal or patti which may be sold under section 166. That section confers no power on the Collector to sell separately from the mahal or patti any share in it.

It is clear from a consideration of section 166 of Act No. XIX of 1873 that such a sale is to be had recourse to only when the Collector and the Board of Revenue consider that the other processes provided by previous sections of Chapter V of Act No. XIX of 1873 for obtaining satisfaction of an arrear of land revenue will be ineffective.

It is not necessary for present purposes to notice the distinction between zamindari, pattidari and imperfect pattidari tenures. Broadly speaking, the mahals to which Chapter V of Act No. XIX of 1873 applies may be divided according to their tenures into two classes, those of pure zamindari tenure, in which the respective interests of the shareholders are represented by fractional denominations of the whole and those of bigha-dam tenure, in which the respective interests of the shareholders are represented by the areas of the lands in the possession of the shareholders respectively, personally or by tenants. In each case the whole mahal is liable to be sold in satisfaction of any arrear of land revenue due in respect of the mahal, and in each case the shareholders are jointly and severally liable for the payment of the whole of the land revenue payable in respect of the mahal.

In mahals of pure zamindari tenure the legal possession of the whole of the lands of the mahal belongs to each one of the shareholders, and in that respect such shareholders resemble joint tenants and have a joint interest in each and every part of the mahal.

In mahals of bigha-dam tenure the shareholders are not in joint possession of the mahal, that is, there is no unity of possession in the unit mahal. The shareholders in a mahal of bigha-dam tenure have several possession of, and a several title to, their respective shares. They are in fact neither joint tenants nor tenants in common. They are several and separate proprietors, each one the several proprietor of his separated and several share and hold in severalty. The fact that in some mahals of bigha-dam tenure there are common lands does not alter the position. The interest and title of the shareholder in such common lands flows from his title to his separated and several share in the mahal.

It is necessary to bear the facts above referred to in mind in considering the application of the proposed sections, and particularly of section 69B., to transactions arising out of the payment of arrears of land revenue in these Provinces.

5. The charges created by the proposed sections will be statutory charges. As those statutory charges were not in the contemplation of the legislature when section 167 of Act No. XIX of 1873 was enacted, it may be a question whether

the provisions of that section will apply to them. If the provisions of that section will not apply to such statutory charges, it follows that a sale of a mahal under section 166 of Act No. XIX of 1873 will be subject to any such statutory charge or charges as may be upon it or any part of it, and in course of time it may happen that such charges will equal or exceed in amount the value of the mahal, and the Government will be left without the remedy by sale of the mahal for the recovery of an arrear of land revenue. Section 167 of Act No. XIX of 1873 seems to be limited in its application as to "incumbrances" to incumbrances created by contract between parties.

The charge under section 69A. takes "priority over all charges on, and rights in, such property which would have been defeated if such alienation had taken effect."

The charge under section 69B. does not apparently take priority over prior charges upon the property, but it may be intended to be a charge taking priority over all subsequent charges upon the property.

The question as to the priority of the charge under section 69C is apparently determined by that section.

6. There is no provision requiring these statutory charges to be registered, or indicating that they may be registered, or if they may, the manner in which and the procedure according to which they may be registered.

When one of these statutory charges has been created and is existing, will a subsequent *boná fide* purchaser or mortgagee for value and without notice of the charge hold or take subject to the charge? If such charges are not to be registered, how is such a purchaser or mortgagee to have notice of the fact of the charge if he is dealing with an ignorant or a knavish vendor or mortgagor?

Is it proposed to keep up in these Provinces any register in the Collector's office or elsewhere which will show in respect of what shares of interests in a mahal one or more of these statutory charges is subsisting, and is such register to be open to public inspection?

If such statutory charges are to affect a subsequent *boná fide* purchaser or mortgagee for value and without notice of the charge, how is it proposed to protect him from the result of the fraud of his vendor or mortgagor in not disclosing to him or wilfully concealing from him by a false representation the fact that there is one of those statutory charges upon the property? Such an undisclosed charge might make the purchaser's title or the mortgagee's security valueless. Must every intending purchaser and every intending mortgagee of a share in a mahal before paying or advancing his money make enquiry of the Collector of the District as to whether any payment to which section 69A, 69B, or 69C applied of any arrear of land revenue due in respect of the mahal has been made within twelve years? How could the Collector say that no such payment had been made? How could a Collector, or how could his subordinates, know in every case whose money it was with which an arrear of land revenue had been paid? How can the intending purchaser or intending mortgagee be certain of the title if these statutory charges are to affect a *boná fide* purchaser or mortgagee for value and without notice?

If such charges are not to affect a subsequent *boná fide* purchaser or mortgagee without notice, of what practical use will they be as a security to the man who obtains the statutory charge?

If there is to be no compulsory registration of such charges, it is not too much to assume that cases will occur in which the title of a purchaser or of a mortgagee will be defeated by collusion between the shareholders in a mahal. For instance, A pays into the Government Treasury for one, two or more years his quota of the land revenue by the hand of B, or in order to prevent a sale under section 166 of Act No. XIX of 1873 pays by the hand of B, another shareholder in the mahal, the arrear of land revenue which is due and unpaid, such arrear being in respect of A's share in the mahal and in fact paid by A with his own money but by the hand of B, and subsequently mortgages his share in the mahal.

What is there to prevent A and B in each of the cases put fraudulently alleging and proving by evidence, which the mortgagee is not in a position to contradict, that the payments were made under circumstances which created a charge under one or other of the proposed sections in favour of B. Respect for the bania purchaser or the money-lender or for the law relating to perjury might not prevent the occurrence of such frauds.

If such charges are to be registered, what is the document which it is intended shall be registered? Is it to be a receipt, setting out the facts, to be given by the Tahsildar or the Collector? If it is, how is the Tahsildar or the Collector to be certain that the statements made to him are true? It must be kept in mind that the charge under section 69A will take priority over all then subsisting mortgages on the property, and that a shareholder may desire to defeat or delay his mortgagee and may attempt to make evidence for that purpose.

Will not the creation of such statutory charges, whether they are to be registered or not, cause great complications of title in respect of all descriptions of property?

7. How is it to be determined by a Court whether a payment to which section 69 of the Contract Act, 1872, applies of an arrear of land revenue had the effect of preserving a mahal from alienation by a sale by the Collector, unless a proclamation of an intended sale of the mahal had been issued under section 169 of Act No. XIX of 1873 when the payment was made? Should the payment have been made prior to the issue of such a proclamation, I presume in order to make out a case under section 69A it would be necessary to call the Collector and the Members of the Board of Revenue as witnesses, the Collector to prove that in his opinion a sale was the only effective process at his disposal under Act No. XIX of 1873 for the realisation of the arrear, and the Members of the Board of Revenue to prove that under the circumstances spoken to by the Collector the Board of Revenue would have sanctioned a sale of the mahal taking place.

Until a series of judicial decisions shall have settled such questions, it may confidently be assumed that in the majority of cases in which a payment to which section 69 of the Indian Contract Act, 1872, applies, of an arrear of land revenue is made, the person making the payment will assert and try to enforce a charge under section 69A, and a large amount of litigation will be the result.

8. How would section 69A apply in the following case? There are five shareholders, A, B, C, D and E in a mahal of bigha-dam tenure. The share of each is under a separate mortgage granted by the owner of the share. A makes default in payment of his quota of the land revenue. B, C, D and E have paid their respective quotas. The Board of Revenue sanctions a sale being had of the mahal to satisfy the arrear due. After such sanction and before sale B pays the quota due by A. Does B get a first charge not only over A's share, but over his own and the respective shares of C, D and E, and does B's charge take priority over the interest of his mortgagee as well as over the interests of the mortgagees of A, C, D and E respectively, who have not had any notice that any arrear was due? It is to be remembered that in the case which I have put all these interests would have been defeated if the mahal had been sold for the arrear of land revenue which B paid. What would in such a case be the position between B and his mortgagee if B had covenanted in his mortgage that all the land revenue of the mahal should be duly paid? For another illustration take the same mahal and the same shareholders A, B, C, D and E and the share of each separately mortgaged. C, D and E have paid their quotas of the land revenue, and A and B have made default in payment of their quotas respectively. On the day before that fixed for the sale C pays the quota of land revenue due by A, and D's mortgagee pays the quota of land revenue due by B. What are the rights of C and of D's mortgagee as between themselves, and as between each of them and the mortgagees of A, B, C and E respectively? Would A, A's mortgagee, B, B's mortgagee, D, D's mortgagee, E and E's mortgagee, be entitled to bring each a separate suit against C to redeem

C's charge, and what would be the result and the decree in each of such suits? Would the man who was first in the legal field get his decree for redemption and would all the other suits consequently fail? Could E maintain a suit against C to redeem C's charge so far only as it affected E's interest, and what would be the decretal amount upon payment of which E would be entitled to have his own share in the mahal discharged from C's charge? Would it be the whole amount of the arrear of land revenue which C had paid, or some and what proportion of it? In answering that question it has to be borne in mind that E had made no default in payment of his quota of the land revenue. If E, in order to free his own share from C's charge, has to pay off the whole charge of C, does E get the charge which C had? Can D then bring a similar suit against E, and having got his decree, can D's mortgagee bring a similar suit against D? Can similar and successive suits be brought by the remaining parties interested until the circle of suits has been completed to the great advantage of legal practitioners and the possible ruin of the parties.

If section 85 of Act No. IV of 1882 applied to any one of such suits, and A, B, C, D, E and their respective mortgagees could be joined in one suit so as to determine the rights of all parties, what would be the decree and how would priorities of redemption, and—on failure to redeem—of foreclosure, be provided for in the decree?

9. I shall now put two questions which relate to the construction exclusively of section 69B. A, B and C are shareholders in a mahal of pure zamindari tenure, but are not co-sharers in each other's share. All three are by reason of section 146 of Act No. XIX of 1873 jointly and severally liable for the payment of the land revenue of the mahal. Are they "jointly interested" in the property, *i.e.*, in the mahal or in any share in the mahal so as to make the payment by one of them of the quota of land revenue due by another of them a payment upon which a charge under section 69B would arise? What would be the answer if the mahal of this illustration were one of bigha-dam tenure?

10. What would be the effect of section 69C in the following case? A, a stranger to the mahal, pays an arrear of land revenue at the request of B, a defaulting shareholder, in order to preserve the mahal from alienation by a sale by the Collector in respect of the arrear due by B. Would section 69C give A a charge on the whole mahal or only on B's share in it?

It must be remembered that the right of sale given by section 166 of Act No. XIX of 1873 is a right to sell the mahal or the patti and not a right to sell a particular share in the mahal or patti. If section 69C applied to such a case, it may be that the charge which A would get would be a charge on B's share only, for that is the property in which B has an interest, and not the 1st charge of the Government on the whole mahal or patti.

If A gets under section 69C a first charge on B's share only or a first charge on the whole mahal, is it clear that such charge could be enforced? The Government could have enforced the charge which it had only under the procedure and by means of the processes of Chapter V of Act No. XIX of 1873. The processes at the disposal of the Government are epitomised in section 150 of Act No. XIX of 1873. How could A avail himself of the processes or procedure of Chapter V of Act No. XIX of 1873? If A could enforce his charge by the procedure and processes of the Civil Courts, the charge would not be the same in any of its incidents as the charge which the Government had. Is such the intention of the framers of section 69C?

11. I shall put only one more case by way of illustration, and for this purpose I shall give an illustration to which Act No. XIX of 1873 has no application. A decree for money is obtained in a Civil Court against A. Under that decree A's carriage and horses are attached and about to be sold. At A's request B pays the judgment debt and costs, and under section 69C gets a statutory charge on the carriage and horses. Will such statutory charge defeat a subsequent *bonâ fide* purchaser of the carriage and horses for value and without notice of the charge? Such a charge in England could be given only by a registered bill of sale, the registration of which would be notice to the world. The Imperial

Legislature has thought it advisable to protect the public in England against unregistered charges upon chattels personal that are capable of transfer by mere delivery, where the possession of the chattel remains with the person giving the charge or making the pledge. I may refer those interested in the present subject to the 17 and 18 Vict. C. 36; 29 and 30 Vict. C. 96; 41 and 42 Vict. C. 31; and 45 and 46 Vict. C. 43; and to the reported cases decided under one or other of those statutes. The two earlier statutes have been repealed. Under the two later statutes a bill of sale (whether it be security for money lent or not) *must be registered within seven days of its execution,* and an affidavit must be registered with it, stating the execution and the true date thereof, the residence and occupation of the grantor, and the residences and occupations of the attesting witnesses; *and the bill of sale must be re-registered every five years.* Notwithstanding the wholesome stringency of the Bills of Sale Acts every one who has practised at the Bar in England must be aware of the daily occurrence of cases in which frauds on creditors, on purchasers, and on mortgagees are attempted, in too many cases successfully, by fictitious charges on chattels personal, against which the registration of the bill of sale is in many cases no protection. The case, which at the commencement of this paragraph I put by way of illustration, is one only of the number which may arise under section 69C in the endless and ever-varying transactions of commercial and daily life. In ordinary course and as the law stands in India the carriage and horses on payment of the judgment debt and costs would be released from attachment and A could sell them with a good title to any one.

If what I have written is not sufficient to suggest some of the dangers and difficulties to be apprehended from the enacting of section 69C as it stands and without any adequate safeguards for the protection of the public being provided, then a cargo of jute, one hundred maunds of wheat, indigo or any article of commerce in the godown of the producer or in a merchant's warehouse in India may be substituted for the carriage and horses of the illustration.

The application of section 69C would not be confined to cases in which a decree for money had been satisfied, as in the illustration. It may be apprehended by those who consider the question that section 69C may apply in many other cases, as, for example, to a case in which a distress upon the article of commerce for rent has been satisfied by a payment made at the tenant's request by a third party.

What will be the effect on trade should one or two judicial decisions inform the public of the bearing of section 69C, and that a charge under that section may attach to articles of commerce, the ownership in which articles not unfrequently passes by successive sales through different hands in the course of a day?

12. As the person who obtains one or other of these statutory charges is not given the right to the possession of the property to which the charge attaches, and as the ownership of the property apparently will not pass by virtue of the charge to the person who obtains the charge, it may be presumed that section 41 of Act No. IV of 1882 will not apply to such a charge in the case of a transfer of immovable property subject to such charge, and that the principle of that section will not apply to such a charge in the case of a transfer of any other kind of property subject to such charge.

13. It is easy to put the questions which I have suggested in this Minute and many more, not affecting Act No. XIX of 1873, which will arise out of the application of the proposed sections to every-day occurrences. I doubt if any lawyer would attempt to forecast the judicial solution of such questions. Will the solution of such questions be provided by statutory enactment, or is it intended that the solution is to be left to litigation.

14. A codification of any branch of existing law is not an easy achievement. In a codification of existing law the codifier has the advantage of seeing how the law has been applied, and to what transactions it has been applied, and to what transactions it has not been applied, and also of seeing the reasons for such application or non-application. The introduction into the Statute Book of novel

principles of law, or the application of well-known principles of law to transactions to which they have not hitherto been applied, is an experiment hazardous in proportion to the variety of the transactions of daily and of commercial life to which, wittingly or unintentionally on the part of the Legislature, the Statute may apply such principles. Such an experiment as that in the present case, so that it may not lead to unforeseen and unintended results, requires a provision and a wider knowledge of such transactions and of the laws prevailing in different parts of India than I possess.

17th May, 1894. JOHN EDGE.

NOTES AND MINUTES OF THE HONOURABLE JUDGES.

By the HONOURABLE MR. JUSTICE TYRRELL.—I strongly approve the views and opinions expressed in the Minute of the learned Chief Justice: and I deprecate the proposed alteration in the Indian Contract Act.

21st May, 1894. W. T.

By the HONOURABLE Mr. JUSTICE KNOX.—I have read the Minute of the Chief Justice and fully agree with him that the proposed legislation will only add to litigation, and the sections as they stand will involve landholders in trouble hitherto unknown. In these Provinces I have heard nothing which leads me to believe that legislation in this direction is sought for. So far from helping to keep alive the village communities, the changes will, in my opinion, tend to disintegrate them. The person who will profit is the money-lender who has made good his footing, or a co-sharer more powerful than his brethren. At present, when such a man pays in a bad year for his brethren in distress, his payments on their behalf are adjusted in good years, and no attempt is made to realize the money paid by ejectment. This will be the probable result of section 69A, if it pass into law.

21st May, 1894. GEO. EDW. KNOX.

By the HONOURABLE MR. JUSTICE BLAIR.—I am of opinion that no charge or lien can be imposed on portable property without seriously hampering the freedom of commercial dealings, and opening the door to numerous frauds.

I think it impossible for me to judge of the practicability of the application of the proposed legislation to immovable property, till the *modus operandi* is actually before me. The principle, if workable, is of course equitable.

21st May, 1894. H. F. BLAIR.

By the HONOURABLE MR. JUSTICE BANERJI.—Having regard to the conflict of opinion which exists among the Judges of the different High Courts on the subject to which the proposed legislation is directed, and the present unsettled state of the law in regard to it, it seems to me to be highly desirable that this unsatisfactory state of things should be remedied by the legislature, and the legislation proposed by the Government should be undertaken.

The principle, on which the proposed sections are founded, is a sound principle of equity, which appears to have been approved by their Lordships of the Privy Council, and to have been acted upon by almost all the High Courts in this country until recently. It has already been recognized and given effect to by the legislature in certain instances, and an extension of it, in the direction proposed, seems to me to be eminently desirable. In an agricultural country like India, where greater value is placed on landed property than on property of any other description, it is equitable that a person, who by compulsion of law,

or at the request of another, advances money in protecting the landed property of another from alienation, where such alienation was threatened or imminent in consequence of the default of a person other than the person making the payment, should acquire a charge on the property of the defaulter, which has been preserved from such alienation. But I think it would be inequitable to give a charge over the property or interests of a person other than the defaulter, and this is apparently what section 69A, as applied to Act No. XIX of 1873, would do. In this respect it seems to me that the proposed measure goes too far. It is also absolutely necessary that any legislation, which may be undertaken on the subject, should provide sufficient and effective safeguards against the perpetration of fraud and an interference with the rights of persons who have innocently dealt with the property of the defaulter. Such safeguards have not been provided in the sections under consideration, and I fully concur with the learned Chief Justice in the observations made by him in his able and exhaustive Minute as to the practical difficulty of working those sections as they now stand. These however seem to me to be matters of detail, which should be carefully considered by the legislature.

I am also of opinion that the measure proposed is a much larger one than what is necessary or desirable. It is proposed to confer a statutory charge on property of every description including movable property. As regards movable property, such a charge will, in the majority of cases, defeat the title of persons who may, after the creation of the charge, deal with such property in good faith without notice. Even if it be provided that the charge shall not prevail against transferees for value without notice, it will be very difficult, if not impossible, for persons dealing with movabe property, to protect themselves by making inquiries. In my opinion movable property should be totally excluded from the scope of the proposed legislation.

I am further of opinion that the provisions of section 41 of Act No. IV of 1882 should be expressly declared to be applicable to the proposed statutory charge, and for the protection of innocent transferees some system for the registration of the charge should be provided.

It also seems to me that much of the objection to the measure may be minimized if it be provided that the charge created by the proposed sections will not take effect against a purchaser at a sale for an arrear of land revenue, to whom section 167 of Act XIX of 1873 applies. I think I may suggest for consideration, whether the proper place for these sections, if they are to be made part of the statute law, is not the Transfer of Property Act.

With these few observations, while fully approving of the principle of the proposed legislation, I concur in the remarks contained in the Minute of the learned Chief Justice.

21st May, 1894. P. C. BANERJI.

By the HONOURABLE MR. JUSTICE BURKITT.—I concur with Mr. Justice Knox's Minute and have nothing to add to it.

21st May, 1894. W. R. B.

No. 847, dated the 13th July, 1894.

From—R. E. YOUNGHUSBAND, Esq., Officiating Junior Secretary to Government, Punjab and its Dependencies,

To—The Secretary to the Government of India, Home Department.

In reply to Mr. Lyall's letter No. 3—417-Judicial, dated the 13th April, 1894, I am desired to forward, for the information of the Government of India, a copy of a letter No. 2924-G., dated the 25th June, 1894, from the Registrar, Chief

Court, Punjab, enclosing notes recorded by the Judges of the Chief Court of the Punjab on the proposed amendment of the Indian Contract Act.

2. Sir Dennis Fitzpatrick desires me to say that the question is one more for judicial officers than for the Local Government, and, as he has not had time to go into it, he offers no opinion upon it.

No. 2924-G., dated Lahore, the 25th June, 1894.

From—A. E. MARTINEAU, Esq., C.S., Officiating Registrar, Chief Court, Punjab,

To—The Officiating Junior Secretary to Government, Punjab.

With reference to your endorsement No. 525, dated the 20th April, 1894, Home—Judicial, forwarding for opinion of the Judges a draft on the proposed amendment of the Indian Contract Act, 1872, I am desired to forward copies of notes recorded by Messrs. Benton, Rivaz, Channing, Stogdon, and P. C. Chatterjee, Judges.

Memo. with reference to the amendment of the Contract Act, section 69.

It is somewhat difficult to understand how the proposed enactments will work in with the provisions of the Registration and Transfer of Property Acts. Section 1 of the Contract Act and 2 of the Transfer of Property Act render these Acts generally independent of other legislation. I think that the proposed legislation would greatly increase the difficulties of the investigator of title, especially where joint estates were to be dealt with, and that in many cases it would be impossible with any amount of care to determine the extent of the charges with which the property might be encumbered. After a transfer has taken place, negotiated with all possible care, I can foresee an interminable vista of litigation with a view to discover what charges of the nature proposed to be created have arisen out of the joint or other previous management. This, it appears to me, would be an evil of no ordinary dimensions far outweighing in importance any benefit that might be anticipated.

Joint management and joint interests prevail almost universally in this country. Legislation with regard to them is difficult, and it should be undertaken with the utmost caution. Wide sweeping measures introducing novel principles are much to be deprecated. The remedy should be carefully adjusted to meet the evil found to exist. In territories where under-tenures prevail and the holders of them are liable to be injuriously affected by sales for the realization of revenue or other charges which have the effect of wiping out prior created encumbrances and tenures, I understand that the evil which is ever liable to result to the innocent has been, to some extent at least, provided for by legislation. If the remedy be insufficient, it might be extended with all due care to meet the particular cases.

In this part of India we have hardly any under-tenures, and sales for the realization of revenue are almost unknown. Here, as everywhere else, we have abundance of joint management and co-ownership. Almost every transfer of joint property gives rise to one or more suits arising out of disputed titles, or claims to pre-emption. It is exceedingly common for some of the co-sharers to leave their ancestral lands in the hands of other co-sharers, and not to return to reclaim their shares for twenty or forty years. These habits give rise to what are known as abandonment cases, in which the principal issue is whether the plaintiff should be presumed to have abandoned his ownership having regard to the length of absence and other circumstances. The claim is as often as not decreed even after an absence of 20 or 30 years free of any charges, it being considered, even when the claimant may have absconded to escape payment of revenue for the land, that the holder of the land during the period has had abundant opportunities of recouping himself for any initial loss or for charges incurred afterwards. It is obvious that the application of the proposed section 69B to such cases would enable the defendant to pile up a heap of charges for revenue paid and the like which would render the plaintiff's case in all instances utterly hopeless. There is no provision for setting off the benefits secured

against the charges. This is most inequitable. The new proposals would, it appears to me, work most unfairly; they would run counter to the cherished ineradicable habits of the people, and give rise to the bitterest discontent.

We should only interfere with joint management, it appears to me, when the clearest possible case is established. In any interference with it, having regard to the desirableness of promoting good feeling between co-sharers and other persons jointly interested, we should by all means avoid the possibility of creating charges of a lasting character. The proverb " Short accounts make long friends " is exactly in point, and the present state of the law leaves very little to be complained of. If a person interested in the payment of money makes a payment relating to land for another which that other is bound by law to pay, he can have recourse to his personal remedy and recover from him personally or by sale of the land in ordinary circumstances. If the person liable to pay be insolvent, he will fail, but the case is a rare one, and to me it appears that this rare case is the sole evil to be remedied. If anything were done to remedy it on the lines of the principle of land salvage, the operation of the new law should in my opinion be limited by a very strict law of limitation not extending beyond three years, and provision should be made for enabling an investigator of title to discover what possible charges there were with certainty by the enforcement of their registration or otherwise.

I have so far been considering the matter with special reference to agricultural estates, but, without any limitation of the interest which would entitle a person to intervene and create a charge in his favour, it seems impossible to place any limit to the scope of the amendments, nor to predict what disastrous results might be produced by its general application to other property, say for instance trust estates or the property of partnerships. The Privy Council case cited and the case in I. L. R., 11 Bombay, are quite sufficient illustrations of the dangerous consequences which may result. In the latter case the Court accepted the principle of salvage lien as applicable to co-owners, but did not apply it to the case before it, because it was clear that the co-owners had been wrongfully excluded by the plaintiff from the possession and management of their own property.

My opinion therefore is that any new legislation on the subject may perhaps be dispensed with, and that if there should be any amendment of the law, it should not be of a general character, but limited to special cases carefully defined, and that moreover its operation should be confined within certain narrow and easily ascertained limits by the rules of limitation and registration applicable to it.

A. H. BENTON,

Judge.

30th April, 1894.

I see no objection to the proposal.

H. T. RIVAZ,

Judge.

4th May, 1894.

Proposed amendment of Contract Act.

The proposed legislation seems to me advisable, if the objects at which it aims can be secured without unduly complicating titles. I doubt whether the proposed provisions ought to apply at all to movable property, and in the case of immovable property I am inclined to think that the charge should not affect a *bonâ fide* transferee for value, unless prior to the transfer to him there had been registered either an agreement by his predecessor in title acknowledging the existence and amount of the charge or a copy of a decree of a competent Court declaring its existence and amount. I think also that when a public demand due on account of immovable property is paid by a person, who, though not

the owner of such property, is in actual enjoyment of the rents and profits arising therefrom, there should be a rebuttable presumption that the payment was made from the rents and profits, and that no charge arose from such payment.

F. C. CHANNING,
Judge.

1st June, 1894.

Opinion on the proposed amendment of the Indian Contract Act.

The proposed sections seem to me to be sound in principle, and I see no objection to their insertion in the Contract Act. Sections 69A and 68C will be practically inoperative in the Punjab, as such cases as are contemplated by them are of very rare occurrence.

I would enact that the request referred to in section 69C must be in writing, signed by the person having an interest in any property. An oral request is easily alleged, easily supported by false evidence, and with difficulty disproved.

A. W. STOGDON,
Judge.

22nd June, 1894.

Opinion on the proposed amendment of the Indian Contract Act.

In my opinion the proposed legislation is both beneficial and necessary. It is, I think, unobjectionable in principle, and its practical working is not likely to inflict any hardship on owners of property and purchasers in good faith for valuable consideration.

As the question of principle has been discussed by eminent authorities, I refrain from a detailed consideration of its various bearings. The case-law on the subject has been admirably marshalled in the lucid judgment of Mr. Justice Mitter in the Full Bench case of the Calcutta High Court reported in I. L. R., 14 Calcutta, 809, while its juristic aspects have been ably handled by Mr. Justice Mahmúd in I. L. R., 14 Allahabad, 273. The Bombay and Madras Courts have given their adhesion to the views of these learned Judges. To these I might add the forcible observations of the learned author of the Tagore lectures on the Law of Mortgage contained in pp. 316—319 of the second edition of his work. They all seem to me to show that the doctrine of salvage liens, proposed to be embodied in the intended legislation, should be considered on its own intrinsic merits, and applied in India irrespectively of its acceptance or rejection by the Courts of Equity in England.

On abstract logical grounds it is difficult to see any serious objection to a more extended adoption of the principle. The right is conceded to mortgagees, who have only a temporary interest in property, when they pay revenue, or incur expense for its preservation. *A fortiori* it should be allowed to co-parceners whose connection with the property is of an intimate and permanent character and to holders of under-tenures and lessees whose interests are mixed up with those of the owner.

By way of analogy reference may be made to a rule in equity which allows a man who has been instrumental in paying the just debt of another under certain circumstances to take the benefit of the liability he has discharged. A very extended application of this doctrine is exemplified in the case where a creditor, who has advanced money to a member of a partnership who is not, to his knowledge, authorized to incur the loan, is nevertheless entitled to recover to the extent it has been applied to the payment of the just debts, present or future, of the firm (Lindley on Partnership, 5th edition, page 191). By parity of reasoning a payment to liquidate a liability which is in the nature of a charge on property should be allowed to take the latter's place. There is in this instance no increase of the owner's liability or of burden on the property. For

example, the revenue assessed on land is a charge on it and has precedence of all other charges. If the owner has his revenue paid by another, wherein is he put in a worse position if the creditor's money is clothed with the priorities given by law to the revenue demand discharged by it? On the other hand, if the creditor has to fall back on simply the owner's personal liability, he loses the benefit of a security he has helped to save for his debtor who, at the same time, profits by having a secured debt converted into an unsecured one. Moreover, he ranks with the owner's ordinary creditors so far as his right to recover his money from the property is concerned, though the latter could not have held this favourable position had the original liability continued, or the property been sold to discharge it. This cannot be equity, for equity is equality. Where the person making the payment is a co-parcener, or one having an interest in the property who has no option but to pay for the preservation of his own rights, the iniquity becomes a glaring one.

I have taken revenue payments simply as a type of those for which salvage lines should be given, for the same reasons apply with more or less force in favour of others which save property from alienation, *e g.*, sales in execution of decrees and the like, or discharge its just liabilities.

I am further of opinion there is nothing in the principle of the proposed legislation opposed to the ideas and sentiments of the people of this Province. On the contrary, irrespective of its recognition by our Courts of Justice, its equitable character has long been generally admitted and acted upon among our land-owners. The custom of absenteeism which has prevailed from time immemorial in this part of India has, as one of its main incidents, the liability of the absentee owner to re-imburse the holder of land during his absence for the revenue paid and other necessary expenses incurred by the latter. It seems to have been invariably recognized by the conscience of the people that such expenses are a charge on the land, and that the absentee owner is not entitled to recover his property without first paying the amount to the holder. In the earlier settlements claims by absentees were numerous, and were settled either by a cash payment to the holder or by allowing him to hold the whole or part of the land for a fixed period in order to recoup himself. Sometimes the holder got a mortgage on the land for the sum found due to him In the first regular settlements agreements are frequently recorded on the part of the holders that the absentees would be allowed to recover their land on payment of losses in payment of revenue, &c. In the revised settlements there is often an express stipulation that they might take back their land *without* such payment. The wording of both kinds of agreement clearly assumes that such expenses are a legitimate charge on the land, which cannot be reclaimed unless they are either paid or remitted. Most frequently the holders were co-sharers in the holding, and in some cases they were simply proprietors in the village. Land tenure in the Province is mostly co-parcenary, and in such tenures the burden of salvage charges falls oftenest on co-sharers. This burden is doubtless lessened by the absence of a revenue sale law like that of the Lower Provinces, but on the other hand under the revenue system prevailing here the joint responsibilities are far greater.

Coming now to the practical working of the principle, I think all legislation intended to give effect to it should exclude cases in which (1) the payer has wrongfully excluded the person for whom the payment is made from the enjoyment of his interest, as in the case reported in I. L. R., 11 Bombay, p 313, (2) such person, being on the spot, is not allowed reasonable facilities according to the circumstances of the case for paying the demand himself (I. L. R., 2 Calcutta, 58).

These exceptions are, I think, sound, and well supported by the decisions quoted. There can be no objection to attaching stringent conditions against the abuse of the right now to be conferred.

The first proposition is intended to guard against giving a premium to wrong doing and facilities for continuing the wrong. In accounting for *mesne* profits, the wrong doer may be allowed credit for such payments, but he should not have a lien for them since they need not have been made at all but for his

tortious act. The second exception is equally necessary to prevent a powerful or wealthy co-sharer, lessee or under-tenant from forestalling the owner and creating money claims as a pretence for excluding the latter from the enjoyment of his share, and finally for running up a bill for payments and interest beyond his power to pay. Draft sections 69A and 69B should, I think, be amended to embody Exceptions 1 and 2.

Section 69C is, perhaps, the least necessary of all. When such a request, as is mentioned therein, is made, it will be generally in the power of the lender to take a registered deed securing the charge, or at all events an agreement to that effect which can afterwards be specifically enforced. The cases must be rare indeed where this cannot be done. I should not think there is much necessity for enacting this section.

I do not apprehend there will be any serious increase of difficulty in the investigation of titles, if the proposed law is enacted. I think when the law is known, inquiries will be made at the time of transfer, and the facts will be ascertained without much difficulty. At any rate, in my opinion, the objection is not sufficient to outweigh the cogent grounds in favor of the proposed legislation. If it is deemed a serious difficulty, I make a suggestion in this connection which might be taken into consideration. A clause might be introduced requiring the holder of such a lien to state the particulars to any intending purchaser of the property subject to it within a fixed period if notice is given to him, and providing that he should be debarred from setting it up against such purchaser in case he fails to comply. It would be analogous to the provision for issuing notice on intending pre-emptors in section 16 of the Punjab Laws Act, IV of 1872. The agency of the Court or of the Post Office might be utilized for service of the notice. Of course, it will be difficult to issue it on creditors under section 69C, as they would not always be known, but this is perhaps an additional argument for its omission.

The proposed sections will not, in my opinion, clash with the provisions of the Registration Act, as the liens will be conferred by operation of law and not by agreement of parties.

Lastly, I would suggest it for the consideration of the Legislature whether it would not be an advantage to the public at large if the entire law relating to liens is consolidated together, either in a separate chapter of the Indian Contract Act or in a separate Act, instead of being scattered as now in various parts of different enactments.

P. C. CHATTERJEE,
Judge.

13th June, 1894.

No. 4445, dated Nagpur, the 2nd July, 1894.

From—C. E. B. CRITCHLEY, Esq., Assistant Secretary to the Chief Commissioner, Central Provinces,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter No. 3 $\frac{\text{Judicial}}{418}$, dated the 13th April last, inviting attention to the cases of Kinu Ram Dass *versus* Mozaffer Hossain Shaha and Seth Chitor Mal *versus* Shib Lal, which were decided by Full Benches of the High Courts at Calcutta and Allahabad, and enquiring whether the Chief Commissioner sees any objection to the enactment of some such provisions as are founded on the rule of equity adopted by the English and Irish Courts and proposed in the draft amendment of section 69 of the Indian Contract Act, 1872, forwarded with your letter.

2. In reply I am to say that neither the Chief Commissioner nor the Judicial Commissioner sees any objection to the enactment of the provisions proposed.

No. 907-3-D.—21, dated Rangoon, the 30th June, 1894.

From—F. C. GATES, Esq., I.C.S., Secretary to the Chief Commissioner, Burma,

To—The Secretary to the Government of India, Home Department.

In reply to your letter No. 3-419, dated the 13th April, 1894, I am directed to submit the opinions marginally cited upon the proposed incorporation into the law of British India of provisions for giving liens or charges upon property to persons who make payments which have the effect of preserving such property from alienation. The Chief Commissioner concurs in the opinions of the Judicial Commissioner, Lower Burma, the Rangoon Bar Library Association, and the Judge of Moulmein. Sir Alexander Mackenzie considers that the registration of liens should be made compulsory without minimum limit of value, because payments small in themselves may in the course of a few years amount to an appreciable portion of the value of an estate. It seems also worthy of consideration whether the period of limitation for the enforcement of liens should not be shortened.

(1) From C. E. Fox, Esq., Government Advocate, No. 108, dated 3rd May, 1894.
(2) From Rangoon Chamber of Commerce, dated 22nd May, 1894.
(3) From H. Thirkell White, Esq., C.I.E., Officiating Judicial Commissioner, Upper Burma, No. 921-20—9, dated 23rd May, 1894.
(4) From R. S. T. MacEwen, Esq., Officiating Recorder of Rangoon, No. 207-58 dated 31st May, 1894.
(5) From D. G. Macleod, Esq., Judge of Moulmein, No. 183-2, dated 1st June, 1894.
(6) From the Bar Library Association, Rangoon, dated 5th June, 1894.
(7) From H. F. Aston, Esq., Officiating Judicial Commissioner, Lower Burma, No. 951-20, dated 16th June, 1894.

2. The proposed section 69A would perhaps be rendered clearer if it contained no reference to the preceding section, but ran somewhat as in the annexed draft; for, although the Government of India intended, if the Chief Commissioner rightly understands the proposals, to give the privilege of lien only to persons interested in the payments omitted to be made by the owner of the estate, yet the Judicial Commissioner, Lower Burma, seems to have considered that section 69A applied to mere volunteers also. When the Bill is drafted, some illustrations might, in the Chief Commissioner's opinion, be introduced with advantage.

No. 108, dated the 3rd May, 1894.

From—C. E. FOX, Esq., Government Advocate,

To—The Secretary to the Chief Commissioner, Burma.

In reply to your letter, Judicial Department No. 818-3D.—21, I have the honour to say that in my opinion it is most desirable that the Indian law should expressly provide that persons making payments which have the effect of preserving property from alienation should acquire a lien or charge on such property in respect of payments, and the proposed additions to the Contract Act appear to be suitable for the purpose.

Dated the 22nd May, 1894.

From—A. D. WARREN, Esq., Secretary to the Rangoon Chamber of Commerce,

To—The Secretary to the Chief Commissioner, Burma.

I am desired by the Committee of the Chamber to acknowledge receipt of your letter No. 821-3-D.—21, dated the 28th ultimo, having reference to a proposed amendment of the law relating to liens.

The subject has been carefully considered by the Chamber, and I am to say that the proposed amendments are fully approved, if provision be made to prevent the giving of fraudulent preferences to creditors.

No. 921-20—9, dated the 23rd May, 1894.

From—H. THIRKELL WHITE, Esq., C.I.E., Officiating Judicial Commissioner, Upper Burma,

To—The Secretary to the Chief Commissioner, Burma.

I have the honour to acknowledge the receipt of your letter No. 815-3-D.—21, dated the 28th April, 1894, concerning a proposal to amend the law relating to liens in certain cases.

2. From the cases cited by the Government of India it appears that there is a conflict of opinion as to the present law on the subject, and that, as the decisions now stand, the law in Bengal and the North-Western Provinces differs from that in Madras and perhaps in Bombay. In Bengal and the North-Western Provinces it has been held that, except as provided by legislative enactment, a person who is interested in the payment of money which another is bound by law to pay and who, therefore, pays it and thereby preserves the property from alienation, is not entitled to a charge on the property. This ruling is that of a Full Bench of each of the High Courts concerned. In the Calcutta case the ruling of the Court is that of three Judges against two. In the Allahabad case, the ruling is that of four Judges against one. The Bombay case cited by the Government of India is a comparatively early one; the opinion expressed therein is an *obiter dictum*. It is an opinion expressed by two Judges who had not the advantage of considering the Calcutta and Allahabad cases under reference. In the Madras case, which was also heard by two Judges, the Calcutta case was considered, but not the Allahabad case. So far as the authority of the Courts on the point under discussion is concerned, it appears that in each of the cases in which the existence of the lien as a rule of equity was denied, the matter was fully argued and discussed before a Full Bench, and that seven Judges out of ten concurred in the decision. In the cases before the Bombay and Madras High Courts the rulings are not Full Bench rulings. In neither case were both the Full Bench decisions on the subject considered. So far the weight of authority appears to be against the admission of the principle which it is now proposed by legislation to affirm.

3. It is not clear on what grounds the proposed legislation is justified. Apparently it is assumed that the change in the law will introduce a rule of equity which has been adopted by the English and Irish Courts. But this appears not to be the case. In his judgment in the case of *Kinu Ram Dass* v. *Mozaffer Hossain Shaha*, Mr. Justice Wilson, expressing the opinion of the majority of the Full Bench, said:

"I think it is settled that, according to the rules of equity in force in England, no such lien as that contended for exists."

In his judgment in the case of *Seth Chitor Mal* v. *Shib Lal*, the Chief Justice of the Allahabad High Court said:

"The doctrine, which apparently had its origin in the Courts in Ireland, that a charge upon land may arise on the principle of Maritime Civil Salvage has, I think, been satisfactorily exploded as a principle of equity by the decisions of the English Courts in the cases of *Leslie* v. *French* and *Faleke* v. *Scottish Imperial Insurance Co.*"

In another passage he said:

"In my opinion, justice, equity and good conscience do not require us in India to go so far afield as the Irish Courts in order there to seek for and thence to import into India novel principles of equity based on unsound analogy, and rejected as unsound by Judges of such authority as Bowen and Fry, L. J. J., and not followed by such an authority as the late Lord Justice Cotton. * *"

This judgment, in which three other Judges concurred, was delivered after consideration of all the Indian cases which have been quoted on the subject. In a judgment by Lord Justice Bowen quoted by Mr. Justice Mahmood in the case now under discussion the principle of English law is thus stated:

"The general principle is, beyond all question, that work and labour done, or money expended by one man to preserve or benefit the property of another, do not, according to English law, create any lien upon the property saved or benefited, nor even, if standing alone, create any obligation to repay the expenditure."

In Shephard and Brown's Commentaries on the Transfer of Property Act (2nd edition), page 283, there is the following passage:

"In an Irish case Lord St. Leonards observes: 'In Ireland it is a very common equity to have as a prior charge to all other incumbrances what is called salvage-money. Where a leasehold estate, or an estate held for lives to which half a dozen people are entitled in succession, many of them being mortgagees

according to certain priorities, the last man of all who is entitled after everybody, being in possession, redeems, I may say, the estate by paying the landlord who otherwise would have recovered the estate, and taken it from everybody; this payment is what is called salvage-money.

'That is an established equity and a very proper equity. He that pays the salvage has a prior incumbrance to every other charge and interest, because, so far as any interest is left to anybody beyond the charge, it is acquired by that payment in the shape of redemption-money.'

"But this doctrine of salvage lien, founded on the analogy of maritime law, is decisively rejected in recent English cases, and Lord St. Leonards' words quoted above are explained by reference to the peculiar practice in the Irish law of conveyancing."

There may be later cases bearing on the subject. But so far as the cases cited are to the point, it does not appear that the proposed enactment is founded on any rule of equity adopted by the English Courts.

4. But although the proposed legislation may not be in accordance with English rules, it may still be considered expedient on general principles and as a sound rule of justice and equity. Experience in this province does not afford much assistance in the formation of opinion on this point. But if the question is to be decided on general principles of equity and expediency, the following remarks of Mr. Justice Wilson in the judgment already quoted seem to deserve consideration:

"If we were at liberty to treat the matter as if it were *res integra,* I should hesitate much before adopting such a rule as that pressed upon us. In the tangle of interests which an estate in this country presents,—zemindari rights, tenures, and under-tenures without limit, every one of them commonly held in co-ownership, and every share of every interest perhaps subject to mortgages,—I cannot pretend to foresee what the consequences may be of broadly laying down such a doctrine as we are asked to do."

The proposal now under discussion is to lay down the rule of which the learned Judge could not foresee the consequences. It is not the adoption of his suggestion that the Legislature should deal with each class of persons as occasion requires, conferring such liens and subject to such restrictions as may be deemed desirable.

5. Again, in the judgment of Mr. Justice Mitter, in the case above quoted, to which much weight has been given, mention is made of the question whether a *bonâ fide* purchaser for value without notice would be affected by the proposed lien. This is a question which seems to require careful consideration. The sections which it is proposed to add to the Contract Act do not seem to deal with this question. If these sections become law, it would seem desirable to include a provision on the subject.

6. On the whole, after considering the matter in the light of the available authorities, I am disposed to think that it would be better not to lay down the broad principles embodied in the proposed new sections, but to deal with the case of various classes of persons likely to be affected in the manner suggested by Mr. Justice Wilson.

7. I enclose a copy of a note by the Civil Judge of Mandalay, who was consulted by my predecessor on the subject under reference.

Remarks by E. RICHARDSON, Esq., Civil Judge of Mandalay, on Home Secretary's letter No. 3-Judicial—419, to the Chief Commissioner of Burma.

The question as formulated by Mr. Justice Wilson is, "whether the part owner of an estate who pays the whole Government revenue thereby obtains a charge upon the share of his co-owner to the extent of the latter's share of the revenue."

That there is no statutory provision giving such a charge is admitted by each of the Justices before whom the several cases have come for decision, and the Legislature adopt that view by the present circular.

The difference of opinion is whether such a right does or does not exist as a principle of general equity, and in order to set the question at rest it is proposed to have legislative sanction to the lien. The point for opinion is whether such a lien should or should not be created by legislative enactment.

The consensus of opinion is that if the lien does not exist it ought to, and there are several reasons in favour of such a provision of law as will create such a lien. As Mr. Justice Mitter observes: "The foundation for such an equity is that if it be not acted upon it would result in injustice in many cases, *and its adoption does not operate unjustly in any conceivable case*." It is the latter portion of the remark that should be the guiding principle as to whether or not a certain thing should be enacted, and I have tried to conceive the existence of cases in which such a law would operate unjustly. Here in Burma we have no such complex rights in and tenures of land as are to be found in India. Upper Burma has a larger variety of titles to land than Lower Burma, but here the rights of possession, of tenure, and claims to land are simplicity itself. Still there may arise cases in which the creation by enactment of such a lien as is proposed by the draft sections for addition to the Contract Act, where the subsequent owner of land might be injuriously affected, unless there is introduced into the draft provisions exempting a *bonâ fide* purchaser for value without notice. But for this there would always be a cloud on the title and an unnecessary depreciation of value. This is a point which Mr. Justice Mitter expressly notices, and which Mr. Justice Norris as expressly passes round. The former observes: "I may notice, however, that there is another question which calls for decision in these cases, namely, whether a *bonâ fide* purchaser for value without notice would be affected by a charge of this kind if it exists." To which the latter states: "I express no opinion upon the question whether a *bonâ fide* purchaser for value without notice would be affected by a charge of this kind." (Indian Law Reports, Calcutta, XIV, 824 and 825). The question is, however, one that becomes more important if legislative sanction is given to the creation of such a charge.

As between co-owners the right may be well enough, though where there are a number of them difficulties may arise. But where an outsider comes and purchases over the heads of all the co-owners, it is quite possible that the late owners either in good faith or collusively may set up such a large claim against the property for such liens as to raise the amount to be further paid to clear it of such incumbrances so large as to outweigh the value of the property or make it not worth purchase or *retaining*. What is there, for instance, to prevent two late owners, one or both of whom is in an insolvent condition (as is likely to be the case should the property be brought to sale for arrears of revenue), pretending that all the revenue for as many years back as limitation or the evasion of limitation will permit has been paid by one or the other of them and is a charge against the estate. The effect in such a case might even be to cause a resale at the instance of the late defaulter and ruinous loss to the misguided innocent purchaser.

Without some provision for *bonâ fide* purchasers without notice the proposed enactment would be likely to be productive of harm. How best to provide against this would be best left to the professional drafter.

No. 207-58, dated the 31st May, 1894.

From—R. S. T. MacEwen, Esq., Officiating Recorder of Rangoon,

To—The Secretary to the Chief Commissioner, Burma.

In reply to your letter, Judicial Department No. 817-3-D.—21, dated the 28th ultimo, I have the honour to state that in my opinion it is desirable that the Contract Act should be amended by the addition of the three proposed sections to Chapter V of the Act. It is only equitable that persons making payments on behalf of others, which have the effect of preserving property from alienation, should have a preferential charge upon such property. This rule of equity is recognized in the English Courts and the conflict of decisions in India shows the necessity for legislative provision on the subject.

No. 183, dated the 1st June, 1894.

From—D. G. MACLEOD, Esq., Judge of Moulmein Town,

To—The Secretary to the Chief Commissioner, Burma.

In reply to your letter No. 819-3D.—21 of the Judicial Department, dated the 28th April, 1894, I have the honour to offer the following opinion on the proposal to amend the Indian Contract Act by the enactment of certain provisions for liens in favour of persons expending money upon the property of others for the preservation of such property.

The Judges of the High Courts, who have had the matter under consideration in the cases cited, have been equally divided in their decisions on the rights of persons to claim such liens, and in view of this conflict of opinion I consider that it is desirable that such rights should be secured by express statutory enactment, and that the provisions proposed to be inserted in the Indian Contract Act are sufficient for the purpose.

It appears to me, however, that it would be well that provision should also be made for the registration of such liens, so that persons intending to take mortgages on the property thus made chargeable may have means of notice of incumbrances of this kind.

Dated the 5th June, 1894.

From—B. LENTAIGNE, Esq., Honorary Secretary, Rangoon Bar Library Association,

To—The Secretary to the Chief Commissioner, Burma.

As directed by the members of the Rangoon Bar Library Association, I have the honour to inform the Chief Commissioner, in reply to your letter No. 820-3--21, dated the 28th April, 1894, that the members of the Association believe the amendments and additions to section 69 of the Contract Act, as suggested in the letter No. 3-419 (Judl.), from the Secretary to the Government of India to the Chief Commissioner of Burma, are a step in the right direction; but the members of the Association desire to point out that the said amendments are insufficient in so far as they contain no provision for the registration of the charges or liens created thereunder, and that without such a provision the proposed legislation would be open to the serious objection that it would create incumbrances on property without giving subsequent purchasers any means of ascertaining the existence of such incumbrances.

No. 951-20, dated the 16th June, 1894.

From—H. F. ASTON, Esq., Officiating Judicial Commissioner, Lower Burma,

To—The Secretary to the Chief Commissioner, Burma.

In reply to your Judicial Department letter No. 816-3D.—21, dated the 28th April last, inviting an expression of my opinion on the proposal to amend the law relating to liens, I have the honour to state as follows.

2. I am of opinion that the proposed additions to section 69 of the Contract Act, IX of 1872, as worded in the draft appended to these papers, would give rise to much undesirable litigation in a country where joint ownership is so common.

3. I would recommend that purely voluntary payments should be expressly excluded from the proposed new provisions because such voluntary payments, though their effect may be to preserve property from alienation, would, in the majority of cases in such a country as India, be made with a view to defeat other interests.

4. I think that the payment referred to in draft section 69A. should be one made by a person possessing an interest in any property and, on account of default made by some person liable, necessary to preserve that property from alienation in order to come within the provisions of the rest of that draft section. I would also recommend that some rate of interest be named, as, for instance, "6 per cent. unless the Court otherwise direct." So that persons affected

may know their liabilities without coming into Court, and that some rate should be for the same reason mentioned in draft sections 69B and 69C.

5. The first paragraph of draft section 69A. might be as follows:

"If any such payment as is mentioned in the last preceding section is made by a person possessing an interest in any property and is, on account of default made by the person liable, necessary for the purpose of preserving such property from alienation and has the effect of so preserving it, the person obliged to make the payment shall be entitled to a charge upon the property so preserved for reimbursement of the sum so paid, with interest at 6 per cent. per annum or at such rate as the Court may direct."

6. In draft section 69B. I would similarly stipulate default on the part of the rest of the persons jointly interested as to making a payment for which a joint liability exists, as a condition precedent to the person making such payment becoming entitled to a charge upon the interests of the rest.

Draft Section 69A.

When any person who is bound by law to pay any money in respect of any property has made default and another person interested in such payment pays the money and thereby preserves the property from alienation, the person making the payment shall be entitled to a charge upon the property so preserved for reimbursement of the sum so paid, with interest at 6 per cent. per annum or at such other rate as the Court may direct.

No. $\frac{69L.L.}{4131J.}$, dated Shillong, the 3rd July, 1894 (issued, the 7th July, 1894).

From—P. G. MELITUS, Esq., Offg. Secretary to the Chief Commissioner of Assam,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of Mr. Lyall's letter No. 3 Judl.—420, dated the 13th April, 1894, asking for an expression of the Chief Commissioner's opinion on the proposed amendment of the Indian Contract Act, 1872, on the lines of the draft annexed to the letter.

1. No. 501J., dated the 10th May, 1894, from the Deputy Commissioner, Sylhet, and enclosure.
2. No. 765, dated the 12th May, 1894, from the District Judge, Sylhet.
3. No. 1028, dated the 8th June, 1894, from the Judge, Assam Valley Districts, and enclosure.
4. No. 1205, dated the 12th June, 1894, from the Deputy Commissioner, Cachar.

In reply, I am to forward copies of the letters marginally noted, which have been received from the officers consulted, and to say that the Chief Commissioner sees no objection to the proposed amendments.

No. 501J., dated Sylhet, the 10th May, 1894.

From—P. H. O'BRIEN, Esq., I.C.S., Deputy Commissioner of Sylhet,

To—The Secretary to the Chief Commissioner of Assam.

Your No. 57L.L.—2513-16J., dated the 26th April, 1894, on the subject of the amendment of the Indian Contract Act.

I have the honour to forward herewith the opinion of the Government pleader, and to say that I see no objection to the enactment of some such provisions as those contained in the draft.

Amendment of the Indian Contract Act.

The proposed legislation will, I think, remedy a great defect in the Indian Jurisprudence. The law in India, as it at present bears upon the points in issue, is very defective, and not calculated to meet the legislative demands of justice. Many of the fraudulent practices which are frequently resorted to by the people in this country are, more or less, the outcome of this defect in the Indian Jurisprudence. Instances of these kinds of fraudulent practices are of every day occurrence in the country, and it will not be out of place to mention some of them here.

I.—An estate paying revenue to Government is owned by two or more co-sharers. One of them allows the estate to fall into arrear for his

share of the revenue. The other co-sharers pay up the arrear and save the estate for sale.

II.—Two or more persons jointly interested in a property mortgage it to a third party. The mortgagee brings a suit for foreclosure or sale. One of the mortgagors defaults in paying his share of the mortgage money, and the other mortgagors pay up the whole amount, and save the property from sale or foreclosure.

III.—A house is owned by two or more persons. It is in a dilapidated condition. One of the co-owners does the necessary repairs, and preserves it from destruction.

In each of these cases, the co-sharer, co-owner, or the co-mortgagor who paid up the money or made the necessary repairs brings a suit for contribution against the party in default, and obtains simply a personal decree under the present law, but before the decree was obtained, he sells his share in the property, and turns out an insolvent, and the decree in fact becomes ineffectual. The decree-holder is thus deprived of the money paid or spent by him for the preservation of the property, and the judgment-debtor profits at the expense of an innocent party.

It is clear, therefore, that the present law in India fails to afford adequate relief in the matter. It causes hardship to the innocent person, and helps the wrong doer to take advantage of his own wrong. The proposed amendment, if adopted, will create a charge on the property in favour of the person paying the money and protect him against the fraud and machination of the other party. It will minimise the chances of fraudulent practices, and produce a healthy effect on the administration of justice in the country. In my opinion there are good reasons to adopt the proposed rules of equity in our own jurisprudence.

It might be said that some of the Judges of the High Court enunciated the theory that the rule of equity which the Legislature propose to adopt is not the rule of equity in force in England. Be it as it may, the question does not, in my opinion, arise in the present case. It is an admitted fact that the circumstances of the two countries (England and India) are not similar in every respect. Hence difference of circumstances must necessarily give rise to different kinds of equities in the two countries. It is, I submit, not a sound theory of legislature that a rule of law peculiarly adapted to the circumstances of this country should not be adopted simply for the reason that a country which we have adopted as the standard of our institutions fails to supply us with any such rule.

DULAL CHANDRA DEB,
Government Pleader.

The 7th May, 1894.

No. 765, dated Sylhet, the 12th May, 1894.

From—R. H. GREAVES, Esq., I.C.S., District Judge of Sylhet,

To—The Secretary to the Chief Commissioner of Assam.

With reference to your letter No. 59L.L.—2730J., dated the 8th instant, forwarding a copy of your memorandum No. 57L.L.—2513-16J., dated the 26th April last, with enclosures, asking for an expression of my opinion on the proposed addition to the Indian Contract Act, IX of 1872, I have the honour to report that I do not see any objection to the provisions proposed in the draft Bill, a copy of which has been forwarded with your letter under reply.

No. 1028, dated Gauhati, the 8th June, 1894.

From—G. GODFREY, Esq., I.C.S., Judge of the Assam Valley Districts,

To—The Secretary to the Chief Commissioner of Assam.

With reference to your memorandum No. 57L.L.—2513-16J., dated the 26th April, 1894, forwarding, for report, letter No. 3Judl.—420, dated the 13th April, 1894, from the Secretary to the Government of India in the Home Department, on the subject of certain proposals to amend section 69 of the Indian Contract Act, I have the honour to say that the proposals seem to me to be altogether just and proper.

2. I asked the Deputy Commissioners of Kamrup and Sibsagar (the two districts where there are Government pleaders) for their opinions, but I have not had a reply from Sibsagar. I send, in original, the reply received from the Deputy Commissioner, Kamrup. Mr. McCabe, while approving generally of the proposals, points out some practical difficulties in the way of carrying those proposals out, but the same objections are applicable in the cases in which, under the different enactments mentioned in the letter from the Secretary to the Government of India, equitable liens similar to that which it is now proposed to confer under the Indian Contract Act already exist in favour of persons making payments to save property from alienation. The difficulties pointed out are more technical than real, and the doctrine of *caveat emptor* would apply in the cases referred to in paragraphs 3 and 5 of the Deputy Commissioner's letter.

3. As to the supposed case of several persons interested all being willing to pay up to save any property from alienation, it seems to me that all are entitled jointly or severally according to the nature and extent of their interest in the property to the same equitable rights as if one person had paid. The case is covered by the general legal interpretation that the singular includes the plural: the word person in the proposed sections 69A. and 69C. would apply to all persons making the payment. I think, however, that section 69B. might be altered to meet the supposed case. After "one" in the second line I would add "or more," as there is no reason why the privilege accorded should be confined to the case of only one person out of several who are jointly interested in making payment; the concluding portion of the section would have to be rewritten.

No. 932, dated Gauhati, the———May, 1894.

From—R. B. McCabe, Esq., I.C.S., Deputy Commissioner of Kamrup,

To—The Commissioner of the Assam Valley Districts.

In reply to your memorandum No. 809, dated the 2nd instant, forwarding copy of letter No. 3Judl.—420, dated the 13th April, 1894, from the Secretary to the Government of India in the Home Department, to the Secretary to the Chief Commissioner, Assam, regarding certain additions to the Indian Contract Act, I beg to make the following remarks.

2. From an equitable point of view the propriety of the proposed additions cannot be questioned. As far as sales for arrears of revenue are concerned, the proposed legislation will facilitate the realisation of arrear demands, as the title of the person advancing money to save the property from alienation will be more secure, and people will consequently be all the more willing to make such advances. With regard to private debts also, it seems to me only fair that when a man advances money to save foreclosure on a mortgage, he should have the same priority as the person whose claim was satisfied.

3. I would note that the charge proposed to be given to the party making the payment is *de facto* a mortgage, but his title deed will, in most cases, be merely simple receipt for money paid, so that this receipt would override a formally registered document of a subsequent mortgagee.

4. The proposed alterations do not define what procedure is to be adopted when there are several persons having an interest in the payment of the debt and the saving of the property from alienation. In this case, where all are willing to pay, whose offer is to be accepted?

5. As far as I am able to judge, the charge intended to be given is an "equitable mortgage." No formal deed would be taken, and the transaction not having the same publicity which attends the registration of a duly-stamped deed, purchasers subsequent to the creation of the charge may occasionally suffer.

No. 1205, dated Silchar, the 12th June, 1894.

From—John Clark, Esq., I.C.S., Deputy Commissioner of Cachar,

To—The Secretary to the Chief Commissioner of Assam.

With reference to your No. 57L.L.—2513-16J., dated the 26th April, 1894, forwarding, for expression of opinion, a copy of Government of India's letter No. 3Judl.—420, dated the 13th April, on the subject of an addition proposed to the Indian Contract Act, I have the honour to make the following remarks.

2. In addition to the cases referred to in the letter of the Government of India, the recent ruling of the Privy Council in the case of Dakhina Mohan Roy *versus* Saroda Mohan Roy may be noted (I. L. R., XXI, Cal., 142). Such an addition as that proposed would, however, set the question at rest, and appears moreover desirable in the interests of justice.

No. $\frac{800}{50\text{-}94}$, dated Bangalore, the 10th May, 1894.

From—MAJOR C. W. RAVENSHAW, I.S.C., Secretary to the Chief Commissioner of Coorg,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter No. $\frac{3\text{-Judicial}}{423}$ of the 13th April, 1894, enquiring whether the Chief Commissioner sees any objection to the enactment of some such provisions as are proposed in the draft enclosed therewith.

2. In reply I am to say that in the Chief Commissioner's opinion the provisions of the draft proposed to be added to section 69 of the Indian Contract Act are unobjectionable.

No. 184, dated Hyderabad Residency, the 25th June, 1894.

From—A. L. P. TUCKER, Esq., Secretary for Berar to the Resident, Hyderabad,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter, No. $\frac{3\text{-Judicial}}{423}$ of the 13th April last, requesting opinion on the proposal to provide for liens of persons expending money upon the property of others for the preservation of such property.

(1) No. 480R., dated 12th June, 1894, from Commissioner, Hyderabad Assigned Districts.
(2) No. 1064, dated 5th June 1894, from Judicial Commissioner to Commissioner, Hyderabad Assigned Districts.
(3) No. 1310, dated 2nd May, 1894, from Deputy Commissioner, Wun, to Commissioner, Hyderabad Assigned Districts.
(4) No. 2185, dated 5th May, 1894, from Deputy Commissioner, Akola, to Commissioner, Hyderabad Assigned Districts.

2. In reply I am to forward copies of the letters, noted in the margin, containing the opinions of the Commissioner, the Judicial Commissioner, and the Deputy Commissioners of Wun and Akola, and to state that the Resident concurs in the opinion favourable to the proposed amendment expressed by the Judicial Commissioner.

No. 480R., dated Amraoti, the 12th June, 1894.

From—COLONEL, K. J. L. MACKENZIE, C.I.E., Commissioner, Hyderabad Assigned Districts,

To—The Secretary for Berar to the Resident, Hyderabad.

*(1) No. 1064, dated 5th June, 1894, from Judicial Commissioner.
(2) No. 1310, dated 2nd May, 1894, from Deputy Commissioner, Wun.
(3) No. 2185, dated 5th May, 1894, from Deputy Commissioner, Akola.

With reference to your No. 1374, dated 23rd April last, I forward copies of the opinions* of officers consulted.

I agree with the Judicial Commissioner that the proposed amendment of the Indian Contract Act is desirable.

No. 1064, dated Amraoti, the 5th June, 1894.

From—F. S. BULLOCK, Esq., C.S., Judicial Commissioner, Hyderabad Assigned Districts,

To—The Commissioner, Hyderabad Assigned Districts.

I have the honour to reply to your No. 4054 of 30th April, 1894, and to forward the replies of the Deputy Commissioners which have been received. Mr. Obbard, the Civil and Sessions Judge, being on leave, no reply has been received from him.

2. My opinion on the proposed additions to section 69 of the Indian Contract Act, 1872, is favourable to the amendment. The particular case of estates under the Jamindari tenure in Bengal no doubt presents some difficulties owing to what Mr. Wilson, J., describes as a "tangle of interests;" but on the

whole, I do not think they are such as ought to stand in the way of the equity proposed.

3. I think Mr. Justice Mitter's arguments in the case of Kinu Ram Dass *vs.* Mozaffer Hossain Shaha, page 809 of Indian Law Reports, Calcutta, Volume XIV, have much force, and that for want of such a provision of law as is proposed much injustice would result.

No. 1310, dated Yeotmahl, the 2nd May, 1894.

From—A. ELLIOTT, Esq, Deputy Commissioner, Wun District,

To—The Commissioner, Hyderabad Assigned Districts, through the Judicial Commissioner, Hyderabad Assigned Districts.

I have the honour to acknowledge receipt of your letter No. 4052, dated 30th ultimo, forwarding copy of a letter from the Government of India, Home Department, No. $\frac{3 \text{ Judicial}}{423}$, dated 13th April, 1894, and its enclosure, regarding a proposal to provide for liens of persons expending money upon the property of others for the preservation of such property from alienation.

2. In my opinion the draft clauses 69A. and 69B. are fair and might be passed. I do not consider that 69C. is called for or necessary, and it does not seem to me to be a logical addition to the original section 69. The person seems to be a mere lender of money at the request of the person interested in the property; he does not pay the money because he has an interest in the payment, and his payment will save property in which he is interested.

No. 2185, dated Akola, the 5th May, 1894.

From—R. D. HARE, Esq., Deputy Commissioner, Akola District,

To—The Commissioner, Hyderabad Assigned Districts, through the Judicial Commissioner, Hyderabad Assigned Districts.

With reference to your No. 4053, dated 30th April, 1894, I have the honour to state that no objection occurs to me to the enactment set forth in the draft therewith forwarded.

No. 1552, dated Calcutta, the 18th July, 1894.

From—T. W. RICHARDSON, Esq., Officiating Registrar of the High Court of Judicature at Fort William in Bengal,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter No. $\frac{3 \text{ Judicial}}{423}$, dated the 13th April last, in which the attention of the Chief Justice and Judges was invited to the various rulings of the different High Courts in India on the subject of the nature and extent of certain liens, sometimes described as salvage liens, which have been allowed in favour of persons expending money on the property of others with a view to its preservation, and an opinion was asked for as to the amendment of the Indian Contract Act IX of 1872 in the manner suggested in the draft forwarded therewith.

2. In reply I am to say that it appears to the Judges that the provisions contained in the additional section 69B., which it is proposed to insert in the Contract Act, are too wide and open to serious objection on the ground that they might have the effect of creating charges on property which ought not to be created, as for example in cases in which payment is made by one of several joint owners for the improvement and not merely for the preservation of such property. The remaining sections suggested in the draft, *viz.*, sections 69A. and 69C., are, however, in the opinion of the Court, sound in principle and may safely be incorporated in the law.

S. HARVEY JAMES,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 18th, 1896.

The present week unlike its predecessors has been one of large changes in all the meteorological elements. Considerable changes in the pressure distribution have accompanied large alterations in the circulation of the winds, while the observed temperatures and humidities have been very remarkable. During the first three days of the week a slight barometric depression passed north-eastward from Sind to the North-Western Himalayas, and the ordinary cyclonic winds with duststorms on the plains and thunderstorms on the hills, which are characteristic of these conditions at this season, were experienced. On the 15th, however, the area of lowest pressure appeared over Bengal, and this lasted until the close of the week. At the same time pressure rose briskly to rapidly over North-Western India, so that by Friday, the 17th, there existed a pressure difference of 0·35 inch between the Indus Valley and Bihar. With the establishment of these large pressure differences, strong northerly winds set in and extended over the whole of North-Western and Central India, while the air at the same time became intensely dry. Of the many low humidities reported the most remarkable were 1 per cent. at 8 A.M. on the 17th at Bhuj and 1 per cent. at Deesa. Thunderstorms gave showers to North-Western India in the early part of the week, to Malabar at the close of the week, and to North-Eastern India throughout the week. On the 18th for the first time since the 25th of March the mean temperature of India fell below the normal average.

Daily Summary.—*Sunday, April 12th.*—Pressure was increasing slightly over Burma, Assam, and part of the Peninsula; decreasing elsewhere; and a slight depression was shown over the western desert. The winds were cyclonic over North-Western India, westerly down the Gangetic Plain, southerly to easterly in Bengal, and southerly over the Bay. The force was fresh to strong at several stations. The mean temperature was slightly below the normal average in the Assam Valley and South Madras, and above elsewhere, the abnormal excess being greatest over the western desert. A few scattered showers were reported.

Monday, April 13th.—The pressure changes were generally the same as on the 12th. The fall had, however, been brisk to rapid in the Punjab, and the depression over the western desert had moved northward. The winds were practically unaltered, and the force was strong to a gale at several stations. The mean temperature was low in the Assam Valley and in the extreme north of the Punjab, and excessive elsewhere—most so over the western desert. Showers had been received in Kashmir and North-Western India, in North-Eastern India, and in Ceylon.

Tuesday, April 14th.—Pressure had increased slightly to rapidly over the western desert and Baluchistan, and had decreased elsewhere. The depression had continued to move northward, and lay over the North-Western Himalayas,

where the barometric fall had been rapid. Pressure was highest in Tenasserim and lowest in the Dehra Dun, and there existed a pressure difference of nearly 0·50 inch between those two localities. The winds were westerly and north-westerly over the greater part of the country, but were southerly over the Bay and between south and east over Bengal. The mean temperature was excessive, except over the north of the Punjab, the extreme south of Madras, and Assam. The greatest excess was over Rajputana. Showers had been received in North-Western and North-Eastern India and in Baluchistan.

Wednesday, April 15th.—Pressure had increased briskly to rapidly over a large part of North-Western India and over part of the Central Provinces. Elsewhere it had decreased, and the lowest pressures were reported from Central Bengal. The winds were little changed. The mean temperature was in defect over the Punjab and Assam, and in excess elsewhere—most so over Bihar and the east of the North-Western Provinces. Showers had fallen over North-Eastern India.

Thursday, April 16th.—The barometer had fallen over part of the Punjab and of Rajputana, and had risen in other parts of India. The rise had been rapid over Bengal, and the depression had largely filled up. Readings were low over the Northern Punjab and over Bihar, while they remained highest in Tenasserim. Southerly and south-westerly winds prevailed over the Bay area, and more or less variable winds elsewhere. The mean temperature was low over Assam, Upper Burma, and the Punjab, and high in all other places. Local showers were reported from a few places in North-Eastern and Southern India.

Friday, April 17th.—Pressure was falling over North-Eastern India and rising in other places. The increase was very rapid in the west of the Punjab. Readings were highest over the Indus Valley and lowest in Bihar, and the pressure difference was considerable. Northerly and north-north-westerly winds prevailed over North-Western and part of Central India, while in other places the directions were little changed. The mean temperature was in slight to very large defect over the Punjab, Rajputana, and Sind. Elsewhere the heat remained excessive—most so in Central India. Thundershowers had been received over the south-west of the Peninsula.

Saturday, April 18th.—Pressure had decreased over the Indus Valley, the south of the Peninsula, and Lower Burma, and increased elsewhere. Readings remained low over Bengal and high over the Indus Valley, and the pressure difference remained considerable. Easterly and north-easterly winds prevailed at some central stations, but in general the winds were not much changed. The low temperature area had extended and covered the greater part of North-Western and Central India. In other places the heat continued excessive. The abnormal deficiency was greatest (15°) at Sirsa and Bickaneer, and the abnormal excess greatest (8°) at Chaibassa. Showers had again fallen over North-Eastern and Southern India.

Temperature.—The principle feature about the temperature has been the appearance of an area of low temperature in the extreme north-west, and its gradual extension over a large part of the country. The first appearance of abnormally low temperatures was at Peshawar on the 13th. This depression of temperature extended, and by the morning of the 15th embraced the whole

of the Punjab. The chart of the 16th showed a check in the development of this area, but during the 17th and 18th it intensified and extended, and by the latter date covered a large part of the country. At Sirsa and Bickaneer on the 18th the abnormal depression of temperature amounted to 15°. During the same time in Bengal there occurred no diminution of the abnormal heat, so that the temperature contrasts over Northern India were very great. Thus, while at Sirsa the mean temperature on the 18th was 70·9°, that at Chaibassa was 99·8°, showing a temperature difference of 29° in place of the ordinary difference of about 5°.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	April 1896.							Mean variation of week.
	12th	13th	14th	15th	16th	17th	18th	
	°	°	°	°	°	°	°	°
Burma	+2·2	+1·8	+ 1·4	+1·4	+1·5	+3·0	+ 3·1	+2·2
Bengal and Assam	+4·4	+3·4	+ 2·9	+2·8	+2·3	+4·0	+ 3·7	+3·4
North-Western Provinces and Oudh	+5·5	+6·6	+ 9·8	+4·6	+1·0	+3·4	− 4·2	+3·8
Punjab	+4·7	+5·0	+ 5·0	−3·1	−0·4	−4·9	−10·7	−0·6
Bombay	+2·7	+2·7	+ 2·1	+2·3	+3·2	+2·4	+ 2·0	+2·5
Central Provinces and Berar	+3·1	+4·3	+ 5·7	+6·0	+5·3	+6·1	+ 1·1	+4·5
Central India and Gujarat	+4·6	+6·8	+ 8·4	+6·5	+5·1	+4·8	− 5·5	+4·4
Sind and Rajputana	+7·7	+8·9	+10·6	+1·5	+1·9	−4·1	−10·7	+2·3
Madras	+2·9	+2·5	+ 3·0	+4·0	+3·7	+3·7	+ 4·1	+3·4
Mean for whole of India	+4·2	+4·7	+5·4	+2·9	+2·6	+2·0	−1·9	+2·8

The gradual increase of temperature relatively to the mean which was in progress last week continued until the 14th, when the table shows there was an abnormal excess for the whole country of 5·4°. After that date, however, the heat fell off, and on the 18th there was a general defect of 1·9°. The variation for the whole country for the week amounted to + 2·8°. The provincial variations disclose large changes of temperature during the week. Thus, in the North-Western Provinces there was an excess of 9·8° on the 14th, and a deficiency of 4·2° on the 18th; in the Punjab an excess of 5° on the 14th, and a deficiency of 10·7° on the 18th; in Sind and Rajputana an excess of 10·6° on the 14th, and a deficiency of 10·7° on the 18th.

The following were the maximum temperatures throughout India reported on each day:

April 12th	111·4°	at	Chanda.
" 13th	112·9°	"	"
" 14th	113·9°	"	"
" 15th	114·2°	"	Chaibassa.
" 16th	112·4°	"	Chanda.
" 17th	113·9°	"	"
" 18th	113·1°	"	Chaibassa.

Rain.—The rainfall of India has again been generally similar in distribution to that reported during the past few weeks. The principal rainfall has occurred over North-Eastern India, while light or moderate showers have been received in North-Western India and in part of the Peninsula. Rain fell in North-Eastern India on most days of the week, while in the north-west the fall occurred mainly during the first three days, and in the Peninsula during the last two days of the week. In all parts of the country rain accompanied dust and thunder storms. Except in Assam, North Bengal, and the south-west of the Peninsula the rainfall was very light, the average actual fall not exceeding one quarter of an inch. The concluding table gives the rainfall data. The first column shows that during the week more or less rain fell in twenty-four of the rainfall divisions as compared with only eighteen in the previous week. Of these twenty-four divisions fourteen received effective rain. These divisions were—Tenasserim, Upper Burma, the three Assam divisions, Eastern, Deltaic, and North Bengal, the North-Western Provinces (Hill district), the Punjab Hills, the Northern Punjab, the Malabar Coast, Coorg, and Mysore. In the remaining ten divisions the amount was unimportant, *i.e.*, the average actual fall was less than 0·10 inch, while in all the other divisions there was actually no rain. The heaviest rainfall was as mentioned above over North-Eastern India, the Surma division of Assam reporting an average actual fall of 8·13 inches, the Hill division of 5·57 inches, the Brahmaputra division of 3·53 inches, and the northern division of Bengal of 1·18 inches. The region with absolutely no rain included roughly West Bengal, the Gangetic Plain, North-Western India (excluding the north of the Punjab), the whole of the central parts of India, and the greater part of the centre of the Peninsula. The second column of the table gives the normal average fall for each division for the week under review, and shews that, except in part of Burma, of Assam, of Bengal, and of the south-west of the Peninsula, the anticipated rainfall is small. The third column gives the difference between the actual and normal, and shows that, except in Assam, North Bengal, and Coorg, even this small anticipated fall has not been equalled. In Assam (Surma), however, there was an excess of 5·62 inches, in Assam (Hills) an excess of 3·80 inches, in Assam (Brahmaputra) an excess of 2·02 inches, in Bengal (North) an excess of 0·56 inch, and in Coorg a trifling excess of 0·04 inch. The largest deficiency is reported from Tenasserim and Arakan, where in ordinary years south-westerly winds give a fair amount of rain. During the present week the wind in that quarter has been mainly from north-west, and the weather has consequently been abnormally dry.

The three concluding columns of the table exhibit the state of the seasonal rainfall. Between March 1st and April 18th the total rainfall has been excessive over Assam and Western Rajputana, has been about normal (*i.e.*, has varied by less than 20 per cent. from the average) in Baluchistan, and has been more or less deficient in all other parts of India. In Burma and Central and North-Western India the rainfall for the whole period has been in most cases actually or practically *nil*.

The following are the principal totals recorded during the week under review:—Karimganj (Sylhet) 7·98 inches, Nemotha (Cachar) 23·54 inches, Cherrapunji (Khasia Hills) 22·16 inches, Gauhati 5·59 inches, Sibsagar 7·23 inches, Alipur (Jalpaiguri) 3·67 inches, Murree 1·27 inches, Tellicherry (Malabar) 2·31 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *23rd April 1896.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 18th April.*—Moderate rain on the West Coast and in the Nilgiris; scattered showers in a few other districts. Preparations for next season are commencing. The standing crops are confined to small areas and are generally fair. The harvest continues with moderate yield. Pasture is scarce, but fodder is generally available, and cattle are in good condition. Prices are practically stationary.

Bombay.—*For week ending 22nd April.*—Slight rain in parts of Belgaum and Dharwar. The standing crops have been damaged by blight or insects in parts of Karachi, but are otherwise good. Cotton-picking continues in parts of Dharwar, and harvesting of the late crops generally in eight districts. Preparations for next season are progressing in fifteen districts. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of four districts. Prices are normal, except in Ahmednagar and Sholapur.

Bengal.—*For week ending 20th April.*—Rain over Northern Bengal and parts of Eastern Bengal during the week has done good to the standing crops and has expedited the sowing of early rice and jute. Generally rain is still badly wanted, and there is little change in agricultural prospects. The spring harvest is now over, and the outturn is estimated at about twelve annas for the whole province. The harvesting of spring rice is progressing in Orissa. There is scarcity of water in places in Burdwan, Midnapore, the 24-Parganas, Khulna, Pabna and Dacca. The price of common rice is still steady.

North-Western Provinces and Oudh.—*For week ending 22nd April.*—The weather continues seasonable. Rain is much needed in the hill districts to assist the germination of the autumn crop sowings. Threshing and winnowing are in progress and approaching completion. Injury to the mango crop is reported in three districts. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 18th April, were—Banda 80,833, Hamirpur 39,320, Jhansi 20,151, Jalaun 25,592, Allahabad 3,066, Pilibhit 2,859, Garhwal 1,710—total 1,73,531; of this number 25,351 dependants were gratuitously relieved on the works and 4,466 persons received gratuitous relief under other provisions of the Famine Code. The reduction in the number of relief workers in Jalaun is attributed partly to the opening of village relief works which will have the effect of reducing the numbers employed on road work controlled by the Public Works Department. The numbers employed on village relief works have apparently not been fully reported. Supplies are ample. Fodder is getting scarce in places and deficiency of water is reported in Banda and Lucknow. Prices are generally stationary.

Punjab.—*For week ending 22nd April.*—Rain has fallen in the Jullundur, Amritsar, Sialkot, Rawalpindi and Gujranwala districts. The canal crops are being harvested in Hissar. The spring crops are being cut throughout the province. The extra spring sowings are in progress in Jullundur and Amritsar, and

the autumn sowings in Amritsar, Sialkot and Mooltan. Sowings of cotton and other crops in Lahore, sugarcane, indigo and cotton in Rohtak, and cane and cotton in Gujranwala, are in progress. The sugarcane fields are being weeded in Gurgaon. The melon and sugarcane crops stand in need of rain in Umballa. The condition of the extra spring crop is good in Dera Ismail Khan. The condition and prospects of the spring crops are generally reported average in irrigated and below average in unirrigated tracts. The stock of food-grain is said to be insufficient in Ferozepore, Sialkot, Gujranwala and parts of Shahpur. The standing crops have suffered from high winds in Dera Ismail Khan and Peshawar. Cattle are in poor condition in Hissar, Shahpur, Rohtak and Gurgaon and they are dying of starvation in Hissar. Fodder is scarce in all districts, except Jullundur, Ferozepore, Sialkot and Dera Ismail Khan. Prices are normal in Ferozepore, but are high elsewhere.

Central Provinces.—*For week ending 22nd April.*—The days are hot, but the nights and mornings are cool. Threshing of the winter crops is completed. Fodder and water are becoming scarce in parts. Prices of rice, gram and wheat are rising in Damoh, Hoshangabad and Raipur respectively; elsewhere prices are generally stationary.

Burma.—*For week ending 18th April.*—In Upper Burma cultivation of dry-weather paddy is nearly completed, and reaping is progressing in several districts. Some slight damage has been caused by a hailstorm to dry-weather paddy in Minbu, but the standing crops generally are in good condition. The price of paddy has risen considerably in Pegu and Amherst and slightly in Thayetmyo and Pakokku, while it has fallen slightly in Rangoon and Myaungmya; elsewhere prices are stationary.

Assam.—*For week ending 21st April.*—The weather is warm. Some damage has been done to low-land paddy in parts of the Sylhet district by the early rising of the rivers. Sowing of early rice is progressing. Plucking of tea has commenced. The condition of cattle is fair. Fodder and water are insufficient in places.

Mysore and Coorg.—*For week ending 22nd April.*—MYSORE: Slight rain in parts. The crops are withering in parts of the Kolar and Chitaldroog districts. Prices have slightly risen in Chitaldroog and Shimoga, but have fallen in Kadur.

COORG.—Showers have fallen in the district, and coffee has commenced to blossom in some places. Fodder is scarce. Prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 22nd April.*—BERAR: The weather is very hot and occasionally cloudy. Breaking up of land for the monsoon sowings is in progress. The fodder and water-supply are scanty in most parts of the province. Prices are steady.

HYDERABAD.—Rainfall slight. Harvesting of the spring crops has been completed. The water-supply is diminishing. Fodder is getting scarce. Prices are normal.

Central India.—*For week ending 22nd April.*—No rain during the week. Agricultural operations are in progress in the Bundelkhand, Malwa and Goona

Agencies and in two districts of Gwalior, but have been completed in all other Agencies. The probable outturn will be below average in four Agencies and in many districts in Gwalior owing to want of rain. Pasturage is good and sufficient in all parts, except in Gwalior. Prices are above normal in Bundelkhand, Baghelkhand, Malwa, Goona and in five districts of Gwalior, but are normal elsewhere. The opium crop is fairly good in Gwalior and Malwa. The number of persons employed during the week on relief works in Gwalior, Bundelkhand and Goona was 2,500, 2,272 and 980 respectively.

Rajputana.—*For week ending 22nd April.*—Agricultural operations are generally satisfactory, except in Merwara and Jaisalmere where prospects are poor. The crops are very poor in Jaisalmere. The unirrigated crops are suffering in Ajmere-Merwara, and the crops have been damaged in Dholepore for want of rain. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk, Jaisalmere and in parts of Meywar. Fodder is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in seven States, fluctuating in two and falling in one; elsewhere prices are steady. In Marwar 4,815 persons are on relief works, and 203 on gratuitous relief, in Shahpura 400 are on relief works, and 30 on gratuitous relief, in Merwara 2,405 are on relief works, in Bikanir 2,083 are on relief works, and 256 on gratuitous relief, in Jaisalmere 22 are on relief works, and 43 on gratuitous relief.

Kashmir.—*For week ending 21st April.*—KASHMIR VALLEY.—Rain has fallen during the week. The weather is now fine. Water is ample for irrigation. The spring crops are excellent. The autumn crops are being sown. Prices continue normal.

JAMMU PROVINCE.—*For week ending 22nd April.*—No rain. Reaping of the spring crops is in progress. Cattle are in fair condition. Prices are stationary.

Nepal.—*For week ending 18th April.*—A good shower of rain has fallen, and Indian-corn and rice are being sown. Some damage has been caused to the wheat and barley crops by hail.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

No. 1797-S. R.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

Simla, the 22nd April, 1896.

Read—

Customs Circular No V of 1896

— —

ORDERED that the Circular be published for general information in the Supplement to the *Gazette of India.*

J. F. FINLAY,
Secretary to the Government of India.

Customs Circular No. V of 1896.

From—The Government of India, Finance and Commerce Department, No. 1181-S R., dated the 16th March 1896.

To—The Governments of Madras, Bombay and Bengal, and to the Chief Commissioner of Burma

I am directed to state for the information / your of ellency the Governor in Council / His Honour the Lieutenant Governor / information that the Governor General in Council is pleased to direct that instruments, apparatus, and appliances (Article 64 of the Tariff Schedule) when imported by a passenger as part of his personal baggage, and in actual use by him in the exercise of his profession or calling, may be treated as personal effects on which import duty will not be levied.

GOVERNMENT OF INDIA.

ORDER—By the Government of India, Finance and Commerce Department.

Read the following:

Order of Her Majesty in Council, dated the 22nd February 1896, exempting from remeasurement for tonnage certain merchant ships of the German Empire.

AT THE COURT AT WINDSOR.

The 22nd day of February 1896.

PRESENT:

The Queen's Most Excellent Majesty in Council.

Whereas by an Order in Council, dated the 23rd day of July 1889, made by Her Majesty in exercise of the powers conferred upon Her by the Merchant Shipping Act Amendment Act, 1862, Her Majesty was pleased, by and with the advice of Her Privy Council, to direct as follows:

1. As regards Sailing Ships that Merchant Sailing Ships of the German Empire, the measurement whereof after the 1st day of January 1873 has been ascertained and denoted in the registers and other national papers of such Sailing Ships, testified by the date thereof, shall be deemed to be of the tonnage denoted in such registers and other national papers in the same manner and to the same extent, and for the same purpose in, to, and for which the tonnage denoted in the Certificate of Registry of British Sailing Ships is deemed to be the tonnage of such ships.

2. As regards Steamships, that Merchant Ships belonging to the said German Empire, which are propelled by steam or any other power requiring engine room, the measurement whereof shall, after the said 1st day of January 1873, have been ascertained and denoted in the registers and other national papers of such Steamships, testified by the dates thereof, shall be deemed to be of the tonnage denoted on

such registers or other national papers in the same manner and to the same extent, and for the same purpose, in, to, and for which the tonnage denoted in the Certificate of Registry of British Ships is deemed to be the tonnage of such ships. Provided, nevertheless, that if the Owner or Master of any such German Steamship desires the deduction for engine room in his Ship to be estimated under the rules for engine room measurement and deduction applicable to British Ships instead of under the German rule, the engine room shall be measured and the deduction calculated according to the British rules; and that, in the event of any such Steamship possessing a certificate of tonnage or other national paper issued as aforesaid on or after the 20th day of June 1888, denoting the net registered tonnage of such Ship under the British rules, the Ship shall be deemed to be of the tonnage so denoted thereon.

And whereas by section 84 of the Merchant Shipping Act, 1894, it is enacted that, whenever it appears to Her Majesty the Queen in Council that the tonnage regulations of that Act have been adopted by any foreign country, and are in force there, Her Majesty in Council may order that the ships of that country shall, without being remeasured in Her Majesty's dominions, be deemed to be of the tonnage denoted in their certificates of registry or other national papers in the same manner, to the same extent, and for the same purposes as the tonnage denoted in the Certificate of Registry of a British Ship is deemed to be the tonnage of that ship:

And whereas it has been made to appear to Her Masjesty in Council that the tonnage regulations of the Merchant Shipping Act, 1894, have been adopted by the Government of His Majesty the German Emperor, and such regulations are now in force in the German Empire, having come into operation on the 1st day of July 1895:

And whereas there still are or may be ships belonging to the German Empire to which the herein-before recited Order of the 23rd July 1889 may apply, and it is expedient not to revoke the same, but to let the said recited Order remain in force so long as there are any ships to which the same may so apply:

And whereas the provisions of section one of the Rules Publication Act, 1893, have been complied with:

Now, therefore, Her Majesty (in pursuance and exercise of the powers herein-before mentioned) is hereby pleased, by and with the advice of Her Privy Council, to direct that the Merchant Ships of the German Empire the measurement whereof shall, after the 1st day of July 1895, have been ascertained and denoted in the registers and other national papers of such ships, shall be deemed to be of the tonnage denoted in their certificates of registry or other national papers in the same manner, to the same extent, and for the same purposes as the tonnage denoted in the Certificate of Registry of a British Ship is deemed to be the tonnage of that ship.

C. L. Peel.

ORDERED, that the Order in Council be published in the *Gazette of India.*

J. F. FINLAY,
Secretary to the Government of India.

APPOINTMENTS.

No. 21.—Sub-Lieutenant B. H. Jones, Royal Indian Marine, Assistant Surveyor, 4th class, Marine Survey of India, is permitted to revert to duty in the Royal Indian Marine.

No. 22.—Sub-Lieutenant G. H. S. La Touche, Royal Indian Marine, to be an Assistant Surveyor, 4th class, Marine Survey of India, *vice* Sub-Lieutenant B. H. Jones.

FURLOUGH AND LEAVE.

No. 23.—The undermentioned officer is granted leave to proceed out of India on medical certificate, under the leave rules contained in paragraph 131, Marine Regulations, volume I, part II; the leave to have effect in India from the date of being struck off duty till the date of sailing; the specified period to count from the date of leaving India:

Commander C. W. Hewett, Royal Indian Marine, Deputy Conservator of the Port of Madras, for one year.

No. 24.—The undermentioned officers have been granted extensions of leave by the Secretary of State for India:

Commander A. G. Lye, Royal Indian Marine, (m. c.) till the 22nd October 1896.

Engineer George Kelly, Royal Indian Marine, (m. c.) for six months.

Lieutenant H. C. E. Dobbin, Royal Indian Marine, (m. c.) for six months.

Sub-Lieutenant A. S. Balfour, Royal Indian Marine, (p. a.) for four days.

P. J. MAITLAND, *Colonel*,
Offg. Secretary to the Government of India.

MILITARY DEPARTMENT.

NOTIFICATION.

Simla, the 17th April, 1896.

Under clause 53 of the Regulations appended to the Regimental Debts Act of 1893, it is notified that reports of the deaths of the undermentioned commissioned officers, on the dates specified, were received in the Military Department between the 11th and the 17th April 1895:

Corps.	Rank and Names.	Date of decease.	Place of decease.	Testate or intestate.	Remarks.
Royal Artillery . .	Lieutenant T. Jones . .	26th March 1896	Meerut .	...	...
2nd Battalion, The Royal Irish Rifles.	Lieutenant G. S. Carey .	4th April 1896 .	Poona .	...	...

Statement of Deposits on account of Estates between the 11th and the 17th April 1896.

On whose account.	Rank.	Corps.	Date of decease.	Testate or Intestate.	Total unclaimed amount deposited.	Amount paid in India.	Date to which claims will be received.
					Rs. a. p.		
Charles McMullin Davis. (*a*)	Lieutenant.	Indian Staff Corps, 24th Punjab Infantry.	16th December 1895.	No will found.	5,497 7 8	...	16th June 1896.

(*a*) *Next-of-kin.*—Father—Colonel A. T. Davis, 35, Grange Road, Ealing, Middlesex.

P. J. MAITLAND, *Colonel*,
Offg. Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 17th April, 1896.

No. 185.—It is hereby notified for general information that Her Majesty's Secretary of State for India has accorded sanction to an expenditure of Rs. 3,66,478 for the construction of a branch line of railway from Najibabad station on the Oudh and Rohilkhand Railway to a point near the town of Kotdwara, a distance of 15¼ miles.

No. 186.—Mr. J B. Chirnside, in Class II, Grade 3 (sub. *pro tem.*), of the Superior Revenue Establishment of State Railways, Locomotive Department, is re-transferred to the Engineer Establishment in his substantive rank of Executive Engineer, 3rd Grade, with effect from the date of his return from furlough.

He will remain at the disposal of the Director General of Railways for employment on the Bezwada-Madras Railway.

No. 187.—The following Resolution by the Government of India, detailing the terms on which the Government are prepared to consider offers for the construction by the agency of private companies of branch lines forming feeders either to State lines worked by the State or to railways worked by companies, is hereby published for general information:

No. 514 R. C., dated Simla, the 17th April 1895.

RESOLUTION—By the Government of India, Public Works Department.

Terms on which the Government of India are prepared to consider offers for the construction by the agency of private companies of branch lines forming feeders either to State lines worked by the State or to railways worked by companies.

Read—

Public Works Department Resolution No. 924 R. C., dated 15th September 1893.

Also Public Works Department Resolution dated 29th March 1895.

OBSERVATIONS.—Many of the applications made under the above Resolutions shew that the terms for the construction of branch or feeder lines of railway have not been fully understood.

The Government of India have accordingly resolved to cancel the previous Resolutions above quoted upon this subject and to issue a fresh Resolution embodying a summary of the concessions which (the previous assent of any Railway Company concerned having been first obtained) they are now prepared to give for the construction of branch or feeder railways; such concessions being usually confined to lines not exceeding 100 miles in length.

2. It should be clearly understood that these concessions are not applicable to the larger or more important railways or to mountain branches, for which separate negotiations are in all cases necessary.

RESOLUTION.—Branch lines forming feeders, whether to State lines worked by the State or to railways worked by companies, will ordinarily be made by the main line administrations, who shall have a prior right to construct them.

The Government of India will from time to time publish a list of branch lines for the construction of which they are prepared to receive tenders.

They will consider and dispose of any application for the inclusion in the said list of any other line which can properly be described as a branch or feeder line, and which does not, except in special circumstances, exceed 100 miles in length.

2. Proposals for the construction of branch lines under this Resolution must conform to the following terms and conditions:

(i) Applicants must satisfy the Government that they are in a position to command substantial financial support.

(ii) The gauge to be adopted must be approved by the Government in each case.

(iii) The proposed railway shall be subject to the provisions of all Acts of the Legislature applicable to Indian railways.

(iv) The proposed railway shall be built in accordance with the fixed and moving dimensions for the time being prescribed by the Governor-General in Council, and on plans and estimates that have been approved by that authority. The route of the line, the situation of stations, and other similar details, shall be subject to approval by the Government.

(v) The line, while under construction, shall be inspected when and so often as an inspecting officer appointed for that purpose by the Government may consider desirable with a view to ensure the construction of the line up to the standard agreed upon.

(vi) Inasmuch as these railways are chiefly required for the development of country hitherto deficient in means of communication, and the anticipated profits may not therefore at once be fully realised, the Government of India are prepared to give financial assistance as set forth below. Proposals for financial concessions may be made in one or other of the following alternative forms:

(*a*) It may be stipulated that after the opening of the railway for traffic the Government shall guarantee out of the revenues of India a fixed yearly minimum dividend in rupees on the actual expenditure charged in the capital account of the branch railway company as entered in rupees in the company's books in India, with such share of the surplus net profits as may be agreed upon. The minimum dividend to be guaranteed in each particular case will depend upon consideration of the circumstances, but for the present no offer will be entertained that requires a guarantee exceeding 3 per cent.; or

Under (*a*) the company will receive an absolute guarantee of interest at a rate not exceeding 3 per cent. and a higher return if the net earnings of the branch are sufficient to pay more than the guaranteed dividend.

(*b*) It may be provided that a payment be made to the branch company by the main line to the extent necessary, together with the branch company's share of branch earnings [see section (6) of paragraph 3] to give the branch company a dividend of 3½ per cent. per annum on the actual expenditure charged in the capital account of the branch railway company as entered in rupees in the company's books in India; provided always that the payment so made to the branch company shall in no case exceed the net earnings of the main line from traffic interchanged with the branch. This rebate will be granted from the first earnings of revenue by the branch, such payment being calculated at the close of the year, payments on account, however, subject to adjustment, being permissible at the close of the first-half of each year. The net earnings of the main line from traffic interchanged with the branch are assumed to bear the same proportion to the gross earnings of the main line from such traffic as the net earnings of the whole system including the branch bear to the gross earnings thereof. If the net earnings of the branch line equal or exceed 3½ per cent. on the actual expenditure as above, the whole of such earnings will go to the branch company.

Under (*b*) the company will receive a dividend of 3½ per cent. provided that the amount of the net earnings from local and interchanged traffic be sufficient, and a higher return if the net earnings of the branch from its own traffic be sufficient to pay a higher dividend.

In either of the above cases (*a*) or (*b*) if the capital is raised in sterling, the capital to be entered in rupees in the company's books in India shall be the actual amount realised in rupees from time to time by the several remittances of funds to provide for expenditure in India, together with the sterling outlay

from time to time in England converted into rupees at the average rate of exchange obtained by the Secretary of State for his remittances during the half-year preceding that in which the outlay shall have been incurred, and the capital expenditure in rupees on which the interest is from time to time to be calculated for the purposes of the guarantee or rebate, as the case may be, shall be the total outlay whether in India or England up to any such time as thereto charged.

(vii) The general character of the supervision and control that will be exercised by the Government over the branch railway, apart from the provisions of the Railways Acts and the preceding provisions of this Resolution, shall be as follows:

(*a*) No capital expenditure by the branch railway company will be allowed as between the Secretary of State and the company unless the prior sanction of the Secretary of State shall have been obtained. The company shall have no power to increase its share or stock capital without the sanction of the Secretary of State or to borrow money except within a fixed limit and on specified conditions.

(*b*) The branch railway company, if required, shall keep capital accounts and statistics in forms approved by the Secretary of State; and shall render, free of cost, all accounts and statistics required by the Government. The accounts and books will be subject to audit on behalf of Government.

(viii) Funds for the execution of new works, properly chargeable to capital, found necessary after the branch railway has been opened to public traffic shall be provided by the branch railway company. Such works and their cost shall be agreed upon between the branch railway company and the main line administration before they are put in hand. In the event of any difference of opinion arising between the branch railway company and the main line administration as to the necessity for and the cost of any new work, the matter shall be referred to the Director General of Railways as arbitrator, and his decision shall be final.

(ix) The rates and arrangements in force on State railways in the matter of services rendered to all Departments of the State shall apply.

3. The following are the principal additional concessions admissible for branch or feeder railways for the construction of which tenders may be invited:

(1) The Secretary of State for India in Council, or the Government of India, respectively, will permit the charge of interest at a rate to be agreed upon in each case, during construction to the capital account of the railway under the terms of the Indian Railways Act of 1894 (57 and 58 Vict., Chapter 12), or the Indian Railway Companies Act X of 1895.

(2) The land required for the construction of the branch railway will be provided free of cost. Such grant shall not include land required for quarrying, ballast, brickfields and kindred purposes.

(3) Electric telegraphs and telegraphic appliances will be supplied and maintained by the Government of India at the usual charges for such works.

(4) The results of existing surveys will be made available free of charge. When desired, fresh surveys will be made by the Public Works Department of the Government of India of any branch railway on the applicants depositing the estimated cost thereof in a Government Treasury, on the understanding that no preferential claim to a concession is thereby established. If permission be eventually given for the construction of the line, the actual cost of all such surveys, as well as of those made at the cost of Government, may be included in the capital cost of the railway. No

responsibility will be accepted by Government for the accuracy of any survey, plan, estimate or other information supplied.

(5) The branch railway may be constructed by the main line administration, and will be maintained and worked by that administration during the full currency of the contract to be entered into for the purpose, at a fixed ratio of expenses to earnings in each half-year. The ratio will, when the branch railway is of the same gauge as that of the working railway, usually be that obtaining on the whole system as from time to time existing including the branch railway, but will not exceed 50 per cent. of the gross earnings of the branch from all sources, and will be inclusive of charges for the use of the main line rolling-stock.

(6) Such expenses on account of the Board of Direction of the Branch Line Railway Company as may be incurred with the sanction of the Secretary of State may be charged—

(*a*) during construction to the Capital Account of the Branch Line Company;

(*b*) after opening, and until the minimum dividend under paragraph 2 (vi) (*a*) or (*b*) is received by the Branch Line Company, as part of the working expenses to be met out of the stipulated percentage of the earnings of the branch taken by the working railway;

(*c*) and thereafter out of the general receipts of the Branch Line Company.

(7) Railway materials for the branch railway will be carried over State lines at the special rates prescribed for such materials belonging to State railways.

4. The Government of India reserve the right to purchase all such branch railways at the expiry of 21 years, or at subsequent intervals of 10 years on 12 months' notice, the purchase price being 25 times the yearly average net earnings not including rebate payments, of the 3 years preceding the purchase, with a maximum price of 120 and a minimum of 100 per cent. of cost price on a rupee basis.

5. The Government also reserve—

(i) The right to fix and vary from time to time the classification of goods, and maximum and minimum rates for each class of goods, as well as of passengers; and

(ii) a general control in respect to the number and timing of trains.

6. Applications for concessions to construct branch railways under the terms of this Resolution should be submitted, in the form prescribed by Memorandum A, hereto attached, to the address of the Secretary to the Government of India, Public Works Department.

7. Applications for fresh surveys to be carried out on the terms detailed in condition 3 (4) above should be submitted in the manner prescribed by Memorandum B, hereto attached, to the address of the Secretary to the Government of India, Public Works Department.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General in Central India, Rajputana, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.
The Accountant General, Public Works Department.

ORDER.—Ordered that this Resolution be forwarded for information to the Local Governments and Administrations and to the officers marginally noted.

Also that it be published for general information in the *Gazette of India*.

Enclosure No. I (with Form A and Appendices A, B and C) to Government of India Resolution No. 514 R. C. of 1896.

MEMORANDUM A.

For the guidance of persons or syndicates desirous of submitting proposals for the construction of branch railways in India forming feeders either to State lines worked by the State or to railways worked by Companies.

1. All applications for leave to construct a branch or feeder railway in any part of British India are to be addressed to the Secretary to the Government of India, Public Works Department.

2. All such applications shall be printed, and shall be drawn up, as far as may be in Form A attached hereto, and shall specify—

(*a*) the company, person, or syndicate by whom the application is preferred; the proposed amount of capital, the number of shares, and the amount of each share;

(*b*) all the termini, together with the names of all the principal towns from, through, into, or near which the railway is intended to be constructed, as well as the names of each civil division and district to be traversed by the proposed alignment;

(*c*) the length, so far as known, of the proposed railway;

(*d*) the gauge, the weight of rails, etc.;

(*e*) the motive power to be employed;

(*f*) the maximum tolls, rates, and fares proposed to be charged on the projected railway;

(*g*) the proposals for working the railway when constructed; and if any agreement is under contemplation, or has been provisionally arranged with any existing Railway Administration under which the proposed line, when constructed, is to be leased out for working by such Railway Administration, the exact nature and terms of such agreement;

(*h*) any further information that may be required to enable Government to thoroughly understand the scope of the proposals.

3. Every such application shall be accompanied by a map to a scale of one mile to one inch, with the line of the proposed railway delineated thereon, so as to show its general course and direction, and also by an estimate as correct as may be of the works proposed to be authorised.

4. When the applicants draw up their own detailed plans and estimates, these documents are invariably to be prepared in strict accordance with the Rules for the preparation of railway projects issued under the authority of the Government of India, of which copies may be obtained on payment from the Superintendent of Government Printing, Calcutta.

5. Lists will be published from time to time of the branch railways forming feeders, whether to State lines worked by the State or to railways worked by companies, for the construction of which the Government of India are prepared to receive tenders. Copies of such lists can be obtained on application addressed to the Secretary to the Government of India, Public Works Department.

6. Upon written application to the Director General of Railways, permission will also be accorded to inspect, at all reasonable hours, the detailed plans, sections, and estimates at the disposal of Government in regard to any particular route already surveyed, provided that they relate to branch railways the construction of which the Government is prepared to entrust to companies; and copies of such plans, sections, and estimates will be furnished on payment of the cost of copying.

7. But in regard to all such information, statistics, plans, sections, or estimates, which may be furnished, it is to be recognised that the information thus offered to any person interested in the matter is simply the best information of the kind at the disposal of Government, and that Government cannot accept any responsibility whatever in regard to the accuracy of any of the documents.

Form A.

To accompany all applications for leave to construct a branch or feeder railway in any part of British India.

	Nature of particulars to be specified.	Particulars.
1	The name of the Company, person, or persons by whom the application is preferred; the proposed amount of capital, the number of shares, and the amount of each share.	
2	The termini, together with the names of all the principal towns from, in, through, or into, or near which the railway is intended to be constructed.	*Reference to an Appendix* (vide *Appendix A*) *may be here given if necessary.*
3	The length, as far as known, of the proposed railway.	
4	The gauge proposed and weight of rails, etc.	
5	The motive power to be employed.	
6	The maximum tolls, rates, and fares intended to be charged on the proposed railway.	*Reference to an Appendix* (vide *Appendix B*) *may be here given if necessary.*
7	Details of any agreement which may have been provisionally arranged, or which it is desired to enter into, under which the proposed line, when constructed, is to be leased out for working to any existing Railway Administration.	*Reference to an Appendix* (vide *Appendix C*) *may be here given if necessary.*
8	Any further information that may be required to enable the Government of India to thoroughly understand the scope of the proposals.

Enclosure No. II to Government of India Resolution No. 514 R. C. of 1896.

MEMORANDUM B.

For the guidance of persons or syndicates desirous of having surveys for branch or feeder lines of railway in India carried out at their expense by the Public Works Department.

1. All applications for the survey of proposed branch or feeder railway routes in any part of British India are to be addressed to the Secretary to the Government of India, Public Works Department.

2. All such applications shall specify—

(*a*) the company, person, or syndicate by whom the application is preferred ;

(*b*) all the termini, together with the names of all the principal towns from, through, into, or near which the survey is intended to be carried, as well as the names of each civil division and district to be traversed by the proposed alignment ;

(*c*) the length, so far as known, of the proposed railway ;

(*d*) the gauge and the motive power to be employed ;

(*e*) the intentions of the applicants as to the construction and working of the railway. If it is intended that the working shall be leased to any existing Railway Administration, the nature of the contemplated agreement shall be specified.

3. Every such application shall be accompanied by a map to a scale of one mile to one inch, with the line of the proposed survey delineated thereon, so as to show its general course and direction.

4. If the detailed plans and estimates are submitted to Government, these documents are invariably to be prepared in strict accordance with the Rules for the preparation of railway projects issued under the authority of the Government of India, of which copies may be obtained on payment from the Superintendent of Government Printing, Calcutta.

5. Upon written application to the Director General of Railways permission will also be accorded to inspect at all reasonable hours the detailed plans, sections, and estimates at the disposal of Government in regard to any particular route already surveyed, provided that they relate to branch or feeder railways the construction of which the Government is prepared to entrust to companies ; and copies of such plans, sections, and estimates will be furnished on payment of the cost of copying.

6. But in regard to all such information, statistics, plans, sections, or estimates, which may be furnished, it is to be recognised that the information thus offered to any person interested in the matter is simply the best information of the kind at the disposal of Government, and that Government cannot accept any responsibility whatever in regard to the accuracy of any of the documents.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 24th April 1896.

NOTIFICATIONS.

No. 1139 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 18th April 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 127 of 1896.—William Bull, civil engineer, at present residing near Calcutta, for improvements in the construction and working of continuous kilns for burning bricks and tiles.

No. 128 of 1896.—Michael Kirshner, machinist and mechanical engineer, of Salem, Verginia, United States of America, for improvements in cigarette machines.

No. 129 of 1896.—Otto Hoffmann, engineer, of 46, Cresswell Grove, Withington, Manchester, in the county of Lancaster, England, for improvements in and relating to humidifying and spraying apparatus and appliances.

No. 130 of 1896.—Harry Dain Hinks, lamp manufacturer and managing director of James Hinks & Son, Limited, for improvements in tubular or hurricane lanterns.

No. 131 of 1896.—Robert Cooke Sayer, engineer, of Clyde Road, Redland, Bristol, in the county of Gloucester, England, for improvements in railways.

No. 132 of 1896.—J. Denis Marklew, engineer, Calcutta, for a sight adjuster to fit on Martini-Henry and other rifles.

No. 133 of 1896.—Thomas Royle, analytical and consulting chemist, of Dalton House, 329, Upton Lane, London, for improvements in purifying water.

No. 134 of 1896.—Charles FitzRoy Alexander Hallifax Bagot, of 59, Cadogan Square, in the county of London, Esquire, for improvements in valves for use with pneumatic tyres, or in other cases where vessels or chambers are to be charged with fluids.

No. 135 of 1896.—Nicholas Marshall Cummins, late district engineer, East Indian Railway, now in England, for sealing the doors of railway wagons.

No. 1140 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place,

West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 37 of 1895.—Lieutenant-Colonel Edward Brooke Anderson, commandant, 24th Madras Infantry, Bangalore, Madras Presidency, for a portable cooking apparatus for use in kitchen or in camp in India. (Filed 15th April 1896.)

No. 101 of 1895.—James Mylne of Beheea, in the district of Shahabad, in the province of Bengal, part proprietor of the Beheea sugarcane mills at Shahabad, for a new and improved method in the design and construction of cylindrical rollers of sugarcane crushing mills. (Amended specification filed 2nd April 1896.)

No. 24 of 1896.—Fleetwood Cecil Wilfred Webb, practical tanner, currier and leather dyer, of Dharavi, Sion, within the limits of the district of the Island of Bombay, for a rapid tanning process without chemicals by means of a rotary drum machine. (Filed 6th April 1896.)

No. 1141 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 80 of 1888.—Henry Thompson, engineer, of Trinity Street, Gainsborough, in the county of Lincoln, England, for improvements in the method of and apparatus for drying tea leaf. (From 17th April 1896 to 16th April 1897.)

No. 37 of 1889.—Samuel Cleland Davidson, merchant, of Sirocco works, Belfast, Ireland, for improvements in rotary fans. (From 25th April 1896 to 24th April 1897.)

No. 84 of 1889.—Thomas Alva Edison, electrician, of Llewellyn Park, in the county of Essex and state of New Jersey, one of the United States of America, for improvements in phonographs and phonograms. (From 30th April 1896 to 29th April 1897.)

No. 85 of 1889.—Thomas Alva Edison, electrician, Llewellyn Park, in the county of Essex and state of New Jersey, one of the United States of America, for improvements in phonogram blanks and phonograms and processes of making the same. (From 30th April 1896 to 29th April 1897.)

No. 86 of 1889.—Thomas Alva Edison, electrician, of Llewellyn Park, in the county of Essex and state of New Jersey, one of the United States of America, for improvements in methods and apparatus for recording and reproducing sounds and for preparing surfaces for receiving sound records and in materials or compositions for such surfaces. (From 30th April 1896 to 29th April 1897.)

No. 87 of 1889.—Thomas Alva Edison, electrician, of Llewellyn Park, in the county of Essex and state of New Jersey, one of the United States of America, for improvements in phonographs. (From 30th April 1896 to 29th April 1897.)

No. 88 of 1889.—Thomas Alva Edison, electrician, of Llewellyn Park, in the county of Essex and state of New Jersey, one of the United States of America, for improvements in appa-

ratus for recording and reproducing sound and in surfaces for receiving such sound record and methods of making and using such surfaces. (From 30th April 1896 to 29th April 1897.)

No. 179 of 1889.—Thomas Alva Edison, electrician, of Llewellyn Park, in the county of Essex and state of New Jersey, one of the United States of America, for improvement in phonographs or apparatus for recording and reproducing sound in devices used in and in connection with such apparatus, and in phonogram blanks or surfaces for receiving the sound records and in methods of making and using such surfaces. (From 30th April 1896 to 29th April 1897.)

No. 263 of 1889.—Alexander Dunbar, barrister-at-Law, of Liverpool, in the county of Lancaster, England, for improvements in machinery or apparatus for the manufacture of casks, barrels and the like. (From 17th April 1896 to 16th April 1897.)

No. 145 of 1890.—Thomas Alva Edison, electrician, of Llewellyn Park, in the county of Essex and state of New Jersey, one of the United States of America, for improvements in phonographs. (From 2nd September 1896 to 1st September 1897.)

No. 47 of 1891.—Ludwig Epstein, electrical engineer, of East Twickenham, in the county of Middlesex, England, for improvements in the formation of electrodes for use in primary and secondary electric batteries. (From 12th May 1896 to 11th May 1897.)

No. 179 of 1891.—Francis Edward Elmore, electro-metallurgist, of Spring Grove, Thwaite Gate, Leeds, in the county of York, England, for improvements in mandrils for electrolytically deposited tubes. (From 19th April 1896 to 18th April 1897.)

No. 286 of 1891 —Henry Pellerin de Lastelle, Director of La Société Nouvelle de constructions. Système Tollet, of 18, Rue St. Lazare, Paris, for improvements in temporary structures, suitable for tents, hospitals, barracks and the like. (From 20th May 1896 to 19th May 1897.)

No. 323 of 1891.—George Henry List, M. Inst. C. E., superintending engineer, Railway branch, Public Works Department, and superintendent of Way and Works, North-Western Railway, Lahore, Punjab, for securing safe working of facing points and signals on railways, to be called double action detectors and locking gear for facing points and signals. (From 9th January 1897 to 8th January 1898.)

No. 213 of 1892.—Edison United Phonograph Company, Limited, of New Jersey, United States of America, for improvements in phonographs. (From 23rd November 1896 to 22nd November 1897.)

No. 1142 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the Fourth Schedule to the Inventions and Designs Act (V of 1888) the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorizing others so to do has ceased :—

No. 66 of 1891.—Mr. W. B. Turner's invention for improvements in baling presses. (Specification filed 12th January 1892.)

No. 124 of 1891.—Messrs. T. B. Burns and R. H. Lee's invention for improvements in and relating to rifle targets. (Specification filed 18th

No. 191 of 1891.—Mr. J. M. Taylor's invention for improved water lift. (Specification filed 15th January 1892.)

No. 208 of 1891.—Mr. E. Taylor's invention for improvements in and relating to cool storage or refrigerating chambers specially applicable to railway cars. (Specification filed 15th January 1892.)

No. 210 of 1891.—Messrs W. B. Brain and A. J. Arnot's invention for an improved alternating electric current motor. (Specification filed 15th January 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

TREASURE TROVE.

NOTICE.

It is hereby notified, under section 5 of the Indian Treasure Trove Act VI of 1878, that about the close of the month of August, 1895, a treasure, consisting of 115 rupee coins issued by the East India Company, was found by one Seeranga Boyan, in the walls of an old ruined house situated in Karathadipalayam, a hamlet of Lakkampatti village, Satyamangalam Taluk, and belonging to one Valliammal.

2. A sum of R100 produced by Seeranga Boyan, as the sale-proceeds of the treasure, is now deposited in the Satyamangalam Taluk treasury.

3. All persons claiming the said treasure, or any part thereof, are hereby required to appear personally or by agent, before the Collector of Coimbatore, at his office, on Saturday, the 12th September, 1896, in order that the matter may be enquired into and determined by the Collector according to the provisions of the said Act.

HERBERT BRADLEY,
Collector.

COIMBATORE COLLECTOR'S OFFICE,
The 10th April, 1896.

NOTICE.

It is hereby notified, under section 5 of the Indian Treasure Trove Act VI of 1878, that on the 20th December, 1895, a sum of R28-8-0 was found hidden in the northern wall of the choultry, north of the Chinthamani Iswaran Temple in the hamlet of Kaningali, Pormeri taluk, Chingleput District, Madras Presidency.

All persons claiming the said treasure, or any part thereof, are hereby directed to appear personally, or by agent, before the Collector of the District, on Friday, the 2nd October, 1896, or if that day should happen to be a public holiday, on the next office day at 12 noon at the Collector's Office at Homes Gardens, Saidapet, when their claims will be heard and disposed of according to law.

P. KRISHNA RAO,
for Actg. Collector.

SAIDAPET;
The 14th April, 1896.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.,*
Principal, Thomason College.

THOMASON COLLEGE, ROORKEE.

NOTIFICATION.

In para. 19 of the Circular, Engineer and Telegraph Classes, dated 1st January, 1896, it is stated that the Civil Engineering Course extends over two years. The Government having determined that this Course shall be extended to three years when the administrative arrangements for such extension are completed, notice is hereby given to intending Candidates that the Government retains discretion to extend the Course to three years without further notice.

J. CLIBBORN, *Lt.-Col., I.S.C.,*
Principal, Thomason College.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up at 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

NOTICE.

The post of Principal of the Bareilly College now vacant will be filled up on 1st July next. Applications are invited from gentlemen who have graduated and *taken honours* at a *European* University. Some knowledge of Urdu is necessary. Salary six hundred rising to seven hundred and fifty. Six months' probation. Applications with copies of testimonials (which will not be returned) should be addressed to the President, College Managing Committee, Bareilly, Robilkhand.

E. ALEXANDER,

President.

BAREILLY;

The 24th March, 1896.

THE YEARLY EXAMINATION OF CANDIDATES FOR 4TH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for 4th grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd June, 1896, at 10-30 A.M. :—

SUBJECTS.

	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity) . . .	100	50
Dictation (spelling, punctuation, etc.) . . .	100	50
Arithmetic (the whole) .	240	160
Mensuration (*a*) the whole .	60	30
Book-keeping, (*b*) mercantile	100	50
TOTAL .	600	400

Mimimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Ball and Hamilton.
"Book-keeping" by double and single entry by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it ; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal, together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no application received direct.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR ;

The 31st March, 1896.

CIVIL ENGINEERING COLLEGE, SIBPUR.

SESSION 1896-97.

Candidates for admission to the Engineer Department should apply to the Principal before the 15th May, 1896. The session begins on Monday, the 1st June, 1896. Candidates must furnish proof that they have passed one of the following tests :—

(1) The F. A. Examination of the Calcutta University or a similar standard of any Indian University recognised by the Calcutta University. The candidate's age must be under 21 years.

(2) The B. A. Examination in the B. course. The candidate's age must be under 23 years. (These students are admitted direct into the 2nd year class.)

The number to be admitted each year is limited to 40. The position in the University Examinations and the age of candidates will be taken into consideration when selection is made, and such selection will be made by the Principal.

Ten scholarships will be awarded to students entering the Engineer Department, not being already holders of junior or senior sholarships. Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eyesight.

Further particulars will be supplied on application to the Principal.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR,

The 22nd April, 1896.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8;* per eight-ounce tin, *R5;* per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the under-noted rates: per four-ounce tin, *R3;* per eight-ounce tin, *R6;* per pound tin, *R12*. PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or, post free,	R18-12.
½	„	R 9,	„	R9-8.
¼	„	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	.	১৮৲	বা ডাকমাশুল বিনা	১৮৸০
½ আধ „	„	৯৲	„	৯৷০
¼ সিকি „	„	৪৷০	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.			With postage.		
	R	*a.*	*p.*	*R*	*a.*	*p.*
For the Calcutta Series	10	0	0	18	8	0
„ each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	*a.*	*p.*	*R*	*a.*	*p.*
For the Calcutta Series; per copy . .	0	8	9	0	10	3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0	5	3	0	5	9
„ the Calcutta Series. For the year .	7	2	6	8	6	3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

The Curator of Government Books, North-Western Provinces and Oudh.

The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
„ three issues . . .	„ 55	„ 36	„ 24
„ six „ . . .	„ 100	„ 68	„ 45
„ nine „ . . .	„ 145	„ 96	„ 64
„ twelve „ . . .	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.			With postage.		
	R	*a.*	*p.*	*R*	*a.*	*p.*
Bengal Law Reports, for one year . . Single copies, R2 per copy.	20	0	0	22	8	0
Full Bench Rulings, Parts I and II . .	20	0	0	22	8	0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Simla, the 29th April, 1896.

No. 7922-*M*.—His Excellency the Viceroy and Governor General will hold a Levée at Viceregal Lodge, Simla, at 9-45 P.M. on Wednesday, the 20th May 1896.

All Civil and Military Officers and the Native Officers of the Detachment of the 1st Battalion, 4th Gurkhas, are invited to attend.

All Officers and Gentlemen attending the Levée are requested to bring with them two cards, with their names legibly written thereon—one card to be delivered on entering Viceregal Lodge, and the other to the Aide-de-Camp in waiting at the time of presentation.

Gentlemen who have not already been presented at the Court of St. James or at the Viceregal Court are requested to send their names and addresses to the Aide-de-Camp in waiting not later than Monday, the 11th May 1896; and, when attending the Levée, to have the names of those Gentlemen who are to present them also written on their cards.

Gentlemen presenting others must themselves attend the Levée.

Gentlemen wearing uniform will appear in full dress.

Gentlemen not entitled to wear uniform will appear in evening dress.

By Command,

A. DURAND, *Lieutenant-Colonel,*
Military Secretary to the Viceroy.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Simla, the 30th April, 1896.

No. 9.—Mr. W. K. Porter, Barrister-at-Law, officiating Reporter for the Indian Law Reports, in the High Court of Judicature for the North-Western Provinces, is confirmed in that appointment.

No. 10.—The following Statute is published for general information :

ARMY (ANNUAL) ACT, 1896.

[59 VICTORIA, CHAPTER 2.]

An Act to provide, during twelve months, for the Discipline and Regulation of the Army.

[27TH MARCH, 1896]

WHEREAS the raising or keeping of a standing army within the United Kingdom of Great Britain and Ireland in time of peace, unless it be with the consent of Parliament, is against law:

And whereas it is adjudged necessary by Her Majesty and this present Parliament, that a body of forces should be continued for the safety of the United Kingdom and the defence of the possessions of Her Majesty's Crown, and that the whole number of such forces should consist of one hundred and fifty-six thousand one hundred and seventy-four, including those to be employed at the depôts in the United Kingdom of Great Britain and Ireland for the training of recruits for service at home and abroad, but exclusive of the numbers actually serving within Her Majesty's Indian possessions:

And whereas it is also judged necessary for the safety of the United Kingdom, and the defence of the possessions of this realm, that a body of Royal Marine forces should be employed in Her Majesty's fleet and naval service, under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid :

And whereas the said marine forces may frequently be quartered or be on shore, or sent to do duty or be on board transport ships or vessels, merchant ships or vessels, or other ships or vessels, or they may be under other circumstances in which they will not be subject to the laws relating to the government of Her Majesty's forces by sea:

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm; yet nevertheless it being requisite, for the retaining all the before-mentioned forces, and other persons subject to military law, in their duty, that an exact discipline be observed, and that persons belonging to the said forces who mutiny or stir up sedition, or desert Her Majesty's service, or are guilty of crimes and offences to the prejudice of good order and military discipline, be brought to a more exemplary and speedy punishment than the usual forms of the law will allow:

And whereas the Army Act will expire in the year one thousand eight hundred and ninety-six on the following days: 44 c.

(*a*) In the United Kingdom, the Channel Islands, and the Isle of Man, on the thirtieth day of April; and

(*b*) Elsewhere in Europe, inclusive of Malta, also in the West Indies and America, on the thirty-first day of July; and

(*c*) Elsewhere, whether within or without Her Majesty's dominions, on the thirty-first day of December:

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Short title.

1. This Act may be cited as the Army (Annual) Act, 1896.

Army Act (44 & 45 Vict., c. 58) to be in force for specified times.

2. (*1*) The Army Act shall be and remain in force during the periods herein-after mentioned, and no longer, unless otherwise provided by Parliament; that is to say,

(*a*) Within the United Kingdom, the Channel Islands, and the Isle of Man, from the thirtieth day of April one thousand eight hundred and ninety-six to the thirtieth day of April one thousand eight hundred and ninety-seven, both inclusive; and

(*b*) Elsewhere in Europe, inclusive of Malta, also in the West Indies and America, from the thirty-first day of July one thousand eight hundred and ninety-six to the thirty-first day of July one thousand eight hundred and ninety-seven, both inclusive; and

(*c*) Elsewhere, whether within or without Her Majesty's dominions, from the thirty-first day of December one thousand eight hundred and ninety-six to the thirty-first day of December one thousand eight hundred and ninety-seven, both inclusive;

and the day from which the Army Act is continued in any place by this Act is in relation to that place referred to in this Act as the commencement of this Act.

(*2*) The Army Act, while in force, shall apply to persons subject to military law, whether within or without Her Majesty's dominions.

(*3*) A person subject to military law shall not be exempted from the provisions of the Army Act by reason only that the number of the forces for the time being in the service of Her Majesty, exclusive of the marine forces, is either greater or less than the number herein-before mentioned.

Prices in respect of billeting.

3. There shall be paid to the keeper of a victualling house for the accommodation provided by him in pursuance of the Army Act the prices specified in the schedule to this Act.

Explanation of 56 & 57 Vict., c. 62, s. 1.

4. For removing doubts it is declared that the things which may be done under or in pursuance of section one of the Madras and Bombay Armies Act, 1893, may be done either within or without the presidencies of Madras and Bombay respectively.

SCHEDULE.

Accommodation to be provided.	Maximum price.
Lodging and attendance for soldier where hot meal furnished.	Fourpence per night.
Hot meal as specified in Part I of the Second Schedule to the Army Act.	One shilling and threepence half-penny each.
Breakfast as so specified . .	One penny half-penny each.
Where no hot meal furnished, lodging and attendance, and candles, vinegar, salt, and the use of fire, and the necessary utensils for dressing and eating his meat.	Fourpence per day.
Ten pounds of oats, twelve pounds of hay, and eight pounds of straw per day for each horse.	One shilling and ninepence per day.
Lodging and attendance for officer .	Two shillings per night.

Note.—An officer shall pay for his food.

S. HARVEY JAMES,

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla, the 1st May, 1896.

No. 801.—The following letter from Her Majesty the Queen, Empress of India, published in the second Supplement to the *London Gazette*, dated the 16th February 1896, is republished for general information :

Whitehall, February 15th, 1896.

The following Letter from The Queen has been received by the Right Honourable the Secretary of State for the Home Department :

" *Osborne, February 14th, 1896.*

I have, alas! once more to thank My loyal subjects for their warm sympathy in a fresh grievous affliction which has befallen Me and My beloved Daughter, Princess Beatrice, Princess Henry of Battenberg.

This new sorrow is overwhelming, and to Me is a double one, for I lose a dearly loved and helpful Son, whose presence was like a bright sunbeam in My Home, and My dear Daughter loses a noble devoted Husband to whom she was united by the closest affection.

To witness the blighted happiness of the Daughter who has never left Me, and has comforted and helped Me, is hard to bear. But the feeling of universal sympathy so touchingly shown by all classes of My subjects has deeply moved My Child and Myself, and has helped and soothed us greatly. I wish from My heart to thank My People for this, as well as for the appreciation manifested of the dear and gallant Prince who laid down his life in the service of his adopted Country.

My beloved Child is an example to all, in her courage, resignation, and submission to the will of God.

VICTORIA, R.I.

No. 802.—The following amendment in the rules regarding the submission of petitions to the Government of India, promulgated with Home Department Notification No. 1812, dated the 11th October 1889, as amended by the Notifications marginally noted, is published for general information:

No. 1790, dated 30th October 1891.
No. 964, dated 13th July 1893.

In note 1 of the preamble *add* the words "a Lieutenant-General Commanding the Forces" *after* the words "the Commander-in-Chief in India."

ESTABLISHMENTS.

The 27th April, 1896.

No. 340.—A vacancy having occurred in the office of an Ordinary Member of the Council of the Governor General of India, owing to the vacation of office by Lieutenant-General Sir Henry Brackenbury, K.C.B., K.C.S.I., R.A., Her Majesty the Queen, Empress of India, has been graciously pleased to appoint Major-General Sir Edwin Henry Hayter Collen, K.C.I.E., of the Indian Staff Corps, to be an Ordinary Member of the Council of the Governor General of India.

Major-General Sir Edwin Collen has, on the afternoon of this day, taken upon himself the execution of his office under the usual salute.

The 1st May, 1896.

No. 349.—The services of Mr. W. H. Lee, of the Indian Civil Service, Officiating District and Sessions Judge, Birbhum, are placed at the disposal of the Chief Commissioner of Assam.

MEDICAL.

The 1st May, 1896.

No. 350.—Surgeon-Lieutenant-Colonel S. H. Browne, M.D., C.I.E., Principal of the Lahore Medical College, is granted special leave on urgent private affairs for six months, under Article 348 of the Civil Service Regulations, with effect from the 25th April 1895, or the subsequent date on which he may avail himself of it.

No. 351.—With effect from the date of assuming charge, Surgeon-Major F. F. Perry, F.R.C.S., Professor of Surgery, Lahore Medical College, is appointed to officiate as Principal of that College in addition to his own duties, during the absence on special leave, on urgent private affairs, for six months, of Surgeon-Lieutenant-Colonel S. H. Browne, M.D., C.I.E., or until further orders.

JUDICIAL.

The 30th April, 1896.

No. 610.—In exercise of the power conferred by section 2 of Regulation IX of 1816 the Governor General in Council is pleased to declare that the following shall be the local limits

within which the Commissioner in the Sundarbans shall in the district of Backergunge perform the duties and exercise the powers and authority vested in him by the said Regulation, namely :

On the north, starting from the Baleswar river, the Sundarbans boundary runs along the north boundary of the estate of Kalaran Chandipur, as far as the Kocha river, then along the eastern bank of the Kocha and Baleswar rivers to the point where the Bara Machua khal enters the Baleswar river, then the Sundarbans northern boundary follows that khal and proceeds first in an easterly and then in a south-easterly direction along the southern boundary of the estate of Tushkhali to a point where the estates of Tushkhali, Tikikhata and Debnathpur meet. The Sundarbans boundary then runs in a southerly direction along the Dhundua and Saplenja nadi down to a point where the latter meets the Kakcheera khal; here it turns to the east and following the course of the Kakcheera khal proceeds along the southern boundaries of the permanently-settled estates of Hultooa and Ramna Bamna till it reaches a point where the Kakcheera khal enters the Bishkhali river. The boundary line then runs due east along the Bishkhali river and crossing its junction with the Khak Dhone again proceeds in the same direction till it reaches a point where the Khak Dhone meets the Burgonah khal. Here the boundary line turns to the south and follows that khal down to its junction with the Buri-hwar river, where it takes first a north-easterly and then a northerly direction along that river up to its junction with the Beghai and Ailah rivers at the southernmost point of the Kootharchur. The boundary then runs north-west along the Ailah river up to its junction with the Khak Dhone. Thence leaving the river it runs first north-west and then east, and taking in the Tarabunia, Jowar Bhoyang, and Kakrabundia Chaks, runs northwards up the Beghai river for a short distance, and then continues east along the northern side of the estates of Bara Beghai, Haji Khali and Chaltabunia to a point where the Gorye and Kukooa khals meet. The eastern boundary of the Sundarbans then commences and goes due south and follows the Kukooa Dhone till this latter joins the Sonaram Das khal; then the boundary taking a bend to the north, follows the Kooleer Chur khal and turns again south from where this khal meets the Badura khal, and then goes along the Patuakhali Dhone to where it (the Patuakhali Dhone) enters the Agunmukhi river or Rabnabad channel. Then going along the northern bank of the Agunmukhi river, the boundary takes in the Rabnabad islands and adjacent chars, and then turning south runs along the eastern shores of the Choта Basdiya or Kuralia and Rangabali islands to the Bay of Bengal.

ECCLESIASTICAL.

The 30th April, 1896.

No. 136.—The services of the Reverend D. Trewby, a Chaplain on probation on the Bengal (Calcutta) Ecclesiastical Establishment, which were placed temporarily at the disposal of the Government of the Punjab, are replaced at the disposal of the Government of Bengal.

J. P. HEWETT,

Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

40th (Pathan) Regiment of Bengal Infantry.

Madad Khan to be Jemadar, on probation, to fill an existing vacancy.

CANTONMENTS.

REGULATIONS.

No. 480.—The following draft of certain rules, which it is proposed to make for the cantonment of Poona, in exercise of the powers conferred by section 26, clauses (13) and (20), and section 27 of the Cantonments Act (XIII of 1889), is hereby published, as required by the said Act, for the information of all persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Governor-General in Council after the 2nd June 1896.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date aforesaid will be considered by the Governor-General in Council.

Draft Rules.

1. The Cantonment Authority may, by notice in writing,—

Cesspools, receptacles for filth, and soaking of foul water, etc.

(1) require any person having control, whether as grantee, owner or occupier, of any land or building—

(a) to close any offensive cesspool belonging to the land or building, or

(b) to provide a receptacle (of a pattern, if any, approved by the Cantonment Authority) for filth accumulating on or in the land or building, or

(c) to keep in a cleanly condition (in such manner, if any, as may be prescribed by the notice) any receptacle provided for such filth, or

(d) to prevent the water of any private latrine, urinal, sink or bath-room, or any other offensive matter, from soaking, draining, flowing or being put from the land or building upon any road or public place or into any water-course or into any drain not intended for the purpose; or

Putting private latrine or urinal to public use.

(2) require the owner or other person having the control of any private latrine or urinal not to put the same to public use; or,

Conformity of private latrines and urinals with standard plan.

(3) if any plan for the construction of private latrines or urinals has been approved by the Cantonment Authority,—

(e) require any person repairing or constructing a private latrine or urinal not to allow the same to be used until it has been inspected by or under the direction of the Cantonment Magistrate and approved by him as conforming with such plan, or

(f) require any person having the control of a private latrine or urinal to rebuild or alter the same in accordance with such plan:

Provided that, on the application of any person to whom a notice under clause (e) or clause (f) of this rule is addressed, a copy of the approved plan shall be given to him by the Cantonment Magistrate free of charge; or

Removal of private latrine or urinal.

(4) require the owner or other person having the control of any private latrine or urinal which, in the opinion of the Cantonment Authority, creates a nuisance, to remove the latrine or urinal, and to substitute fresh earth, to such a depth, not exceeding two feet, as may be specified in the notice, for the earth on which the latrine or urinal stood; or

Roofing, etc., of private latrine, or cleansing of private latrine or urinal.

(5) require any person having control, whether as grantee, owner or occupier, of any land or building,—

(g) to have any latrine provided for the same shut out by a sufficient roof and wall or fence from the view of persons passing by or dwelling or working in the neighbourhood, or

(h) to cleanse with deodorants any latrine or urinal belonging to the land or building; or

Collection of offensive matter and rubbish for public removal.

(6) require any persons having control, whether as grantees, owners or occupiers, of any lands or buildings, who have allowed any offensive matter or rubbish to accumulate or remain thereon or therein, to collect the same and deposit it, for removal by the public conservancy establishments, at such times and in such receptacles or places as may be specified in the notice:

Provided that no person shall be required to deposit any offensive matter or rubbish in any receptacle or place situate at a greater distance than one hundred and fifty feet from the nearest boundary of his premises; or,

Provision of sufficient drainage.

(7) where any land or building is situate within one hundred feet of a public drain or of some other place set apart for the discharge of drainage, and the drains belonging to such land or building are, in the opinion of the Cantonment Authority, insufficient, require

any person having control of the land or building, whether as grantee or owner, or,

in the case of neighbouring lands or buildings, the several grantees or owners having control of the lands or buildings, conjointly,

to provide sufficient drainage within fifteen days from the service of the notice; or

Making or altering a private drain leading into a public drain.

(8) require any person to desist from making or altering any drain leading into a public drain; or

Altering, etc., public drain, or neglecting to provide culvert, or keeping insufficient culvert.

(9) require any person who is creating or likely to create a nuisance by—

(j) altering, obstructing or encroaching upon a public drain, or

(k) altering any path leading to his premises or any culvert under such path so as to obstruct the flow of water in or into any public drain, or

(l) impeding the flow of water owing to the absence or insufficiency of any culvert or water-course which he has undertaken to construct or is by law liable to construct or maintain,

to desist therefrom; or

Construction of private drain.

(10) require any person who is constructing or laying a drain to obey any directions which the Cantonment Authority may, on the advice of the Executive Engineer, think fit to give in order to ensure the completion of the work to its satisfaction; or

Covering of private drains.

(11) require any person or persons, being the owner or owners, and having control, of any drain or drains to provide and apply to the same within ten days from the service of the notice such covering as may be specified in the notice; or

Cleansing, etc., of private drain.

(12) require any person having the control of a drain,

within a period to be specified in the notice, to remove any obstruction from the drain, or to cleanse, purify, repair or alter the drain, or otherwise to put the same in good order.

Penalties.

2. Whoever fails to comply with any notice issued under rule 1 shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing failure, with an additional fine which may extend to five rupees for every day after the date of the first conviction on which the failure is proved to have been persisted in;

and, if any person required by any such notice to perform any act fails to perform it, the Cantonment Authority may cause the act to be performed and recover the cost from him.

Licenses required for carrying on of certain occupations.

3. (1) No persons of any of the following classes, namely:

(a) butchers, and sellers of poultry, game or fish,

(b) persons keeping pigs for profit, and dealers in the flesh of pigs which have been slaughtered in India,

(c) persons keeping milch cattle or milch goats for profit,

(d) persons keeping for profit any animals other than pigs, milch cattle or milch goats,

(e) dairymen and buttermen,

(f) makers of bread, biscuits or cake, and sellers of bread, biscuits or cake made in India,

(g) sellers of fruit or vegetables,

(h) manufacturers of aërated or other potable waters, or ice, and sellers of the same,

(j) sellers of any medicines, drugs or articles of food or drink for human consumption (other than the flesh of pigs, milk, butter, bread, biscuits, cake, fruit, vegetables, aërated or other potable waters, or ice) which are of a perishable nature,

(k) sellers of water to be used for drinking purposes,

(l) washermen,

(m) dealers in hay, straw, wood, charcoal or other inflammable material,

(n) dealers in fire-works, kerosine oil, petroleum or any other inflammable oil or spirit,

(o) tanners and dyers,

(p) persons carrying on any trade or occupation from which offensive or unwholesome smells arise,

shall reside in any part of the cantonment for the purpose of carrying on their trades callings or occupations, unless they have obtained a license from the Cantonment Authority:

(2) Provided as follows:

(i) a license shall not be withheld if the applicant is willing to comply with such conditions as the Cantonment Authority may consider it necessary to impose under rule 4;

(ii) no person who may, when these rules come into force, be carrying on his trade, calling or occupation in any part of the cantonment shall be bound to obtain a license for carrying on such trade, calling or occupation in that part until he has received from the Cantonment Authority not less than three months' notice of his obligation to do so;

(iii) if the Cantonment Authority refuses to grant a license to any person mentioned in clause (ii) to carry on his trade, calling or occupation in such place, it shall pay him reasonable compensation for any loss incurred by reason only of such refusal.

(3) No charge shall be made for any license granted under this rule.

Conditions which may be entered in such licenses.

4. A license granted to any person under rule 3 shall specify the part of the cantonment in which the licensee shall reside for the purpose of carrying on his trade, calling or occupation, and may contain any conditions which the Cantonment Authority may think fit to impose with respect to the following matters, namely:

(a) in the case of butchers, and sellers of poultry, game or fish,—

(1) the apparatus and coverings to be used in the operations of their trade,

(2) the places at which, and the manner in which, meat, poultry, game or fish may be exposed for sale, and

(3) the disposal of meat, poultry, game or fish when found to be unfit for human consumption :

EXPLANATION —Meat which has been subjected to the process of blowing shall be presumed to be unfit for human consumption :

(b) In the case of persons keeping pigs for profit, and dealers in the flesh of pigs which have been slaughtered in India,—

(4) the places at which pigs may be kept,

(5) the number of pigs which may be kept at any one place,

(6) the season and the places at which pigs may be slaughtered and the flesh offered for sale,

(7) the manner in which pigs shall be inspected prior to slaughter, and

(8) the manner in which the flesh thereof shall be inspected and marked prior to sale, and disposed of when found to be unfit for human consumption ;

(c) in the case of persons keeping milch cattle or milch goats for profit,—

(9) the places at which such animals may be kept,

(10) the number of such animals which may be kept at any one place,

(11) the sources from which such animals shall be watered,

(12) the segregation of any sick or diseased animals, and

(13) the taking of any other measures which the Cantonment Authority may consider necessary for maintaining the premises in a clean and sanitary state ;

(d) in the case of persons keeping for profit any animals other than pigs, milch cattle or milch goats,—

(14) the places at which such animals may be kept;

(15) the number of such animals which may be kept at any one place, and

(16) the manner of keeping the animals so as to prevent their becoming a public nuisance or injurious to the public health ;

(e) in the case of dairymen and buttermen,—

(17) the vessels and other apparatus to be used in the operations of their trade,

(18) the places at which and the manner in which milk or butter may be prepared and kept for sale, and

(19) the taking of any other measures which the Cantonment Authority may consider necessary for keeping the premises and all vessels and apparatus in a cleanly and sanitary state,

(f) in the case of makers of bread, biscuits or cake, and sellers of bread, biscuits or cake made in India,—

(20) the apparatus and the water, flour and other ingredients which may be used in the operations of their trade,

(21) the places at which bread, biscuits or cake may be prepared and kept for sale,

(22) the inspection to be exercised over the making of such articles, and

(23) the disposal of any such articles which may be found to be unwholesome ;

(g) in the case of sellers of fruit or vegetables,—

(24) the places and seasons at which fruit or vegetables, or any specified kinds of fruit or vegetable, may be sold, and

(25) the disposal of any fruit or vegetables which may be found to be unwholesome, or of which the sale has been prohibited under clause (24) of this rule ;

(h) in the case of manufacturers of aërated or other potable waters, or ice, and sellers of the same,—

(26) the sources from which water used in such manufacture shall be taken,

(27) the machinery, chemicals and ingredients which may be used in such manufacture,

(28) the measures to be taken in order to ensure the proper filtering of the water used and the cleanliness of all apparatus and receptacles used, and

(29) the attachment of labels or the adoption of other means for the purpose of identifying the factory at which each article was made ;

(j) in the case of sellers of any medicines, drugs or articles of food or drink for human consumption (other than the flesh of pigs, milk, butter, bread, biscuits, cake, fruit, vegetables, aërated or other potable waters, or ice) which are of a perishable nature,—

(30) the disposal of any articles which may be found to be unwholesome ;

(k) in the case of sellers of water to be used for drinking purposes,—

(31) the sources from which such water shall be taken, and

(32) the taking of measures to ensure the cleanliness of mussucks or any other vessels or utensils used for carrying such water ;

(l) in the case of washermen,—

(33) the places at which clothes may be washed, dried or kept ;

(m) in the case of dealers in hay, straw, wood, charcoal or other inflammable material,—

(34) the places at which such materials may be kept,

(35) the quantity which may be stored at any one place, and the manner of storing, and

(36) the precautions against fire to be taken by the dealer or the person in charge of the business;

(n) in the case of dealers in fire-works, petroleum, kerosine oil or any other inflammable oil or spirit,—

(37) the places at which, and the quantities in which, any such article may be stored or kept for sale, and

(38) the taking of any measures which the Cantonment Authority may consider necessary for the prevention of danger to life or property;

(o) in the case of tanners and dyers,—

(39) the taking of measures for regulating the discharge of refuse matter from their premises and for abating any nuisance arising from such premises;

(p) in the case of persons carrying on any trade or occupation from which offensive or unwholesome smells arise,—

(40) the taking of any measures which the Cantonment Authority may consider necessary for the abatement of any nuisance arising from the premises.

Feeding animals on filth, etc.

5. No person holding a license under rule 3 for keeping for profit milch cattle or milch goats, or pigs or any other animal which may be used for human consumption, shall allow the same—

(a) to be fed upon refuse or any filthy or deleterious substance, or

(b) to graze in any place in which grazing has for sanitary reasons been prohibited by public notice issued by the Cantonment Authority.

Adulteration of milk.

6. No dairyman holding a license under rule 3 shall mix water with, or otherwise adulterate, any milk intended for sale.

Adulteration of butter.

7. No butterman holding a license under rule 3 shall adulterate any butter intended for sale.

Selling food or drink unfit for human consumption.

8. No person holding a license under rule 3 shall sell any article of food or drink for human consumption which is unfit for that purpose.

Removal of brothels or prostitutes.

9. The Cantonment Authority may, by notice in writing, prohibit—

(a) the keeping of a brothel, or

(b) the residence of a public prostitute,

in any part of the cantonment specified in the notice.

Power to suspend or withdraw license.

10. (1) If any person holding a license under rule 3 fails to comply with any condition imposed upon him under rule 4, or does any act in contravention of rules 5, 6, 7 or 8,

the Cantonment Authority may, in addition to any punishment which may be inflicted under rule 11, by order, suspend the license for any period specified in such order, or withdraw the license.

(2) No person who has obtained a license under these rules for carrying on a trade, calling or occupation in any part of the cantonment shall carry on such trade, calling or occupation in that part while such license is suspended or after the same has been withdrawn.

Penalties.

11. (1) Whoever fails to observe any condition imposed under rule 4, clauses 1 to 16, 20 to 25, 30, or 34 to 39, all inclusive, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days, and, in case of a continuing failure, with an additional fine which may extend to five rupees for every day after the date of first conviction on which the failure is proved to have been persisted in.

(2) Whoever—

(a) commits any breach of rule 3 or rule 4, clause (2), or

(b) fails to comply with any condition imposed under rule 4, clauses (17), (18), (19), (26), (27), (28), (29), (31), (32), (33) or (40), or

(c) does any act in contravention of rules 5, 6, 7 or 8, or

(d) disregards any prohibition made by notice under rule 9,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days, and, in case of a continuing offence or failure, with an additional fine which may extend to five rupees for every day after the date of first conviction on which the offence or failure is proved to have been persisted in.

Lieutenant-Colonel P. D. Barclay resigns his commission.

No. 507.—*2nd Battalion, Bombay, Baroda, and Central India Railway Volunteer Rifle Corps*—

Captain F. Hutchinson, Lieutenant L. S. Newmarch (Captain, Indian Staff Corps), and

Lieutenant J. W. D. Johnstone, Unattached List, resign their commissions.

No. 508.—*Malabar Volunteer Rifles*—

Second-Lieutenant H. S. Mullins, Unattached List, resigns his commission.

MARINE DEPARTMENT.

APPOINTMENTS.

No. 28.—Mr. John Andrews, officiating Superintending Engineer, Mandalay, is confirmed in that appointment, with effect from the 27th April 1896.

FURLOUGH AND LEAVE.

No. 29.—The undermentioned officer has been granted an extension of leave by the Secretary of State for India:

Assistant Engineer T. P. Barnaby, Royal Indian Marine, (m. c.) for three months.

RETIREMENTS.

No. 30.—Mr. James McDonald, Engineer, Royal Indian Marine, has been temporarily transferred to the retired list by the Secretary of State for India, with effect from the 25th April 1896.

No. 31.—Sub-Lieutenant G. T. Macfarlane, Royal Indian Marine, has been permitted by the Secretary of State for India to retire from the service, with effect from the 5th April 1896.

P. J. MAITLAND, *Major-General,*
Secretary to the Government of India.

MILITARY DEPARTMENT.

NOTIFICATION.

Simla, the 1st May, 1896.

Under clause 53 of the Regulations appended to the Regimental Debts Act of 1893, it is notified that reports of the deaths of the undermentioned commissioned and warrant officers, on the dates specified, were received in the Military Department between the 25th April and the 1st May 1896:

Corps.	Rank and Names.	Date of decease.	Place of decease.	Testate or Intestate.	Remarks.
Indian Staff Corps (3rd Bombay Light Cavalry).	Lieutenant E. W. Wadington	19th April 1896.	Deesa.		
Ordnance Department, Bengal.	Sub-Conductor A. A. Robertson.	4th April 1896.	Calcutta.		

Statement of Deposits on account of Estates between the 18th April and the 1st May 1896.

On whose account.	Rank.	Corps.	Date of decease.	Testate or Intestate.	Total unclaimed amount deposited. Rs. a. p.	Amount paid in India.	Date to which claims will be received.
George Nelis	Surgeon-Captain.	Army Medical Staff.	9th June 1895	Intestate	10 8 0		
Acton Alexander Graves. (a)	Captain	Indian Staff Corps (20th Bombay Infantry).	2nd January 1896.	Intestate	1,537 13 5	...	30th June 1896.

(a) Mother—Mrs. R. S. Graves, 1, Royal Crescent, Don Road, St. Heliers, Jersey.

P. J. MAITLAND, *Major-General,*
Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 28th April, 1896.

No. 206.—With reference to Government of India, Public Works Department, orders quoted in the margin, it is hereby notified that an examination for the appointment of Probationers to the Superior Traffic Department of State Railways will be held this year on the 23rd November and four following days, when three vacancies will be offered for competition to nominated candidates.

Public Works Department Circular No. 2, Railway, dated 10th October 1888, published in Part I of the *Gazette of India* of the 27th October 1888, pages 489 to 491.

Public Works Department Circular No 2, Railway, dated 21st March 1893, published in the Supplement to the *Gazette of India* of the 1st April 1893, pages 523 and 524.

No. 207.—Babu Arobinda Prakash Mullick, Apprentice Engineer, Assam, is permanently promoted to Assistant Engineer, 3rd Grade (old classification), with effect from the 15th July 1895.

The 29th April, 1896.

No. 208.—Mr. M. P Schembry, Traffic Inspector, is appointed to officiate as Assistant Traffic Superintendent during the absence of Mr. L. C. D. Bean, District Traffic Superintendent, North Western Railway, on furlough, or until further orders.

The 30th April, 1896.

No. 209.—Mr. W. T. Porter, Accountant, 2nd Grade, attached to the Office of the Examiner of Accounts, Bezvada-Madras Railway, is placed in charge of that office, during the absence of Mr. A. Grant, Examiner of Accounts, on privilege leave.

No. 210.—Mr. M. J. Chabrel, Executive Engineer, 2nd Grade, State Railways, is permitted to retire from the service of Government, under Article 712 (*c*) of the Civil Service Regulations, with effect from the 23rd May 1896.

No. 212.—The Governor General in Council is pleased, under Section 16 (1) of the Indian Railways Act (IX) of 1890, to sanction the use of locomotive engines and of rolling stock to be drawn or propelled thereby on such portion or portions of the Karikal-Peralam Railway as are situate in British territory.

The 1st May, 1896.

No. 213.—Mr. J. Benton, Executive Engineer, 1st Grade, Punjab, is appointed to officiate as a Superintending Engineer, with effect from the afternoon of the 14th April 1896, during the absence of Mr. S. Preston on privilege leave, or until further orders.

No. 215.—The following promotions are ordered in the Accounts Branch:

Names.	From	To	Nature of promotion.	With effect from
Sweet, G. W.	Examiner, 4th Class, 2nd Grade, sub. *pro tem.*	Examiner, 4th Class, 2nd Grade.	Permanent	7th December 1895.
Rai Mungal Sain, *Bahadur.*	Deputy Examiner, 1st Grade.	Examiner, 4th Class, 3rd Grade.	Temporary	4th March 1896.
Ross, C. E.	Examiner, 4th Class, 3rd Grade, sub. *pro tem.*	Examiner, 4th Class, 3rd Grade.	Permanent	7th April 1896.
Turner, W. H. E.	Deputy Examiner, 2nd Grade.	Deputy Examiner, 1st Grade.	Permanent	7th April 1896.
Balarama Iyer, K.	Assistant Examiner, 1st Grade.	Deputy Examiner, 2nd Grade.	Permanent	1st April 1896.
Philips, G. W. V. de-Rhé.	Assistant Examiner, 1st Grade.	Deputy Examiner, 2nd Grade.	Permanent	1st April 1896.
Bayly, W. G. G.	Assistant Examiner, 1st Grade.	Deputy Examiner, 2nd Grade.	Permanent	1st April 1896.
Durant, W. E.	Deputy Examiner, 1st Grade.	Examiner, 4th Class, 3rd Grade.	Temporary	7th April 1896.
Gaynor, M. H.	Deputy Examiner, 1st Grade.	Examiner, 4th Class, 3rd Grade.	Temporary	8th April 1896.

No. 216.—Lieutenant W. C. Smyth, R.E., Assistant Engineer, 1st Grade, State Railways has been permitted by Her Majesty's Secretary of State for India to undergo a course of instruction for promotion, lasting from 23rd March 1896 to about 4th May 1896, and to add an equivalent period to his leave of one year on private affairs, from 19th October 1895, sanctioned in Director General of Railways' Notification No. 64, dated 27th September 1895.

No. 217.—Mr. H. M. C. Trotter, Deputy Examiner, Class II, is appointed to officiate as Examiner of Accounts, Burma State Railway, in Class IV of Examiners (new classification), during the absence of Mr. E. H. Johns on privilege leave.

TELEGRAPH.

The 1st May, 1896.

No. 214.—The Governor General in Council is pleased to permit Mr. W. Small, Assistant Superintendent, Class VII, 1st Grade, Indian Telegraph Department, to retire from the service, with effect from the forenoon of the 28th March 1896.

No. 218.—The Governor General in Council is pleased to order the following temporary and officiating promotions in the Superior Establishment of the Indian Telegraph Department, with effect from the dates specified:

Names.	From	To	Date.
Mr. J. J. Allen	Chief Superintendent, Class IV.	Director, Class III, temporary.	5th March 1896.
Mr. H. S. Styan	Assistant Superintendent, Class VI, 1st Grade.	Superintendent, Class V, 2nd Grade, temporary.	15th March 1896.
Mr. F. Mercer	Assistant Superintendent, Class VI, 2nd Grade.	Superintendent, Class V, 2nd Grade, officiating.	19th March 1896.

The 30th April, 1896.

No. 211.—The following is published for general information:

No 293 R. T., dated 27th April 1896.

RESOLUTION—By the Government of India, Public Works Department.

General Rules for railways under construction.

Read—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act (IX) of 1890.

Government of India, Public Works Department, notification No. 480½, dated the 30th October 1890, publishing in the *Gazette of India* of the 8th November 1890 the Government of India resolution No. 736 R. T., dated the 17th October 1890, and the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods.

Letter from the Joint Secretary to the Government of Madras, Public Works Department, Railway Branch, No. 278 R., dated the 25th March 1896, forwarding letter No. 248, dated the 20th March 1896, from the Agent, South Indian railway.

OBSERVATIONS.—The South Indian Railway Company has applied for leave to adopt, on the Karikal-Peralam railway, the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods, which rules were published in the *Gazette of India* of 8th November 1890, under Public Works Department notification No. 480½, dated the 30th October 1890.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules which are referred to in the foregoing observations to such portion or portions of the Karikal-Peralam railway as are situate in British territory and may have been sanctioned for construction.

ORDER.—Ordered, that the General Rules, which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the engineer in charge of the construction of the railway.

Ordered also, that this resolution be communicated to the Joint Secretary to the Government of Madras, Public Works Department, Railway Branch, for information and guidance, and that it be published under a notification in Part I of the *Gazette of India*.

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 25th, 1896.

The principal feature in the weather of the past week has been the appearance of slight barometric depressions on the north-west frontier. The first of these depressions passed on a curved course through Sind, Rajputana, and the south-east of the Punjab, and thence travelled along the foot of the Himalayas until absorbed in the large area of low pressure which lay over West Bengal and the east of the Gangetic Plain. The second depression passed from Sind into Rajputana and there filled up, and the third depression had only begun to appear over Sind at the close of the week. These depressions occasioned brisk changes of pressure in North-Western India and were accompanied with strong winds at times, but their general affect on the weather was small, and only on one day was there any rain of importance in North-Western India. In other parts of the country the changes of pressure were slight and the general distribution underwent very little alteration from day to day, but towards the close of the week the southerly winds at the head of the Bay increased in strength, and thundershowers were received at a few stations in North-Eastern India. The mean temperature has steadily risen during the week, and the depression of temperature which prevailed during the first four days disappeared on the 23rd, when it was replaced by a slight excess.

Daily Summary.—*Sunday, April 19th.*—Pressure was decreasing over Baluchistan and the western desert, and increasing elsewhere. A slight depression was shown with its centre near Jacobabad, while readings were high in Tenasserim and over Rajputana and Central India. The winds were feebly cyclonic near the depression, westerly down the Gangetic Plain, northerly in Lower Bengal, and variable elsewhere. The mean temperature was excessive over the Peninsula, Burma, Assam, and Lower Bengal, and in defect in other places. The deficiency was greatest (12·5°) at Neemuch and Ajmere, and the excess greatest at Salem and Trichinopoly. Light to moderate showers were reported from the Peninsula, and light showers from Assam.

Monday, April 20th.—Pressure had decreased over the east of the Punjab, the west of the North-Western Provinces, and the east of Rajputana, and had increased elsewhere. The depression from the Indus Valley had marched north-westward and was central over Sirsa. The positions of the high pressure areas were the same as on the 19th. The winds were cyclonic around the depression and were unchanged in other parts of the country. The mean temperature remained excessive over the Peninsula, Burma, Assam, and Lower Bengal, and in defect of the normal elsewhere. The greatest deficiency (10°) was reported from Nowgong and Sutna. There had been a few light showers over the Peninsula and the Assam Valley.

Tuesday, April 21st.—Pressure had changed irregularly, the principal alterations being a brisk fall over the Gangetic Plain, and a brisk rise over the Central Punjab. The depression was drifting eastward along the Himalayas, and the lowest pressure was reported from Bareilly. Readings were high in Tenasserim and the Indus Valley. Northerly winds prevailed over the Punjab, Kathiawar, and down the West Coast, but elsewhere the directions were rather variable. The mean temperature was in excess of the normal over Assam, Lower Bengal, Lower Burma, and the south of the Peninsula. Some showers had been received in Madras.

Wednesday, April 22nd.—The barometer had fallen briskly to rapidly over Baluchistan and the western desert, and had changed only slightly in other places. A slight fresh depression had appeared over the Indus Valley. The

winds were irregular. The area of relatively low temperature had contracted considerably and was confined to the Punjab, Upper Sind, Rajputana, and the Gangetic Plain. In most other places the heat was excessive. Hardly any rain was reported.

Thursday, April 23rd.—The barometer has risen, except over Rajputana, where there had been a slight fall. The depression noticed over the Indus Valley on the 22nd was passing through Rajputana, and steepish gradients prevailed on its northern side. Northerly winds were reported over the Punjab, and very variable breezes in most other places. The mean temperature was low over the Gangetic Plain and the north of the Punjab, and high in other parts of the country. A few showers were reported from the north-west and north-east of India and from the south-west of the Peninsula.

Friday, April 24th.—Pressure had increased over the Peninsula, Sind, and Rajputana, and had fallen elsewhere. The depression had disappeared, and readings were lowest over the Gangetic Plain. The wind was northerly over North-Western India, southerly over the Bay, and more or less variable elsewhere. The mean temperature was relatively low over the north of the Punjab, the North-Western Provinces, and West Bengal, and was high elsewhere. Some showers had been received at a few places in North-Eastern India.

Saturday, April 25th.—The barometer had fallen briskly over the Punjab, and a slight depression was appearing over the Indus Valley. In other places there was relatively little change. The wind was shifting towards east in the Punjab, but in other parts of the country the directions were similar to those reported on the 24th. The mean temperature was low in the Madras coast districts and over North-Eastern India. Rain had been received in Sikhim, in North and East Bengal, and in parts of Burma.

Temperature.—The area of low temperature which was spreading over India from the north-west at the close of last week occupied nearly the whole of Northern and Central India on the first day of the present week, and the abnormal depression of temperature at the centre of the area was as much as 12·5°. After the first day both the extent and intensity of the area began to diminish, and this change progressed until by the 23rd it had become quite a small area only covering the Gangetic Plain, and by the 25th had wholly disappeared. This gradual contraction of the low temperature area and its replacement by temperatures exceeding the normal average was the principal feature in the temperature changes of the week.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	April 1896.							Mean variation of week.
	19th	20th	21st	22nd	23rd	24th	25th	
	°	°	°	°	°	°	°	°
Burma	+3·6	+2·5	+1·8	+1·3	+0·6	+1·0	+0·2	+1·6
Bengal and Assam	+0·1	−1·3	−1·5	+0·9	+1·1	+2·2	0	+0·2
North-Western Provinces and Oudh	−9·5	−7·5	−4·1	−4·8	−2·6	−1·1	+1·7	−4·0
Punjab	−7·7	−4·5	−6·0	−2·8	−1·4	−0·7	+2·4	−3·0
Bombay	−1·0	−0·8	−0·3	+1·2	+1·7	+2·8	+3·3	+1·0
Central Provinces and Berar	−5·5	−5·8	−5·4	−3·4	−1·9	+0·9	+3·8	−2·2
Central India and Gujarat	−8·8	−6·1	−2·4	−1·3	+1·0	+3·2	+5·3	−1·3
Sind and Rajputana	−9·4	−5·2	−2·7	−3·7	+4·1	+3·6	+4·3	−1·3
Madras	+3·5	+1·1	−0·3	+0·2	+0·6	+0·7	+0·5	+0·9
Mean for whole of India	−3·9	−3·1	−2·2	−1·4	+0·4	+1·4	+2·4	−0·9

From the 19th to the 22nd the area of low temperature noticed above covered the greater part of the Indian region, and the mean temperature of the whole region was below the average by amounts decreasing from 3·9° to 1·4°. On the 23rd the areas of high and of low temperature were about equal, and the variation was only +0·4° for the whole of India. Thereafter the excessive temperatures gained on area of low temperature, and the variations for the last two days exhibited increasing excess.

The following were the maximum temperatures throughout India reported on each day:

April	19th	110·3°	at	Cuddapah.
"	20th	108·1°	"	Yamethin and Minbu.
"	21st	107·3°	"	Cuddapah.
"	22nd	110·5°	"	Deesa.
"	23rd	111·5°	"	"
"	24th	112·5°	"	"
"	25th	113·5°	"	"

Rain.—A change has occurred in the distribution of the rainfall over India in the present week as compared with its distribution in preceding weeks. The slight barometric depressions which appeared over North-Western India during the week, though exercising considerable influence on the winds and occasioning sharp changes in pressure, yet gave rain only on one occasion and then only an insignificant amount. The rainfall of the week was thus confined to two regions, *viz.*, North-Eastern and Southern India. In both regions the rainfall occurred during duststorms and thunderstorms. In North-Eastern India the fall was associated with strong winds from the Bay, and with light easterly winds over Assam and North Bengal, and in Southern India with light and variable breezes. In neither region was there any specially rainy period during the week, but the showers fell on different days throughout the week. The concluding table gives the rainfall data. Rain was received in twenty-one of the rainfall divisions as compared with twenty-four last week. Of these twenty-one divisions fourteen received effected rainfall, that is, an average fall of one-tenth of an inch or more per division. These fourteen divisions included Lower and Central Burma, all the Assam divisions, the East, Deltaic and hill divisions of Bengal, the Malabar Coast, Madras (South-Central), Coorg, Mysore, the East Coast (North), and Madras (Central). In all other parts of India the week's rainfall was either absolutely *nil*, or so small as to be quite unimportant. The heaviest average fall was 0·78 inch in the Bengal Hills, followed by 0·72 inch in Lower Burma, and by about 0·50 inch in Central Burma and the Assam divisions. The second column of the table shows the anticipated rainfall of the week in the different provinces. In Assam and the Bengal Hills the average normal fall is between 2 and 3 inches, and in East, Deltaic and North Bengal over 1 inch, but elsewhere the normal rainfall is less than an inch, and over a large part of the country is very small indeed. Yet with four unimportant exceptions, this small amount has not been received, and the week's rainfall is almost everywhere deficient. The exceptions are Lower Burma, which received nearly half an inch more than the normal, and Central Burma, the East Coast (North), and Madras (Central), which received a trifle more than the usual amount. The greatest deficiency was in Assam and parts of Bengal, where it amounted to between 1 inch and 2½ inches, but in the south-west and south of the Peninsula and in Tenasserim the deficiency exceeded half an inch.

The three concluding columns of the table exhibit the state of the seasonal rainfall. Between March 1st and April 25th the total rainfall has been excessive only in Western Rajputana. In Assam (Surma, Brahmaputra, and Hills), in Baluchistan, and in the East Coast (North) the rainfall for the period has been about normal, that is, has varied by less than 20 per cent. from the average, while in all other parts of the country it has been deficient. In West Bengal, Central Bengal, the central parts of the country, and part of North-Western India there has been practically or actually no rain throughout the whole season.

The following are the principal totals—in all cases small—recorded during the week under review:—Bassein 2·05 inches, Toungoo 3·26 inches, Dacca 1·48 inches, Jorhat (Sibsagar) 4·11 inches, Faridpur 1·35 inches, Darjeeling 1·39 inches, Badagara (Malabar) 1·80 inches, Magadi (Bangalore) 2·05 inches, Palakonda (Vizagapatam) 1·95 inches, Madanapalli (Cuddapah) 1·77 inches. As an example of the lightness of the rainfall in the north-east this week, as compared with last, it may be mentioned that at Cherrapunji this week the total rainfall was only 0·45 inch, while last week it was 22·16 inches.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING APRIL 25TH, 1896.			RAINFALL DATA FROM MARCH 1ST TO APRIL 25TH, 1896.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *30th April 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 25th April.*—Moderate rain or showers fell in parts of the Circars, Deccan, Southern and West Coast districts. Preparations for next season are going on steadily. Harvest operations continue in some districts with moderate yield. Pasture is scarce, but fodder is available. The condition of cattle is generally good. Prices are stationary.

Bombay.—*For week ending 29th April.*—Slight rain fell in parts of Poona, Sholapur and Satara. Wheat is blighted in one taluka of Karachi; but the standing crops are otherwise good. Cotton-picking continues in parts of the Karnatak, and harvesting of the late crops generally in seven districts. Preparations for next season are progressing in eighteen districts. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in five districts. Prices are normal, except in Ahmednagar and Sholapur.

Bengal.—*For week ending 27th April.*—Rain fell in Eastern and parts of Northern and Central Bengal during the week, benefitting the crops in the ground and helping the preparation of lands for the sowing of the rice and jute crops; elsewhere there was practically no rain, and agricultural operations are at a standstill. Spring rice is being harvested, but it has suffered from the absence of rain. Cattle are generally in good condition, except in some parts of Midnapore, Purnea and Patna. Scarcity of drinking water continues to be reported from places in the Burdwan and Presidency divisions. The price of rice has risen as compared with last year in many districts, principally in those of Eastern Bengal and Chota Nagpur.

North-Western Provinces and Oudh.—*For week ending 29th April.*—The weather continues seasonable. Threshing and winnowing are practically completed. The extra crops are flourishing and are being irrigated where practicable. Damage by hail is reported in some parts of Almora, to the extra crops in Hardoi by hot winds and want of rain, and to mangoes in Bahraich by strong winds. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 25th April, were—Banda 94,814, Hamirpur 44,090, Jhansi 29,511, Jalaun 24,118, Allahabad 4,394, Pilibhit 2,343, Garhwal 1,771—total 2,01,041; of this number 29,750 were dependants gratuitously relieved on the works and 3,807 persons received gratuitous relief under other provisions of the Famine Code. Greater prominence is now being given to village relief works in Bundelkhand, but only two districts have reported the number employed on such works, namely, Hamirpur 11,688 and Jalaun 4,037. The further extension of village works will relieve the pressure on the large works managed by the Public Works Department and save the people from exposure during the great heat. The reduction in the number of relief workers in Pilibhit is due to the more strict enforcement of the labour task. Supplies continue to be sufficient. Fodder is becoming scarce in places and deficiency of water is reported in Banda, Dudhi,

South Mirzapur and Lucknow. Prices are fairly stationary, but show a tendency to rise in some districts and fall in others.

Punjab.—*For week ending 29th April.*—Slight rain has fallen in the Rawalpindi and Peshawar districts only. The canal crops are being threshed in Hissar, and spring threshing is in progress in Umballa and Jullundur. The extra spring sowings have been completed in Jullundur and are in progress in Dera Ismail Khan. The autumn sowings have commenced in Mooltan. Sowings of cane and cotton are in progress in Gujranwalla, of cotton and indigo in Rohtak, of cotton and other crops in Lahore, and of *jowar* (*Sorghum vulgare*) and cotton in Gurgaon. Sowings of cotton and sugarcane in Sialkot and harvesting of the spring crops in Amritsar are nearly completed. The spring crops are being reaped in Ferozepore, Mooltan, Rawalpindi and Dera Ismail Khan. The extra spring crops are in good condition in Amritsar, Lahore and Dera Ismail Khan. The condition and prospects of the spring crops are generally reported average in irrigated and below average in unirrigated tracts. The stock of food-grain is reported to be insufficient in Ferozepore, Sialkot, Rawalpindi and Dera Ismail Khan. Cattle are in poor condition in Hissar and Shahpur, and they are dying of starvation in Hissar. Fodder is scarce in all districts, except Jullundur, Ferozepore, Sialkot and Dera Ismail Khan. Prices are normal in Ferozepore and are falling in Karnal and Gujranwalla, but are high elsewhere.

Central Provinces.—*For week ending 29th April.*—The weather is very hot and is occasionally cloudy in the north. Preparation of land for the autumn sowings is in progress. Scarcity of fodder and water continues in some districts. Prices are almost stationary, except in Bilaspur where wheat shows a tendency to cheapen, but the price of rice is rising.

Burma.—*For week ending 25th April.*—In Upper Burma reaping of dry-weather paddy is progressing in several districts. Cultivation of early wet-weather paddy continues in Kyaukse and the Southern Shan States. The standing crops are generally in good condition, but rain is required for the dry-weather paddy crops in Yamethin. The price of paddy has risen considerably in Minbu and slightly in Thaton and Magwe, while it has fallen slightly in Bassein and Thayetmyo; elsewhere prices are stationary.

Assam.—*For week ending 28th April.*—The weather is cloudy. Sowing of early rice and plucking of tea continue. Planting of sugarcane has commenced. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 29th April.*—MYSORE: Rain fell nearly all over the State, except in Hassan. Prospects are favourable. The standing crop is withering in parts of Kolar and Chitaldroog, but is good elsewhere. Prices have risen in Hassan, but have fallen in the Shimoga, Mysore, Kadur and Chitaldroog districts.

COORG.—Want of rain is much felt in parts. Water and fodder for cattle are insufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 29th April.*—BERAR: The weather is hot and cloudy. Ploughing of fields for the monsoon sowings continues. Fodder is getting scarce, and the water-supply is reported scanty in all districts. Prices of food-grains are above normal in Wun, but are stationary elsewhere.

HYDERABAD.—Rainfall moderate. The crop on irrigated areas is drying up in a few places for want of water. Fodder is getting scarce. Prices are normal.

Central India.—*For week ending 29th April.*—No rain during the week. Agricultural operations are in progress in Malwa and Bhopawar, but have been completed elsewhere. The condition of agricultural stock and pasturage is bad in some districts of Gwalior and is indifferent in others, but is fairly good in all other Agencies. Prices of food-grains are rising in Baghelkhand and in five districts of Gwalior, and are above normal in Malwa and Goona; elsewhere prices are normal. Opium is in fairly good condition in Gwalior, Malwa and Goona. 2,800 people were employed on famine works on the Goona-Bina line, and 1,856 on relief works and 416 on gratuitous relief in Bundelkhand.

Rajputana.—*For week ending 29th April.*—Agricultural operations are generally satisfactory, except in Merwara where the harvest is poor. The crops are very poor in Jaisalmere. The unirrigated crops are suffering in Ajmere-Merwara, and have been damaged in Dholepore for want of rain. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk, Jaisalmere and parts of Merwar, and fodder is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in six States, and fluctuating in two, but are steady elsewhere. In Marwar 4,436 persons are on relief works, and 228 on gratuitous relief, in Shahpura 400 are on relief works, and 25 on gratuitous relief, in Merwara 1,279 are on relief works, in Bikanir 2,125 are on relief works, and 260 on gratuitous relief, in Jaisalmere 296 are on relief works, and 42 on gratuitous relief.

Kashmir.—*For week ending 29th April.*—KASHMIR VALLEY.—The weather is fine. Autumn sowings are still in progress. The spring crops are excellent. Prices continue normal.

JAMMU PROVINCE.—*For week ending 29th April.*—Heavy rain is reported from Skardu. Harvesting of the spring crops is in progress. Cattle are in fair condition. Prices are stationary.

Nepal.—*For week ending 25th April.*—The weather is somewhat cooler than last week. Wheat and barley have been harvested. The outturn is very poor. More rain is wanted for Indian-corn.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

INVENTIONS and DESIGNS.

Calcutta, the 30th April 1896.

NOTIFICATIONS.

No. 1197 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 25th April 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 136 of 1896.—Hugh McEwing, 4th engineer, S. S. *Goorkha*, and Shore Street, Campbeltown, Argyllshire, Scotland, for improvements in locks and padlocks.

No. 137 of 1896.—Alois Wolfmüller, engineer, of Landsbergam Lech, in the empire of Germany, for improvements in and relating to motor propelled velocipedes.

No. 138 of 1896.—L. Sardari Mal, deputy superintendent, settlement department, now attached to Lahore and Multan, Public Works divisions, for a corn grinding mill fitted with an improved machinery.

No. 139 of 1896.—The Apostoloff Automatic Telephone Parent Syndicate, Limited, of 13 and 14, Abchurch Lane, in the city of London, for a system of automatic telephone exchange.

No. 140 of 1896.—John Melvill Boustead, merchant, Colombo, Ceylon, for improved apparatus for desiccating.

No. 141 of 1896.—James Balfour Thomson manager, Union Jute Mills, Sealdah, in the suburbs of Calcutta, for fixing power looms or other machinery to stone, patent stone, concrete, granolithe, brick or other floors, to be called "Thomson's machine-fixing rail."

No. 142 of 1896.—Melvin Linwood Severy, of 31, Milk Street, Boston, in the county of Suffolk and commonwealth of Massachusetts, United States of America, for improvements in platens, impression cylinders and the like for printing presses, type-writers and similar machines.

No. 143 of 1896.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, North Britain, for improvements in or connected with webs, trays, flaps or carriers for carrying tea leaf or other substances in drying machines.

No. 1198 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the

office of the Secretary in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 108 of 1895.—Edward Herbert Stone, civil engineer, residing at Calcutta, British India, for an automatic release apparatus applicable to railway signals. (Filed 31st January 1896.)

No. 119 of 1895.—Edward Herbert Stone, civil engineer, residing at Calcutta, British India, for an improved point lever apparatus for working coupled points on railways. (Filed 31st January 1896.)

No. 189 of 1895.—William Martin, retired indigo planter, of Agra, now residing at Simla, for a five-roller hand cotton-gin intended for the use of cotton growers. (Filed 15th February 1896.)

No. 348 of 1895.—John William Ward, contractor, residing at the Gymkhana Hotel in Bombay, for an automatic bit. (Amended specification filed 21st April 1896.)

No. 86 of 1896.—Percy John Ogle, engineer, of 4, Bishopsgate Street, Within, in the city of London, for improvements in envelopes for enclosing letters or other articles, applicable also to letter cards, or letter paper and envelopes combined, and for securing lids on boxes. (Filed 16th April 1896.)

No. 1199 P.—THE fee prescribed in Schedule 4 of Act V of 1888 has been paid for the continuance of exclusive privilege in respect of the undermentioned invention for the period shown :—

No. 274 of 1891.—Thomas Wilson Anderson, merchant, of 5, Fairlie Place, Calcutta, for improvements in punkah actuating mechanism or apparatus. (From 3rd May 1896 to 2nd May 1897.)

No. 1200 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, subsection (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 272 of 1890.—Mr. E. Fahrig's invention for an improved composition applicable for electrical insulating and other purposes and the process for manufacturing the said composition. (Specification filed 25th January 1892.)

No. 203 of 1891.—Lieutenant A. C. deL. J. deLotbinière's invention for a spring stirrup to be called the de Lotbinière spring stirrup. (Specification filed 21st January 1892.)

No. 306 of 1891.—Mr. C. P. Hammond's invention for improvements in metal ties for railways. (Specification filed 23rd January 1892.)

No. 339 of 1891.—Mr. W. D. Bohm's invention for improvements in and apparatus for the separation of gold and silver from ores or materials containing them. (Specification filed 22nd January 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

CIVIL ENGINEERING COLLEGE, SIBPUR.

SESSION 1896-97.

Candidates for admission to the Engineer Department should apply to the Principal before the 15th May, 1896. The session begins on Monday, the 1st June, 1896. Candidates must furnish proof that they have passed one of the following tests :—

(1) The F. A. Examination of the Calcutta University or a similar standard of any Indian University recognised by the Calcutta University. The candidate's age must be under 21 years.

(2) The B. A. Examination in the B. course. The candidate's age must be under 23 years. (These students are admitted direct into the 2nd year class.)

The number to be admitted each year is limited to 40. The position in the University Examinations and the age of candidates will be taken into consideration when selection is made, and such selection will be made by the Principal.

Ten scholarships will be awarded to students entering the Engineer Department, not being already holders of junior or senior scholarships. Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eyesight.

Further particulars will be supplied on application to the Principal.

J. S. SLATER,
Principal, Civil Engineering College.

Unclaimed Letters held in the Barrackpore Post Office on the 27th April, 1896.

Elder, Mr.
Hawrad, L. G.
Sloyd, C.
Tydd, F. Ashley.

The 2nd May, 1896.

SEA AND FOREIGN MAILS.

Mails for	Date of closing at Calcutta.	Route by which despatched.
	1896.	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., Natal, and Cape Colony, and in general all countries served through the United Kingdom.	6th May	Per P. & O. Str. from Bombay.
Straits Settlements, China, and Japan.	5th „	*Viâ* Tuticorin and Colombo.
*Australasian Colonies . .	2nd „	Ditto.*
Ditto ditto . .	9th „	Ditto.
Colombo	11th „	Per P. & O. Str. *Chusan.*
Straits Settlements, China, and Japan.	5th „	Per Steamer *Suisang.*
Rangoon and Moulmein . .	8th „	Per Steamer *Nerbudda.*
Rangoon, Moulmein, Penang, and Singapore.	5th „	Per Steamer *Malda.*
Akyab, Kyaukpyu, Sandoway, and Rangoon.	6th „	Per Steamer *Karagola.*

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up at 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS.

Presidency Postmaster, Calcutta.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—per four-ounce tin, *R2-8;* per eight-ounce tin, *R5;* per pound tin, *R10.* The general public can be supplied by the Superintendent, Botanic Garden, *for cash only,* at the under-noted rates: per four-ounce tin, *R3;* per eight-ounce tin, *R6;* per pound tin, *R12.* This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فیوج یعنی تپ بهگانے والے سنکونا ٭

سنکونا فبري فیوج کلکته کے بوٹانکل گارڈن یعنی کمپني باغ کے سپرنٹنڈنٹ صاحب سے هرایک ملازم سرکاري اور ایك مشت چهه پونڈ تک لینے والا هر آدمی حسب نرخ ذیل خرید کرسکتا هی— یعنی چار اونس والا ٹین بقیمت دو روپیه آٹهه آنه ؛ آٹهه اونس والا ٹین بقیمت پانچ روپیه ؛ ایک پونڈ والا ٹین بقیمت دس روپیه ٭

عام آدمیوں کو یهه دوا بوٹانکل گارڈن یعنی کمپنی باغ کے سپرنٹنڈنٹ صاحب سے بقیمت نقد حسب نرخ ذیل مل سکتي هی - یعنی چار اونس والا ٹین بقیمت تین روپیه ؛ آٹهه اونس والا ٹین بقیمت چهه روپیه ؛ ایک پونڈ والا ٹین بقیمت باره روپیه ٭

یهه دوا کلکته کے بڑے بڑے ولایتي اور دیسي دواخانوں میں بهي بکتي هی - ماسواے قیمت مذکورۂ بالا کے محصول ڈاک چار اونس والے ٹین کا چار آنه ؛ آٹهه اونس والے ٹین کا آٹهه آنه ؛ رو ایک پونڈ والے ٹین کا باره آنه ٭

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or, post free,	R18-12.
½	„	R 9,	„	R9-8.
¼	„	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন .	১৮৲	বা ডাকমাশুল বিনা	১৮৸০
॥ আধ	৯৲	„	৯৷০
। সিকি	৪৷০৲	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনী-ডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

METEOROLOGICAL PUBLICATIONS FOR SALE.

At the Meteorological Office, No. 5, Russell Street, Calcutta, at the prices specified below:—

Hand-book of Cyclonic Storms in the Bay of Bengal for the use of Sailors, describing the phenomena of Cyclonic Storms and Cyclones in the Bay of Bengal, and giving a brief account of six typical Bay of Bengal Cyclonic Storms. It also gives practical hints to sailors respecting Cyclonic Storms in the Bay. Demy, 212 pages, 29 plates (shewing diurnal oscillation of barometer at different Latitudes and Longitudes, mean monthly barometric height, tracks of different Cyclonic Storms, etc., etc.) R5.

Rainfall Map of India in two sheets, scale 64 miles to one inch, showing the annual distribution of rainfall in India (in colours). R3.

Instructions to Observers of the India Meteorological Department, in which are described in detail the various Meteorological instruments in use at the Meteorological observatories, with full instructions how to read them, etc. Demy, 103 pages. R3.

Tables for the Reduction of Meteorological Observations in India. This book contains tables for reducing barometric observations taken at different heights, and for calculating humidity and vapour tension, etc., etc. R2

Barometer, Wind and Current Charts of the Bay of Bengal and adjacent sea, north of the equator. R5.

Charts of the Bay of Bengal and adjacent sea north of the equator, showing the specific gravity, temperature and currents of the sea surface. R1-8.

Barometer, Wind and Current Charts of the Arabian Sea and the adjacent portion of the North Indian Ocean. R5.

Monthly Weather Review of India, giving a summary of the chief features of the weather in India and containing discussions on atmospheric pressure, barometric depressions, temperature of the air, winds, rainfall, etc. It also contains all available information about snowfall in the mountain districts to the north and north-west of India, and an abstract of observations taken at about 200 observatories in India. Published *monthly*. R1 per month or R12 per annum. Postage 1a. 6p. for each copy outside Calcutta.

India Daily Weather Report and Chart, containing observations recorded at 8 A.M. at 147 observatories, with a Chart showing the distribution of atmospheric pressure and rainfall all over India, and a brief summary of the chief features of the weather of the day. Issued *daily* from the Simla Meteorological Office. Monthly subscription R2, and postage annas 8.

JOHN ELIOT,

Meteorological Reporter to the Govt. of India.

List of Books for sale at the Library of the Asiatic Society of Bengal, No. 57, Park Street, Calcutta, and obtainable from the Society's Agents, Messrs. Luzac & Co., 46, Great Russell Street, London, W. C., and Mr. Otto Harrassowitz, Bookseller, Leipzig, Germany.

Complete copies of those works marked with an asterisk cannot be supplied—some of the Fasciculi being out of stock.*

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

First two Volumes are published in separate sections, as below, but can be bound up in Volumes if required :—

VOLUME I.†

Section	I.	Building Materials.	(1895),	R2-8.
"	II.	Masonry	(1891),	R1-8.
"	III.	Carpentry	(1889),	R1-8.
"	IV.	Earthwork	(1892),	R1-8.
"	V.	Tools and Plant (never published).		

VOLUME II.†

Section	VI.	Buildings.	(1891),	R1-8.
"	VII.	Bridges	(in the Press), say	
"	VIII.	Roads	(1888),	R2-0.
"	IX.	Railways	(1891),	R1-8,
"	X.	Irrigation Works	(1873),	R2-0.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R5.

* The other Fasciculi of these works are out of stock, and complete copies cannot be supplied.
† Date of Edition on sale.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).
„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table. R3-8.

XIII. Drawing (by Lieut. R. Pulford, R.E.*) R8.

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.
Simple Applied Mechanics, Part II (1st edition). 8a.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition) (5th edition in Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 8a.

XVII. Specimens of Printing used in the College. Drawing Course and Entrance Examinations. 8a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve (in the Press.)

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.

Scantlings of Timber for Beams. 8a.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth, to fold up. R1-12.

GEORGE WATT,
Reporter on Economic Products to the Govt. of India.

CALCUTTA,
The 28th November, 1894.

FOR SALE.

Report on the Inspection of Mines in India during 1893-94. By JAMES GRUNDY (1894). Price R1.

To be had on application to the Registrar, Geological Survey of India, Calcutta.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage. R a. p.	With postage. R a. p.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. R a. p.	For mofussil. R a. p.
For the Calcutta Series; per copy	0 8 9	0 10 3
" each of the Madras, Bombay, and Allahabad Series; per copy	0 5 3	0 5 9
" the Calcutta Series. For the year	7 2 6	8 6 3
" each of the Madras, Bombay, and Allahabad Series. For the year	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 9
" three issues	" 55	" 36	" 24
" six "	" 100	" 68	" 45
" nine "	" 145	" 96	" 64
" twelve "	" 180	" 120	" 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. R a. p.	With postage. R a. p.
Bengal Law Reports, for one year	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

FOR SALE BY THE

SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA,

8, HASTINGS STREET, CALCUTTA.

All books published by the Superintendent of Government Printing, India, can be purchased either directly or through the following or any other booksellers :—

Ditto. Urdu version. Royal 8vo., stiff boards. 6a.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III, & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L; and Volume V contains the latter half of L to end of O; Vol. VI (which consists of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

- 1886-87, 6 Plates with Text. R1-8 a set (4a.)
- 1888-89, 18 Plates with Text. R4-8 a set (8a.)

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MAY 2, 1896.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

PROMISSORY NOTES.

Lost, Stolen, Mislaid or Destroyed.

The Government Promissory Note, No. 173080, of the 4 per cent. Loan of 1865, for R500, originally standing in the name of (not ascertainable), and last endorsed to P. R. Cadell, Esq., Administrator, Sachin State, by whom it was never endorsed to any other person, has been lost.

Payment of the above Note and the interest thereon has been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of a duplicate in favour of the proprietor.

C. N. SEDDON,

Administrator, Sachin State, Surat.

Stolen.

The Government Promissory Note, No. 007296, of 3½ per cent. Rupee Loan of 1879, for Rupees one thousand, originally standing in the name of Bank of Bengal, and last endorsed to Sirdar Natha Singh, the proprietor, by whom it was never endorsed to any other person.

Payment of the above Note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicate in favour of the proprietor.

SIRDAR NATHA SINGH,

Nabha, Nabha State,

late Nazim, Bamal District, Nabha State.

Lost.

The Government Promissory Notes, Nos. 356999 and 356990, of the four per cent. Loan of 1865, for R1,500 each, originally standing in the name of the Bank of Bengal and last endorsed to Executive Engineer, Agra Division, Military Works, Agra, the proprietor, by whom they were never endorsed to any other person. Payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest and for the issue of duplicates in favour of the proprietor after two years from the date of last advertisement.

L. H. REID, *Captain,*

Secretary, Cantonment Committee, Agra.

NOTICES

I, Lall Behary Dutt, hereby give notice that I have made over my business of merchant and commission agent, carried on in my own name, to my nephews, Brindabun Chunder Dutt and Kally Churn Dutt, together with the goodwill in and right to use the name of Lall Behary Dutt.

LALL BEHARY DUTT.

Calcutta, 1st May, 1896.

With reference to the above advertisement we give notice that we are carrying on the abovementioned business of merchants and commission agents under the name and style of Lall Behary Dutt.

BRINDABUN CHUNDER DUTT.

KALLY CHURN DUTT.

Calcutta, 1st May, 1896.

Commercial and Land Mortgage Bank, Ld.

Messrs. Daryana Mul Dholan Dass, Bankers, have been appointed Treasurers at the Rawal Pindi and Murree Agencies of the above Bank.

By Order,

C. BERESFORD, *Agent*,

Rawal Pindi and Murree Agencies.

Advertisement under Section 176 of Act 6 of 1882.

At a General Meeting of the Wazirpur Páribárik-Dhon-Sanchay Company, Limited, held on the 21st January, 1896, it was resolved to wind up the said Company voluntarily, and the said resolution has been confirmed in another Meeting held on the 3rd February, 1896.

NABIN CHANDRA DÁS GUPTA,

Secretary.

SUPPLEMENT TO

The Gazette of India.

No. 18.] CALCUTTA, SATURDAY, MAY 2, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

PART I.

Government of India Notifications, Appointments, Promotions, &c.

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENTS.

Simla, the 2nd May, 1896.

No. 351.—A vacancy having occurred in the office of an Ordinary Member of the Council of the Governor General of India by the resignation of Sir Charles Bradley Pritchard, K.C.I.E., C.S.I., Her Majesty the Queen, Empress of India, has been graciously pleased to appoint the Honourable Mr. Arthur Charles Trevor, C.S.I., of the Indian Civil Service, to be an Ordinary Member of the Council of the Governor General of India.

The Honourable Mr. Trevor has, on the afternoon of this day, taken upon himself the execution of his office under the usual salute.

The 7th May, 1896.

No. 362.—The services of the Honourable Mr. Alan Cadell, C.S.I., of the Indian Civil Service, are replaced at the disposal of the Government of the North-Western Provinces and Oudh, with effect from the 2nd instant.

The 8th May, 1896.

No. 365.—Mr. D. M. Smeaton, C.S.I., of the Indian Civil Service, received charge of the office of Chief Commissioner of Burma from Sir F. W. R. Fryer, K.C.S.I., on the afternoon of the 25th ultimo.

MEDICAL.

The 6th May, 1896.

No. 360.—The services of Surgeon-Captain J. J. Bourke, M.B., B.CH., Indian Medical Service (Bengal), are placed temporarily at the disposal of the Chief Commissioner of Assam, with effect from the date on which he may assume charge of his duties under that officer.

SANITARY.

The 8th May, 1896.

No. 117.—The services of Surgeon-Major A. V. Anderson, M.B., Indian Medical Service (Bombay), are placed permanently at the disposal of the Government of Bombay.

PORT BLAIR.

The 7th May, 1896.

No. 367.—The services of Surgeon-Lieutenant E. C. MacLeod, Indian Medical Service (Bengal), are placed temporarily at the disposal of the Chief Commissioner of Assam.

JUDICIAL.

The 7th May, 1896.

No. 652.—The services of the undermentioned officers are placed at the disposal of the Government of the Punjab, for employment as officiating Cantonment Magistrates:

Captain C. W. O'Bryen, 27th (Punjab) Regiment of Bengal Infantry.

Lieutenant C. C. Cook, 2nd Punjab Cavalry.

No. 654.—Mr. L. H. Jenkins, Barrister-at-Law, took his seat as a Judge of the High Court of Judicature at Fort William in Bengal on the forenoon of the 29th April 1896.

The 8th May, 1896.

No. 658.—In exercise of the power conferred by section 138 of the Negotiable Instruments Act, XXVI of 1881, as amended by Act II of 1885, the Governor General in Council is pleased to appoint the persons for the time being holding the undermentioned offices in the Madras Presidency to be Notaries Public, and to exercise their functions as such within the sub-districts to which their jurisdiction as registration officers respectively extends:

The Sub-Registrar of Ferok	Calicut District.
The Sub-Registrar of Kasbah	Calicut District.
The Sub-Registrar of Badagara	Tellicherry District.

J. P. HEWETT,

Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATION.

GEOLOGY AND MINERALS.

Simla, the 4th May, 1896.

No. 1144—43-4.—Mr. T. H. Holland, Deputy Superintendent, Geological Survey of India, is appointed to officiate as a Superintendent, with effect from the 20th March 1895, during the absence of Mr. T. H. D. La Touche on furlough.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Simla, the 4th May, 1896.

No. 748-*G.*—The following promotions are made in the 2nd Regiment, Central India Horse, with effect from the 1st April, 1896:

Ressaidar Jawahir Singh to be Resaldar, *vice* Sahibdad Khan, transferred to the pension establishment.

No. 1505-*I*.—Whereas the Governor-General in Council has full jurisdiction within the lands which are, or may hereafter be, occupied by the Rutlam-Ujjain Railway (including the lands occupied by stations, by out-buildings and for all other purposes), and which lie within the States noted on the margin :

Gwalior.
Sailana.
Rutlam.

In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct that the following addition shall be made to the Notification of the Government of India in the Foreign Department, No. 3573-I., dated the 29th October 1895, namely :

In the schedule, *after* the entries relating to the Rajputana-Malwa Railway, the following entry shall be added :

Rutlam-Ujjain-Railway ... { Gwalior. Sailana. Rutlam.

No. 1509-*I*.—Whereas His Highness the Mir of Khairpur has ceded to the British Government the civil and criminal jurisdiction exercised by him within the lands which lie within his State and which are occupied, or may hereafter be occupied, by the Kotri-Rohri Railway (including the lands occupied by stations, by out-buildings and for other railway purposes), and whereas the Governor-General in Council now possesses full jurisdiction within those lands :

In exercise of such jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to provide as follows for the administration of justice within the aforesaid lands :

(1) All laws in force in the Shikarpur District of the Province of Sind and Presidency of Bombay shall be deemed to be in force in the said lands.

(2) The Governor of Bombay in Council and all officers of Government subordinate to the Government of Bombay exercising executive authority (other than the administration of the police) in the Shikarpur District, shall have within the said lands the same executive powers as they may respectively exercise within the British territory subject to their administration.

(3) All Courts having for the time being jurisdiction within the Shikarpur District shall exercise the like jurisdiction within the said lands.

(4) The administration of the police within the said lands shall be vested in the Assistant Inspector-General of the Railway Police, Punjab, who shall exercise within such lands the same police powers as he may for the time being exercise on the portion of the North-Western Railway which lies in the Shikarpur District, in subordination to the authorities to whom he may be, for the time being, subordinate when exercising those powers on that portion of that railway.

(5) The said lands shall be deemed to be included for the purpose of clauses 2 and 3 of this Notification within such taluka or other sub-division of the Shikarpur District as the Governor of Bombay in Council shall from time to time direct by Notification in the *Bombay Government Gazette*.

ACCOUNTS AND FINANCE.

SAVINGS BANKS.

No. 1968-A.

Simla, the 4th May, 1896.

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read—

Resolution by the Government of India in the Department of Finance and Commerce, No. 2270-A., dated the 18th May 1895, prescribing revised rules for the guidance of depositors in the Post Office Savings Banks.

RESOLUTION.—The Governor-General in Council is pleased to sanction the following alteration in the rules:

For rule 42, clause (*a*), the following shall be substituted:

" (*a*) Government servants, servants of local authorities and of Courts of Wards who are required by their employers to deposit security, and contractors who are required by Government or local authorities to deposit security, may be allowed separate accounts for the security deposits only."

ORDER.—Ordered, that copy of the Resolution be forwarded to the Chief Commissioner, Central Provinces, with reference to his letter No. 1060, dated the 11th March 1896; to the Director General of the Post Office of India; to the Comptroller and Auditor General; and to the Comptroller, Post Office.

Ordered also, that copy of the Resolution be published in the *Gazette of India* for general information.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 2nd, 1896.

On most days of the week under review the changes in pressure have been considerable, but notwithstanding this the general distribution has not as a rule undergone much change. The lowest pressures have on most occasions been situated over the Gangetic Plain and the north of the Central Provinces, while relatively high readings have been reported from Tenasserim, from Assâm, from the west coast of the Peninsula, and from the north of the Punjab. At the close of the week the area of lowest pressure was suddenly transferred north-westward and was shown over the Central Punjab. This change in the position of the low pressure area occasioned a change in the winds over the Gangetic Plain. These winds had been settling into the normal westerly and north-westerly direction, but on the 2nd this direction was suddenly changed and become strongly easterly. The weather has been showery over part of North-Eastern India, but has been fine in other parts of the country. The mean temperature has been, for the whole country, excessive on each day of the week, and, except in Bengal on the 29th of April and the 1st and 2nd of May, no province shows any cases of deficient temperature. Over the east of the Arabian Sea the weather seems to have been locally and slightly disturbed. On Sunday, the 26th, the wind shifted suddenly to south on the Konkan Coast with a slowly falling barometer. On the following day the barometer was recovering again over the Konkan Coast, but the wind had shifted to south-east on the Kathiawar and Sind Coast. These changes appeared to show that some small disturbed area had travelled to north-west off the west coast of India.

Daily Summary.—*Sunday, April 26th.*—**The barometer had fallen briskly over North-Western India, but had changed only slightly elsewhere. Readings were**

low over the central parts of the country and high in Tenasserim and Assam. The wind has shifted suddenly to south on the Konkan Coast, and some easterly winds were reported blowing up the Gangetic Plain; with these exceptions the wind directions were fairly normal. The mean temperature had risen generally and was excessive in all provinces. Showers of rain were reported from a few places in East Bengal and Burma, as well as from Murree, Colombo, and Belgaum.

Monday, April 27th.—Pressure had decreased briskly over North-Eastern India and the Gangetic Plain and changed slightly in other places. Readings were lowest over the region represented by the stations of Cawnpore, Mainpuri, and Delhi and were highest in Tenasserim. Abnormal southerly winds continued on the Konkan Coast, and south-easterly winds were reported from Verawal and Karachi. Elsewhere the directions were about the average, except over the Gangetic Plain, where the direction was southerly. The mean temperature was again excessive in all provinces. Rain had occurred over North Bengal and Assam, and a few local showers were reported from other parts of the country.

Tuesday, April 28th.—Pressure had decreased everywhere, and at the majority of stations the change had been brisk. Readings were lowest over the Gangetic Plain and the north of the Central Provinces and highest in Tenasserim. The wind directions were fairly normal, except over the Gangetic Plain, where the direction had shifted to north-east. The mean temperature, though remaining generally excessive, was in considerable defect in parts of Bengal and of Assam. Showers had been more general, having occurred over the Kumaun Himalayas, North and East Bengal, and at some stations in Burma and the Peninsula. In North and East Bengal the rainfall equalled 1 to 1¾ inch.

Wednesday, April 29th.—The barometer had fallen briskly over the south of the Peninsula and over Sind, the Punjab, and the west of the North-Western Provinces, but had changed slightly elsewhere. Pressure was lowest over the Gangetic Plain and highest over Tenasserim. Westerly winds were appearing over the Gangetic Plain, and the directions generally were fairly normal. The low temperature area over North-Western India had extended and intensified, and in part of East Bengal and of Assam the deficiency exceeded 6°. Thundershowers had occurred fairly generally over part of Bengal, Assam, Burma, and the south-west of the Peninsula.

Thursday, April 30th.—Pressure had increased almost everywhere, the change being brisk to rapid over Northern and Central India. Readings were low over the Gangetic Plain, the east of the Central Provinces and the west of Bengal and were highest in Tenasserim. The winds were southerly in West Bengal and easterly in Bihar, but elsewhere the directions were about normal. The mean temperature was low over Assam, East Bengal, and the Bay, and was excessive in all other places—most so in Eastern Rajputana. Showers were again reported from the extreme north-east, but they were less heavy and less general than on the 29th.

Friday, May 1st.—Pressure had changed only slightly, but on the whole the inclination was upward. Readings remained lowest over the Gangetic Plain and highest over Tenasserim and the Andaman Sea. The winds were more easterly than usual in Bihar and North Bengal, but were fairly normal in direction generally. The mean temperature was below the normal average over Assam and North and East Bengal, but was still excessive elsewhere. Showers had been received over Upper Burma, Assam, East and North Bengal, and the south-west of the Peninsula.

Saturday, May 2nd.—The barometer had risen briskly to rapidly over Bengal and fallen briskly to rapidly over the Punjab. The area of lowest pressure had been transferred suddenly north-westward and was shown over the Punjab. As a consequence of this there had occurred a sudden extension of the easterly winds which had spread up the Gangetic Plain again as far west as Bareilly. Temperature remained low over Assam, East and North Bengal, and Upper Burma, and high in all other places. Showers had again been received over parts of Assam, of Burma, of East and North Bengal, and of the south-west of the Peninsula.

Temperature.—The main feature in the temperature conditions has been the excessive heat, which has prevailed over nearly the whole Indian region throughout the whole week. On the 28th a decided fall of temperature took place over East Bengal and Cachar, and the mean temperature at some stations in that locality fell to considerably below the normal. This area of depressed temperature extended and intensified during the 29th, but on the 30th it contracted again, and, though, during the 1st and 2nd of May, the abnormal depression of temperature was considerable to large, the extent of the area remained small. The area of greatest heat (relatively to the normal) varied its position considerably during the week. On the 26th it lay near Lahore, on the 27th over Berar, on the 28th over the Central Provinces, on the 29th over the Central Provinces, on the 30th over Eastern Rajputana, on May 1st over Sind, and on the 2nd over the Central Punjab.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	April 1896.					May 1896.		Mean variation of week.
	26th	27th	28th	29th	30th	1st	2nd	
	°	°	°	°	°	°	°	°
Burma	+1·0	+0·7	+1·5	+0·3	+0·7	+2·3	+1·0	+1·1
Bengal and Assam	+1·0	+2·4	+1·4	−1·5	+0·9	−0·3	−1·2	+0·4
North-Western Provinces and Oudh	+3·9	+4·6	+3·4	+1·2	+1·8	+3·4	+3·9	+3·2
Punjab	+5·9	+4·6	+1·1	+1·6	+3·5	+5·1	+7·4	+4·2
Bombay	+3·8	+4·6	+2·3	+0·4	+1·5	+2·1	+2·1	+2·4
Central Provinces and Berar	+4·8	+6·0	+5·7	+4·0	+3·5	+2·2	+1·7	+4·0
Central India and Gujarat	+5·2	+6·8	+6·2	+4·3	+2·4	+1·6	+2·0	+4·1
Sind and Rajputana	+5·4	+6·9	+4·7	+2·3	+4·3	+3·4	+5·3	+4·6
Madras	+2·1	+2·5	+3·2	+2·2	+2·5	+3·7	+3·4	+2·8
Mean for whole of India	+3·7	+4·3	+3·3	+1·6	+2·3	+2·6	+2·8	+2·8

The mean temperature of the whole of India was excessive on each day of the week, the greatest abnormal excess being on the 27th. The provincial variations show that the mean temperature was about normal in Bengal and excessive in all other provinces. In the Punjab, the Central Provinces, Central India, Gujarat, Sind, and Rajputana the abnormal excess for the week was more than 4°.

The following were the maximum temperatures throughout India reported on each day:

April	26th	114·4°	at	Chanda.
„	27th	115·3°	„	Ahmedabad.
„	28th	114·5°	„	Amraoti and Deesa.
„	29th	113·2°	„	Jhansi and Nagpur.
„	30th	112·4°	„	Chanda.
May	1st	114·9°	„	„
„	2nd	114·7°	„	Jacobabad.

Rainfall.—The distribution of rain during the present week has been generally similar to that reported last week, but the amount is larger. Almost the whole of the rainfall has occurred over North-Eastern India, though moderate showers have been received over the south-west of the Peninsula, and a few light scattered showers in other parts of the country. The rainfall over Burma occurred generally during the last four days of the week, the first three days being relatively dry. Over Bengal and Assam the fall took place throughout the whole week, while over the Peninsula the fall was generally towards the close of the

week. The rainfall over North-Eastern India was associated with strong southerly winds at the head of the Bay, the average force of the wind for the whole week at Saugor Island having been over 25 miles per hour. In nearly all cases the fall occurred during more or less severe thunderstorms. The concluding table gives the rainfall data. This table shows that rain in greater or less amount fell in twenty-six of the rainfall divisions, as compared with only twenty-one divisions in the preceding week. Of these twenty-six divisions seven had an average actual fall of less than one-tenth of an inch, and hence cannot be said to have received effective rain, while nineteen had an average fall exceeding one-tenth. The divisions which received effective rainfall were—Tenasserim, Upper Burma, Arakan, all the Assam divisions, East, Deltaic, Central, and North Bengal, the hill district of Bengal, Orissa, North Bihar, the North-Western Provinces Hills, Malabar Coast, Coorg, Mysore, the Bombay Deccan, and the central division of Madras. With the exception of these divisions the rainfall was hence practically or actually *nil*. The heaviest average fall reported was 5·16 inches in Assam (Surma), followed by 4·66 inches in the Assam Hills, by 3·69 inches in East Bengal, by 3·54 inches in Assam (Brahmaputra), by 3·40 inches in Tenasserim, and by 2·07 inches in North Bengal. In addition the divisions of Deltaic and Central Bengal, the Bengal Hills, and Coorg all had an average fall of over 1 inch. In the second column of the table are shown the averages of the different divisions for the week under review, and in the third column the differences between the actual and normal averages. In the case of Tenasserim, East Bengal, Assam (Surma, Hills, and Brahmaputra), Central Bengal, North Bengal, and Coorg the normal fall was exceeded by amounts, ranging from 0·14 inch in Central Bengal to 1·61 inches in Tenasserim. In all other parts of the country the actual average fall was less than the normal. The greatest abnormal deficiency was in Lower Burma, Arakan, and the south-east of the Peninsula, where the rainfall of the week was between half an inch and three-fourths of an inch less than that usually received.

The three concluding columns of the table exhibit the state of the seasonal rainfall. For the period March 1st to May 2nd the total rainfall has been excessive only in Rajputana (West) and the hills of Assam. It has been normal, *i.e.*, has varied by less than 20 per cent. from the average, in Tenasserim and Assam (Surma and Brahmaputra) and has been more or less in defect in all other parts of India. In Chota Nagpur, Bihar, the plains of the North-Western Provinces, the Konkan, Berar, the centre and east of the Central Provinces, Gujarat, Kathiawar, Central India, and the central parts of the Peninsula there has been practically no rain throughout the whole season.

The following are the principal totals recorded during the week under review :—Moulmein 6·05 inches, Naaf (Akyab) 4·03 inches, Brahmanbaria (Tippera) 8·01 inches, Cherrapunji (Khasia Hills) 7·83 inches, Palasbari (Kamrup) 10·20 inches, Krishnagar 3·74 inches, Culna (Burdwan) 3·47 inches, Jalpaiguri 5·08 inches, Kishangunj (Purnea) 1·14 inches, Hosdroog (Mangalore) 4·89 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *7th May 1896.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd May.*—Moderate rain on the West Coast, and scattered showers in parts of the Circars, Deccan and Central districts. The April rainfall was considerably deficient in the Nilgiris and Central districts, where rain is now wanted. Preparations for the next crop are proceeding slowly. Harvesting operations still continue in some parts with moderate yield. Pasture is scarce, but fodder is generally available. The condition of cattle is generally good. Prices are rising slightly, especially in the Circars and Southern districts.

Bombay.—*For week ending 6th May.*—Slight rain fell in parts of Sholapur, Satara, Belgaum and Dharwar. Wheat is blighted in one taluka of Karachi and *jowar* (*Sorghum vulgare*) and *mung* (*Phaseolus mungo*) have been damaged by adverse winds in one taluka of Thar and Parkar. The standing crops are otherwise good. Cotton-picking continues in the Karnatak, and harvesting of the late crops generally in parts of eight districts. Preparations for next season are progressing in eighteen districts. Fodder is insufficient in parts of Sind. Agricultural stock in good condition, except in parts of three districts. Prices are normal, except in Hyderabad and Sholapur.

Bengal.—*For week ending 4th May.*—There was general rain in Bengal Proper during the week, the falls being heavy in the eastern districts and some of the northern districts. The rain has improved the agricultural prospects generally, and the cultivation of the rice and jute crops is now going on. More rain is still badly wanted in parts of South-West Bengal and in Bihar, Chota Nagpur and Orissa, which have had practically no rain. Spring rice is being harvested, but it has suffered for want of rain. Prospects of indigo in Midnapore and Murshidabad are said to be poor. In Bihar sugarcane and millets are doing fairly well. The heavy rain has relieved the scarcity of water to some extent, but it is still felt in parts of Midnapore, the 24-Parganas and Khulna. The price of common rice is generally steady.

North-Western Provinces and Oudh.—*For week ending 6th May.*—The weather is getting hotter. Light showers have fallen in two hill districts, but more rain is urgently wanted to assist in the germination of the autumn crop sowings. In a few of the Eastern districts fields are being prepared for the autumn crops. The extra crops are flourishing everywhere and are being irrigated where practicable. Slight injury to tobacco, cane and rice by hot winds is reported from Farukhabad, Bareilly and Basti. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, May 2nd, were—Banda 1,02,698, Hamirpur 40,062, Jhansi 30,892, Jalaun 24,164, Allahabad 4,532, Pilibhit 2,207, Garhwal 1,682—total 2,06,237; of this number 29,979 were dependants gratuitously relieved on the works and 4,625 persons received gratuitous relief under other provisions of the Famine Code. The numbers employed on village works were—Hamirpur 8,347 and Jalaun 4,836. In Banda the figures were not available at date of report. Supplies are sufficient. Fodder is becoming scarce in several places. Water is also deficient in Banda and

Lucknow, and in the latter district *jhils* and tanks are drying up, and cattle have to be watered from wells. Prices, although fairly stationary, show a tendency to rise in many districts.

Punjab.—*For week ending 6th May.*—No rain. The canal crops are being threshed in Hissar. Spring threshing has been completed in Umballa and is almost completed in Ferozepore. Spring harvesting is almost completed in Ferozepore and Mooltan and is in progress in Sialkot, Lahore, Rawalpindi and Dera Ismail Khan. The autumn ploughings in the canal villages of Hissar, and cotton sowings in Shahpur, are progressing. The autumn weeding of sugarcane and cotton in Sialkot and of sugarcane in Gurgaon has commenced. Sowings of millet and the extra spring crops in Lahore, of indigo and cotton in Rohtak, of *jowar* (*Sorghum vulgare*) and cotton in Gurgaon, and of cane and cotton in Gujranwalla, are in progress. The spring crops are being winnowed in Gurgaon. The condition of the standing extra spring crops is good in Amritsar and Dera Ismail Khan. The melon and sugarcane crops are suffering in Umballa and Rawalpindi. The extra spring crops are being watered from wells for want of rain. The condition and prospects of the spring crops are generally reported average in irrigated and below average in unirrigated tracts. Cattle are in poor condition in Hissar, Umballa, Shahpur and Rohtak, and are dying of starvation in Hissar. They are suffering from scarcity of fodder and water in Umballa and of fodder in Rohtak. Fodder is scarce in all districts, except Jullundur, Ferozepore. Sialkot, Mooltan and Dera Ismail Khan. Prices are normal in Ferozepore and Amritsar and are falling in Gujranwalla, but are rising in parts of Gurgaon, and are high elsewhere.

Central Provinces.—*For week ending 6th May.*—The weather continues very hot and is cloudy in places. Preliminary operations for the autumn sowings are in full swing in many districts. Prices are stationary, but are above the normal in Chhattisgarh.

Burma.—*For week ending 2nd May.*—In Upper Burma reaping of dry-weather paddy has been completed in Sagaing and has commenced in Lower Chindwin, Pakokku and Meiktila and is in progress in several other districts. The prospects of the standing crops continue good, but some damage has been caused to the Indian-corn crop in the Kyabin township of the Minbu district. The price of paddy has risen slightly in Thongwa, Pakokku and Minbu; elsewhere prices are stationary.

Assam.—*For week ending 5th May.*—The weather is rainy. Sowing of early rice continues. Prospects are unfavourable in Nowgong owing to incessant rain. Planting of sugarcane and plucking of tea are progressing. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 6th May.*—MYSORE.—Rain fell nearly all over the State. Prospects are good. The standing crops are in good condition, but are withering in parts of Chitaldroog. Prices have risen in Tumkur, Kadur and Shimoga, but have fallen in Chitaldroog and Kolar.

COORG.—Rainfall moderate. Ploughing for *ragi* (*Eleusine coracana*) continues. Coffee has blossomed, and cardamom has sprouted. Fodder and water are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 6th May.*—BERAR.—The weather is very warm. Land is being prepared for the next autumn crop. Scarcity of fodder and water continues. Prices have risen in Wun, but are steady elsewhere.

HYDERABAD.—Rainfall slight. The crop on irrigated areas is being harvested, but is drying up in places for want of water. Fodder is getting scarce. Prices are normal.

Central India.—*For week ending 6th May.*—No rain fell during the week. Agricultural operations are in progress in Malwa and have been started in Bhopal, but have been completed in other Agencies. The probable outturn will be below average in most Agencies owing to want of rain. Cattle are in fairly good condition, except in Bhopal, Bundelkhand and Gwalior. Pasturage is good and sufficient all over, except in some districts of Gwalior. Prices of food-grains are above normal in Baghelkhand, Malwa and Goona and in a few districts of Gwalior, but are normal elsewhere. The opium crop is in fairly good condition in Gwalior, Malwa and Goona. The numbers employed on famine relief works in the Gwalior and Bundelkhand Agencies were 4,000 and 13,286 respectively.

Rajputana.—*For week ending 6th May.*—Agricultural operations are generally satisfactory, except in Merwara where the harvest is poor. The crops are very poor in Jaisalmere. The unirrigated crops have been damaged in Dholepore for want of rain. Agricultural stock are generally in good condition, but are suffering in one pargana of Bhurtpore, in Ulwar and in parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Meywar, Shahpura, Tonk, Jeypore, Ulwar and Jaisalmere. Fodder is becoming scarce in Ajmere-Merwara and is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in nine States, fluctuating in one and falling in another, but are steady elsewhere. In Marwar 3,789 persons are on relief works, and 307 on gratuitous relief; in Shahpura 400 are on relief works, and 25 on gratuitous relief; in Merwara 1,526 are on relief works; in Bikanir 2,349 are on relief works, and 464 are on gratuitous relief; in Jaisalmere 310 are on relief works, and 42 on gratuitous relief.

Kashmir.—*For week ending 5th May.*—KASHMIR VALLEY.—The weather is fine. The autumn sowings are still in progress. Water is ample for irrigation. Prices continue normal.

JAMMU PROVINCE.—*For week ending 6th May.*—No rain. Reaping of the spring crops continues. The autumn sowings have commenced. Cattle are in fair condition. Prices are falling.

Nepal.—*For week ending 2nd May.*—Some light showers have fallen, and the weather is cooler. Sowing of early rice and Indian-corn is progressing.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

NO. 2054 S. R.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

Adulteration of Indian Opium at the Treaty Ports of Chinkiang and Wuhu.

Simla, the 8th May, 1896.

In the discussion, on March 26th last, on the Financial Statement for 1896-97, the Honourable Mr. Playfair made an enquiry about adulteration of opium in China in the following terms :

* * * I would also like to enquire whether the attention of the Government of India has been directed to the remarks appearing in the reports of the British Consuls in China upon the increased adulteration by the Chinese of Indian opium with Tientsin cake, sesamum seed cake, and other compounds, to the prejudice of the reputation of the Indian drug, before it reaches the consumer, and whether the Government will endeavour to induce the officials in China to protect the Indian trade against this pernicious practice. * * *

To this enquiry, by inadvertence, no reply was given : the following correspondence is therefore published for information in the Supplement to the *Gazette of India.*

J. F. FINLAY,

Secretary to the Government of India.

LIST OF PAPERS.

1. Letter from Her Britannic Majesty's Minister in China, dated 11th December 1892, and enclosure.
2. Letter from Her Britannic Majesty's Minister in China, dated 2nd August 1894, and enclosure.
3. Letter from this Department, to the Government of Bombay, No. 5071-Ex., dated 10th October 1894.
4. Letter from the Government of Bombay, No. 518, dated 22nd January 1895, and enclosures.
5. Letter from the Foreign Department, to Her Britannic Majesty's Minister in China, No. 337-E., dated 14th February 1895.
6. Letter from Her Britannic Majesty's Minister in China, dated 5th April 1895.
7. Letter from Her Britannic Majesty's Minister in China, dated 7th June 1895, and enclosures.
8. Letter from the Foreign Department, to Her Britannic Majesty's Minister in China, No. 1515-E., dated 5th August 1895.
9. Additional Article to the Agreement between Great Britain and China signed at Chefoo on the 13th September 1876.
10. Letter from Her Britannic Majesty's Minister in China, dated 10th October 1895, and enclosure.

Dated 11th December 1892.

From—N. R. O'CONOR, Esq., C.B., C.M.G., Her Britannic Majesty's Minister in China,
To—His Excellency the Viceroy and Governor General of India.

I have the honour to transmit herewith to Your Excellency copy of a despatch which I have received from Her Majesty's Consul at Chinkiang on the subject of complaints which have been received by him of the seizure by the Chinese Customs of opium on which duty and likin duty had been paid.

Mr. Carles's No. 6, November 30th, 1892.

Under the system which prevails at Chinkiang and which differs from that in existence at all other Treaty Ports except Wuhu, the merchant is allowed to remove opium which has paid duty and likin to his own godown. It is only

brought to be packed under the supervision of the Customs after it has been sold. During the interval a door is opened to abuses: the opium thus seized has been found to be adulterated, and it is difficult for a British merchant to prove that such opium is the same as that which has already paid the legal duties.

By Article 4 of the Additional Article to the Chefoo Convention of 1885, opium has to be deposited in bond in warehouses or hulks approved by the Customs, and after payment of duty and likin (Taels 30 and Taels 80 per chest) is repacked on the spot, the packages being stamped by the Customs. Each such package is then entitled to receive a transit certificate from the Customs.

I propose informing Mr. Carles that I do not consider it advisable to support the complaint of the merchants if they take upon themselves to make other conditions than those laid down in the Additional Article to the Chefoo Convention, more especially that there appears reason to think that the opium has been adulterated in the godowns.

No. 6, dated 30th November 1892.

From—W. R. Carles, Esq., Her Britannic Majesty's Consul at Chinkiang,
To—Her Britannic Majesty's Minister in China.

I have the honour to report to you that recently complaints have been made to this Consulate of the seizure by the Customs of opium on which likin and duty are alleged to have been paid.

The manner in which opium is treated at Chinkiang is different, I believe, to that at all other Treaty Ports except Wuhu, and demands some explanation on my part.

So far as I can learn, when the new Opium Regulations were introduced in 1887, it was represented to the Customs here and at Wuhu by the merchants (whether native or foreign I am unable to ascertain) that the opium trade would be ruined unless facilities were afforded to merchants of allowing their customers to test the quality of the opium offered to them for sale, previous to its being packed in wrappers sealed by the Customs.

The Customs accordingly consented to allow merchants, on the payment of likin and Tariff duty at the time of importation, to remove the opium to their own godowns, and it is only after its sale to native merchants that the opium is brought to be packed, under the supervision of the Customs in packages for which Transit Pass certificates are issued. These certificates differ from the form prescribed in the 4th Additional Article signed at London on the 18th July 1885, in the addition of a clause, in Chinese only, which requires all likin and other stations to allow the opium to pass without hindrance as the Tariff duty and *likin* on it have been paid in full, and which further gives the name of the Chinese merchant who has applied for the certificate.

The practice has, I understand, worked very well until recently, but of late the Customs has made several seizures of opium, which they are satisfied has been adulterated.

The fact that the opium has been for some time in godowns where its adulteration may have been effected leads the Customs to presume that the adulteration has taken place subsequent to importation, and the lenient practice of the port makes it practically impossible for the British merchant to satisfy the Customs that the opium brought to them for examination is the same as that on which duty and likin have been paid.

Messrs. Duff and Co., who have complained to me and my predecessor of the action of the Customs, assert that the opium is of foreign origin but of a low quality. Experts at Shanghai, to whom samples of the opium seized have been submitted, while differing as to the exact nature of the opium have, with one exception, agreed that it was adulterated, while the dealer who took a more favorable view said that it was Malwa opium, but of such a low grade that it could not be smoked without an admixture of pure opium. The majority agree that there is a large proportion of sesamum seed in the opium, and the Chinese authorities assert that sesamum seed is imported from Hankow for the purpose of being mixed with foreign opium.

Under the circumstances I have not thought it my duty to protest against the action taken by the Customs. The British merchant has the remedy in his own hands of submitting the opium at the time of importation to the Customs for examination; and if he foregoes this opportunity in order to obtain the exceptional advantages granted at this port, he cannot, I hold, complain if he suffers afterwards on account of his opium being so far adulterated or of such low grade as not to be recognized as Indian.

The question is one which may be of interest to the Indian Government, for the importation into the interior of adulterated opium purporting to be Indian will, if it continue, necessarily in time prejudice the native consumers against what they find to be an inferior drug to that to which they have been accustomed as Indian, while the certificate issued by the Customs will confirm them in the belief that the drug is genuine.

On the ground there would appear to be objections to any modifications such as exist here in the provisions of the Additional Articles to the Chefoo Agreement. Owing to the destruction of the Consular archives prior to 1889, I am unable to ascertain whether or how far these modifications have been approved by the Legation, and I shall be glad to receive your instructions regarding them.

I learn privately from the Commissioner of Customs that the Taotai is prepared to revert to the stricter practice laid down in the Additional Articles, if the Wuhu authorities follow the same course, and my own opinion is that it would be desirable to conform entirely to the rules laid down in those Articles, if any abuse of the present Regulations continues to occur.

Dated 2nd August 1894.

From—N. R. O'Conor, Esq., C.B., C.M G., Her Britannic Majesty's Minister in China,
To—His Excellency the Viceroy and Governor-General of India.

I have the honour to inclose herewith, for Your Excellency's information, a copy of a despatch from Her Majesty's Consul at Chinkiang respecting the increasing quantities of adulterated opium sent inland under Customs certificates as foreing opium.

Mr. Carles's No. 17, dated 18th July 1894.

No. 17, dated 18th July 1894.

From—W. R. Carles, Esq., Her Majesty's Consul at Chinkiang,
To—Her Britannic Majesty's Minister in China.

In my despatches No. 6 of the 30th November 1892 and No. 2 of the 20th January 1893, I had the honour to report to you on the local adulteration of Indian opium which was afterwards sent inland for consumption as Indian opium, under transit certificates from the Customs.

At the same time I referred to the prejudicial effect which this abuse, if tolerated, might have on the market for Indian opium.

During the last twelve months the importation of Indian opium to Chinkiang has increased, and its adulteration has to some extent been checked by the action which I reported had been taken by the Customs.

But large quantities of this adulterated opium are still sent into the interior under Customs certificates for Indian opium.

The chief market is in the large tract of country known as Hsia Ho, which lies between the Grand Canal and the sea in the Northern half of this Province.

In that part of the country I learn from the Taotai that it is likely to displace pure Indian opium entirely.

The Commissioner of Customs has been strenuously endeavouring to stop the abuse by confiscation of such parcels of adulterated opium as are detected by the Customs officers. This action, however, creates a considerable outcry, as the native merchants maintain that the adulteration has occurred previous to importation into Chinkiang.

Without a strict observance of the practice prescribed by the Additional Articles to the Chefoo Agreement it is impossible to tell how far their story may be true. But with the opportunities for adulterating opium which the merchants enjoy through the Customs not enforcing the deposit of opium in its own warehouses, and granting transit certificates to opium which has been stored in private godowns, it seems more probable that the adulteration takes place here.

I have informed the Commissioner of Customs that I am quite ready to support him in any way that I can in preventing adulterated opium from being passed off as Indian, and I have spoken to the Taotai of the strong objections which exist to its improperly receiving an official guarantee of genuineness owing to the rule approved by our respective Governments not being enforced.

No. 5071 Ex., dated 10th October 1894.

From—E. N. Baker, Esq., Deputy Secretary to the Government of India, Finance and Commerce Department,
To—The Acting Chief Secretary to the Government of Bombay, Revenue Department.

I am directed to forward a copy of letters from Her Britannic Majesty's Minister in China, dated the 11th December 1892 and 2nd August 1894, with their enclosures, regarding adulteration of opium imported into the Treaty Port of Chinkiang and sent inland for consumption under Customs certificates as Indian opium.

2. It is understood that the opium referred to is Malwa opium, and I am to request that the Government of India may be favoured with an expression of opinion by His Excellency the Governor in Council (after communication with the merchants interested in the opium trade) as to whether the adulteration of opium, before it is sent into the interior of China, interferes with the opium trade, and whether steps should be taken to stop it.

No. 518, dated 22nd January 1895.

From—The HONOURABLE MR. J. NUGENT, Chief Secretary to the Government of Bombay,
To—The Secretary to the Government of India, Finance and Commerce Department.

I am directed to acknowledge the receipt of Mr. Baker's letter No. 5071 Ex, dated 10th October 1894, forwarding copies of the correspondence received from Her Britannic Majesty's Minister in China, on the subject of the adulteration of opium imported into the Treaty Port of Chinkiang and sent inland for consumption under Customs certificates as Indian opium, and requesting that the Government of India may be favoured with an expression of the opinion of this Government (after communication with the merchants interested in the opium trade) as to whether the adulteration of opium, before it is sent into the interior of China, interferes with the opium trade, and whether steps should be taken to stop it.

2. In reply I am directed to forward herewith copy of a memorandum from the Commissioner of Customs, Salt, Opium and Abkari, No. 165, dated 11th January 1895, and of its accompaniments, which contain the opinion of the various merchants consulted on the subject, and to state that His Excellency the Governor in Council concurs in the view expressed by the Commissioner that the proper course to prevent Indian opium losing its reputation amongst the consumers in China, is to remove the facilities afforded for its adulteration at Chinkiang and Wuhu by the system which now obtains at those two ports by substituting for that system the practice in force at the other Treaty Ports.

No. 165, dated 11th January 1895.

Memo. by T. D. MACKENZIE, Esq., Commissioner of Customs, Salt, Opium and Abkari, Bombay.

In returning the papers received with the above the Commissioner of Customs, Salt, Opium and Abkari, has the honour to submit, for the information of Government, copy of his memorandum No. 5253, dated 25th October last, to the Collector of Land Revenue, Customs and Opium, Bombay, and that officer's reply, No. 401 C., dated 9th instant, in original, together with the accompaniments thereto. Mr. Mackenzie sees no reason to alter the view expressed in his memorandum of 25th October to Mr. Campbell.

No. 5253, dated 25th October 1894.

Memo. by T. D. MACKENZIE, Esq., Commissioner of Customs, Salt, Opium and Abkari, Bombay.

Forwarded to the Collector of Land Revenue, Customs and Opium, Bombay, for favour of report after consulting such merchants as are able to give an opinion on the question raised. It appears to the Commissioner *primâ facie* that the proper course to prevent Indian opium getting a bad name in China is to urge that the facilities given for its adulteration at the Chinese ports named in the correspondence should be withdrawn.

No. 401 C., dated 8th January 1895.

From—J. M. CAMPBELL, Esq., C.I.E., Collector of Land Revenue, Customs and Opium, Bombay,
To—The Commissioner of Customs, Salt, Opium and Abkari, Bombay.

I have the honour to return herewith the papers received under your endorsement No. 5253, dated 25th October last, and to enclose the replies of the various merchants in Bombay whom I have consulted on the subject under reference.

2. It will be observed that in their replies the merchants do not suggest that the adulteration of Indian opium at the ports of Chinkiang and Wuhu has so far caused any appreciable injury to the trade in that commodity. They merely confine themselves to the general statement that such adulteration is likely to have an injurious effect on the trade in the future. And this, in my humble opinion, is beyond dispute.

3. It seems that the cause for complaint lies in the system which prevails at Chinkiang and Wuhu inasmuch as merchants of those ports are allowed to remove opium, after payment of duty, to their own godowns where they are at liberty to manipulate it as they please. I would therefore venture to express my concurrence in the remark made by you that the proper course to pursue is to urge that the facilities which exist for the adulteration at the Chinese ports named above should be withdrawn. If, after this has been done, the complaints still continue, it will be necessary to look elsewhere for their cause. At present the conclusion is unavoidable that the adulteration is due to the laxity of the system.

Dated 27th November 1894.

From—E. J. ABRAHAM, Esq., Bombay,

To—The Collector of Land Revenue, Customs and Opium, Bombay.

In reply to your letter of the 19th instant, I beg to state that in my opinion the adulteration of Indian opium before it is sent to the interior of China interferes with the consumption and trade of opium, because the quantity mixed is of inferior quality and of less value than Indian opium.

I think if steps are taken to stop this practice our trade will be benefited.

Dated 17th December 1894.

From—MESSRS. DAVID SASSOON & Co., Bombay,

To—The Collector of Land Revenue, Customs and Opium, Bombay.

We have the honour of acknowledging receipt of your letter of 7th instant (No. 14448-C. of 1894), conveying information of the advantage taken by certain Chinkiang merchants of the privilege accorded to the trade by the Customs authorities at that port to remove opium for testing and sale to adulterate the opium in the interval between such removal and its return for packing under Customs supervision.

In reply to your enquiry, we are decidedly of opinion that such adulteration of Bombay opium is injurious to the trade, and we think steps should be taken to stop the practice.

Dated 22nd November 1894.

From—MESSRS. SASSOON J. DAVID & Co., Bombay,

To—The Collector of Land Revenue, Customs and Opium, Bombay.

We have the honour to acknowledge receipt of your No. 13471-C. of 1894, dated the 19th instant, which was addressed to us as J. David & Co., perhaps by an oversight, instead of Sassoon J. David & Co., and in reply to your enquiry whether the adulteration of opium, before it is sent into the interior of China in the manner explained in your letter, interferes with the opium trade, and whether steps should be taken to stop it, we beg to express our opinion as follows:

There is no doubt that the adulteration complained of is most detrimental to the interests of exporters of Indian opium like ourselves, and for this reason. The practice which prevails in Chinkiang and Wuhu of allowing the merchant to remove the opium which has paid duty and likin to his own godown, and of only bringing it to be packed under the supervision of the Customs after it has been sold, offers ample opportunity and inducement to mix Chinese opium of inferior quality and value with the Indian opium. The Chinese opium by itself, as is well known, is liable to certain duties and imposts from which the Indian drug is free after once paying the Customs and likin dues. By adulterating Indian with this Chinese opium on which full likin duties have not been paid, so much of the latter is in fact smuggled, and there is in consequence so much evasion of leviable duty.

But from the point of view of the exporter of Indian opium, the quality of his drug seriously suffers by the facility thus unwittingly offered of making a mixture which, though it is passed off as Indian opium, is not really so. The mark of superiority which it has up to this time borne would be seriously damaged by the practice recently exposed, and the demand for the real Indian drug would gradually grow less and less on account of its name being thus spoiled.

Now, if strong measures are taken to put a stop to the system in vogue at Chinkiang and Wuhu, the inducement to adulteration would immediately cease. The merchant would not consider it worth while; in fact he will not have the opportunity to mix the Chinese drug which is subject to so many duties and which in consequence would be so much dearer to mix with the Indian drug.

We do not see why Chinkiang and Wuhu should not be placed under the same restrictions to keep the opium in bonded warehouses, or under the immediate control of the Customs until the drug is re-packed and the package bears the Customs stamp, as at the other Treaty Ports. Up to this time we have not heard that any merchants at these ports have had cause to complain against such restrictions.

Under these circumstances we are strongly of opinion that to keep up the reputation of Indian opium as regards its superior quality and prevent its demand from falling off as above explained so as to guard the interests of exporters, it is urgently necessary to take prompt action in the matter.

No. 337 E., dated 14th February 1895.

From—W. J. CUNINGHAM, Esq., C.S.I., Secretary to the Government of India, Foreign Dept.,
To—Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of China, Peking.

I am directed to acknowledge, with thanks, the receipt of Your Excellency's letters, dated the 11th December 1892 and 2nd August 1894, regarding adulteration of opium imported into the Treaty Port of Chinkiang and sent inland for consumption under Customs certificates as Indian opium

2. The Governor General in Council apprehends that the continued importation into the interior of adulterated opium purporting to be Indian is likely to injure the reputation of the Indian drug among the Chinese consumers, and may have a prejudicial effect on the trade in the future. I am, therefore, to suggest that, if Your Excellency sees no objection, the authorities in China should be pressed to take steps towards removing the facilities afforded for the adulteration of the opium at Chinkiang and Wuhu.

Dated 5th April 1895.

From—N. R. O'CONOR, Esq., C.B., C.M.G., Her Britannic Majesty's Minister in China,
To—His Excellency the Viceroy and Governor General of India.

I have the honour to acknowledge the receipt of Your Excellency's Despatch No. 337-E, dated the 14th February, respecting the adulteration of Indian opium at Chinkiang, and in reply beg to state that I have instructed Her Majesty's Consul at that port to take advantage of any opportunity that may offer for urging upon the local authorities the necessity of reverting to a stricter enforcement of the provisions of the additional Article of the Chefoo Convention with a view to the suppression of the existing abuses.

Dated 7th June 1895.

From—Sir N. R. O'CONOR, K.C.B., C.M.G., Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of China,
To—His Excellency the Viceroy and Governor General of India.

With reference to Despatch of the 5th of April last, I have the honour to transmit to Your Excellency herewith copy of a Despatch which I have received from Her Majesty's Consul at Chinkiang respecting the adulteration of opium at that port.

Mr. Carles's No. 15 of May 22nd, 1895.

No. 15, dated 22nd May 1895.

From—W. R. CARLES, Esq., Her Britannic Majesty's Consul at Chinkiang,
To—Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of China.

With reference to your Despatch No. 5 of the 5th ultimo, instructing me to take advantage of any opportunity that may present itself for impressing upon the Taotai and the Customs authorities the stricter enforcement of the provisions of the additional articles to the Chefoo Agreement relative to opium, I have the honour to report that the stricter measures adopted of late by the Customs to guard against the issue to adulterated opium of certificates as Indian opium have not been without a beneficial effect.

The import last year, 4,179 chests, was 810 chests in excess of that of 1893, and exceeded that of any year since 1887. The import for the first four months of the current year is little below that of the same period in 1894.

It is, however, impossible to secure that certificates be not granted to adulterated opium, unless the regulations are strictly enforced which provide that the repacking of foreign opium be under the supervision of the Customs and take place before the opium is removed from the hulks or warehouses approved of by the Customs. The Commissioner of Customs informs me that he cannot enforce these regulations without instructions from the Inspector General of Customs.

It is the practice here, and I believe at some other ports, to allow opium to be taken away after examination of the chests. As the opium is sold, it is brought to the Customs, before conveyance into the interior, in packages of 2 or 4 balls, or in much smaller quantities. Occasionally a package is opened to see whether it is genuine drug, but, as a rule, the package is accepted without question, and the Customs labels are affixed to it, in certification of its foreign origin.

The confiscation of some packages of adulterated opium last year has done much to check the adulteration of opium with sesamum seed. The presence of native opium is more difficult to detect and prove.

So general was the practice of adulteration with sesamum seed that a Chinese official stated it to be his belief that pure Indian opium would find no market in this neighbourhood. The increased demand for Indian opium is a proof that he was mistaken as to the appreciation of pure foreign opium.

It is believed that little adulteration now takes place, except that sometimes the opium is steeped in sesamum seed oil in order to increase its weight.

Last year, of 4,140½ chests of Malwa imported, 3,520 chests were sent inland under transit pass, and labels were issued by the Customs for a quantity representing 503 chests, to be sold retail in Chinkiang and the neighbourhood. There was thus a balance of 117½ chests left for consumption in Chinkiang itself, which, though it appears an inadequate supply for the needs of this large town, is very much larger than in previous years.

I am of opinion that the present practice of the Customs encourages to a small extent the sale of foreign opium, but the effectiveness of the check on adulteration depends almost entirely upon the experience and carefulness of the Customs employé, in charge of the Opium Department.

No. 1515 E., dated 5th August 1895.

From—W. J. Cuningham, Esq., C.S.I., Secretary to the Government of India, Foreign Department,

To—Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of China.

I am directed to acknowledge, with thanks, the receipt of Your Excellency's Despatches, dated the 5th April and 7th June 1895, regarding the adulteration of Indian opium at the Treaty Port of Chinkiang.

2. It is stated in Mr. Carles's report* that the effectiveness of the check maintained on adulteration under the present system at Chinkiang depends almost entirely upon the experience and care of the Customs Officer in charge of the Opium Department, and that it is impossible to prevent the grant of certificates covering adulterated opium as long as the regulations of the Additional Article of the Chefoo Convention are not strictly enforced.

* Enclosure to Despatch dated the 7th June 1895.

3. I am, therefore, directed to enquire whether, in Your Excellency's opinion, there are any objections to the strict enforcement of the provisions of the Additional Article at Chinkiang as well as at Wuhu where a similar system is said to exist; and to observe that, if there are no such objections, the Governor General in Council considers that the practice at these two ports should be brought into conformity with the regulations.

Additional Article to the Agreement between Great Britain and China, signed at Chefoo on the 13th September 1876.

The Governments of Great Britain and of China, considering that the arrangements proposed in Clauses 1 and 2 of Section III of the Agreement between Great Britain and China, signed at Chefoo on the 13th September 1876 (hereinafter referred to as the "Chefoo Agreement"), in relation to the area within which *likin* ought not to be collected on foreign goods at the open ports, and to the definition of the foreign Settlement area, require further consideration; also that the terms of Clause 3 of the same section are not sufficiently explicit to serve as an efficient regulation for the traffic in opium, and recognising the desirability of placing restrictions on the consumption of opium, have agreed to the present Additional Article.

1. As regards the arrangements above referred to and proposed in Clauses 1 and 2 of Section III of the Chefoo Agreement, it is agreed that they shall be reserved for further consideration between the two Governments.

2. In lieu of the arrangement respecting opium proposed in Clause 3 of Section III of the Chefoo Agreement, it is agreed that foreign opium, when imported into China, shall be taken cognizance of by the Imperial Maritime Customs, and shall be deposited in bond, either in warehouses or receiving hulks which have been approved of by the Customs, and that it shall not be removed thence until there shall have been paid to the Customs the tariff duty of 30 taels per chest of 100 catties, and also a sum not exceeding 80 taels per like chest as *likin*.

3. It is agreed that the aforesaid import and *likin* duties having been paid, the owner shall be allowed to have the opium repacked in bond under the supervision of the Customs, and put into packages of such assorted sizes as he may select from such sizes as shall have been agreed upon by the Customs authorities and British Consul at the port of entry.

The Customs shall then, if required, issue gratuitously to the owner a transit certificate for each such package, or one for any number of packages, at the option of the owner.

Such certificate shall free the opium to which it applies from the imposition of any further tax or duty whilst in transport in the interior, provided that the package has not been opened, and that the Customs seals, marks, and numbers on the packages have not been effaced or tampered with.

Such certificates shall have validity only in the hands of Chinese subjects, and shall not entitle foreigners to convey or accompany any opium in which they may be interested into the interior.

4. It is agreed that the Regulations under which the said certificates are to be issued shall be the same for all the ports, and that the form shall be as follows:

" *Opium Transit Certificate.*

"This is to certify that tariff and *likin* duties at the rate of taels per chest of 100 catties have been paid on the opium marked and numbered as under; and that, in conformity with the Additional Article signed at London the of 1885, and appended to the Agreement between Great Britain and China signed at Chefoo the 13th September 1876, and approved by the Imperial Decree printed on the back hereof, the production of this certificate will exempt the opium to which it refers, wherever it may be found, from the imposition of any further tax or duty whatever, provided that the packages are unbroken, and the Customs seals, marks, and numbers have not been effaced or tampered with.

"Mark.	No.	
X	—	10 packages.

"Port of entry,

"Date "Signature of Commissioner of Customs."

5. The Chinese Government undertakes that when the package shall have been opened at the place of consumption, the opium shall not be subjected to any tax or contribution, direct or indirect, other than or in excess of such tax or contribution as is or may hereafter be levied on native opium.

In the event of such tax or contribution being calculated *ad valorem*, the same rate, value for value, shall be assessed on foreign and native opium, and in ascertaining for this purpose the value of foreign opium the amount paid on it for *likin* at the port of entry shall be deducted from its market value.

6. It is agreed that the present Additional Article shall be considered as forming part of the Chefoo Agreement, and that it shall have the same force and validity as if it were inserted therein word for word.

It shall come into operation six months after its signature, provided the ratifications have then been exchanged, or if they have not, then on the date at which such exchange takes place.

7. The arrangement respecting opium contained in the present Additional Article shall remain binding for four years, after the expiration of which period either Government may at any time give 12 months' notice of its desire to terminate it, and such notice being given it shall terminate accordingly.

It is, however, agreed that the Government of Great Britain shall have the right to terminate the same at any time, should the transit certificate be found not to confer on the opium complete exemption from all taxation whatsoever whilst being carried from the port of entry to the place of consumption in the interior.

In the event of the termination of the present Additional Article the arrangement with regard to opium now in force under the Regulations attached to the Treaty of Tientsin shall revive.

8. The High Contracting Parties may, by common consent, adopt any modifications of the provisions of the present Additional Article which experience may show to be desirable.

9. It is understood that the Commission provided for in Clause 7 of Section III of the Chefoo Agreement to inquire into the question of the prevention of smuggling into China from Hong-Kong shall be appointed as soon as possible.

10. The Chefoo Agreement, together with, and as modified by, the present Additional Article, shall be ratified, and the ratifications shall be exchanged at London as soon as possible.

In witness whereof the undersigned, duly authorised thereto by their respective Governments, have signed the present Additional Article, and have affixed thereto their seals.

Done at London in quadruplicate (two in Chinese and two in English), this day of 1885, being the day of the moon, in the year of the reign of Kwang-Su.

Dated 10th October 1895.

From—Sir N. R. O'CONOR, K.C.B., C.M.G., Her Britannic Majesty's Minister, Peking,

To—His Excellency the Viceroy and Governor General of India.

Chinkiang, No. 37, dated 27th September 1895.

With reference to Your Excellency's Despatch, dated the 5th of August last, regarding the adulteration of Indian opium at the treaty port of Chinkiang, I have the honour to enclose herewith copy of a further despatch upon this subject, which I have received from Her Majesty's Consul at the said port.

No. 37, dated 27th September 1895.

From—W. R. CARLES, Esq., Her Majesty's Consul at Chinkiang,

To—Her Britannic Majesty's Minister, Peking.

With reference to your despatch No. 17 of the 5th instant, I have the honour to report that I learn that the Commissioner of Customs, Mr. W. Say, some time since reported to Peking in favour of a strict adherence to the provisions of the Additional Article to the Chefoo Agreement, in the interest of the Chinese revenue.

It appears that even after opium has been boiled and is therefore almost incapable of identification, it is brought to the Custom House to be certified to be Indian opium and is labelled as such by that office.

The system obtaining at Chinkiang was sanctioned, I understand, by the Inspector-General of Customs on the local native dealers representing that their trade would be ruined by a strict enforcement of the additional article, but I know of no reason to apprehend that such action would produce more than perhaps a diversion of some of the trade to another port.

WM. ROSS,

Publisher, Gazette of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 7th May 1896.

NOTIFICATIONS.

No. 1219 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 2nd May 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 144 of 1896.—Alfred Ernest Markwick, engineer, Karachi, in the province of Sind, in the empire of India, for improvements in push water cocks.

No. 145 of 1896.—Alister MacNab, merchant, of 23, Great Winchester Street, in the city of London, for an improvement in the treatment of bay salt.

No. 146 of 1896.—Wasudeo Balwant Soman, head clerk, Indo-China Mills, residing at No. 20, Parel Road, Cross Lane, Bombay, for an improved sizing machine.

No. 1220 P.—A SPECIFICATION of the undermentioned invention has been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying:—

No. 264 of 1895.—Samuel Maurice Johnson, managing director, Muir Mills Company, Limited, Cawnpore, for an improved fastener for the purdahs, kanaths and other parts of tents, to be known as the "Johnson tent link." (Filed 27th March 1896)

No. 1221 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 175 of 1889.—Samuel Telford Dutton, civil engineer of Marl Bank, in the city of Worcester, England, for improvements in locking and unlocking points and signals, and detecting the position and movement of points on railways, which improvements are also applicable to the locking and unlocking of turntables, gates and other structures and things appertaining to railways. (From 27th January 1897 to 26th January 1898.)

No. 267 of 1890.—Charles Arthur Turton, manager, Lukwah Tea Company, Upper Assam, for improvements in the methods, machinery and appliances used for withering or desiccating tea leaf. (From 12th May 1896 to 11th May 1897.)

No. 314 of 1890.—Alexander Stanley Elmore, electro-metallurgist of Spring Grove, Hunslet, Leeds, in the county of York, England, for improvements in the process and apparatus for manufacturing copper tubes, sheets, strips and wires by electrolysis. (From 20th May 1896 to 19th May 1897.)

No. 135 of 1891.—Edward Lennon Cantwell, civil engineer, of the town of Calcutta, for an improved and economical method or system for pulling punkahs and for appliances connected therewith. (From 25th March 1896 to 24th March 1897.)

No. 155 of 1891.—The Vacuum Brake Company, Limited, a share company legally constituted and registered and having their principal place of business at 32, Queen Victoria Street, in the city of London, for improvements in or applicable to automatic vacuum-brake apparatus, having reference more especially to the ejector and brake-controlling mechanism. (From 1st October 1896 to 30th September 1897.)

No. 165 of 1891.—Alfred William MacIlwaine, managing director of the Hull Oil Manufacturing Company, Limited, of Stoneferry, Hull, in the county of York, England, for improved means for cleaning or removing extraneous matter from rape or other seeds. (From 5th October 1896 to 4th October 1897.)

No. 107 of 1892.—Jabez Turton, metallurgist, of No. 9, Norfolk Street, Strand, in the county of London, for a process for the extraction of metals from ores and minerals containing them. (From 23rd June 1896 to 22nd June 1897.)

No. 129 of 1892.—The Vacuum Brake Company, Limited, a share company legally constituted and registered and having their principal place of business at 32, Queen Victoria Street, in the city of London, for improvements in or applicable to automatic vacuum-brake apparatus. (From 1st August 1896 to 31st July 1897.)

No. 179 of 1892.—The Vacuum Brake Company, Limited, a share company legally constituted and registered and having their principal place of business at 32, Queen Victoria Street, in the city of London, for improved means applicable for use in railway trains fitted with pneumatic brakes for enabling passengers to signal the drivers and guards. (From 26th October 1896 to 25th October 1897.)

No. 1222 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the Fourth Schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorizing others so to do has ceased:—

No. 35 of 1891.—Mr. S. G. B. Cook's invention for improved machinery for making nails or brads, and for nailing or bradding together the parts of wooden boxes or other articles with such nails or brads. (Specification filed 1st February 1892.)

No. 212 of 1891.—Mr. W. Murray's invention for an improved stopper for bottles containing aërated or gaseous liquids. (Specification filed 1st February 1892.)

No. 217 of 1891.—Mr. H. Harper's invention for improvements in electro-magnets and in their application to arc-lamps. (Specification filed 26th January 1892.)

No. 218 of 1891.—Mr H. Harper's invention for improvements in electric arc-lamps. (Specification filed 26th January 1892.)

No. 229 of 1891.—Mr. E. Taylor's invention for an improved refrigerating machine for ice-making and cooling purposes. (Specification filed 1st February 1892.)

No. 285 of 1891.—Mr. J. Suydam's invention for automatic pipe couplings for railway cars. (Specification filed 30th January 1892.)

No. 291 of 1891.—Mr. S. B. Wortmann's invention for mechanical movements. (Specification filed 26th January 1892.)

No. 293 of 1891.—Mr. G. Young's invention for improvements in mechanism or apparatus for dyeing and bleaching cotton, wool, silk and other fibrous materials in the raw and manufactured or partly manufactured state. (Specification filed 26th January 1892.)

No. 294 of 1891.—Mr. A B. Ibbotson's invention for improvements relating to couplings for railway carriages and other vehicles and to apparatus connected therewith. (Specification filed 26th January 1892.)

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

Madras, Colombo, Straits Settlements, China, and Japan.	13th ,,	Per A. Lloyd's Str. *Daphne.*

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer.

full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up at 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS.

Presidency Postmaster, Calcutta.

POSTAL NOTICE.

Commencing from Friday, the 22nd May, 1896, and until further notice, the Foreign Mail Steamer will leave Bombay every Friday, the Mails closing in Calcutta every Tuesday. The last Wednesday Mail closes at the General Post Office on the 13th May current. The first Tuesday Mail will close on the 19th May, 1896.

JOHN OWENS,

Presidency Postmaster.

CALCUTTA GENERAL POST OFFICE,
The 8th May, 1896

N. E. FOWELL, *Major, R.A.*,

Comdg. 22nd Field Battery, Royal Artillery.

CIVIL ENGINEERING COLLEGE, SIBPUR.

SESSION 1896-97.

Candidates for admission to the Engineer Department should apply to the Principal before the 15th May, 1896. The session begins on Monday, the 1st June, 1896. Candidates must furnish proof that they have passed one of the following tests:—

(1) The F. A. Examination of the Calcutta University or a similar standard of any Indian University recognised by the Calcutta University. The candidate's age must be under 21 years.

(2) The B. A. Examination in the B. course. The candidate's age must be under 23 years. (These students are admitted direct into the 2nd year class.)

The number to be admitted each year is limited to 40. The position in the University Examinations and the age of candidates will be taken into consideration when selection is made, and such selection will be made by the Principal.

Ten scholarships will be awarded to students entering the Engineer Department, not being already holders of junior or senior scholarships. Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eyesight.

Further particulars will be supplied on application to the Principal.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR,
The 22nd April, 1896.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—per four-ounce tin, *R2-8*; per eight-ounce tin, *R5*; per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the undernoted rates: per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فيوج يعني تپ بهگانے والے سنکونا *

سنکونا فبري فيوج کلکته کے بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے هرايک ملازم سرکاري اور ايک مشت چهه پونڈ تک لينے والا هر آدمي حسب نرخ ذيل خريد کرسکتا هی— يعني چار اونس والا ٹين بقيمت دو روپيه آٹهه آنه ؛ آٹهه اونس والا ٹين بقيمت پانچ روپيه ؛ ايک پونڈ والا ٹين بقيمت دس روپيه *

عام آدميوں کو يهه دوا بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے بقيمت نقد حسب نرخ ذيل مل سکتي هی - يعني چار اونس والا ٹين بقيمت تين روپيه ؛ آٹهه اونس والا ٹين بقيمت چهه روپيه ؛ ايک پونڈ والا ٹين بقيمت باره روپيه *

يهه دوا کلکته کے بڑے بڑے ولايتي اور ديسي دواخانوں ميں بهي بکتي هی - ماسوائے قيمت مذکورهٔ بالا کے محصول ڈاک چار اونس والے ٹين کا چار آنه ؛ آٹهه اونس والے ٹين کا آٹهه آنه ؛ اور ايک پونڈ والے ٹين کا باره آنه *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.
½ " R 9, " R9-8.
¼ " R4-8, " R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৸০
½ আধ " " ৯৲ " ৯৷০
¼ শিকি " " ৪৷০ " ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারান্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

PROMISSORY NOTES.

Stolen.

The Government Promissory Note, No. 007296, of 3½ per cent. Rupee Loan of 1879, for Rupees one thousand, originally standing in the name of Bank of Bengal, and last endorsed to Sirdar Natha Singh, the proprietor, by whom it was never endorsed to any other person.

Payment of the above Note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicate in favour of the proprietor.

SIRDAR NATHA SINGH,
Nabha, Nabha State,
late Nazim, Bamal District, Nabha State.

Lost.

The Government Promissory Notes, Nos. 356999 and 356990, of the four per cent. Loan of 1865, for R1,500 each, originally standing in the name of the Bank of Bengal, and last endorsed to Executive Engineer, Agra Division, Military Works, Agra, the proprietor, by whom they were never endorsed to any other person. Payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest and for the issue of duplicates in favour of the proprietor after two years from the date of last advertisement.

L. H. REID, *Captain,*
Secretary, Cantonment Committee, Agra.

Lost.

The upper half of the Government Promissory Note, No. 133848, of the 4 per cent. Loan of 1842-43, for Rupees Five hundred (R500) originally standing in the name of Babu Chunder Madhub Ghose and last endorsed by Carapiet Matthews, of No. 5, Grants Lane in Calcutta, the proprietor, to M. V. Apcar, of No. 45, Free School Street, Calcutta, by whom it was never endorsed to any other person, having been lost in transit from Cuttack in Orissa between the 7th and 15th of August, 1894, notice is hereby given that payment of the abovementioned note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of a duplicate in favour of the said Carapiet Matthews, the proprietor. The public are cautioned from the purchasing or otherwise dealing with the said upper half of the said note.

C. MATTHEWS,
5, Grants Lane, Calcutta.

Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 15th May, 1896.

No. 11.—Whereas the non-official Members of the Council of the Lieutenant-Governor of the North-Western Provinces and Oudh have, in accordance with the Regulations published in the Notification of the Government of India in the Legislative Department, No. 19, dated 23rd June, 1893, recommended the Honourable Pandit Bishambar Nath, Vakil of the High Court of Judicature, North-Western Provinces, for nomination as an Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations, His Excellency the Governor General, under the authority vested in him by section 10 of the Indian Councils Act, 1861 (24 and 25 Vict., c. 67), and section 1 of the Indian Councils Act, 1892 (55 and 56 Vict., c. 14), has been pleased to nominate the said Honourable Pandit Bishambar Nath, to be an Additional Member of the said Council of the Governor General.

S. HARVEY JAMES,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

MEDICAL.

Simla, the 14th May, 1896.

No. 374.—The services of Surgeon-Captain E. Hudson, F.R.C.S., Indian Medical Service (Bengal), are placed temporarily at the disposal of the Government of the North-Western Provinces and Oudh, with effect from the date on which he may assume charge of his duties under that Government.

The 15th May, 1896.

No. 377.—The services of Surgeon-Captain J. Garvie, Indian Medical Service (Bengal), are placed temporarily at the disposal of the Government of the North-Western Provinces and Oudh, with effect from the date on which he may assume charge of his duties under that Government.

No. 379.—The services of Surgeon-Captain J. S. S. Lumsden, M.B., C.M., Indian Medical Service (Bengal), are placed temporarily at the disposal of the Government of the North-Western Provinces and Oudh, with effect from the date on which he may assume charge of his duties under that Government.

SANITARY.

No. 129.

The 15th May, 1896.

DRAFT REGULATIONS UNDER THE PILGRIM SHIPS ACT, XIV OF 1895.

The following proposed notifications under section 5, sub-section (1), and section 19, sub-section (1), and the following draft of certain rules which it is proposed to make under section 58, of the Pilgrim Ships Act (XIV of 1895), is published, as required by the said Act, for the information of all persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Governor General in Council on or after the 15th July 1896.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date aforesaid will be considered by the Governor General in Council.

Proposed Notification No. I.

In exercise of the power conferred by section 19, sub-section (1), of the Pilgrim Ships Act (XIV of 1895), the Governor General in Council is pleased to order that every pilgrim ship shall contain, in the first or upper between-deck, at least twelve superficial feet and seventy-two cubic feet, and, in the second or lower between-deck, at least sixteen superficial feet and ninety-six cubic feet, of space available for each pilgrim.

Proposed Notification No. II.

In exercise of the power conferred by section 5, sub-section (1), of the Pilgrim Ships Act (XIV of 1895), the Governor General in Council is pleased to direct that, in the computation of pilgrims for the purposes of the said Act and the rules thereunder, two persons of the age of one year and upwards and under the age of twelve years shall, unless otherwise expressly provided, count as one pilgrim.

Proposed Notification No. III.

In exercise of the powers conferred by section 58 of the Pilgrim Ships Act (XIV of 1895), the Governor General in Council is pleased to make the following rules:

1. In these rules "the Inspector" means the officer appointed by the Local Government under section 8, or the person authorised by such officer as aforesaid under section 9, of the Pilgrim Ships Act (XIV of 1895), hereinafter referred to as "the Act," and "Section" means a section of the said Act.

2. The Inspector shall, on receiving the notice required by section 8, himself proceed, or give written authority to some competent person on his behalf, to inspect the ship, her provisions, medical stores, equipments, ventilation, fittings, etc., and shall satisfy himself by such inspection that they meet all prescribed requirements.

3. The certificates A and B required under sections 11 and 12 shall be given in Forms Nos. I and II appended to these rules and that required under section 24 in Form III.

4. No certificate under section 12 shall be granted between May 20th and September 20th in any year in respect of a ship of a tonnage of less than 500 registered tons, or which is not capable of steaming at least eight knots an hour in ordinary monsoon weather; nor shall such a certificate be given unless all the arrangements required by these rules have been made to the entire satisfaction of the Inspector.

5. The Inspector shall see that in all cases where the number of pilgrims exceeds 100, the Medical Officer of the ship is present at the official inspection and that such Medical Officer has had an opportunity of satisfying himself as to the completeness of the arrangements made for the accommodation and care of the pilgrims under these rules; and shall require such Medical Officer to furnish a certificate to that effect in Form X and to sign the second of the certificates prescribed by rule 57.

Boats, anchors and cables.

6. (1) Every pilgrim ship shall be provided with boats, two of which shall be life-boats, according to the following scale:

Registered tonnage of steam-ship.	Number of boats not less than	Minimum cubic contents of life-boats Feet.	Minimum cubic contents of all the boats of the ship.
Less than 800 tons ...	5	330	1,730
800 tons and less than 1,000 tons.	6	330	2,045
1,000 tons and less than 1,250 tons.	6	900	2,545
1,250 tons and less than 1,500 tons.	6	900	3,000
1,500 tons and upwards ...	7	918	3,600

NOTE.—The cubic contents of the boats in the above table are ascertained by multiplying their outside length, their outside width and their inside depth together, and then the product by 0·6.

(2) Every boat shall be supplied with two fresh water breakers, two small tin-lined lockers fitted under the side seats in the stern and each capable of holding about 50 lbs. of biscuit, and a tightly spread canvas cover.

(3) Every boat shall be provided, to the satisfaction of the Inspector, with masts, sails, painters, oars, rowlocks or tholes, rudder and tiller, boat hooks, plugs and breakers, all properly secured.

(4) A hatchet or tomahawk shall be kept in each end of every life-boat in good order and secured by a lanyard; a life-jacket or belt for each oarsman, and one for the cockswain, shall also be provided: and a life line in loops shall run round the outside of the boat and be securely made fast.

7. Boat drill shall be practised at least once a week.

8. Every pilgrim ship shall be provided with three bower anchors of such weight, and with cables of such length, size and material as are, in the judgment of the Inspector, sufficient.

Instruments for purposes of navigation.

9. Every pilgrim ship shall be provided with—

(a) not less than three good ship's compasses and two boat's compasses and with a record of the deviation of her compasses on every point, entered in the log-book;

(*b*) Admiralty or Indian Government charts and sailing directions suitable for the voyage she is about to undertake;

(*c*) Not less than two chronometers and not less than two sextants or quadrants and barometers, one of the latter being a mercurial barometer;

(*d*) A deep sea lead-lined and lead.

Apparatus for extinguishing fires and precautions against fire.

10. (1) Every pilgrim ship shall be provided with—

(*a*) hose capable of being connected with the engines of the ship, and adapted for extinguishing fire in any part thereof; and

(*b*) fire-buckets in the proportion of three for every 100 tons of tonnage up to 600, and two for every 100 tons above 600: Provided that not more than 50 fire-buckets need under any circumstances be carried.

(2) If fire-annihilators or fire-engines are carried, they shall be placed by the Master in charge of one of the principal officers of the ship and the ship's carpenter, who shall be held responsible that they, with the buckets and other fire apparatus, are kept in a state fit for immediate use.*

11. As soon as possible after leaving port, the officers and crew shall be divided into parties and assigned to stations in case of fire; and fire-drill shall be practised at convenient times and at least once a week.

12. Immediately before leaving port, the passengers shall be called on to deliver up whatever lucifer matches, gunpowder or other inflammable articles they may have with them.

13. No naked lights shall on any account be used in the hold or store-rooms or in the between-decks, except under trustworthy superintendence. No person shall be allowed to read in bed with a naked light. Smoking between-decks is strictly prohibited.

14. Cases containing spirits shall never be opened in the hold, but may be hoisted on deck for the purpose.

Appliances for saving life and making signals of distress.

15. Every pilgrim ship shall be provided, to the satisfaction of the Inspector, with a supply of life-buoys, with lines attached, of which not less than six shall be kept readily available on deck, and with inextinguishable lights fitted for attachment to the life-buoys. Every pilgrim ship shall also be supplied with an approved lifebelt or other similar approved article of equal buoyancy suitable for being worn on the person, for each person on board, and such life-belts or other articles as aforesaid shall be so placed, to the satisfaction of the Inspector, as to be readily accessible.

EXPLANATION.—An "approved lifebelt" means a belt which does not require to be inflated before use, and which is capable of floating in water for 24 hours with at least 15 lbs. of iron suspended from it.†

* Fire-engines should be worked once a week to keep them in proper order.

† Lifebelts should be cut out 2 inches under the armpits, and so fitted as to remain securely in place when put on.

16. Life-buoys shall be secured by toggle and becket or any similar method allowing of ready release, but shall not be lashed or seized to the vessel.

17. Every pilgrim ship shall carry such quantity of rockets and blue lights or other signals as the Inspector may deem adequate.

Fittings and other appliances to be provided in the upper and between-decks.

18. The Inspector shall see that sufficient ventilators are provided for the between-decks to give each pilgrim 10 square inches of ventilation area exclusive of hatches and side scuttles, and so placed as to afford an equable diffusion of air through all parts. The ventilators of the second between-deck must act separately from those of the first between-deck, and, if pilgrims are carried on a second or lower between-deck, such lower between-deck shall be ventilated by artificial ventilation, such as Blackman's ventilator or a thermantidote approved of by the Inspector. The Inspector shall also see (i) that all air-holes affording a means of communication between the hold and the between-decks, are closed so as to shut off, as completely as possible, the escape of foul air from the bilge, or steam from the cargo, into the between-decks; (ii) that the foul air from the hold and the between-decks respectively is carried in separate shafts above the uppermost deck; and (iii) that all ventilating shafts and tubes for the hold are so arranged as to act quite independently of those for the between-decks.

19. In the absence of hollow iron masts or other means of ventilating the hold, there shall be fitted at least four cowl-headed tubes (of a size to be approved by the Inspector) leading from the lower hold to the open air on the upper deck.

20. Every cowl-headed tube shall be provided with a strong plug for use, if necessary, in bad weather.

21. Such provision shall be made for affording light to the between-decks as the circumstances of the case may in the judgment of the Inspector require. The pilgrims shall, moreover, have the free and unimpeded use of the whole of every hatchway situated over the space appropriated to their use, and over each hatchway there shall be erected such a booby-hatch or other substantial covering as shall, in the opinion of such Inspector, afford the greatest amount of light and air and of protection from sun and wet as the case will admit of.

22. The upper deck of every pilgrim ship shall be either of wood, or of iron or steel sheathed with wood and caulked.

23. Each hatchway shall be provided with a large tarpaulin tent which can in bad weather be spread well over it and securely fastened so as to keep out rain and let in fresh air, and in fine weather be rolled up and put out of the way; and shall, except where arrangements exist for lowering the derrick boom in a way which will serve the purpose, also be fitted with a strong iron or wooden A-shaped frame for the support of such tent.

24. Every pilgrim ship shall have poop, quarter deck, waist and forecastle awnings complete and in good order, and six windsails distributed as the Inspector may direct. The

awning and windsails shall be kept up so long as the weather does not render this impossible.

25. Strong ladders 2½ feet wide with hand rails of a convenient height shall be provided for every hatchway used as such and not merely as a ventilator; and, as additional means for women and children to hold on by, knotted hand-ropes shall be fastened conveniently near the ladders.

26. Hooks for hanging the required number of lanterns shall be fixed at convenient distances apart.

27. The space to be occupied by pilgrims must be kept clear from obstruction of any kind whatever, thoroughly clean and dry; and nothing, except lifebelts with the consent of the Inspector given under rule 15, shall be slung up or stowed away between the beams. Every day while the pilgrims are on deck the between-decks shall be carefully cleaned and scrubbed with dry sand mixed with suitable disinfectants.*

28. Bamboos, ropes or strong rails shall be securely fastened fore and aft to the midship stanchions on the between-deck.

29. Only the necessary fittings properly secured and timber, cargo and live-stock for consumption on the voyage shall be allowed on the upper deck, which shall, save as aforesaid, be exclusively reserved for the pilgrims.†

30. A set of water-vessels, such as buckets and tin mugs, required by topases or others for use in the latrines, shall be exclusively set apart for such purposes; and they shall be marked or painted so as to be clearly distinguishable from those used for cooking or drinking purposes.

Food, fuel and water-supply.

31. Every pilgrim ship shall be supplied in accordance with the following scale with food, fuel and water, of good quality, conveniently stored and in quantity sufficient to supply the pilgrims on board during the intended voyage (including such detention in quarantine as may be probable):

For each pilgrim daily—

Rice . . .	1 lb.	Tamarind . .	1 oz.
Flour or ships' biscuit . . .	4 oz.	Condiments, chillies, garlic, coriander seed or turmeric . .	½ „
Pulse, dall . .	4 „	Salt . . .	¼ „
Ghee or oil . .	1 „	Firewood, dry .	2 lbs.
Onions . . .	2 „	Drinking water from iron tanks .	1 gal.
Pumkins, yams, or other vegetables .	2 „		

Provided that, in the case of drinking water, the allowance hereby prescribed shall be provided for each pilgrim irrespective of his age.

A table of the rations of food and water in Persian, Urdu and Gujarati shall be posted up in a public place on the ship to be approved of by the Inspector.

32. Excepting fuel and water, which shall always be found by the ship, the articles in the above scale need not be provided for those pilgrims who have satisfied the officer appointed in this behalf under section 18 that they have on board sufficient food for their own use.

33. Every pilgrim ship shall, in addition to the requirements of the two last foregoing rules, have on board, either as cargo or stores, food sufficient, in the opinion of the Inspector, to provide for the pilgrims in the event of an accident to the ship's machinery.

34. (1) Every pilgrim ship shall be provided with caboose accommodation sufficient to cook for the total number of pilgrims on board, and such accommodation shall in no case consist of less than two cabooses or cooking ranges placed on deck, properly housed and covered, to which the pilgrims shall have free access between the hours of 6 A.M. and to 9 P.M.

(2) All cooking ranges shall be made of substantial plate-iron lined inside with bricks and raised at least four inches from the deck, with an outlet or chimney at top for the escape of smoke. Each range shall contain five or six cooking places, and the Master shall see that fires adequate for cooking are kept lighted at them from 6 A.M. to 9 P.M. An additional range shall be provided for every 200 pilgrims carried in excess of 100. Cooking on board in pilgrims' private stoves is prohibited.

(3) The Inspector may require the Master to provide such number as such Inspector may think necessary of Muhammadan cooks, not exceeding three per hundred pilgrims (exclusive of pilgrims who have on board their own supplies and desire to cook for themselves).

35. The crew of the ship shall not be allowed to use the cooking ranges or latrines set apart for pilgrims while pilgrims are on board, but shall be provided with a separate cooking range and latrine.

36. Each ship shall be fitted with a condenser or distilling apparatus of sufficient capacity to produce at least one gallon of drinking water a day for every person on board of whatever age, including the crew.

37. No certificate under section 12 shall be granted unless the condenser can not only supply the minimum quantity of water prescribed under rule 36 for each person on board, but also yield every 24 hours 500 gallons of pure cold water fit to drink.

38. The tanks for storing drinking water on board shall not be placed near the latrines. They shall be protected from all filth, and shall be so closed that the distribution of the water can be effected only by means of pumps or from taps with lock and key fitted to the tanks.

39. The water of any tank pronounced bad by the Medical Officer of the ship shall be immediately rejected and pumped out and the tank cleaned out before being refilled.

40. If there is any doubt as to the quality of the drinking water stored, or as to the possibility of its pollution, either at its source or in the course of the voyage, it shall be well boiled; and it shall be thrown into the sea as soon as it is possible to obtain a purer supply. All water taken on board at any port and intended to be issued as drinking water shall invariably be boiled before it is distributed.

* Calvert's powder in the proportion of 10 per cent. should be used.

† Pilgrims should be encouraged to use the upper deck as much as possible.

41. Every condenser or distilling apparatus shall have a separate engine for working the circulating cold-water pump, and under no circumstances shall this engine be used for any other purpose than that of feeding the boiler of the condenser.

42. The arrangements for discharging the circulating water from the condenser shall be such that it can be delivered into buckets or connected with a hose for the purpose of washing decks, or extinguishing fire, as well as discharging over the ship's side. A suitable hose and connection shall also be provided.

43. Either upright or horizontal boilers may be used for condensers. Each boiler shall be furnished with a steam-gauge indexed to double the working pressure, a glass water-gauge and two separate gauge-cocks, one safety valve and two mud-hole doors for the purpose of cleaning.

44. The boilers and all machinery connected with condensers shall be properly covered in, and every wooden bulkhead in the vicinity of the boilers of condensers shall be covered with sheet lead weighing 4½ lbs. per square foot and securely fastened to such bulkhead.

45. All the piping in connection with the condenser, especially the main suction and the condensed water discharge-pipe, shall be laid in position safe from accident or otherwise securely encased.

46. The Inspector shall satisfy himself by actual experiment that the condenser is capable of performing the work required of it.

47. The Chief Engineer or some other competent person, to be approved by the Inspector, shall be appointed to have charge of the distilling apparatus and machinery connected therewith during the voyage.

48. No ship shall put to sea before the decks have been cleared of any loose straw, hay or other inflammable material, and all the cargo has been properly stowed away.

Cargo.

49. No petroleum as defined in the Petroleum Act (XII of 1886), or explosive as described in the Explosives Act (IV of 1884), nor any inflammable oils, spirits, jute or coal (except such coal as is required for the voyage and the return voyage to India), nor any commodity likely, by reason of its quantity, quality or mode of stowage, to be prejudicial to the safety of the pilgrims, shall be taken as cargo or part of the cargo.

Allotment of upper deck space.

50. No cabin shall be provided for any pilgrim on the upper deck unless space remains unallotted on that deck after providing the accommodation required for the permanent and temporary hospitals, latrines, and six superficial feet for every pilgrim carried in the between-decks. Such space as remains unallotted after making provision for these requirements may be reserved for the accommodation of pilgrims in cabins containing not less than 12 superficial and 72 cubic feet of space. No pilgrim shall be furnished with reserved accommodation on the upper deck except in a cabin.

51. The deck space may be distributed between the 1st and 2nd class pilgrims as the Master or owner may desire: provided that each pilgrim of the lowest class has six feet of deck space provided for him.

Amount and distribution of baggage.

52. Pilgrims' heavy baggage shall be registered and numbered under the supervision of the Master the day before the ship sails, and shall be deposited in the hold before the ship leaves her moorings. Pilgrims shall be allowed to keep with them only such articles as are absolutely necessary: Provided that they do not exceed one maund (82 lbs.) in weight for each adult pilgrim or, in the case of those who, in accordance with the provisions of section 18, are allowed to provide their own food for the entire voyage, one maund and-a-half.

Hospital accommodation, medical stores, and arrangements for maintaining health, cleanliness and decency.

53. *(1)* The hospital accommodation required under section 21 shall be provided on the upper deck either in the poop or in a deck-house. A permanent hospital shall be provided containing not less than six bunks, and having a deck area of at least 144 superficial feet and dimensions of not less than 864 cubic feet. On every pilgrim ship on which there are 50 or more female pilgrims, there shall be a separate permanent hospital, containing not less than two bunks with a deck area of at least 72 superficial feet and dimensions of not less than 288 cubic feet, which shall be reserved for the use of women and children under 12 years of age. The hospitals shall be lighted and ventilated to the satisfaction of the Inspector and shall be provided with permanent raised floors or platforms at least four inches off the deck. They shall be made as secure as any other deck-house, and the roof shall be well caulked and covered with painted canvas.* No case of small-pox, cholera, yellow fever or plague shall on any account be treated in a permanent hospital.
